DEMOCRATIC MEETING.

In accordance to the call of the Democratic County Chairman of DeKalb Co. The Democrats of Wilmington Township assembled at the town hall. The meeting was called to order by J J. Oberlin who was made Chairman, John H W Krontz Secretary. At which time the following business was transacted to-wit:

Township Chairman, T. H. Tomlinson.
Precinct Chairmen,
No. 1, William S. Troyer.
No. 2, T. H. Tomlinson.
No. 3, John Mack.
No. 4, John H. W. Krontz
No. 5, Charles Madden.
No. 6, George Dannells.

Delegates to district convention at Ft. Wayne, January 2, 1902, to select a district Chairman for the 12th Congressional district are, Jeff N. Boyle, Milo D. Husselman.

The meeting was well attended and a great amount of enthusiasm was manifested which goes to show that the true democracy of Wilminhton township is still alive and ready for the battle of 1902.

Holp Led A Dual Life,

The divorce suit now pending in the Steuben circuit court against the Rev. P. E. Holp reveals a story which excels that of the odinary dual life, says the Chicago Inter Ocean. Mrs Holp has secured evidence which will substantiate the report circulated when he left Angola that the frisky "Col," as he was popularly known on the lecture platform, in addition to being a minister of the gospel, lecturer, newspaper reviewer, etc., was a blackmailer, agent for a speculative oil company and the confidant and associate of a gay adventuress named Jack-on in Chicago. As heretofore noted, the disappearance of Holp from Angola set the town agog, and many stories were set afloat, most of which were proven to be well-founded. Mrs. Holp had investigated his private drawer while he was away from home and the evidence there obtained was so conclusive that there is no doubt of her securing a divorce Letters written to him by the Jackson woman in an endearing and somewhat questionable terms, as other letters and pictures of a licentious character, were found and will be produced in court if necessary. Holp gained a wide reputation as a minister and lecturer, but when his true character became known he was deposed from the ministry after he had deserted his wife and children at Angola never to return. Mrs. Holp with her daughter and son are temporarily residing with relatives in Iowa.

The Poultry Market

Fransworth and McMorgan will until further notice buy poultry two days of each week Tuesday and Wednesday. Please govern yourself accordingly.

The Eastern Star lodge met specially Tuesday evening for the purpose of arranging for installation and initiating candidates. The Misses Olive Letter, Nora Brown and Lottie Master received the degrees after which the lodge had a good social time. The Eastern Star lodge is prospering nicely and its membership is rapidly increasing.

Mr. and Mrs. Arthur Letter are visiting relatives and friends in Butler. Mr. Letter has a most excellent position and has forged to the front. He is a sterling young man, whose many years spent in Butler makes him virtually a local citizen and his many friends have watched his progress with pleasure.

The Inspired Idiot

A Brave Dash For Far the North Pole in Order.

"According to the papers Lieut. Pearey's artic expedition must spend the winter way up there some place before they can make their dash for the pole some time next summer," said the Clerk. "I should think explorers would get sick and tired of spending half of their life on an ice floe, freezing themselves to death."

"It is perfectly apparent, Mr. Clerk, that you are woefullly ignorant of the charms attached to the business of chasing down the north pole," replied the Inspired Idiot. "If a man could get in his automobile and ride up the boulevards to the north pole there would be no artic explorers. If the time ever comes when the conductor of the through Pullman train yells 'all aboard for the north pole' that will settle the whole business. There isn't an explorer in the whole world who would think of going up there with any of the comforts of home.

The habit of hunting for the north pole is gradually undermining a portion of the human race. In comparsion the cigarette habit and smoking hop are as tame as that of a man parting his hair in the middle. There are sanitariums where they shoot stuff into you to overcome the paper cigar and the card of dope. There is nothing that will cure the polar habit except to go up to the 83rd latitude and freeze to death, be chewed up by a walurus or get the gout from eating gum overshoes. The average polar explorer is not supremely happy until he gets clogged in an ice floe, where he waits patiently two or three years for a relief expedition to find him. All this while the civilized world has given him up for lost and the papers print columns of speculation as to his whereabouts. This paves the way nicely for the explorer's new book and his season of lectures. When the relief party brings him back home it takes a year of the best hospital care to melt his feet and get the icicles out of his hair. Just when the public begin to think that he is cured of the habit he jumps out of bed and announces that he has got to go to the north pole that afternoon.

"I must go to the north pole," he says, "to see if my fishing tackle and canned beans are still intact at the point where I left them. This was 200 miles southeast by east-three-quarter-east from Fitznoodle land. It was there that we dined off the archæologist, who was a faithful friend, though rather tough eating. I tried to save his life, but the crew and second mate said they were eating tarpaulin and the keel of the aluminum lifeboat. Fortunately I saved his notes and specimens, which I will include in my forthcoming book.

The brave explorer and his fearless crew leave the dock in their stanch little craft amid the huzzas of the crowd and music by the band. The little craft Solar Plexus carries provisions for seventeen years. In the cabin are books on biology, zoology, boozology, a cottage organ and a deck of cards. The crew has been picked from the best tropical sailors and is therefore well fitted to be rescued in the ice floes of the north. In due time the Solar Plexus is in the land of ice and snow and one member of the crew dies from eating canned peas.

"Men," says the explorer, "the north pole is over there. As there are no sled runners on the bottom of the ship, I will have to leave it here while we go and camp on that iceberg two miles abaft the beam and spend the winter. It is more comfortable to stay here by the kitchen stove, but we did not come up here for comfort. We will abandon the ship and trust to the relief party which is a few miles behind to find us."

"Leaving the ship to its fate the brave lads camp on the iceberg. As they sit there slowly freezing to death they see the Solar Plexus drift away out of sight.

Men, it is now springtime and we must make our dash to the north pole. As the leader says this one of the crew slips through a crack in the ice and is seen no more. This delays the trip another week, for the men have to hunt up kindling wood to build a monument. Than with 40,000 pounds of provisions strapped to their backs and carring a lifeboat on their sholders, the explorers make another effort to elude the relief party. After crawling over the ice for sixty-eight days, all but two of the party give up. With their pockets stuffed with ham sandwiches, these two bid adue to their comrads to push on two miles farther up the ice gorge to suffer and to die by themselves. Here the two brave fellows find an old house to rent sign telling that three years before another party of arctic explorers had camped here and died. as this is the farthest north an explorer ever went, the two men push on fifty feet farther and make preparations to freeze to death.

"Just as the two men had eaten the last Eskimo dog a Dundee or Norwegin whaler drops anchor and sends a boat out to rescue them. Then the whaler proceeds to pick up what is left of the main party.

"This upsets all of my arrangements, says the chief explorer. We have thirty dogs left out of 200 and we can't think of leaving this place until they are all devoured. And after that we have got our bed quilts yet to chew up and there isn't a man in the party who has tasted of his boots. If we went back home without being able to tell of these thing I could not get another party to come up here with me next summer. Only two men have died from starvation, when our contract calls for six. I am sorry to say that only one of us has gone stone blind. I must have at least four if my lecture is going to be a success. Think of it, dear sir, of my writing a book containing not a single instance of any of our crowd going crazy!

"But, said the captain of the whaler, you are in no condition to find the north pole.'

"But we didn't come up here to find the north pole, says the explorer. We came up here to depopulate ourselves. Give us time and we will accomplish our mission The last party that was up here lost all but two men and a half. If I should leave now I should recover before we reach home and be able to walk from the ship to the dock. Through the long nights of intence suffering our only hope was that we were lost to everybody except the relief party. Your attempt to secure us has crushed that last hope.'

"Yes, that seems to be the way these polar exploration trips end said the Clerk. "But what strikes me as rather singular is how these Dundee and Norwegian whalers get up around there so far."

"They are on their way back from the north pole, where they have been catching bull whales."

A N w Firm in Butler.

Geo. Stout of Swanton will open a candy kitchen in the room occupied by Winston Bros., the railroad contractors, in a few days. Mr. Stout is a candy manufacturer of the old school and understands his art in every detail. He will also carry a full line of domestic and tropical fruits, nuts, etc., and will conduct a high class retail room in every particular. We welcome him to Butler and trust he will find a prosperous business.

Hot Rolls,

hot muffins, hot cakes, made with Royal Baking Powder may be freely eaten without fear of indigestion.

Welcome to the Vandalia.

The first train to arrive in Butler over the new Vandalia line left Logahsport at one minute after midnight on Jan. 1, and arrived in Butler at 3:10 a. m. and our little city is now on the Vandalia railroad in every way with a complete and satisfactory train service. The company intends to move the depot in the near future, just south of the Lake Shore in order to give better facilities: this makes Butler the best shipping point in all northern Indiana and factories desiring an excellent location would do well to see what we have to offer.

The Vandalia, Wabash and Lake Shore, three of the best railroads in the United States are now in operation from this city and no better shipping facilities can be had anywhere.

The time card of the Vandalia in effect Jan. 1st is as follows:

Arrive—No. 108, at 12:18 a. m, No, 114 at 2:20 p. m; No. 110 at 11:10 a. m; local freight Fo. 164 at 5:10 p. m through freight No. 166 at 4:45 a. m.

Depart—No. 121 at 6:40 a. m; No. 103 at 10:50 a. m; No. 109 at 5:30 p. m. local freight No. 163 at 6:00 a. m through freight No, 167 at 9:30 p. m.

The new agent is Geo. Foster of South Bend and the yard master is A. F. McFann, who lived in Butler and worked for the Wabash many years ago. His office will be in the room formerly occupied by the trainmaster. Mr. McFann tells us that the number of men who will necessary reside in Butler will be about 25 and that the pay car will distribute about $1500 a month at this station. A switching engine and crew have arrived and business is going on the same as before. The Vandalia have a day and night operator, baggage man etc in addition to the agent. Mr. Kurtz the present day operator is transferred to Wabash, Ind., and Mr. Lennen goes to Peru to await futher orders.

Mr. Smith the general Wabash agent is now at home in the new depot, and will discharge all the duties of the road for the next 30 days. After which the new line will be completed and a day and night operator will then be installed. Pending the completion of the new line the Wabash will run trains out of Butler as follows:

Depart—7:30 a. m.; 2:25 p. m. and 5:20 p. m

Arrive—6:35 a. m; 10:45 a. m and 5:15 p. m.

The B. and O. crossing matter was settled Monday afternoon by Judge Baker of the federal court, and the Wabash completed the crossing at 9:30 a. m Tuesday. The track layers have for the third time returned to Butler and work is being pushed rapidly. Through trains will be running before Feb. 1st. and the line will soon be a popular one with the public. Butler will be a excellent transfer point and the outlook for our little city is very prosperous.

A Lake Shore division wil be the next move. Keep your eye on Butler

A New Factory To Open.

Ed Geigax of Archibald, Ohio, has purchased the old M. E. Church property of Henry Wilson and will move his ladder factory to this city within the next few days. He comes to Butler on account of our excellent shipping facilities and has 1600 ladders on hand at this time, which he will also move. Mr. Geigax comes to Butler through the solicitation of James Wilcox, who is one of the greatest hustlers in town. We wish Mr. G. abundant success in his new field and we believe he could have made no better selection in the State of Indiana. He will no doubt co a large and successful business and the HERALD welcomes him to our enterprising little city.

A St. Louis man and his wife provided a Christmas tree for his dog this year. For strange freakes in human form St. Louis has the banner.

Chas. Scoville In Chicago.

The Chicago Tribune of Sunday publishes the portrait of Chas. Reign Scoville, together with the following article:

Having accepted the call sent to him three months ago, the Rev. Charles Reign Scoville, for nine years an evangelist will preach his first sermon this morn- as resident pastor of the Union Christian Church. The stage of the auditorium in in the People's Institute, Van Buren and Leavitt streets, will be his pulpit.

The church organization of which Evangelist Scoville becomes the ministerial guide was built up by the Rev. J. J Smith, and during the last year of his pastorate the man who how succeeds him created such a favorable impression with one sermon that the members thought of him when they had a vacancy to fill.

Dr. Roland A. Nichols was their pastor during the last summer. The Rev. Mr. Scoville comes to Chicago from Gainsville, Tex He resigned the pastorate of the Union Christian there to accept the charge here.

The large number of renewals coming in at this time is a source of much satisfaction to the editor, and the many expressions of good will expressed by our constituency are gratifying indeed. Of course money talks, but again the satisfaction of knowing that ones efforts are appreciated does much to renew ambition, and encourage an editor to strive harder to merit approbation and incidentally gather in the coin of the realm. The year 1901 has been a very prosperous one and, under the present management, the paper has done the largest business in its history. The outlook for 1902 is very flattering indeed and we enter the new year with a determination to make the paper three fold better than ever before. We had hoped to be able to come out with some radical improvements in the initial issue of 1902 but find that we are unable to do so, as it take time to get new material around and installed in working condition. The DeKalb County Herald has many friends in all political parties, in every walk of life throughout the county; people admire it as a newspaper that is not afraid to tell the truth, and uphold right, because it is right.

The Herald editor dances to nobody's music, nothing tied to it. It is a clean family newspaper and as such is appreciated in a substantial manner by the public of this vicinity. Hoping for a continuance of the many favors shown us in the past we will conclude by wishing every reader a Happy New Year.

Oberlin—Farley.

Clyde B. Oberlin has joined the army of benedicts and upon the 1st inst. was married to Miss Lulu Farley, daughter of Mr. and Mrs. Wash Farley. Mr. Oberlin had fitted up a neat home on the South side for himself and bride prior to the event, and not-with-standing the efforts of the couple to keep the affair quiet, it was readily understood by many. Announcements are now out, however and the happy couple are at home to their friends. Mr. Oberlin is a model young man, highly regarded by all and his bride is a charming young lady who stands high in the social set of our little city and whose friends are legion. The Herald begs to extend its sincere congratulations and to wish them a long, happy life. May their most sanguine expectations be realized in every particular is our best wish.

"Perhaps You'll Need Me During 1902."

Dr. W. H Sargent, Dentist, announces to his friends and acquaintances, that he is permanently located in Butler and will be found over the Knisely Dry Goods Store, where he is prepared to perform all the operations of modern dentistry with skill and precision. Hours from 9 to 4.

It Takes a Remedy of Uncommon Merit to Draw the Unqualified Praise of a Successful Practicing Physician.

Dr. J. W. Bates of Corfu, N. Y., states: "A most remarkable case has come under my hands of late and has fully convinced me of the wonderful power of Dr. A. W. Chase's Nerve Pills over diseases of the nerves.

"A young lady who was treated for over two years for epilepsy by two doctors was given up to die. I found that her sickness was not epilepsy, but nervous troubles, due to menstrual derangements, and prescribed four of Dr. Chase's Nerve Pills a day, after meals and at bed-time. Since that time she has not had a single bad spell. Her health has rapidly improved, she has gained about 15 pounds in weight, and I do not hesitate to state that Dr. A. W. Chase's Nerve Pills have saved her life and restored her to health."

Mrs. Fawcett of Marietta St., St. Clairsville, O., says: "I have used Dr. A. W. Chase's Nerve Pills and can recommend them to others as a good sound reliable nerve and general tonic. When I got the box of the Pills I was complaining of nervousness, weakness and pain through the shoulders—rheumatic in type—digestion not over good as usual. The effect of the medicine has been very satisfactory indeed. So marked has been the change towards health and comfort I can conscientiously say they are fine and what they are represented to be. At my advanced age I feel I am getting all the benefit possible."

Mrs. M. J. Hubbard of Railroad Avenue, Sistersville, W. Va., says: "I like Dr. A. W. Chase's Nerve Pills. I was nervous, excitable, unable to sleep. I had not taken the medicine long when my nerves were steady and strong—my physical strength and energy back and my sleep sound and natural."

See that the portrait and signature of Dr. A. W. Chase are on every box. Price 50 cents a box.—Six boxes for $2.50. Manufactured by the Dr. A. W. Chase Medicine Co., Buffalo, N. Y.

Sold in Butler at Stone's Drug Store.

B. And O. Officials.

Attorneys of the Wabash road have asked that proceedings be taken to bring leading officials of the B. & O. railroad into the United States Court at Indianapolis to explain why the order of Judge Baker in the crossing difficulty at St. Joe was not obeyed. As our readers remember, some time ago Judge Baker issued an injunction requiring the B. & O. company to permit the Wabash to cross its tracks and giving the defendant company five days in which to remove the obstructions. This was not done, but instead a big force of B. & O. men were sent to the proposed crossing to interfere with the work of the Wabash track-layers. A special from Indianapolis, December 27, says:—"Attorney W. V. Stewart, of Lafayette, a law partner of E. P. Hammond, came to the the city yesterday prepared to file proper documents in the United States court. Messrs. Stuart and Hammond are assisted by A. C. Harris and Frank Cutter, of this city. At 7:30 o'clock last night Mr. Stuart filed in the United States court a petition setting out the above facts and asking that the head officers of the Baltimore & Ohio Railroad company be required to come into court and show why they should not be cited for contemrt. Mr. Stuart will proceed to Goshen this morning and lay the matter before Judge Baker."

REMARKABLE CURE OF CROUP.

I have a few words to say regarding Chamberlain's Cough Remedy. It saved my little boy's life and I feel that I cannot praise it enough. I bought a bottle of it from A. E. Steere of Goodwin, S. T., and when I got home with it the poor baby could hardly breathe. I gave the medicine as directed every ten minutes until he "threw up" and then I thought sure he was going to chock to death. We had to pull the phlegm out of his mouth in great long strings. I am positive that if I had not got that bottle of cough medicine, my boy would not be on earth today.—Joel Demont, Inwood, Iowa. THE POST OFFICE DEPARTMENT.

Publishers were informed of a ruling about to be made by the postoffice department at Washington which will be of great importance to almost every newspaper in the country. It denies the right of a publisher to extend credit to any subscriber for his paper, under penalty of withdrawal of mailing privleges

The large local publishing concerns like Crowell & Kirkpatrick Co. and the Floral Publishing company will not be seriously affected by this ruling, as their subscription business is done on a cash basis. It does not interfere to any great extent with daily newspapers, the circulation of which is almost exclusive by carriers. The publishers of religious and agricultural journals and of country weeklies will find the ruling a most serious thing, however, as in the very nature of things they must extend credit to their subscribers.

The action of the department is the culmination of a long line of similar ruling which have been made within the last six months. As is well known newspapers and periodicals are given the benefit of what is knovn as the second class rate—one cent per pound. It costs probably four or five cents a pound to carry this kind of mail matter, and the department handles it at a loss, therefore it would appear at first glance.

Leading publishers have prepared exhaustive statistics, however, showing that every pound of second class matter creates enough profit bearing business business for the department, in the sale of stamps, money orders, registered letters, etc., to more than balance the apparent loss to which reference has been made. The claim is made that the other branches of the postal service would fail to maintain their present prosperity were it not for the advertising value of the newspapers and magazines which have the cheaper postage rate.

The claims thus made by publishers are strongly substantiated by the figures of the department itself, which shows that the annual deficit which represents the excess of its outlay over income has been decreased from year to year in almost exactly the same proportion as the amount of second class mail matter has increased. The third assistant postmaster general does not admit the truth of these contentions, however, and has made a determined effort to restrict the number of second class publications and to limit their circulations.

Heretofore the rulings of Mr. Madden the third assistant postmaster general, have been directed at the papers which have built up enormous circulations on a very low subscription price. In addition he has refused second class rights to what is known as "library publications" paper covered editions of popular books His latest ruling will bear on 90 per-cent of the newspaper of the country, other then daily publications, the exception being the standard magazines which do not handle credit subscriptions.

Among the publications excluded by Mr. Madden have been many trades union and socialistic papers. The matter was taken up by the recent convention of the American Federation of Labor at Scranton, Pa., and vigorous denunciatory resolutions adopted. As there is no appeal from the decision of the third postmaster general, in relation to second class matter, except through the courts, political influence is being brought to bear to secure the removal of the present incumbent from the office.

Washington correspondence of the Cincinnati dailies would indicate that the fight on Mr. Madden has become an exceedinly warm one. There is a divergency of opinion as to its result, some believing that the general will be able to retain his position and others thinking his official days are numbered. It is said that Mr. Madden admits that he has assumed the function of making and interpreting laws, regardless of the fact that he is connected with neither the legislative nor the judiciary branches of the government, but expresses the belief that his course will be sustained in the end. If the indignation expressed by local publishers yesterday upon receipt of his most recent ruling is a fair indications of the conditions which obtain throughout the country, Madden's pathway in the next few weeks will not be one altogether peaceful and pleasant.—Springfield Sun.

They are not slow in the estimation of their merits nor overly modest in their demands.

A GENTLE HINT.

In our style of climate, with its sudden changes of temperature,—rain, wind and sunshine often intermingled in a single day,—it is no wonder that our children, friends and relatives are so frequently taken from us by neglected colds, half the deaths resulting directly from this cause. A bottle of Boschee's German Syrup kept about your home for immediate use will prevent serious sickness, a large dodtor's bill, and perhaps death, by the use of three or four coses. For curing Consumption, Hemorrhages, Pneumonia, Severe Coughs, Croup, or any disease of the Throat or Lungs, its success is simply wonderful, as your druggist will tell you. 101. **He Who Would Thrive Must Either Hold or Drive.**

That would do in the olden times but now he must both hold and drive. Men everywhere are driving and climbing for dear life (or gold). It is this being everlastingly at it that shortens men's lives. Every nerve is put on the stretch and sooner or later the system begins to give out. The stomach is of the greatest possible importance in sustaining life and vigor, and is liable to be the first to give out. The work performed by the bowels is no less important. The overstrain caused by rush and worry of life soon results in indigestion, dyspepsia, constipation, liver and kidney troubles Headache, nervousness, and every conceivable trouble soon follows unless the right thing is done. The old philosophers searched for the elixir of life but failed to find it. We have found it.

Congressman Emerson and Congressman Connell as well as Ex-Treasurer of United States, Wyman, Senator Brackett, Judge Houghton, Mayor Knapp, Attorney-General Smyth, not only speak in the highest terms of our Company but of our great remedy, Dr. Kay's Renovator, and thousands of the most eminent people who know by experience, endorse Dr. Kay's Renovator, as the greatest known remedy.

If you are beginning to give out or if you are down where other remedies have failed to help you, don't wait but go at once to your druggist and get Dr. Kay's Renovator. It strikes to the very root of the whole trouble, beginning with the stomach, bowels, liver and kidneys and renovates and invigorates the whole system, giving new life, health and vigor to the whole body. It is not only very efficient but perfectly safe for all ages and conditions. Ask for our pamphlet giving reports of the most marvelous cures known to the medical profession, or send to us for a copy. Free advice, sample and book for the asking. Prices 25c, 50c and $1. Dr. H. Kindly Take Notice that Ely's Liquid Cream Balm is of great benefit to those sufferers from nasal catarrah who cannot inhale freely through the nose, but must treat themselves by spraying. Liquid Cream Balm differs in form, but not medicinally from the Cream Balm that has stood for years at the head of remedies for catarrah. It may be used in any nasal atomizer. The price, including a spraying tube, is 75cts. Sold by druggists and mailed by Ely Brothers, 56 Warren Street, New York.

The following from the Indianapolis News may be applied to any town: When a boy breaks through the reserve which nature has given him and begins to befoul his mouth with bad language he enters on a course that leads to destruction. Association with other boys at night, without supervision, helps on this evil way. Let's all get together in this community and stop the profanity. To do this we need the enforcement of the curfew law and the three great p's—"pulpit, press and police," but of that still greater p, parents, and of the school teachers as well. There are some hopeless, hardened sinners, addicted to the use of bad language, whom we may not be able to reach, but even they will willingly join the crusade to prevent the youth from falling victims to the unnecessary and bad habit profanity.

Hair Falls

"I tried Ayer's Hair Vigor to stop my hair from falling. One-half a bottle cured me."
J. C. Baxter, Braidwood, Ill.

Ayer's Hair Vigor is certainly the most economical preparation of its kind on the market. A little of it goes a long way. It doesn't take much of it to stop falling of the hair, make the hair grow, and restore color to gray hair. $1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Secure and give the name of your nearest express office. Address, J. C. Ayer Co., Lowell, Mass.

Barnum's Monkeys

"All well—all happy—all fun"... That is the report from the monkeys at Barnum's Circus ever keepers began dosing them days with Scott's Emulsion. Consumption was cured off two thirds of the monkeys every year and the circus had to buy new ones.

One day a keeper accidentally broke a bottle of Scott's Emulsion near the monkeys and the monkeys carried it up from the floor. It suggested the idea that it do them good. Since the monkeys have received dollar doses and the keeper reports very few deaths from consumption. Of course it paper to buy Scott's Emulsion rather than new monkeys, but it suits the circus. Consumption is in the blood and it must be cured before health can come. A 50 cent bottle of Scott's Emulsion will do the work.

The Microscope in the Kitchen.

A celebrated authority on domestic economy has recently stated that a first-class microscope should be a part of the equipment of every well organized kitchen. He would have the cook, before she puts a piece of beefsteak on to broil, examine it in order to see that no "taint or tissue change" exists. He urges that the daily supply of milk be microscopically examined in order to make certain that it is not contaminated by "pathogenic micro-organisms." The average housewife who hears these sage suggestions brought forward, remarks the Chicago Tribune, will be likely to give up the fight with incompetent and ignorant servants. She will feel that before the use of the microscope is made compulsory the women who profess to be cooks should learn something of the proper use of the gas stove. She will picture to herself the average cook with her eyes glued to the eyeglass of a microscope while the steak burns to a crisp and the coffee boils over. She will admit that at some distant date the microscope may possibly play a proper part in the economy of the average household, but she will insist that the proper use of the frying pan, the oven and the gridiron be taught before too much stress is laid on the prompt discovery of microbes and animalculae.

Gen. Maximo Gomez, the Cuban patriot, is a very serious minded man and is rarely known to smile, but an incident occurred in New York on the Fourth of July which made the grizzled veteran unbend a little. The general had just left his hotel and was on his way to dine at the home of a friend. As he approached Sixth avenue, a group of boys who were celebrating Independence day in the approved old-fashioned way, decided "to scare the old man," as one of them irreverently expressed it. Placing a giant firecracker just behind the aged Cuban, they touched it off and watched to see Gomez jump. The explosion made almost as much noise as the firing of a seven-inch gun, but "it never touched" the general. With an amused smile he waved his hand toward the urchins and continued quietly on his way.

Experimental chemistry has been having a lively time all over the country, but the reports that come to us inspire the idea that, after all, this may be the silly season for science, as well as for the summer resorts. Grafting snakes is a pretty device, but curing lockjaw with infusions of rabbits' brains savors of some of the prescriptions of the physicians of the middle ages. Our friends, the three witches, might well have added rabbits' brains to their famous decoction, says the Boston Herald, and no doubt some bookworm will unearth this lockjaw remedy from black letter tomes, where it has hidden since the earliest days of magic and witchcraft. There is nothing new under the sun, unless it is wireless telegraphy.

Another curious use of the thermometer is as a toy, or odd ornament. There are made nowadays tiny thermometers, with tubes an inch and less in length. There are tiny thermometers whose mercury tube is coiled and attached to a round backing, the whole thing being no bigger than a campaign button. These odd little thermometers have a pin on the back, by which they can be worn pinned to the lapel of a coat. They are bought mainly by young folks, but older people buy them, too.

The government is only looking into a new phase of alleged fraud in regard to the collection of customs when it is trying to ascertain whether there has not been fraud in connection with the importation of Japanese silks. TUB TRUTHS.

A DROP of ink will color a whole glass of water. It is an inch of yeast which makes a pan of bread rise, and a single cake of soap containing unabsorbed alkali can ruin a hundred times its cost in laces and fine embroidery. After all, is it wise to take such risks with common soap? Of course you can get along without Ivory Soap. So can a wagon without axle grease—but it goes hard.

BUTLER HERALD

Butler, Ind., Friday, Jan. 3. 1902

Entered at Butler as Second Class Matter—But First Class Literature.

C. H. DOWNEY, PUBLISHER.

TO OUR SUBSCRIBERS.

The recent decision of the post-office department that a publisher must not send his paper to delinquents is being universally cussed and discussed by publishers generally. Newspaperdom, an editor's publicatron of New York says:

"The Department holds it to be not within a publisher's privilege to mail at the pound rate of postage, as to subscribers, copies of his publication to persons whose subscriptions have expired; and the inclusion within the number presented for mailing as to legitimate subscribers, of copies addressed to persons who are not legitimate subscribers, will deprive the publisher *of the pound rate* upon the whole, unless the illegitimate portion be separated therefrom.

It will be seen that this means nothing else than that a newspaper publisher may no longer give credit to his subscribers. It's to be paid in advance or nothing. It may be thought that an easy way out of the difficulty will be to omit dates of expiration from address labels, but there are rumors roundabout of a detective branch of the Post-office Department that will devote itself to publishers only. If there be foundation for the report—and with Mr. Madden in authority nothing is impossible nowadays—you may expect at some time soon to receive a visit from a burly gentleman with authority from Mr. Madden to look over your lists and your books to see if there be any names there of persons who have not paid in advance for your paper. If such be found you will be informed you cannot mail longer to them, and, what is more, you cannot mail to anybody, unless you first separate what to Mr. Madden is the chaff from the wheat."

The method which the *Herald* shall adopt in order to get on a cash basis, and make it as easy as possible on our friends, is as follows:

Every subscriber on the list who is now delinquent will have his subscription credited three months in advance, until April 1st. 1902, and the amount will be charged against him on the ledger (not subscription) to be paid as quickly as possible, all or a part of it will be thankfully received now or as soon as you can make it convenient. In the future we will notify you 4 weeks before your subscription expires, soliciting a renewal etc., and also notifying you with a final notice the week your subscription expires. Also all subscribers who are now paid ahead, will be notified in the same manner as above. The method of notification in both instances will be the marking of a blue cross in this column next to the date of issue of the paper. Within the next few weeks we will notifiy every delinquent exactly how they stand and what they owe us to date. The notification will not be a dun, but still do not forget the fact that money is always a legal tender at this office. Going on a cash basis will be better for all concerned and will enable us to give you a much better paper in the future.

Keep your eye on Butler and on its popular paper and do not forget that renewals are always in order.

President Roosevelt seems to have a preference for governors, possibly due to the fact that he was a governor himself once.

The Garrett Clipper goes after the new Auburn Courier partnership in great shape. It seems as though editor Miner was bound to get them going and coming. He owns a republican paper at Garrett and a half interest in a democratic one at Auburn.

The New Kensington, Penna., Dispatch received an inquiry from a subscriber asking whether or not the paper on which the Dispatch was printed was dampened before printing. The inquiring subscriber being several years delinquent the answer was as follows: "No! we do not dampen the paper used in the Dispatch before printing. If it feels damp it is because of the "due."

The B. and O. is entitled to the contempt of every loyal citizen in this entire vicinity over their action in the St. Joe crossing matter. Their action was boy's play and shows to what end a corporation will sink for spite work. The B. and O. better known as the "road of wrecks and disaster," should turn over a new leaf, and attempt to appear at least decent. Its a bum road and has some bum officials in high places.

We have read of Maude on a summer day, who bare-footed, raked the new mown hay; we have heard the lay the poet sings of the rustling corn and the flowers of spring, but of all the lays of tongue or pen, there is naught like the lay of American hen. Long before Maude raked the hay, the American hen had begun to lay, and ere the milk maid stirs a peg the hen is up and has dropped her egg; the corn must hustle and the birds of spring, if they hold there own with the barnward ring. Long live the American hen! May her comb grow as red as the rose in May, as the eggs roll the mortgage on the farm away.

None but the initiated know the accuracy required in a printing office. The average reader who detects a misspelled word or a letter upside down feels that his mission on earth is not fully accomplished till he has called the attention of the overworked editor to the glaring defect. He does not notice the thousands and tens of thousands of letters that are in the right place nor the multitude of words correctly spelled, but his eagle eye is glued on the one that is out of place. So it is with our deeds. Man does a thousand good deeds and no attention is paid to them, but if he makes one mistake it is flashed all over the world. A lifetime may be spent in building up a reputation that may be wrecked in a moment. The world is a harsh critic, exacting to a to a fault, and if the Father of all does not temper justice with mercy, we may fail to reach heaven.

IN THE SOCIAL CIRCLE.

Mr. and Mrs. J. W. Brown held a reception on New Years day, from three to nine. The house was beautifully decorated with ropes of myrtle, carnations, autumn leaves and plants. A hundred and sixty guests were invited, most of the number being present. Refreshments were fine and all present joined in wishing Mr and Mrs. Brown many happy returns of the day.

—o—

A grand surprise was planned on Miss Dale Powers on last Tuesday evening, by Mrs. George Powers, it being the occasion of her birthday.

Miss Powers was invited out for tea and on her return about 7:30 she found 16 of her young friends assembled at her home to greet her. To say that she was surprised is putting it mild. Like all other victims of a surprise, on finding the crowd seated in the parlor she lacked for words, but finally acknowledged that she could say nothing.

A very beautiful gold pen and book was presented her by Mr. Clarence Murch in behalf of the guests. Games were participated in and refreshments served. Sometime after 12 o'clock, the guests left for their homes feeling that the surprise had been a success and a pleasant evening spent. The following is a list of those present:

Gladys Garber, Bertha Good, Nellie Rudd, Laura Devinney, Florence Campbell, Belle Norford, Flossie Freeburn, Carl Haynes, Clarence Murch, Lester Haverstock, Lee Norford, Dale Beechler, Jay Thompson, Cyrill Wilson, Frank Eviston.

—o—

A masquerade party was given on New Years eve at the home of Will Mutzfeld by the friends of Miss Florence. Some of the costumes were quite unique; among the different representations, were a gipsy, chinaman, rough rider, irishman, darkey, yellow kid, farmer, clown and Miss United States.

The young folkes served lunch, and after seeing the old year out and the new one in, they departed for their homes in the early morning wishing each other a happy new year. Those present were: Ethel Porter, Iva Haverstock, Lela Warner, Josie Bowman, Jennie Deck, Sylvia Diehl, Bessie Davis, Esta Gengnagel, Fred Voigt, Homar Bell, Floyd Elliot, Sammie Freeburn, Joe Baker, Tom Maxwell, Carl Graff, Robert Moltz, Robin Davis, Roy Oberlin, Arthur Shaw and Harry Eviston.

—o—

A delightful celebration of the seventh anniversary of the ladies Bible Class was given at the home of Mr. and Mrs. J. H. Aldrich. A six o'clock dinner was served in honor of the event, the gentlemen having been invited to join in the festivities.

The rooms were beautifully decorated in holly, the dining room presenting a scene of lovliness with its trailing vines and white primroaes; all were soon seated at the well laid board; Miss Nellie Rudd, seated at the piano, rendered some fine selections. Returning to the parlors, Bible conundrums and charades passed the time away. Among the guests present were Mr. and Mrs. Kiplinger of Fort Wayne, Mrs. Wright of Bad Axe, Mich., Mrs. Russel Stevens and Mrs. Peachey. At a late hour good nights were said, all pronouncing it one of the pleasantest events of the season.

George Powers as a Fancier.

At the poultry show recently held in this city, Geo. Powers again carried away the honors on his S. C. White Leghorn's. On cockrel he captured both first and second; on pullet first and second and first on pen. It will be remembered that he captured a long string of firsts at Toledo and the various Ohio shows laat fall and that his birds were then scored by some of the most expert judges in the United States. In taking all these honors, he shows what merit

will accomplish. His stock is not only as fine as money can secure but is properly taken care of, and never neglected in any detail. Improvement is his motto and Mr. Powers will leave no stone unturned to reach the acme of perfection in breeding his favorite class of birds. In the poultry arena, Mr. Powers is a new comer and he has done more, in less than one year, than many fanciers do in a lifetime.

Mr. and Mrs. Del Chilson of Bryan Ohio, were visiting their many Butler friends this week. Mr. Chilson is selling hardware on the road and is a successful salesman. He is a royal good fellow and deserves his success.

A laughable incident to the railroad tangle near St. Joe, is that the B. & O. had a one legged man on guard while the Wabash had a one armed man to guard their interests. They did not come to blows however.

J. D Brown and D. D. Melroy will attend the chicken show at Logansport, as exhibitors next week. Mr. Brown will exhibit his beautiful wyandotts, while Mr. Melroy will exhibit games and several other varieties for friends. They are both expert fanciers and we will have the pleasure of chronicling their premiums next week. Good luck to them.

The Fort Wayne merchant are jubliant over the increased business afforded them by the introduction to their city of the new electric railroad from Huntington. The people go to Fort-Wayne in great numbers.—Kendallville Standard.

That is just the reason Butler doesn't want any electric roads. We do not want to act as a suberb for the summit city and if a line should be built in this county its a 100 to 1 that Ft. Wayne would be on the line.

A certain man had five daughters, the first of whom married Mr. Poor, the second Mr. Little, the third Mr. Short, the fourth Mr. Brown and the fifth Mr. Hogg. At the wedding of the latter, her sisters with their husbands were there, and the old gentleman said to the guests: "I have taken pains to educate my daughters that they might well perform their part in life and do honor to my family. I find that all my pains, cares and expectations have come at last to nothing but a Poor, Little, Short, Brown Hogg."

About the next number on the program is the building of the Fayette branch of the Lake Shore. It will undoubtedly be built next summer in order to catch the Detroit traffic to the St. Louis exposition. If not built by the Lake Shore it will perhaps be an extension of the Vandalia.

Fred Briggs, of Reading, Mich., has been in the city for the past week prospecting on a location for an up-to-date undertaking establishment. He will, or has purchased the business belonging to A. S. Briggs and will bring it up to date by installing new material and a complete stock as soon as he can get an up town room.

Never has there been a better holiday trade in Butler than this year, Every business house in town has had a good trade, and those that went to the trouble of going after the business had all of it that they could handle. The trade is estimated as being fully fifty per cent better than that of last year, and that was thought to be exceptionally liberal. The choice in the selection of presents has run to a better grade than ever before, and money has seemed to be just a little bit looser.

Geo Crider has our thanks for a payment on subscription.

Another effort to make Butler a city is under consideration and will probably come to a head in the spring. Sentiments seems divided as to the advisability of such a plan, but circumstances are such that it looks as though it would go through, if another election was called.

In Indiana alone there is sufficient posits of coal to supply the entire world with fuel for many years. In the South west part of the states fourteen counties are entirely underlain with it, while it is found in twelve other counties. The total area covered is about 7,500 square miles or one-fifth of the entire state.

Prof. Martin M. Crowl wishes to extend his sincere thanks to the good people who so kindly remembered him recently; he is grateful to the members of "the club" for their tokens of esteem, and to Dan Tombo for the generous banquet put up by him. Included among his gifts was a neat sum of money which had been made up for him.

Mr. and Mrs. F. L. Kiplinger of Ft. Wayne, were the guests of their many Butler friends this week. Mr. Kiplinger displayed his samples for the first time during 1902 in this city and F. L. Earnsworth our enterprising merchant started him off right by giving him a good order He is an excellent salesman and represents a first class house, but above all that he is a genial popular fellow whom everybody likes.

Be Strong

Weakness won't win

The battle of life is a hard one. Prepare for it. If your constitution is good, preserve it. If it is weak, build it up. If your Liver and Kidneys are sound, keep them so. You'll need them in the daily struggle. If they are weak, watch them every hour of the day.

To succeed in these troublesome times, you must have a sound Liver and safe Kidneys; otherwise your blood will be poisoned and your nerves ruined. Diabetes must be unknown. Bright's Disease must be impossible. Your success would be threatened, your health shattered, so you need a safeguard against physical decay. You need good rest at night—steady, quiet nerves during the day. At the first sign of weakness, be warned.

McLean's Liver and Kidney Balm

will bring speedy relief from pain and decay. And if you have neglected these organs—most essential to your success, or if other remedies have failed, it will help you, and restart the dormant organs back to safe and sure action.

It will remove, as if by magic, the dull, heavy ache in your back, that hurts you when you stand, sit, walk, or lie down. A bottle at $1.00 will make you a new, well being. Buy it of your druggist. Made by

The Dr. J. H. McLean Medicine Co.

John Hopkins, a rural mail carrier out Owosso, Mich., has equipped his mail wagon with a successful heater. It is a piece of six-inch stovepipe 14 inches long, with a fire-pot and grate in the bottom end. Under the grate and just above an opening in the bottom of the wagon is a slide by which the draft is regulated, and a smokepipe two inches in diameter extends upward through the roof of the wagon. Charcoal is used for fuel. It occupies very little room, and is said to be just the thing for mail carriers, milk peddlers and others who have to ride every day in all kinds of weather.

OBITUARY.

Hannah Bordner Moughler, daughter of Phillip and Catharine Bordner, was born in Lancaster Co. Penn. Oct. 31st 1828, died Dec. 25th 1901, aged 73 years, 1 month and 25 days. She came with her parents to Wayne county where she was united in marriage to Jacob Moughler in the year 1846. To this union was born seven children.

They moved from Ohio to DeKalb Co. Indiana in 1852 and lived on a farm until about 5 years ago she moved to Butler where she remained until death.

Her husband died in 1888.

She leaves six children, 3 brothers and 1 sister together with many friends to moun her loss. She was a kind and affectionate mother, a good neighbor and loved by all who knew her. She was a firm believer in the Christian Religion and 8 years ago was converted and united with the Christian church at this place and was faithful to the end. The funeral services were held at the Christian Church, Dec. 27th and the remains interred in the Big Run Cemetery: Rev. Drash assisted by Rev. Bell officiated.

How It Is Done.

The first object in life with the American people is to to "get rich;" the second, how to regain good health. The first can be obtained by energy, honesty and saving; the second, (good health) by using, Green's August Flower. Should you be a despondent sufferer from any of the effects of Dyspepsia, Liver Complaint, Appendicitis, Indigestion, etc., such as Sick Headache, Palpitation of the Heart, Sour Stomach Habitual Costiveness, Dizziness of the Head, Nervous Prostration, Low Spirits etc., you need not suffer another day. Two doses of the well-known August Flower will relieve you at once. Go to Geddes & Harding and get a sample bottle free. Regular size, 75 cts. Get Green's special Almanac.

John Alexander Dowie, alias Elijah the Steenth and in truth the Prince of Fakirs has opened a mail order house in Chicago. This would not be worth mentioning except that the Fakir allows his alleged religion to dominate his every action. He says he wont sell whiskey, nor tobacco, nor pork; these these things emenate from the devil and are to be eschewed. But all else John the Fakir will sell to you for as much as he thinks you will pay. The catalogue is adorned with his 'piter,' followed by a rambling introduction which is nothing it not sacred religious.

If Jawn has followed his usual method you will perhaps find listed Extracts of Treachery, recommended by Judas, baled hay such as Balaam fed his ass, or perhaps p. elm clubs such as Cain manipulated, or oil from the whale that heaved up Jonah. The almighty dollar is the bull's eye on which is centered his every ambition. To accumulate wealth is his sole endeavor. It matters not whether he weedles it from the purse of the millionaire, commands it from the widow or appropriates the pocket of his trusting dupes.

How anyone will permit themselves to be hoodwinked by such a hypocritical old sardine is beyond my ken.

'Twas a False Alarm.

I have used your Dr. Caldwell's Syrup Pepsin and can truthfully recommend it. Some four years ago doctors told me that I had Bright's Disease. I was laid up three months and nothing I used helped me and no food would stay on my stomach. I used one bottle of your Dr. Caldwell's Syrup Pepsin and food would stay on my stomach and I craved something to eat. I got well. There was no Bright's Disease about me. It was a "false rumor." Ever since I have recommended Dr. Caldwell's Syrup Pepsin to friends and strangers. It is just splendid. I have full confidence in it.—Geo. F. Benedict, 639 West King St, Decatur, Ill. Her Fatal Loquacity.

She was quite a worthy woman, but her
best friends would allow
She had a tongue,
And her meek and gentle husband ever
to her will would bow,
Because she clung
Fast unto her owned prerogative, which
was, as he averred,
In each one of their discussions to pronounce the final word,
Which would mean a final scone or two
all certain to be heard,
With vigor flung.
So for years she masticated textile fabric day by day
Morp, noon and night,
And her meek and gentle husband's hair
grew prematurely gray,
As well it might;
But she went abroad a-touring in the mountains round about,
Where she met a stubborn echo, and the
echo tired her out,
And her broken spirit, after a last, long
despairing shout,
Did wing its flight.

An article which will prove of the widest interest to all those engaged in teaching or who may be interested in education, is one in the January Cosmopolitan by Elisha Benjamin Andrews, ex-President of Brown University, who for the first time, in a leading magazine, has had the courage to show the great evils resulting from the private contract school-book system educational officials corrupted, school-books often the poorest selected, and the prices paid by the children themselves of the highest-an annual tax going up into the millions which could be very easily avoided if the proper organization were brought into to this effort.

A Good Cough Medicine.

From the Gazette, Toowoomba, Aust'a.

I find Chamberlain's Cough Remedy is an excellent medicine. I have been suffering from a severe cough for the last two months, and it has effected a cure. I have great pleasure in recommending it.—W. Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become—so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urinates too often, if the urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of **Swamp-Root** is soon realized. It is sold by druggists, in fifty-cent and one dollar sizes. You may have a sample bottle by mail free, also pamphlet telling all about it, including many of the thousands of testimonial letters received from sufferers cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper.

CATARRH

Catarrh has become such a common disease that a person entirely free from this disgusting complaint is seldom met with. It is customary to speak of Catarrh as nothing more serious than a bad cold, a simple inflammation of the nose and throat. It is, in fact, a complicated and very dangerous disease; if not at first, it very soon becomes so.

The blood is quickly contaminated by the foul secretions, and the poison through the general circulation is carried to all parts of the system.

Salves, washes and sprays are unsatisfactory and disappointing, because they do not reach the seat of the trouble. S. S. S. does. It cleanses the blood of the poison and eliminates from the system all catarrhal secretions, and thus cures thoroughly and permanently the worst cases.

Mr. T. A. Williams, a leading dry-goods merchant of Spartanburg, S. C., writes: "For years I had a severe case of nasal Catarrh, with all the disagreeable effects which belong to that disease, and which make life painful and unendurable. I used medicines prescribed by leading physicians and suggested by numbers of friends, but without getting any better. I then began to take S. S. S. It had the desired effect, and cured me after taking eighteen bottles. In my opinion S. S. S. is the only medicine now in use that will effect a permanent cure of Catarrh."

SSS is the only purely vegetable blood purifier known, and the greatest of all blood medicines and tonics.

If you have Catarrh don't wait until it becomes deep-seated and chronic, but begin at once the use of S. S. S., and send for our book on Blood and Skin Diseases and write our physicians about your case.

A Good Recommendation.

"I have noticed that the sale on Chamberlain's Stomach & Liver Tablets is almost invariably to those who have once used them," says Mr. J. H. Weber, a prominent druggist of Cascade, Iowa. What better recommendation could any medicine have than for people to call for it when again in need of such a remedy? Try them when you feel dull after eating, when you have a bad taste in your mouth, feel bilious, have no appetite or when troubled with constipation, and you are certain to be delighted with the prompt relief which they afford. For sale by S. G. Stone, Druggist.

A Writer throws this little boquet at the primary teacher, and the beauty of it is that it is deserved, every word of it: "She takes the little bantling fresh from the home nest, and full of his pouts and passions, an ungovernable little wretch whose own mother admits that she sends him to school to get rid of him. This young woman, who knows her business, takes a whole carload of these youngsters, half of whom single handed and alone are more than a match for their parents, and puts them in the way of being useful and upright citizens. And at what expense of toil and weariness! Here is the most responsible position in the whole school, and if her salary were doubled she would receive less than she earns." Washington Herald.

Official Circular.

Notice is hereby given you as a health officer in the state, that commencing January 1st 1902, a new form of Certificate of Death will be used, a copy of which is enclosed. This new form is in accordance with that used by the United States and all registration states, and is adopted for the sake of uniformity. This, it is plain, will make it possible to better compare all state mortality statistics, a matter of great importance. You will cease to use the old form of certificate after January 1st, 1902, and it is your duty to so inform the physicians within your jurisdiction and supply them with the new form. Direct that all old certificates be destroyed on January 1st, and not used under any circumstances.

County officers will supply all city and town officers and deputies in their respective jutisdiction.

Some body asked us the other day what the editoral "we" embraced. This is rather a comprehensive question; however, "we" will state that it includes everything that comes within the radius of the editorial tentache. We will embrace a pretty girl when our wife is not around. We embrace every opportunity to tell the truth about our subscription list—it is the largest in the country. We embrace the opportunity to dodge the fellow who thinks he wants to lick us. We used, incidentally, to embrace an occasional telegraph pole at an uncertain hour of the night and wonder like a certain congressman. "where we are at." In a more comprehensive sense, when you read, "We expect our wife home to day," we refer to the editor "We are a little late with our work,' includes the whole office, the devil and the towel. In saying "We are having a boom," the town is meant. We received over 100,000 immigrants last year," embraces the nation; but "we have hog cholera in our midst" means that some small souled son-of-a-gun who took our paper for ten years without paying for it and ordered the post master to mark it "refused" is ill, and "we" are still 'charitable enough to extend the hope that should he shuffle off this mortal coil, he will be provided with a No. 1 fireproof asbestos-lined coffin, because he will surly need it.

NOW LOOK OUT!

"Take care of yourself," say our friends. "I'll try to," we answer. We do take a little care, yet in spite of warm clothes, rubbers and mackintoshes, an army of people were bowled out by pneumonia and other lung and chest diseases last winter. They caught cold, neglected it, let it fix upon them, were torn by coughs, choked by inflammations and congestions, wasted by fever, tired out by pain and then gave up the fight. The hour you realize that you have a cold on the chest, place a Benson's Porous Plaster where the pain or oppression is felt. If you think two are needed make it two. No harm if you were covered with them. They act quickly and prevent the engorgment of blood in the organs. In this way—with ordinary caution as to exposure—you will break up the cold and avoid a serious sickness. No other applications, or any other form of treatment, will accomplish this as certainly and speedily. Benson's Plasters have a distinct and positive action and are curative to the highest degree. Use them with the same confidence for coughs, muscular rheumatism, the grip (back and chest) and all similar ailments. Women, who are chief sufferers from cold weather complaints, should keep these plasters always within reach. Get the genuine. All druggists, or we will prepay postage on any number ordered to the United States on receipt of 25c. each.

Something New.

A new graphophone for $25, which uses both large and small cylinders is the latest development in the talking machine field. This new instrument has been provided to supply a demand which has manifested itself ever since the large cylinder appeared. Its posessor, while having only one instrument, costing considerable less than any previous machine capable of using the large cylinder, may now enjoy a large variety of selections at the nominal cost of small records, and is also enabled to avail himself of the great volume and superior reproduction of the Grand record, whenever desired, at no additional cost other than that of the records themselves. Besides its other advantages this instrument is provided with an entirely new feature which has never before appeared on any graphophone. This is a dial speed indicator which, by the position of a pointer, enables the operator to tell at a glance, the speed at which the machine is running and to adjust the speed by merely moving the pointer

The Columbia Phonograph Co., No 88 Wabash Avenue, Chicago, headquarters for graphophones and talking machine supplies of every kind, will send you catalogues on application.

Charity begins at home, but it should not stay there. That the principle our wife makes her Christmas lists on. She begins economically with a pair of slippers for us and some toys for our offsprings but before she gets through she's a buying automobubbles for her stepmother's father's half brother's second cousin's daughter by her first husband.

But it is more blessed to give than to received, I've forgotten where I read that, but I think it was what Young Corbett said to Terry McGovern. The papers said that McGovern didn't believe it at first, but that Corbett managed to pound it into his head. Still, it's pretty to receive.

Just before Christmas we consulted a medium and asked her if she told the previously, the subsequently and the interim? 'I tell the past, present and future, if that's what you mean,' she answered. 'Well,' it would break a snake's back to follow our past, and we can see our finish, but will you tell us something about our present. She die—told us a "shaving mug," she was a fizzle no good—we got—left.

SOLOMON'S TEMPLE.

Its Great Cost, as Figured Out in Dollars and Cents.

A noted statistician and investigator who has lots of time for such work, has been doing some figuring on the cost of the Temple of Solomon, and says few people, even in these days of palmy extravagance and millionaire display, have an adequate impression of the enormous cost of the great temple. According to Villalpandus, the "talents" of gold, silver and brass equaled the enormous sum of £6,879,822,000. The worth of the jewels is placed at a figure equally as high. The vessels of gold, according to Josephus, were valued at 140,000 talents, which, reduced to English money, would equal £575,296,203. The vessels of silver, according to the same authority, were still more valuable, being set down as worth £646,344,000. Priests' vestments and the robes of singers, £2,010,000, and the trumpets, £269,000. To this add the expense of the building material, labor, etc., and some wonderful figures result. Ten thousand men hewing cedars, 60,000 bearers of burdens, 80,000 hewers of stone, 3,300 overseers, all of whom were employed for seven years, and upon whom, besides their wages, Solomon bestowed £6,733,970. If their daily food was worth 50 cents each, the sum total of all was £63,877,088 during the time of building. The materials in the rough are estimated as having been worth £2,545,337,000. This gives a total, just for this much of the expense, which by no means expresses the whole cost, of £10,719,620,261, or about $53,598,101,305.

FINGER RINGS.

Every Roman freeman was entitled to wear an iron ring.

Wedding rings were used in Egypt 3,000 years before Christ.

Luther habitually wore a small ring, in which the setting represented a death's head.

In many female religious orders the ring is used during the ceremony of receiving a novice.

Shakspeare's ring, or at least a ring supposed to be his, was found a few years ago in a meadow near the Avon.

In the tombs of ancient Egypt, dating probably not later than 3000 B. C., are found gold rings of fair workmanship.

In the fourteenth century astrological rings were fashionable in Italy. The settings were carved with various emblems and symbols.

Richard I. of England had a ring set with a bloodstone. His enemies attributed his daring and success to the influence of this jewel.

Dial rings were common in France and Germany during the last century. By holding one up to the sun the time of day could be approximately ascertained.

In the time of Augustus portrait rings came into fashion, probably for betrothals or engagments. The portraits of the happy pair were graven on the setting.

Quintillian laid down certain rules for the wearing of rings. He protested against the use of too many, and said that it was not in good taste to wear rings below the middle joint of the finger.

Anchor, or Christ, rings were frequently used among the early Christians. Many specimens have been found in the catacombs, bearing upon the settings the representation of an anchor and the Greek symbol for the name of Christ.

OUR CITIES.

New York has the greatest number of Austrians.

Albany, N. Y., has an area of nine square miles.

The most northern city in our territory is Sitka, Alaska.

Chicago is the greatest lumber center, the second being Tonawanda, N. Y.

The city limits of San Francisco comprise forty-two and one-fifth square miles.

The people of Louisville live on an area of fourteen and one-half square miles.

The city having the longest streets of unbroken continuity is said to be Washington.

The population of Pittsburg inhabit twenty-seven and three-fifths square miles of ground.

Denver is the only city with natural streams of water flowing through the gutters in its streets.

The people of Indianapolis have plenty of room, for the city is spread over twenty square miles of territory.

Salt Lake City, Utah, is the only city in the United States situated on salt water and yet far from the seashore.

Cincinnati, Ohio, is one of the few cities whose growth has not been proportionate to the increase of wealth of the State in which it is located.

Broadway, New York, that is, counting as a part of it the streets into which it leads in the direction of length, is said to be the longest thoroughfare in the United States.

Head Feel Like Bursting.

Maybe you were out last night? If you had taken a Krause's Headache Capsule before retiring, your head would be cool and clear this morning. Take one now and you will be all right in a half an hour. Price 25c. Sold by Geddes & Harding.

Uncovering the Head.

Men did not always observe the proprieties by uncovering the head. The custom of lifting the ha as seen now originated during the age of chivalry, when it was customary for knights never to appear in public except in full armor. Upon entering an assembly, however, a knight would remove his helmet, to signify that he felt safe in the presence of friends. From this custom came the practice of lifting the hat on meeting a friend.

A Charitable Bishop.

The late Bishop Wigger, who for 19 years was the head of the Catholic diocese of Newark, N. J., with an income of between $4,000 and $5,000, left only $250. All of his income not used in his support went to charity.

Nervous Prostration Cured by DR. PIERCE'S GOLDEN MEDICAL DISCOVERY.

"I am an engineer by trade and the hard work and worry of running a large engine brought on nervous prostration," writes Mr. Chas. F. Dixon, of Arbuckle, Colusa Co., Calif. "A friend recommended Dr. Pierce's Golden Medical Discovery to me and I bought one bottle; thought that it helped me so continued the use of it until I had taken six bottles. I feel better than ever in my life. Am not a particle nervous, can work hard all day and sleep sound at night. I not only think so but I know that the 'Golden Medical Discovery' cured me and therefore I will recommend it to others."

Dr. Pierce's Pleasant Pellets regulate the bowels and stimulate the sluggish liver.

To Fight The Wabash.

Toledo, Dec. 31.—It was learned tonight that beginning Jan. 10 the Lake Shore and Vandalia will establish a St. Louis service out of Toledo in competition with the Wabash and while the Wabash is fighting the Lake Shore for Chicago business out of Toledo the Lake Shore will be fighting the Wabash for St. Louis business. This is one of the methods to be used by the Lake Shore and the Pennsylvania in retaliating against the Wabash for its entrance into the Chicago field from this city in competition with the Lake Shore for its proposed entrance into Pittsburg in competition with the Pennsylvania.

At midnight tonight the Vandalia took charge of the Eel River Railroad. This was purchased jointly by the Lake Shore and the Pennsylvania under the name of the Toledo & Logansport Railroad Company and has been turned over to the Vandalia for operation by James McCrea, the president. Up to this time has been used by the Wabash as a connecting link between the Detroit and St. Louis divisions of the Wabash. The officials of the Lake Shore and Vandalia, it is said, are now working upon a schedule for through train between Toledo and St. Louis over the new route. The speed the Wabash's fastest trains will be met.

The distance over the new route is 441 miles, only five miles longer than the Wabash mileage. The competition will not stop with the passenger business, but freight service will be put on.

In December, reports to the state board of health show, there were 287 cases of smallpox in Indiana, as against 186 in November. The increase is attributed to the cold weather.

The statement that the County had a fund on hand aggregating $70,000 was misleading. The amount is about correct, but the apportionments for the towns and township has not been made. After this is done the balance on hand will be between $4,000 and $8,000. This is pretty good for a county that was a $100,000 in the hole a few years ago.

A man in Indiana named William Crunk had a lot of mules for sale, but refused a big offer for them from a British agent. He didn't want his mules to assist in the warfare against the patriots of the Transvaal and Orange Free State. The Democrat would be willing to trade Mr. Hay off for Mr Crunk, who has patriotism and pride of country, two important attributes in a secretary of state. Mr. Crunk may not have as much book learning as Mr. Hay has and he may not have acquired polish at the court of St. James; but he knows that selling his mules to the British would be giving aid and confort to the men who have been trying for a long time to destroy two republics.

ODDS AND ENDS.

Isn't it a sad comment on American civilization, that its three most conspicuous men of today, Admiral Schley, Admiral Dewey and General Miles should be traduced and censured by a clique of republicans, who happen to fill places high in authority, at Washington.

The effort will be made again in congress to declare the St. Joseph river non-navigable within the state of Indiana and confirm the private water rights granted. The bill was introduced in the last congress, but some opposition developed on account of a law suit that was pending to determine between rival litigants for water rights.

A dispatch to the Journal from Peru says: "The Wabash will open its line from Toledo to Montpelier and Butler on Sunday and will start two trains to run each way over the line. They will be in charge of Superintendent Gould and the dispatchers of this city. About six miles of track are yet to be laid in the middle of the stretch between Fort Wayne and Butler and the work will be completed by Saturday."—Indianapolis Journal.

The Lake Shore & Michigan Southern has announced an advance in wages to all yard conductors and yard switchmen employed at the principal points along the line, averaging between 5 and 6 per cent. The advance is effective from Jan. 1. The aggregate thus paid will amount to about $30,000 per year and 1,500 men will be benefitted. The company is now considering the advisability of granting an advance to its engineers and firemen. The trainmen employed by the road received an advance in wages several months ago.

Hamilton is all wrought up over a proposition to incorporate the town. Of course there are few who oppose it, and it seems that "to oppose" is all some people are made for. In case the opposition is not strong enough to carry their point, Waterloo can furnish the required additions. In the meantime the progressive spirit will continue to keep the world moving. When a man gets in the habit of obstructing everything it is time for him to pack his grip for the long Journey as it is unpleasant to live among people who constantly elbow us out of our road.

A Payne girl played postoffice at a party the other night, yelled, shrieked and howled, and ran behind the door and scratched the young man's face in seven places, and upset a kerosene lamp and kicked over the piano stool, and fianally when he kissed her on the tip of the ear, she fainted dead away, and she could never look any one in the face again, and they led the bashful, modest, sobbing creature home. The next day she ran away with a married lightning rod peddler, with a hair-lip and ten children.

The cheap politician is again abroad in the land displaying his insatiable desire for lawmaking, and the cheaper the politician the more deeply he becomes interested in making laws ostensibly designed to benefit some particular class. These same cheap-politicians when approached by some irate citizen display a fear that is a stultification of their intelligence and an insult to the intelligence of their honest supporters who desire the outspoken truth in local political affairs. Along with the cheap politician is the cheap editor of the mediocre party organ, sanctioning everything so long as his party espouses it. An editor who fears the outspoken truth in local political affairs gains only the contempt of his readers, be they of the soft or hard hand persuasion. An editor who fails at the first opportunity to nail the cheap politician does not mix with his people enough to know their wants, and consequently fails utterly to win his heart's fondest desire, to lead a large constituency.

The United States Government Report shows ROYAL Baking Powder to be stronger, purer and better than any other.

Settled For $1,000.

Our readers will remember the arrest, several months ago, of John W. Brown of Garrett, his subsequent imprisonment in the jail at Crown Point and acquittal on the charge of having been connected with the attempted hold up of a B. & O. express train at Miller's station. After Brown was released, no evidence being produced to show that he was in any way connected with the crime, he filed suit against the B. & O. for damages for false imprisonment. The company secured a change of venue to Steuben county but the case did not come to trial. Negotiations, opened by the company's attorneys, were made for a settlement, the terms being agreed upon early in December.

Monday morning the plaintiff through his attorney H. W. Mountz of Garrett, received the railroad company's check for $1,000 in settlement of his claim and thus another sensational case is ended. Brown was certainly entitled to da maes in this case and the company settled at a very reasonable figure.

Leonard McClish, of Fort Wayne, purchased a postoffice money order last Friday fifty cents, payable to May Covault, also of Ft. Wayde. Next day May presented the order for payment, and it read "fourteen dollars and fifty cents," the word "fourteen" having been inserted in the dollar blank subsequent to its purchase. The forging was a bungling job, the handwriting and ink being quite unlike the genuine part; and of course the duplicate advice was positive proof that it has been tampered with. McClish was arrested and held for trail in the United States Court, and went to jail in default of $500 bail. The girl was also arrested as an accomplice, and on examination held yesterday, was discharged.

Divorce Grind Now On.

An exchauge remarks that the divorce grind in the courts of Indiana is now on and in every county the dockets predominate in domestic cases. The subject is old and no new thing can be said for or against the easy granting of divorces, but the best argument yet devised to prevent divorce is to make marriage harder—make each party to the contract pass the test of a board of examiners as to health, ability to support and maintain families, and with moral conditions and environment. Collusion to obtain divorces ought to be made impossible by strict investigation into the merits of each case. So long as divorces are granted on the payment of nominal cost and for trivial offenses, just so long the sacredness of the home and marriage relation will be regarded lightly, and just in proportion as they are made harder to obtain, just so long will the plighted troth assume a higher, nobler and better aspect.

Letter from Senator Fairbanks

The following letter from Senator Fairbanks to the publishers of the Herald will be of interest to the publishers of Indiana Newspapers:

Washington, D. C. Jan. 2, 1902.

Gentlemen:—Appreciating your interest as publishers in a recent ruling of the Post Office Department concerning second class mail matter which has been quite widely commented upon in the press of Indiana, I beg to say that there is nothing in the order which effects the interest of our Indiana publishers in the slightest degree. I called upon the Postmaster General personally at the request of some of our Indiana publishers and was assured that the order in no wise changes the status of the legismate publisher. The apprehension of some that might destroy the credit subscription business is based upon a misunderstanding of the scope of the order.

I am glad to reassure you in this matter. Since I saw the Postmaster General, a general order has been issue d by the third Assistant Postmaster General fully explaining the scope of the order and stating most positively that the ruling would have no such effect as has been represented.

Very respectfully,

Chas. W. Fairbanks.

"Perhaps You'll Need Me During 1902."

Death of an Aged Citizen.

Death came unexpectedly to Peter Lesh, at his residence in Fair Hone, Tuesday morning. Mr. Lesh has been in poor health for a number of years and died while seated in his arm chair. He was suffering from consumption but paralysis is supposed to have been the immediate cause of his demise. He was aged nearly 77 years.

The deceasd was a son of Henry Lesh who came from Pennsylvanna to Ohio with his family, when this territory was first settled. He was one of thirteen children and two brothers, Isaac Lesh, of Indiana, and Lewis Lesh, of Louisville, and one sister, Mrs. Tombaugh of Fair Hope, survive. Mr. Lesh was married to Miss Leah Youtz, who died about seven years ago. Two sons are living, namely Henry Lesh, of Fair Hope, and Ephraim Lesh, who resides in Texas. During his illness Mr. Lesh was tenderly nursed by Mr. and Mrs. Hnery Lesh, who resided with him. The deceased had for many years been a member of the United Evangelical church and was a faithful attendant at the services of that denomination. The funeral services will be held at the Fairhope Evangelical church at 10 o'clock, Friday morning. Revs. Brown and Domer will officate.—Louisville Ov. Herald.

How It Is Done.

It Takes a Remedy of Uncommon Merit to Draw the Unqualified Praise of a Successful Practicing Physician.

Dr. J. W. Bates of Corfu, N. Y., states: "A most remarkable case has come under my hands of late and has fully convinced me of the wonderful power of Dr. A. W. Chase's Nerve Pills over diseases of the nerves.

"A young lady who was treated for over two years for epilepsy by two doctors was given up to die. I found that her sickness was not epilepsy, but nervous troubles, due to menstrual derangements, and prescribed four of Dr. Chase's Nerve Pills a day, after meals and at bed-time. Since that time she has not had a single bad spell. Her health has rapidly improved, she has gained about 15 pounds in weight, and I do not hesitate to state that Dr. A. W. Chase's Nerve Pills have saved her life and restored her to health."

Mrs. Fawcett of Marietta St., St. Clairsville, O., says: "I have used Dr. A. W. Chase's Nerve Pills and can recommend them to others as a good sound reliable nerve and general tonic. When I got the box of the Pills I was complaining of nervousness, weakness and pain through the shoulders—rheumatic in type—digestion not over good as usual. The effect of the medicine has been very satisfactory indeed. So marked has been the change towards health and comfort I can conscientiously say they are fine and what they are represented to be. At my advanced age I feel I am getting all the benefit possible."

Mrs. M. J. Hubbard of Railroad Avenue, Sistersville, W. Va., says: "I like Dr. A. W. Chase's Nerve Pills. I was nervous, excitable, unable to sleep. I had not taken the medicine long when my nerves were steady and strong—my physical strength and energy back and my sleep sound and natural."

See that the portrait and signature of Dr. A. W. Chase are on every box. Price 50 cents a box.—Six boxes for $2.50. Manufactured by the Dr. A. W. Chase Medicine Co., Buffalo, N. Y.

Sold by Butler at Stone's Drug Store.

The place to take the measure of a man is not in the forum nor the field, nor the market place nor the amen corner, but at his own fireside. There he lays aside his mask and you may judge whether he's imp or angel, king or cur, hero or humbug. If his babies dread his home coming and his better half swallows her heart every time she asks him for a five dollar bill he's a fraud of the first water. When his children rush to the front gate to meet him and love's own sunshine lights the face of his wife when she hears the footfall you may take it for granted that he is pure gold, for his home is a heaven and the humbug never gets that near the white throne of God. I can forgive much in that fellow moral who would rather make men swate than women weep; who would rather have the hate of the whole world than the contempt of his wife; would rather call anger to the eyes of a king than fear the face of a child.

The Garret Clipper observes that "The special Judge for this term of the circuit is from Angola," and adds: "That town seems to have a monopoly in this line of political grabs." May be little jealously there, but it is quite certain there is a little worth having that the Steuben Republican sleek workers don't go after. They are not slow in the estimation of their merits nor overly modest in their demands.

REMARKABLE CURE OF CROUP.

I have a few words to say regarding Chamberlain's Cough Remedy. It saved my little boy's life and I feel that I cannot praise it enough. I bought a bottle of it from A. E. Steere of Goodwin, S. T., and when I got home with it the poor baby could hardly breathe. I gave the medicine as directed every ten minutes until he "threw up" and then I thought sure he was going to chock to death. We had to pull the phlegm out of his mouth in great long strings. I am positive that if I had not got that bottle of cough medicine, my boy would not be on earth today. Joel Demont, Inwood, Iowa. Newspaper Warfare Undignified

If the editors of the papers in the smaller towns, where they are personally known, could thoroughly understand how undignified it looks to the average reader to see them vilifying each other in their respective columns there would be less of it. Roasting may relieve the pent-up feelings of a particular editor and furnish lively reading for a few readers but, on the other hand, there are readers who look upon newspaper warfare, as far as editors are concerned individually, as bad taste and very undignified. Slurring and publishing truths and untruths about each other are bound to have in the end, an adverse effect. That is one paper will convince a number of its readers that the editor of its contemporary is unreliable, and vice-versa. A little careful study of this matter may convince newspaper editors that there is considerable truth in our assertion.—Newspaperdom.

SKULL OF MONOQUET

The editor of this paper has secured for the newly organized historical society a relic which has more than ordinary historic interest for the people of this county. This is a portion of the skull of the old Indian chief, Monoquet after whom the little village of Monoquet was named. The body of the old chief was dug up by medical students soon after its burial and later a portion of the bones passed into the possession of a prominent physician of northern Indiana. The skull is now presented to the society by his son who has had it for a number years. He requested, however that his name should not be given to the public.—Warsaw Union.

The Chicago judge who imprisoned two newspaper men for criticism of his decision may have gone too far but it is a question if newspapers do not occasionally err in their structures on judicial acts. Their cruse is likely to detract from the respect due to law.

When the late Robert Dunlap the famous hatter started in business he had only $2,000, and his conditions were no better than there hundred of hat makers. A part of his small capital he used for small newspaper advertisements. Of every dollar of profit he took half for newspaper publicity until his fame became known in all the leading cities. He often said that without newspaper aid he never could have made more than a living from his business.—E.

Zoa Phora, the Greatest Known Cure for Leucorrhea, Change of Life, Painful Menses, Kidney Liver or Bladder Troubles.

The Only Safe, Sure and Ever-Ready Remedy in the Three Danger Periods in a Woman's Life—Trial Bottle Free.

Zoa Phora cures falling of the womb, leucorrhea, painful or suppressed menstruation, flooding, laceration, kidney, liver or bladder trouble, and change of life.

Mrs. J. E. Connor, Lawrenceburg, Tenn.

It serves as a steady hand to guide the frail and sickly girl through the trying period that opens to her the untraveled path of womanhood. It proves through the trying times of pregnancy and childbirth a "woman's friend;" as she passes to the last period in womanly life Zoa Phora is still her friend and mainstay—bringing her through the third dangerous change in woman's life, safe and soundly healthy. Women by the thousands testify to the wonderful effect of Zoa Phora on their general health as well as to its marvelous power in correcting irregular or suppressed menses and permanently strengthening when weak.

Lawrenceburg, Tenn.

Zoa Phora Co., Kalamazoo, Mich.

Gentlemen:—I feel it my duty to inform you what Zoa Phora has done for me. Ten years ago I was married. I had always had painful menstruation and was all run down and people said I could not live, but my husband sent for one bottle of Zoa Phora which cured me. Two years later I was troubled with Falling of the Womb and the doctors said I would have to wear a pessary, but one bottle of Zoa Phora cured me. Four years ago I had a miscarriage and came near dying, but one bottle cured me again. Since then I have kept it always in the house and would not be without it at any price.

Yours respectfully,
Mrs. J. E. Connor.

Zoa Phora is for sale by druggists, or if will be sent direct, prepaid, on receipt of price, one dollar a bottle. If you are a sufferer you can make no mistake in taking Zoa Phora at once. If you are interested or have a friend who is a sufferer, send for our great book telling why Zoa Phora cures. It is sent free. All letters strictly confidential and answered by the doctor.

We will be glad to send you a large trial bottle free upon receipt of 10c. to cover postage and packing. Address, Zoa Phora Co., Kalamazoo, Mich.

SKULL CRUSHED.

Jacob Deeds an aged and respected farmer, residing four miles north of Helmer, went to the freight house in that place yesterday afternoon to take home a new heavy lumber wagon, lately purchased by him. In doing so his team became frightened and ran away. Mr. Deeds was thrown under the wagon which passed over him, the wheels crushing his skull, killing him instantly. He also received many severe cuts about his head and face and body. The funeral will be held Friday morning at Fairfield Center. Interment at Fairfield cemetry.—Kendallville Sun.

What the Vandalia May Do.

For several days, engineer, conductors and brakeman, as well as some of the officials of the Vandalia railway system have been running over the old Eel River railroad which has been operated by the Wabash system. This has been done so that they would be acquainted with the road when the new owners take possession on the first of January.

While several of these people were waiting in this city from one train to another, they got into the conversation as to what the Vandalia might do and it all seems probable. If they are carried out it will mean that the ninety-four mile line will be of much value, and Columbia City will probably be benefited considerably by the change of system.

One said it is a known fact that the Pennsylvania road has long wanted into Detroit and by using the Vandalia which is practically a part of their system they can get to Butler. With a line to Delray they can there intersect with the Pier & Marquett, another branch and then have direct line from Detroit to be built from Butler east, trains could run from Detroit to this place and here take the P, F. W. & C. road for Chicago. This would make a route that would be only eight miles longer than the line of the Wabash for same points. To St. Louis it would be the same as has been used by the retiring company of the old Eel River.

By running trains from Chicago to this place, thence to Butler, and from there over the Lake Shore road to Toledo, it would make the shortest route by three miles of any line. While all of the above is only talk at present, yet it all looks and seems reasonable, for a railway system like the Vandalia which is backed by the Pennsylvania, is not liable to want a point like Butler as a terminal.

Red is a danger signal on the railroad, on a fellow's nose and on a woman's face. Men and women use Rocky Mountain Tea and get genuine rosy cheeks. 35c. Geddes & Harding.

It is hard on an individual, party or nation to have to much prosperity. This will be the down fall of the republicans. Their recent victories have given them overconfidence and the leaders of the party have degenerated into a lot spoils hunters. Here in Illinois the republicans seem to have lost sight of the fact that there is a democratic party and are engaged in bitter strife among themselves for the control of state patronage. The enmity among the warring class is beautiful to behold from a democratic standpoint and the villifications heaped on the different factions by each other contains lots of truth and is showing the people what a rotten lot they are.

ROBBERY IN DAYLIGHT.

One of the most daring robberies ever perpetrated in Garrett occured at the home of Mr and Mrs. James Gregg in the Schelter building on Randolph street. Tuesday afternoon about three o'clock. Mrs. Gregg, who was in the kitchen working, heard a slight noise in the front room and thinking some lady had dropped in and was trying to surprise her stole quietly up stairs to turn the tables on her guest. Imagine her surprise when on pushing aside the curtains beteen two rooms to find a burly intruder with a revolver in his grasp which he pointed at her with the command to "keep still." He then started down stairs backwards, still keeping Mrs. Gregg covered with the revolver, and presumably shook the dust of Garrett from his feet without further ceremony.

While making his exit Mrs. Gregg noticed that he carried away with him her gold watch and chain as a result of his visit, but nothing else of importance has been missed. Garret Clipper.

He Who Would Thrive Must Either Hold or Drive.

That would do in the olden times but now he must both hold and drive.

Men everywhere are driving and climbing for dear life (or gold). It is this being everlastingly at it that shortens men's lives. Every nerve is put on the stretch and sooner or later the system begins to give out. The stomach is of the greatest possible importance in sustaining life and vigor, and is liable to be the first to give out. The work performed by the bowels is no less important. The overstrain caused by rush and worry of life soon results in indigestion, dyspepsia, constipation, liver and kidney troubles. Headache, nervousness, and every conceivable trouble soon follows unless the right thing is done. The old philosophers searched for the elixir of life but failed to find it. We have found it.

Congressman Emerson and Congressman Connell as well as Ex-Treasurer of United States, Wyman, Senator Brackett, Judge Houghton, Mayor Knapp, Attorney-General Smyth, not only speak in the highest terms of our Company but of our great remedy, Dr. Kay's Renovator, and thousands of the most eminent people who know by experience, endorse Dr. Kay's Renovator, as the greatest known remedy.

If you are beginning to give out or if you are down where other remedies have failed to help you, don't wait but go at once to your druggist and get Dr. Kay's Renovator. It strikes to the very root of the whole trouble, beginning with the stomach, bowels, liver and kidneys and renovates and invigorates the whole system, giving new life, health and vigor to the whole body. It is not only very efficient but perfectly safe for all ages and conditions. Ask for our pamphlet giving reports of the most marvelous cures known to the medical profession, or send to us for a copy. Free advice, sample and book for the asking. Prices 25c, 50c and $1. Dr. B. Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urinates too often, if the urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of Swamp-Root is soon realized. It is sold by druggists, in fifty-cent and one dollar sizes. You may have a sample bottle by mail free, also pamphlet telling all about it, including many of the thousands of testimonial letters received from sufferers cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper.

The editor of the Millersburg, Mich. News has opened a wood yard and is doing a rushing business selling his neighbors fuel. The matter is worthy of notice as he gets his stock from subscribers. Down this way we can hardly secure enough wood on subscription to supply our own needs, to say nothing of furnishing fuel for our neighbors.

The bill introduced by Senator Hoar giving the federal courts exclusive jurisdiction in cases of attacks on or lynching of foreign residents of the U. Similar bills have been knocked out in previous congresses, and the chance of this one becoming a law is very slim.

Eugene Carter Dead.

Eugene Carter, one of the best known billiard players in the world, died at his home in Chicago, Thursday, aged forty-eight years. Carter was born in Toledo and followed the game of billiards from childhood, beginning when but sixteen years of age. He won the Ohio state championship in 1875. He spent several years in Europe, for a time running a billiard ball in Paris which was a favorite resort for leading European players. Though for several years a resident of Waterloo his visits to DeKalb county have been few and far between in late years. His father, Alf. Carter, and uncle, S. J. Locke, were well-known residents of the county.

The remains will be taken to Waterloo for burial and we understand the funeral will be held there.

Green Goods Men Active.

There are indications that the eastern green goods artists are showing renewed activity in the attempt to get a grip on some easy money in the vicinity of Fort Wayne. Within the past few days numerous people in this city have been the recipents of flattering offers from the enterprising sharks who prosper upon the gullibility of others.

A number of these letters have been returned to Postmaster Page, and will be submitted to the post-office department. Some of them, at least, were mailed from Holyoke, Mass., and they are of the old, sterotyped variety, in which glittering profits are held up to dazzle the eyes of those whom the swindlers hope to gull. The business is to be done only by telegraph and personal interview, at the end of which the victim will find himself parted from his good currency and the possessor of a package of more or less indiferent sawdust.

It is impossible to say just how generally the letters have been received in the city at this time, but if anybody has been victimized it has not yet come to light.—Fort Wayne Sentinel.

A Good Cough Medicine.

From the Gazette, Toowoomba, Aust'a.—I find Chamberlain's Cough Remedy is an excellent medicine. I have been suffering from a severe cough for the last two months, and it has effected a cure. I have great pleasure in recommending it.—W. C. Wockner. This is the opinion of one of our oldest and most respected residents, and has been voluntarily given in good faith that others may try the remedy and be benefitted, as was Mr. Wockner. This remedy is sold by S. G. Stone, Druggist.

The birth statistics have in the past been far from perfect and the state board of health is now working to correct the defects. The law is plain, but has not been fully enforced. Each birth must be reported within fifteen days and if the doctor or accoucher fails to make the report, it should be done by the householder. The secretary of the county board of health is now making an effort to have the reports properly made and asks all to assist him with the work.

W. H. Hart, auditor of state, says he will begin to enforce the law against oil mining and insurance companies that have been doing illegal business in the state. The oil companies will be required to send a representatives to the auditor's offiice to give informations concering their organization.

Help... Nature

Babies and children need proper food, rarely ever medicine. If they do not thrive on their food something is wrong. They need a little help to get their digestive machinery working properly.

SCOTT'S EMULSION OF COD LIVER OIL WITH HYPOPHOSPHITES of LIME & SODA

will generally correct this difficulty.

If you will put from one-fourth to half a teaspoonful in baby's bottle three or four times a day you will soon see a marked improvement. For larger children, from half to a teaspoonful, according to age, dissolved in their milk, if you so desire, will very soon show its great nourishing power. If the mother's milk does not nourish the baby, she feeds the emulsion. It will show an effect at once both upon mother and child.

Fleming Wins.

At the democratic district convention held in Ft. Wayne January 2. Senator Stephen B. Fleming was selected the member of the state central committee for the twelfth district. The old district chairman, William Kaugh, who was a candidate for re-election, withdrew before the convention and Mr. flemming's election was made unanimous. In the convention DeKalb county was strictly in the swim, Ab. Kelly of Waterloo being chosen chairman and J. A. Barns of the Courier, secretary. The new district chairman is the son of the late William Fleming of Fort Wayne and a vigorous party worker.

TO STOP A COLD.

After exposure or when you feel a cold coming on, take a dose of Foley's Honey and Tar. It never fails to stop a cold if taken in time. Geddes & Harding

A Burning Question.

Is is rather surprising that farmers in this county are burning coal for fuel, but it is a fact nevertheless. During the cold spell as high as thirty teams were at Mike Kirby's yard for coal in a single day. In speaking of the matter, one farmer said the best he could do was $3 for a cord of wood delivered at his home and then it was made from tops of fallen trees and he perferred to buy coal. There is any amount of timber in the county but the owners do not care to cut it into wood and object to letting outsiders in to get what they want. The fuel question is coming to be an important one.—Columbia City Post.

Twas a False Alarm.

I have used your Dr. Caldwell's Syrup Pepsin and can truthfully recommend it. Some four years ago doctors told me that I had Bright's Disease. I was laid up three months and nothing I used helped me and no food would stay on my stomach. I used one bottle of your Dr. Caldwell's Syrup Pepsin and food would stay on my stomach and I craved something to eat. I got well. There was no Bright's Disease about me. It was a "false rumor." Ever since I have recommended Dr. Caldwell's Syrup Pepsin to friends and strangers. It is just splendid. I have full confidence in it.—Geo. F. Benedict, 639 West King St, Decatur, Ill. Sold by Geddes & Harding.

Decision of Interest.

A decision of interest to Woodmen and members of similar orders, was handed down by the St. Louis court of appeals. A member of the M. W. A. died some time ago there and was one month in arrears with his dues. Two hours after his death the dues were paid. The order refused to pay the insurance, claiming that the policy was void because the member was delinquent at the time of his death. The attorney for the widow claimed that many of the members of the order are always a week behind in payment of dues which the lodge has made a custom of accepting and that if the late payment is good when a member is alive it should hold good when he is dead. The court so held and the company must pay the insurence in this case.

The Microscope in the Kitchen.

A celebrated authority on domestic economy has recently stated that a first-class microscope should be a part of the equipment of every well organized kitchen. He would have the cook, before she puts a piece of beefsteak on to broil, examine it in order to see that no "taint or tissue change" exists. He urges that the daily supply of milk be microscopically examined in order to make certain that it is not contaminated by "pathogenic micro-organisms." The average housewife who hears these sage suggestions brought forward, remarks the Chicago Tribune, will be likely to give up the fight with incompetent and ignorant servants. She will feel that before the use of the microscope is made compulsory the women who profess to be cooks should learn something of the proper use of the gas stove. She will picture to herself the average cook with her eyes glued to the eyeglass of a microscope while the steak burns to a crisp and the coffee boils over. She will admit that at some distant date the microscope may possibly play a proper part in the economy of the average household, but she will insist that the proper use of the frying pan, the oven and the gridiron be taught before too much stress is laid on the prompt discovery of microbes and animalculae.

Gen. Maximo Gomez, the Cuban patriot, is a very serious minded man and is rarely known to smile, but an incident occurred in New York on the Fourth of July which made the grizzled veteran unbend a little. The general had just left his hotel and was on his way to dine at the home of a friend. As he approached Sixth avenue a group of boys who were celebrating Independence day in the approved old-fashioned way, decided "to scare the old man," as one of them irreverently expressed it. Placing a giant firecracker just behind the aged Cuban, they touched it off and watched to see Gomez jump. The explosion made almost as much noise as the firing of a seven-inch gun, but "it never touched" the general. With an amused smile he waved his hand toward the urchins and continued quietly on his way.

Experimental chemistry has been having a lively time all over the country, but the reports that come to us inspire the idea that, after all, this may be the silly season for science, as well as for the summer resorts. Grafting snakes is a pretty device, but curing lockjaw with infusions of rabbits' brains savors of some of the prescriptions of the physicians of the middle ages. Our friends, the three witches, might well have added rabbits' brains to their famous decoction, says the Boston Herald, and no doubt some bookworm will unearth this lockjaw remedy from black letter tomes, where it has hidden since the earliest days of magic and witchcraft. There is nothing new under the sun, unless it is wireless telegraphy.

Another curious use of the thermometer is as a toy, or odd ornament. There are made nowadays tiny thermometers, with tubes an inch and less in length. There are tiny thermometers whose mercury tube is coiled and attached to a round backing, the whole thing being no bigger than a campaign button. These odd little thermometers have a pin on the back, by which they can be worn pinned to the lapel of a coat. They are bought mainly by young folks, but older people buy them, too.

The government is only looking into a new phase of alleged fraud in regard to the collection of customs when it is trying to ascertain whether there has not been fraud in connection with the importation of Japanese silks. Thousands of travelers and scores of importers, says the Detroit Free Press, could, if they would, tell of favors they have bought from customs house officers, and the total would be very apt to show that the loss through smuggling is comparatively insignificant.

C. Planitz, of Frankfurt-on-Main, writes to the editor of Appletons' Annual Cyclopedia as follows: "I have the honor to ask you if you do not know the address of young and rich girls, which would like to go marry German noblemen. You will have the kindness and to send me your answer." Now's your chance, you girls with bundles.

The bedroom outfit of a man in Iola, Kan., comprises just two articles, a quilt and an alarm clock. On a recent sultry night, with his outfit under his arm, he went to the park, spread out his quilt on the grass, put the clock near the spot selected for his head and deliberately went to bed.

Secretary of Agriculture James Wilson, who has been personally investigating western crop conditions, says there is an abundance of potatoes to supply the states further east where they have suffered.

A California comedian has just eloped with a girl who will inherit $8,000,000. He confesses that it is the biggest hit he ever made.

Apples, it is said, are going up. Apples were notorious from the first for making trouble.

No Time to Lose

You cannot afford to disregard the warnings of a weak and diseased heart and put off taking the prescription of the world's greatest authority on heart and nervous disorders—

Dr. Miles' Heart Cure.

If your heart palpitates, flutters, or you are short of breath, have smothering spells, pain in left side, shoulder or arm, you have heart trouble and are liable to drop dead any moment.

Major J. W. Woodcock, one of the best known oil operators in the country dropped dead from heart disease recently, at his home in Portland, Ind., while mowing his lawn.—*The Press.*

Mrs. M. A. Birdsall, Watkins, N. Y., whose portrait heads this advertisement, says: "I write this through gratitude for benefits I received from Dr. Miles' Heart Cure. I had palpitation of the heart, severe pains under the left shoulder, and my general health was miserable. A few bottles of Dr. Miles' Heart Cure cured me entirely.

TUB TRUTHS.

A DROP of ink will color a whole glass of water. It is an inch of yeast which makes a pan of bread rise, and a single cake of soap containing unabsorbed alkali can ruin a hundred times its cost in laces and fine embroidery. After all, is it wise to take such risks with common soap? Of course you can get along without Ivory Soap. So can a wagon without axle grease—but it goes hard.

Entered at Butler as Second Class Matter—But First Class Literature.

O. H. DOWNEY, PUBLISHER.

Figures prepared by the Railway Age show that railroad building in the United States during 1901 has been grater than it has been for eleven years previous, the total approximating 5,057 miles of line. In 1890 the total was 5,670 and in 1900 was 4,437 miles. The construction for the year added to the total mileage previously reported brings the total mileage of the country to approximytely 199,-700 miles.

Governor Durbin rejected the annual report of the state soldiers' home at Layfayette because most of the report was taken up by pictures and biographies of the officers and not about the institution affairs. We understond that Col. R. B. McDonal, the democrat member of the board, objected to the picture and biography part of the report, but was overruled by the republican majority of the board.

John Swinton, the old-time newspaper writer, died, last week, in New York City. There were few better writers than John Swinton and none more honest. It was he who, while principal editoral writer on the New York Sun, responded to a toast. "The Independent Press," at a banquet. "There is no such a thing as an independent press," said Swinton, "With the exception of the country papers the press reflects the sentiment of some master. I am selling my soul at $75 a week! We are a set of intellectual prostitutes."

The American Standard calls attention to an omission in the President's message: President Roosevelt's message was a very lengthy one, but he did not have one word to say on pensions. The Union pensioner is a back number under Roosevelt. This item is for the benefit of certain comrads who think that only Republican Presidents can care for the Union pensioners."

Judging from the expressed sentiment of the American people regarding the injustice of the Schley board of inquiry, the rebuke administered by the administration to General Miles is a rebuke to the nation at large, ninety-nine per cent, of which feels just as General Miles does about the matter. In the language of i ncoln the heart of the American people usually "wabble right."

We agree with the Muncie Herald that the democrats of the state should make no mistake in the selection of a chairman of the state committee. He should be a man who would have the hearty endorsement of every active party worker in the state. He should be one who at no time sulked in his tent but who was an active fighter against the common enemy. It does not so much matter what his private opinion on any question was, his fealty to party should be the gauge of his worth in the position of chairman.

Isaac Garrett who is doing the Tanning for the boys who killed their deer in Maine, has turned out some fine Deer hide rugs, etc. He tans them with the hair on or off just as one wishes and makes them soft and good. No need sending anything away to get this work done when we have a man here who can do as well as the best.

In England at the time of the great plague it was reported that no one living in a tobacconist's house fell sick of the disease. "This caused a great demand for tobacco," Herne says in his diary. "I remember that I heard formerly Tom Rogers, who was yoeman beadle say that when he was a school boy at Eton that year when the plague raged all the boys of that school were obliged to smoke every morning, and that he was never whipped so much in his life as he was one morning for not smoking."

Over in Indiana at a church fair they voted a silver mug to the ugliest man present. The victim showed his appreciation of the honor by hurling the mug at a man who made the presentation speech, and teeth flew in every direction when the mug landed squarely on the mouth of the orator of the occasion. Not satisfied, the ugly man swatted the good brothers right and left and created the roughest kind of a rough house. He was finally subdued and carried away by officers of the law. Voting contests are no longer popular with that congregations.

It is very gratifying to patriotic people to note the stand the press has taken with regard to the Schley verdict. Our exchanges with but few exceptions denounce the decision of the majority and those that do not are, as a rule, papers of no standing or so ultra partisan, that they feel that they must approve anything the administration does regardless of merit.

We beg to extend our own sincere congratulations to Prof. Earnest G. Walker, principal of the Butler High Schools, over his entrance into the matrimonial arena. He was married some time ago, we understand, and the HERALD cannot keep the secret any longer, so, Mr. Walker will please pardon us for giving it publicity. It's the nature of a newspaper man's work to print the news. Prof. Walker is an upright young man, with the respect of all, and the ranks of the benedicts have received a worthy addition.

We understand that a gentleman in Garret, who is somewhat versed in star-reading, found that with a chart he could figure out the price of grain two or three days ahead with an accuracy that sent a thrill through the system of those choice friends who were given an inside tip. So confident did all become that the board of trade was about to meet its Waterloo, that they clipped in to the amount of $100 and pursuaded the astrologer to go to Chicago and buck the market. He did so and for several days all went well, But the best laid schemes of men and stars "aft gang aglee" one night the dog star slipped from its socket and fell into the dipper and the seer failed to see it. The next day he laid his money on the wrong side and got swiped for his roll. Two days later a telegram was received in Garrett "Dear friends: There is something wrong with the firmament: send me $4.50 to come home on"

Edward Gigax the new manufacturer of ladders of Archbold Ohio, who has purchased property and intends to locate in Butler will do so at an early date. He will move his family to this city about April 1st. He is a genuine hustler and it is such men that are wanted in Butler.

Miss Leiter was the agreeable hostess to a number of friends Sat. evening honoring Miss Soules, of Somerset Ky., who is spending part of her vacation here. Those present were the, Misses Stone, Masters, Knisley, Abrams, Deckers, Haukins, Brown, Soules and Messers Moltz, Sargent, Beechler, Coats, Murch, Mitchell and Abrams.

L. C. Harding is now the principal stock holder in the Butler Co having purchased the interest held by President Munger. The company will be reorganized in the near future. We congratulate Mr. Harding over his purchase and believe it was a wise move. He will place the company in the front ranks. The Butler Co, is now a home institution in every detail. Success to it.

Taft wasn't conspicuous in the action of those Spanish War, Veterans of Washington who asked Admiral Dewey and Gen. Miles to be fellow-guests of Mr. Roosevelt at a banquet. Dewey and Miles might at least have been given a little more time to forget the undeserved snubs given them by Roosevelt before being asked to meet him in a social way.

When You Need a Druggist We Always Endeavor To Please

The most critical and exacting buyer

S. G. STONE,

The Druggist.

"Here Goes: The jig's up and we have inaugurated a great cut price Sale on fine tailored-to-measure garments.

Some suits one dollar less than formerly, some two dollars less, some three, four, five, six seven, eight nine--yes some ten dollars less.

We have just had instructions from the Royal Tailors, Chicago, U. S. A. advising us of these most marvelous reductions on their superb line of Imported or domestic woolens—Novelty Suitings, fancy Worsteds, fancy Casimeres, Over Coatings and fancy Vestings—the staples as well as the novelties and we offer them to our patrons on the same literal basis.

What do you think of the idea of an all wool suit made to your measure and guaranteed proper in style, fit and make at $13. Better one for a little more, but no matter what the price may be, the best every time that was ever bought for the same money.

During this sale we show 400 different patterns in fashionable goods for men and boys.

Opportunity knocks once at every man's door, listen, and you'll hear him hummering now.

Be Strong

Weakness won't win

The battle of life is a hard one. Prepare for it. If your constitution is good, preserve it. If it is weak, build it up. If your Liver and Kidneys are sound, keep them so. You'll need them in the daily struggle. If they are weak, watch them every hour of the day.

To succeed in these troublesome times, you must have a sound Liver and safe Kidneys; otherwise your blood will be poisoned and your nerves ruined. Diabetes must be unknown. Bright's Disease must be impossible. Your success would be threatened, your health shattered, so you need a safeguard against physical decay. You need good rest at night—steady, quiet nerves during the day. At the first sign of weakness, be warned.

McLean's Liver and Kidney Balm

will bring speedy relief from pain and decay. And if you have neglected these organs most essential to your success, or if other remedies have failed, it will help you, and restart the dormant organs back to safe and sure action.

It will remove, as if by magic, the dull, heavy ache in your back, that hurts you when you stand, sit, walk, or lie down. A bottle at $1.00 will make you a new, well being. Buy it of your druggist. Made by

CATARRH

Catarrh has become such a common disease that a person entirely free from this disgusting complaint is seldom met with. It is customary to speak of Catarrh as nothing more serious than a bad cold, a simple inflammation of the nose and throat. It is, in fact, a complicated and very dangerous disease; if not at first, it very soon becomes so.

The blood is quickly contaminated by the foul secretions, and the poison through the general circulation is carried to all parts of the system.

Salves, washes and sprays are unsatisfactory and disappointing, because they do not reach the seat of the trouble. S. S. S. does. It cleanses the blood of the poison and eliminates from the system all catarrhal secretions, and thus cures thoroughly and permanently the worst cases.

Mr. T. A. Williams, a leading dry-goods merchant of Spartanburg, S. C., writes: "For years I had a severe case of nasal Catarrh, with all the disagreeable effects which belong to that disease, and which make life painful and unendurable. I used medicines prescribed by leading physicians and suggested by numbers of friends, but without getting any better. I then began to take S. S. S. It had the desired effect, and cured me after taking eighteen bottles. In my opinion S. S. S. is the only medicine now in use that will effect a permanent cure of Catarrh."

SSS is the only purely vegetable blood purifier known, and the greatest of all blood medicines and tonics.

If you have Catarrh don't wait until it becomes deep-seated and chronic, but begin at once the use of S. S. S., and send for our book on Blood and Skin Diseases and write our physicians about your case.

A Good Recommendation.

"I have noticed that the sale on Chamberlain's Stomach & Liver Tablets is almost invariably to those who have once used them," says Mr, J. H. Weber, a prominent druggist of Cascade, Iowa. What better recommendation could any medicine have than for people to call for it when again in need of such a remedy? Try them when you feel dull after eating, when you have a bad taste in your mouth, feel bilious, have no appetite or when troubled with constipation, and you are certain to be delighted with the prompt relief which they afford. For sale by S. G. Stone, Druggist.

The Jefferson club of Ft. Wayne is making preparations to properly celebrate Jackson's Day, January 8th, 1902. A number of the leading democrats of the state have been invited to be present and discuss some questions of present interest and the affair promises to be an event of unusual importance to the democracy of Fort Wayne and the 12th district.

To Cure Ga Grippe In 24 Hours.

No remedy equals Warner's White Wine of Tar Syrup for this terrible and fatal disease. If taken thoroughly and in time, it will cure a case in 24 hours, and for the cough that follows La Grippe it never fails to give relief. Price 25c and 50c. Geddes & Harding.

Business men who understand themselves are now busily engaged in settling up accounts. The importance of such settlements can't well be overestimated, says the South Bend Times. Everybody should endeavor to get their accounts balanced by the end of the year. There is a good deal of force in the old adage "Short settlements make long friends." It is decidedly bad policy to let accounts stand open any great length of time. Every individual should know exactly how he stands and govern himself accordingly.

PERSONAL.

The wheat prospects are good at present. There was enough snow during the recent cold spell to keep the plant from freezing. The plant is now said to be in excellent condition, and there is nothing to fear unless there should come dry cold weather.

LaGrippe coughs often continue for months and sometimes lead to fatal results after the patient is supposed to have passed the danger point. Foley's Honey and Tar affords positive protection and security from these coughs. Geddes & Harding.

N Jackson, Danville, Ill, writes: "My daughter had a severe attack of la grippe and a terrible cough settled on her lungs. We tried a great many remedies without giving relief. She tried Foley's Honey and Tar which cured her. She has never been troubled with a cough since." Geddes & Harding.

President Ramsey, of the Wabash, predicts that the company will have to double track its line before five years. He says that after a most careful review of the freight situation at present, with future possibilities, he cannot figure out an end to the present congestion and blockades unless other lines come in to help relieve the situation.

A minister was calling on one of his parishoners where there had been a recent olive branch added to the family of the masculine gender possessed of remarkably good lungs with a strong predilection for using them. The mother began making excuses. "You shouldn't mind the baby's crying," remarked the pastor, "it strengthens his lungs." "Yes' replied the woman, "but it weakens his father's religion."

At six o'clock Wednesday evening at the home of the bride's parents, Mr and Mrs. Wash Farley, in the east part of town, occured the marriage of their daughter, Lula, to Clyde Oberlin of Butler. The cermony was performed by Rev. N. Paul Barton in the presence of father, mother and brother of the bride. The newly married couple left at once for Butler where they are at home to their many friends. Their many friendr here will all join in wishing them a long and happy wedded life. Hamilton News.

A man in Indiana named William Crunk had a lot of mules for sale, but refused a big offer for them from a British agent. He didn't want his mules to assist in the warfare against the patriots of the Transvaal and Orange Free State. The Democrat would be willing to trade Mr. Hay off for Mr Crunk, who has patriotism and pride of country, two important attributes in a secretary of state. Mr. Crunk may not have as much book learning as Mr. Hay has and he may not have acquired polish at the court of St. James; but he knows that selling his mules to the British would be giving aid and confort to the men who have been trying for a long time to destroy two republics.

Now that Christmas is past, and Santa Clause has made a home run, the candidate will come to bat. There is a difference between the candidate and Santa Clause. The old gentleman from the north always makes a home run, but about two thirds of the candidates simply fan wind and go down on three strikes.

The postoffice department has decided that all notices of guessing, drawing, grabbing and other contests involving the element of chance are lotteries and any newspaper or circular telling of them as an announcement cannot pass through the mails The unfeeling official will not even grant a respite when the offender is a church society.

Frank Treadwell, Bennett, Ia., was troubled with kidney disease for two years. He writes: "I had taken several kinds of kidney remedies, but with little benefit. Finally I tried Foley's Kidney Cure. The first bottle gave immediate relief and three bottles cured me permanently. I gladly recommend this wonderful remedy." Take no substitute. Geddes & Harding.

A Missouri editor evens things up with a patron of a foreign job printing office in the following manner after a year's waiting: One day he received a note stating that a son of seemingly rare intelligence had arrived at their home and the father would be delighted to have special mention made of the affair. The editor camly read it and then returned it with this postscript: "Have that published where you had your wedding cards printed."

Cuba has held her first presidential election. On Tuesday her legal voters chose presidential and senatorial electors governors of provinces and members of the provincial councils. The meeting of the electorial colleges will take place in February. The voting for President and Vice President will occur on the 27th day of that month, but as all the electors are known to be Palma supporters this action will amount simply to a ratifycation of the popular will.

While in conversation with P. A. Randall at Fort Wayne yesterday he informed us that the inter-urban line from there to Garrett and Auburn and Waterloo will undoubtedly be built during the coming summer and fall. The company recently formed at Fort Wayne are in earnest and have abundant capitol and are fully convinced that the line will be a paying venture from the first. The great mass of people along the line are anxious for its construction and there is no good reason for long delays.—Courier.

The medical science has of late been making rapid progress in its fight on disease and death is evident from the material lowering of the general death rate been lowered, but official statistics on the subject show that some of what were formerly considered to be the most formidable and virulent forms of disease have now been deprived of the greater part of their terror. Their approach used to be veiwed with alarm and panic and the most skillful physicians shrank from a combat with them and virtually admitted their impotency to deal with them effectively. Now the presence of these diseases causes little or no alarm. The most virluent cases can be handled with the greatest ease, efficiency and success.

Aid For the Engineer.

A prominent engineer who has ha years of experience, in talking of the recent calamities, says that the men who take to many drinks can be detected and the men who are short sighted, color blind or deaf can be singled out, but the fellows who will forget orders at critical times are hard to pick out. He expressed a belief that a great many of the complicating orders to the engineer, should be eliminated. A modern engineer must remember extra stops, slow orders, hot boxes, defective pins and injectors and a thousand different signals. Besides this he is usually required to run over a divisions of 200 miles, which is bad enough with only one orders. The man in the cab is after all the important factor in safety and to crowd his memory is worse than folly.

Mr. Frank T. Howard, of New Orleans, has just donated to that city a magnificent primary school. In his presentation speech he said "The greatest need to day in our large cities is primary education, the education of the masses, the education of the common people, who are the brawn and sinew of the community."

It is related of the late Eugene Field that he once borrowed $50 from the Washington correspondent of his paper. Mr. Wm. E. Curtis was in the home office and Field apologized for not having repaid the loan. The next morning Mr. Curtis discovered in Field's column of the paper the announcement "Mr. William E. Curtis, our talented and versatile Washington correspondent, is in the city looking after his permanent investment." Needless to say the investment remained permanent.

NOW LOOK OUT!

"Take care of yourself," say our friends. "I'll try to," we answer. We do take a little care, yet in spite of warm clothes, rubbers and mackintoshes, an army of people were bowled out by pneumonia and other lung and chest diseases last winter. They caught cold, neglected it, let it fix upon them, were torn by coughs, choked by inflammations and congestions, wasted by fever, tired out by pain and then gave up the fight. The hour you realize that you have a cold on the chest, place a Benson's Porous Plaster where the pain or oppression is felt. If you think two are needed make it two. No harm if you were covered with them. They act quickly and prevent the engorgment of blood in the organs. In this way—with ordinary caution as to exposure—you will break up the cold and avoid a serious sickness. No other applications, or any other form of treatment, will accomplish this as certainly and speedily. Benson's Plasters have a distinct and positive action and are curative to the highest degree. Use them with the same confidence for coughs, muscular rheumatism, the grip (back and chest) and all similar ailments. Women, who are chief sufferers from cold weather complaints, should keep these plasters always within reach. Get the genuine. All druggists, or we will prepay postage on any number ordered in the United States on receipt of 25c. each. Seabury & Johnson, Mfg. Chemists, N.Y.

"Some time ago my daughter caught a severe cold. She complained of pain in her chest and had a bad cough. I gave her Chamberlain's Cough Remedy according to directions and in two days she was well and able to go to school. I have used this remedy in my family for the past seven years and have never known it to fail," says James Prendergast, merchant, Annato Bay, Jamaica West India Islands. The pains in the chest indicate an approaching attack of pneumonia which in this instance was undoubtedly warded off by Chamberlain's Cough Remedy. It counteracts any tendency of a cold toward pneumonia. Sold by S. G. Stone, Druggist.

STAFFORD.

Miss Anna Hull returned home from Michignn the latter part of last week where she spent a few days visiting relatives and friends.

C. S. Arford has sold part of his farm He still has the same number of acres because what he sold went in the form of balled hay.

Our schools are all in session again after a two weeks holiday vacation.

For about 6 months there has been no bridge at the foot of Gypsy hill across Big Run and many of the people are much vexed about it. Some say we never had such a condition of things since the stream was first bridged. Again there is a report that our county has no money for bridge purposes. Of course this report is false if the published statement concerning the amount of surplus in the treasury is true. The people generally do not know where to place the blaim for the delay in building a bridge at the place stated. Perhaps commissioner Gunsenhouser can give the public some light on this matter that will peacify the people. If this is not bommed to the wase basket it will please many persons.

SCARED THE WILD BEASTS.

Travelers Saved from Lions by Imitating the Howls of Wolves.

M. Foa, the French explorer, says that lions have a wholesome fear of African wolves, which hunt in packs and do not scruple to attack even the lion. There are terrible battles, in which the lion succumbs to numbers and dies fighting. In connection with the lion's fear of wolves, M. Foa tells a story from his own experience.

It was a very dark night, so dark that trees could not be distinguished until the travelers were close upon them. Lions prowled about the party, one of them roaring from a point so close as to have an alarming effect on the nerves.

Reaching a tree, the men found one of their comrades, with rifle cocked, peering into the darkness, trying to discover the whereabouts of the animals, which could be plainly heard walking among the leaves. A second man was trying to relight a half-extinguished torch. Still the lions could be heard coming and going in the darkness.

At this point the native servant whispered the advice to imitate the cry of wolves in the distance. The party at once began barking and crying "Hu! hu! hu!" in an undertone, as if the pack were still at a distance, while the man at the camp made the same well-imitated cry.

The effect was instantaneous. There was the sound of a rapid stampede across the dry leaves. The lions decamped in a panic, driven off by the supposed approach of a pack of wolves. For the rest of the night the party was undisturbed.

A GREAT LOVER OF CHILDREN

Was Gen. Marmaduke, for Four Years Governor of Missouri.

"Governor Marmaduke was a single man," said Uncle Jose Fuller, an old-time resident of Jefferson City, who was telling the other day of some of the characteristics of Missouri's Governors. "He was a graduate of West Point, stood six feet three, and had a fine Confederate record as a soldier. Governor Marmaduke didn't mix none in society to speak of, and there were mighty few shindigs for grown-up folks at the mansion during his time, but it was lively around there jist the same. The Governor was simply crazy about children. He loved 'em all until they got into long dresses and trousers, and the children had the run of the house while he was in office. On festival occasions like Jackson's birthday, which is always celebrated in Mizzoura, the Governor gave a children's party, at which he was the only adult present. The children 'bout ruined the billiard table an' the carpets in some of the rooms, and played hob with the furniture, but they were the Governor's friends, an' that settled it.

"I remember once meeting Governor Marmaduke on his return from a trip to New York. He told me he had bought a magnificent picture to hang in the mansion; said the place needed a little artistic toning up. Then he showed me the picture, and what do you think it was? Gen. Washington? No. Jubal Early? No. Col. Mosby? I reckon not by a jugful! It was a copy of that familiar painting of a couple of little children wearing paper soldier hats, one playing a trumpet and the other beating a drum. The Governor thought it was one of the finest scenes ever depicted by an artist. It went right to his great big heart to see those children playing at being soldiers, all innocent of the horrors of battle, such as he had witnessed during his stormy career in the Civil War."

WAYS OF TWO CHIEFTAINS.

Roberts and Kitchener Contrasted by A War Photographer.

A photographer who went to the front on behalf of the leading illustrated journals and has just returned related an anecdote the other day which very aptly illustrates the different characters and methods of those two great English generals, Lord Roberts and Lord Kitchener. He (the photographer) was provided by his employer with a special tarpaulin-covered cart and a couple of mules for the transport of his apparatus, and, needless to say, the name and style of his paper was writ large all over it. During those fierce days at Paardeberg preceding the surrender of Cronje there was a big run on the ambulance wagons, of which, owing to the rapid British advance, there were none too many. Proceeding cautiously one day with his cart and mules to a spot faverable for snapshotting a few pictures, the artist was suddenly confronted by an orderly who signed to him to stop, and then spoke as follows: "Lord Roberts presents his compliments and would be glad of the immediate loan of your cart for a couple of hours to convey a wounded trooper to the rear."

Of course there was only one possible answer to such a request. The photographer hastily climbed down and evinced in the rapidity with which he undid his tackle how much real pleasure it gave him to comply. But that was not all. At the expiration of two hours the orderly again galloped up and said: "Lord Roberts presents his compliments and would be glad if you would extend the loan of your cart for another two hours." Absolutely flushing with pleasure the artist could do nothing but blurt out his readiness to lend his cart to so courteous a commander for just as long as he should be pleased to retain it. Promptly at the expiration of the time named, however, the cart and mules were brought safely back, along with an expression of thanks from the commander-in-chief for the assistance rendered him.

But now mark the difference in the case of the "man of iron." The very next day a precisely similar emergency arose. This time, however, Lord Kitchener himself rode up, accompanied by a troop of lancers. Acting evidently upon orders just given, two of the troopers sprang from their saddles, one of them seized and held the mules and the other proceeded with the utmost dispatch and without so much as a look at the astonished artist to undo the fastenings at the back of the cart and unload the tackle. "What is it, my lord?" gasped the artist, helplessly, from the box seat. "Quick, man, get down and lend a hand. Sorry, but we must commandeer you for ambulance," was all the reply he received. And before he could quite realize the situation the two mules had been "outspanned," his traps strewed about the ground and his cart attached to two mounted troopers and was thundering over the veldt. As to when, where or how it would be returned to him was left entirely to his imagination, as Kitchener and his staff immediately galloped away without vouchsafing a word.

EVARTS GOT HIS FEE.

His Unanswerable Argument When Reduction Was Intimated.

From a story related by a New York lawyer it can be inferred that the late William M. Evarts held his services at a good round figure. It also seems that he was clever in avoiding any reduction in his charges when the time for payment came. The lawyer says, "I was employed once in a suit of considerable importance in which my client was a lady. To insure success it was thought advisable to secure the services of distinguished counsel, and accordingly I was authorized to employ Mr. Evarts. After talking over the matter with him, on rising to go, I said to Mr. Evarts that it would be the proper thing to give him a retainer, and asked him for what amount I should make out a check in his favor.

"'Oh,' said he, 'I guess $1,000 will suffice,' and thereupon I tendered him the paper for that sum.

"Not long afterward the suit was settled to our satisfaction, and again I called on Mr. Evarts, this time to pay him in full for his services, which had not been of an arduous nature.

"'How much do we owe you?' I said.

"'Call it $5,000,' he responded, without a moment's hesitation. I thought this a little steep in view of the circumstances, and I started in with a mild protest.

"'You know, Mr. Evarts, that you've had $1,000.'

"'Yes,' he said, with a dry smile, 'but I've spent that.'

"This was an unanswerable argument, and all further effort at reduction ceased."

I Can do all my own Work

"I feel it my duty to tell you what your medicines did for me," writes Mrs. Blanche Marshall, of Whiting, Jackson Co., Kansas, Box 139. "I was severely afflicted with kidney trouble and female weakness. In less than three months the trouble became so bad I could hardly walk around the house. I suffered almost everything. Seeing your advertisement in our paper concluded to write Dr. Pierce. After receiving your kind advice I immediately began taking your medicine. After taking two bottles of 'Favorite Prescription' alternately with two of 'Golden Medical Discovery,' and using one box of 'Lotion Tablets' I am entirely cured. I can do all my own work without any trouble. I take great pleasure in recommending Doctor Pierce's medicines to all suffering women."

REV. NEIBLE INSTALLED.

Rev. E. E. Neibel was installed as pastor of the Lutheran church Monday evening. Rev. C. E. Rice of Elkhart, President of the northern Indiana Synod, performed the installation ceremony and delivered an excellent address to the congregation as to their duties to their new Pastor, while Rev. A. McLaughlin of Goshen, spoke of the duties of the Pastor to the people. Both addresses were timely and pleasing. When a boy Rev. Rice was a resident of LaGrange, his father being the pastor of the Lutheran church here. Ability and merit have placed him in the exalted position he now occupies, and his former acquaintances rejoice at his success. Rev. Neibel, the new pastor, enters upon his duties with the good will and love of his people and we believe that far reaching good will be the result of his selection for this pastorate.—LaGrange Call.

Euncoed.

When on old and valued subscriber of this weekly effort-to-please called on Tuesday morning and paid his dues, we thought fortune had concluded to smile upon us for a change instead of continually frowning. After he departed with our grateful thanks we took the coin from our pocket in order to feast our eyes on it; and our gladness turned to sadness when we discovered that it was a Spanish silver coin, the size of a dollar, worth five pesetas over in King Alphonso's domain, but only good for about 53 cents here. One side of the coin bears the picture of a woman's head and the other side is decorated with a crown and several other emblems of kingly sovereignty. The coin may have been a pocket-piece or a souvenir that our subscriber carried as a cure for rheumatism and desires to keep, and acting upon this theory we will hold it for a week just as a favor to him, even though we starve to death before the week is out. He may call at any time and get it by leaving a real dollar in its place.

The Chruch of Christ will begin a series of meetings about the last of February with Rev. A. P. Cobb of Decatur, Ill., as evangelist Mr. Cobb, is very able man and quite successful in his chosen calling. He has held meetings in some of the larger centers of the country such as New York City, Scranton and Pittsburg, Pa., Cincinnati, O., Lexington, K., and DesMoines, Ia.

Be sure to hear him when the meeting begins.

A Good Cough Medicine.

Gentlemen:—After using five of your road levelers last season I am pleased to state that we are well pleased with them. We can keep our roads in better shape for at least one-third the cost of the old way of using six horses. I think the Hoosier Leveler will save enough in expense to pay for it in five days. We will not use the heavy grader any more for dressing up our roads.

The New Wabash.

The new accommodation train was run over the Butler line yesterday and back without the slightest bit of trouble and the line was formally opened. Quite a number of guests were taken over the line and all expressed a belief that the road would soon be in perfect condition for the big business it will soon have to handle. Whether this train will be a permanent thing after the big ones are put on depends entirely upon the people along the line take kindly to it it will be kept in the service and the road will have fourteen passenger trains daily.

Superintendent Gould was in the city yesterday in connection with the opening of the Butler line to the big trains. He stated that the exact date of this important event had not been determined, but that it would surely come off some time next week. It depends entirely upon the circumstances. The day which ever is decided upon, will be memorable for the local Wabash people and the people of Fort Wayne generally.—Ft. Wayne Journal.

L. O. T. M. Install.

The installation of the newly elected officers of the Ladies of the Maccabees took place in the lodge hall last Friday evening, in the presence of the members and invited guests. Lady Coats, very impressively acted as Installing Officer. Great credit is due all those taking part in the installation ceremony; their work was performed in a competant manner, showing that they had been carefully drilled.

Lady Mason retires, after a years successful work, with a good record and is ably succeeded by Lady Stevens.

A most excellent program had been prepared and was enthusiastically received. There was not a dull number. At the close an elaborate repast was served, those present being seated at small tables.

NOTES

The Male Quartette may not know "chicken from turkey" but they know how to cater to the wants of their hearers. They never fail to please.

Little Helen Garber and Zura Shumaker delighted those present by reciting comical selections and were both recalled.

The gentlemen appearing in the tableau, performed their parts so well one would think they might have "been there" before. This we think is a misnomer.

The music for the evening, vocal and instrumental, was furnished by the Misses Miller, Harger and Rudd, Mrs. Urie and Mrs. Melroy and the Male Quartette. The various selections brought forth liberal and hearty applause.

The tableau's were beautiful and those taking part acquitted themselves admirably.

All in all it was one of the most enjoyable events of the season.

"Some time ago my daughter caught a severe cold. She complain ed of pain in her chest and had a bad cough. I gave her Chamberlain's Cough Remedy according to directions and in two days she was well and able to go to school. I have used this remedy in my family for the past seven years and have never known it to fail," says James Prendergast, merchant, Annato Bay, Jamaica West India Islands. The pains in the chest indicate an approaching attact of pneumonia which in this instance was undoubtedly warded off by Chamberlain's Cough Remedy. It counteracts any tendency of a cold toward pneumonia. Sold by S. G. Stone, Druggist.

Bob Barr Talked 12th District Politics.

The Indianapolis News of a recent date credited R. P. Barr, a well known republican of Kendallville, with the following concerning 12th district politics: Matters political are badly mixed in our section. The republicans lost ambition when we failed, by only a few hundred votes, to carry the district for Bob Hanna for congress two years ago. Hanna is a young fellow, bright and clean, with a great personal following, but Jim Robinson beat him and at the same time made a dead letter of the old two terms and quit rule, which had so long obtained in our district.

This year Dr. McGoogan, of Fort Wayne, revenue collector, is a candidate for the republican congressional nomination, and the only one to dispute the honor with him is John Gilham, county auditor at La Grange. McGoogan is forty is as bright as a new dollar, and a strong man. He is greatly favored by his geographical situation. Gilham is about the same and is probably unexcelled in republican ranks as a hustler after votes.

But Jim Robsnson is the hardest campaigner our country has ever seen. It is an absolute fact that he never ceases to be a candidate for congress. As soon as he is elected he begins the work of getting the next nomination and election. This year Judge Hench is a candidate for the democratic nomination, but can hardly be successful.

The publishers of "The American Boy," Detroit, Mich., have secured from Will Levington Comfort, who was the youngest newspaper correspondent in the Philippines at the time of the death of General Lawton, an exciting story, based upon fact, relating the experiences of the youngest correspondent in General Lawton's army. The hero of the story was the first of the newspaper correspondents to cable to America the news of the death of General Lawton at the hands of the insurgents. By an almost superhuman effort the boy correspondent, who was with the army at the time of the shooting, made his way through the enemy's country to the cable office and flashed the news to America three hours before any of the other correspondents got posession of the cable. It was a notable achievement on the part of a boy. The story begins in the February number of "The American Boy,"

None but the initiated know the accuracy required in printing office. The average reader who detects a mispelled word or a letter upside down feels that his mission on earth is not fully accomplished till he has called the attention of the overworked editor to the glaring defect. He does not notice the thousand and tens of thousands of letters that are in the right place nor the multitude of words correctly spelled, but his eagle eye is glued on the one that is out of place. So it is with our deeds. Man does a thousand good deeds and no attention is paid to them, but if he makes one mistake it is flashed all over the world. A life time may be sbent in building up a reputation that may be wrecked in a moment. The world is a harsh critic, exacting to a fault, and if the Father of all does not temper justice with mercy, we may fail to reach heaven.

REMARKABLE CURE OF CROUP.

I have a few words to say regarding Chamberlain's Cough Remedy. It saved my little boy's life and I feel that I cannot praise it enough. I bought a bottle of it from A. E. Steere of Goodwin, S. T, and when I got home with it the poor baby could hardly breathe. I gave the medicine as directed every ten minutes until he "threw up" and then I thought sure he was going to chock to death. We had to pull the phlegm out of his mouth in great long strings, I am positive that if I had not got that bottle of cough medicine, my boy would not be on earth today.—Joel Demont, Inwood, Iowa. Practical Education Needed.

A prominent writer asserts that "without education in these days success is impossible." That may be true, but an ability to use an education, the power to be practical and energetic is worth more to the person who would succeed than all the cramming that ever took place in a college.

An education in the ordinary acceptance of the term means filling the mind with a knowledge of history, mathematics, literature, philosophy and similar subjects from the great fund of general information. But suppose that great storehouse, the mind, becomes through the habit of study a sort of a receiving department from which the student through close application to the acquirement of knowledge loses the power to impart it or put it to practical use? Of what benefit is this education to such a person? And there are many of them in every community.

The first and most important duty in the education, is to learn to be practical, to put information to practical uses. A gold mine that cannot be entered is of little value. A jewel that cannot be displayed is without price. The man with but little education and a large fund of common sense will outstride in the race for success the one who is filled with knowledge and does not know how to use it.

Teach children how to live before stuffing them with useless information It is better to know the weight of a loaf of bread than the distance to the moon. Practical education is what is most needed.—Elkhart Truth.

What has become of the old fashioned man who wore a paper collar and kindly brought the printer a jug of cider when he came to town at the last season of the year, and later on about hog-killing time, brought the editor enough backbone and tenderlion to last a week? says an exchange. "It was the same old fashioned man who drank sassafras tea in the spring to thin his blood and wore big suspenders which he called "galluses" knit from wool from the backs of his own sheep. He was the man that owned the big muzzle-loading rifle that had a whore bored in the stock to keep tallow in to moisten the patches when he got up at 4 o'clock in the morning and went out to "roost" the turkeys. The same old fashioned man gathered hickory nuts enough to make a wagon-load brought them to town and exchanged them for winter supplies. He pinned his weather prognostications to the goosebone and corn husk and his faith therein was generally justified. He weaned his calves and planted his potatoes according to the complexion of the moon, and he remembered Peter Cartwright and his famous doings. He lived in a "settlement" and his girls "set up" in the kitchen with the young men who "shyed" around after them. He carried his money in his weazel skin purse and paid two dollars in advance for his county paper. He lived all over Indiana and his name was legion but he is gone and little is known either of himself or family."

This is supposed to be an age of intellectual improvement, yet there are people who still believe that saucer were made to drink out of.

None but the initiated know the accuracy required in printing office. The average reader who detects a mispelled word or a letter upside down feels that his mission on earth is not fully accomplished till he has called the attention of the overworked editor to the glaring defect. He does not notice the thousand and tens of thousands of letters that are in the right place nor the multitude of words correctly spelled, but his eagle eye is glued on the one that is out of place. So it is with our deeds. Man does a thousand good deeds and no attention is paid to them, but if he makes one mistake it is flashed all over the world. A life time may be sbent in building up a reputation that may be wrecked in a moment. The world is a harsh critic, exacting to a fault, and if the Father of all does not temper justice with mercy, we may fail to reach heaven.

When one thinks more highly of themselver than they ought, it should not be forgotten that society levies an assessment upon the fictitious value, and it may be hard to pay the requirements when called upon.

Dr PRICE'S CREAM BAKING POWDER

Dr. Price's Baking Powder supplies a pure, wholesome leavening agent, which makes the biscuit and cake of highest healthfulness at medium cost and protects the food from alum, which is the greatest dietary danger of the day.

The foremost baking powder in all the world.

PRICE BAKING POWDER CO. CHICAGO.

NOTE.—Alum baking powders are low priced, as alum costs but two cents a pound; but alum is a corrosive poison and it renders the baking powder dangerous to use in food.

When Jesus wanted a good church worker and a piller on which his kingdom might lean he sought a humble fisherman. When we hunt for a man to give the church strength and the gospel a good standing in town we hunt for a banker or a capitalist, or a big business man. Jesus looked for a big heart and a big brain. We seek a full purse and a commercial certificate.

'Twas a False Alarm.

I have used your Dr. Caldwell's Syrup Pepsin and can truthfully recommend it. Some four years ago doctors told me that I had Bright's Disease. I was laid up three months and nothing I used helped me and no food would stay on my stomach. I used one bottle of your Dr. Caldwell's Syrup Pepsin and food would stay on my stomach and I craved something to eat. I got well. There was no Bright's Disease about me. It was a "false rumor." Ever since I have recommended Dr. Caldwell's Syrup Pepsin to friends and strangers. It is just splendid. I have full confidence in it.—Geo. F. Benedict, 639 West King St., Decatur, Ill. CATARRH

Catarrh has become such a common disease that a person entirely free from this disgusting complaint is seldom met with. It is customary to speak of Catarrh as nothing more serious than a bad cold, a simple inflammation of the nose and throat. It is, in fact, a complicated and very dangerous disease; if not at first, it very soon becomes so.

The blood is quickly contaminated by the foul secretions, and the poison through the general circulation is carried to all parts of the system.

Salves, washes and sprays are unsatisfactory and disappointing, because they do not reach the seat of the trouble. S. S. S. does. It cleanses the blood of the poison and eliminates from the system all catarrhal secretions, and thus cures thoroughly and permanently the worst cases.

Mr. T. A. Williams, a leading dry-goods merchant of Spartanburg, S. C., writes: "For years I had a severe case of nasal Catarrh, with all the disagreeable effects which belong to that disease, and which make life painful and unendurable. I used medicines prescribed by leading physicians and suggested by numbers of friends, but without getting any better. I then began to take S. S. S. It had the desired effect, and cured me after taking eighteen bottles. In my opinion S. S. S. is the only medicine now in use that will effect a permanent cure of Catarrh."

SSS is the only purely vegetable blood purifier known, and the greatest of all blood medicines and tonics.

If you have Catarrh don't wait until it becomes deep-seated and chronic, but begin at once the use of S. S. S., and send for our book on Blood and Skin Diseases and write our physicians about your case.

A Good Recommendation.

"I have noticed that the sale on Chamberlain's Stomach & Liver Tablets is almost invariably to those who have once used them," says Mr. J. H. Weber, a prominent druggist of Cascade, Iowa. What better recommendation could any medicine have than for people to call for it when again in need of such a remedy? Try them when you feel dull after eating, when you have a bad taste in your mouth, feel bilious, have no appetite or when troubled with constipation, and you are certain to be delighted with the prompt relief which they afford. For sale by S. G. Stone, Druggist.

The road is being ballasted and put in shape as fast as the rails are laid and will be ready to open for traffic next week, From the Maumee river to St Joe there is not the least deviation from a straight line and it is said that trains on the Baltimore & Ohio can be seen crossing the right-of-way for a distance of over twelve miles.—New Haven news.

The ugliest and most dangerous word in the English language is "gossip" It is a curse to mankind and an abomination in the sight of God. The law-makers of our grand and glorious republic ought to provide measures against it with a severe punishment upon those who use it. It is worse than theft, arson, blasphemy or expectorating the juice of tobacco on the sidewalks. Yet many of those who are rigidly opposed to these very courteously use the means of "gossip" to express themselves in public and private conversation Shame on the gossiper!

He was a candidate, sleek, smiling and talkative. He was talking with a man with a long face and was pouring out sympathy by the bucketful. The downcast man had been telling how the lines had fallen to him in unpleasent places. His wife's sister had the mumps, his brother had been troubled with the grip for the past six weeks, and a second cousin over in Ohio had the toothache and rheumatism about half the time. And the candidate sympathized with this tale of woe, and tried to speak cheering words to the forlorn voter who was looking at the world through blue glasses. A little later, the candidate ran up against a doctor, who was also a voter. To the question of "How is business?" the doctor had replied that there was none, and that trade was dull. And again the candidate was called upon for sympathy, this time because the general health of the community was so distressingly good. Yea, varily, the candidate must be a man of many words and numerous phases of feeling.

There seems to be a misunderstanding about the sale of return tickets over the Lake Shore, The Elkhart Review says that the order issued does not wipe out the practice but restricts the territory in which the tickets can be used. A farmer told us recently that he had an extra good hired hand, so far as farm work goes, but the fellow has a bad habit, while at his meals, of licking his knife and then sticking it in the butter. The habit said the farmer is very annoying to the family and will probably result in the hired man being invited to hit the pike some morning in the near future. Licking one's knife at the table is not considered good manners and the man who will so far ignore the laws of good breeding as to do so should be swatted between the eyes with a sad, disheartened biscu t or a dark bay sausage.

An example in mathematics is causing considerable debate among a number of our exchanges. The question is this: A man bought thirty five cents worth of fruit cans; he gave the clerk a dollar and she gave him back sixty-five cents. A little afterwards the man told the clerk that he had given her a bad dollar and if she would give it back to him he would give her good money in return. She gave him the bogus dollar and he gave her two fifty cent pieces. Now the proprietor thinks that he was beaten in the deal, and others think the man with the bogus dollar lost fifty cents. How do you figure it out; did either lose anything? If so, which one and how much?

That class of individuals whom we are told are soon parted from their money have a great chance just at present. There are about twenty-five Texas oil companies offering to sell stock in "gushers" at from 5 to 50 cents a share. Stock in legitimate oil companies don't go begging for buyers that way. If you have more money than you know what to do with and must fool some of it away, buy gold bricks. They can be used to prop the door open, or throw at the cats, or to give to the baby to cut his eye teeth on. Town lots in Florida are a better investment, even if there isn't a town within nine miles of the place. Starting a newspaper is another good way of getting rid of any loose change that may be burning hol s in your pocket.

AS OTHERS SEE US.

While in Butler recently, we had the the pleasure of calling at the Herald office and there found one of the busiest places in town. S me people, you know think an Editor has nothing to do but to write the news. Not so, for he has to know everybody, see everything that transpires, know everything, get after his delinquent subscribers, run the office run the Press, play the "Devil" and a and a thousand other acts, but Downey is equal to the emergency as we said the Herald office was one of the busiest places we visited. Seven laborers are employed working day and night, they report that a large number of jobs waiting. We found stacks and stacks of unfinished catalogues and other jobs. Downey excused himself from conversation and remarked, he scarcely had time to breathe.

Butler is at the dawn of a boom; right in the procession the Herald is in line to push it along keep your eye on Butler.

The of Mr. Phillips.

Young Mr. Phillips continues to afford the world instructive object lessons as to the dangerous fascinations of grain gambling. After his failure of last August, when an audacious effort to manipulate the market closed with a receiver in charge of his company, Mr. Phillips had the exceptional good fortune to get upon his feet again. With the ability he had shown, with the confidence and good will of the farmers and country dealers and with certain attractive plans for the extension of his deals he had bright chances for building up a substantial and legitimate business. Had he confined himself to careful trading in actual grain apparently he might have made himself a permanently influential factor in the market, with reasonable chances for large profits. Instead, he thought he saw another opening for himself and his customers and proceeded to hoist various cereals and otherwise disport himself. A sudden turn in the market found him powerless to meet his obligations and he is again face to face with ruin, with the additional disadvantage that this is a second experience.

Other young men who may be ambitious to become "Napoleons" in fashionable varieties of gambling would do well to note the obvious lesson. The fame achieved by Mr. Phillips doubtlesss has rendered many persons feverish for gains derived from guessing the market or controlling it. His later experiences should be useful to them in cooling their blood. The old-fashioned method of making money by giving a fair return for it in labor or goods still has advantages which are not to be sneezed at

If you want something in the line of business property we can fill you out with some of the best in town at prices to make some money for you.—Webster & Wartenbe.

As a matter of fact, says an exchange there is not a shadow of excuse for profanity in any relation or exigency of life. It adds no force or power to speech. It is the confession of vocal impotency in the man who uses it. The blustering, boviating blasphemer who flies into a rage and pours forth a stream of profanity upon all occasions is a man that is not to be feared. When it come to a question of vocal dynamics the man whose speech is as clean and sharp as a hound's tooth will inspire most fear and respect.

The Americans have the reputation of being the most profane people on earth. In no other land or clime does the common speech reek with the polution of profanity as here. The Japanese, the most docile, sweet-tempered artistic and ingenious people on earth never poison the atmosphere of the "flowery kindom" with profanity. There are no oaths or cuss words in the Japanese language.

A traveler in England, Germany or France very rarely hears the name of Deity taken in vain. The continental languages do not appear to lend themselves to such vile and variegated profanity as the Anglo Saxon tongue is capable of.

Profanity is a vile, disgusting and useless habit. It is the one abhorrent blight upon a languge that is destined one to become the common vehicle of all human thought. Stop it!

For Pneumonia.

Dr. C. J. Bishop, Agnew, Mich, says: "I have used Foley's Honey and Tar in three very severe cases of pneumonia with good results in every case." Beware of substitutes. Geddes & Harding.

HE FEARED HE HAD LOST

When Wu Ting Fang, the famous Chinese Minister to Washington, irritable and somewhat forgetful from a severe cold, missed one day from the front of his cap the immense diamond he always wears there, he was dreadfully frightened. A friend pointed out that the statesman had inadvertently donned his turban wrong side before, and that the diamond was safe in the rear. Had Wu Ting Fang been wearing a Benson's Porous Plaster on his chest or back to cure his cold, he never would have doubted its location. He would have felt it doing its work,—warming and making flexible the torpid muscles, extracting the pain and soreness, promoting the free circulation of the blood, stimulating the skin and lungs to proper action, and so *dissolving* and banishing the malady. Thus we perceive, beloved friends, that

THE BIG DIAMOND ON HIS HAT

while a pretty thing to look upon, was of no practical use. But Benson's Plasters are supremely useful. They relieve and cure gout, rheumatism, neuralgia, colds on the chest, lame back, etc., so quickly and completely as to make you wonder how it can be. Better *now*,—well *to-morrow*; that's the way they work. Get the genuine. All druggists, or we will prepay postage on any number ordered in the United States on receipt of 25c. each.

Setting a Prisoner Free.

A man with rheumatism is a prisoner. His fetters are none the less galling because they are envisible. To him Perry Davis' Painkiller comes as a liberator. Rubbed well into the swollen, stiffened joints it not merely drives away the pain, it makes the muscles pliable so that the prisoner becomes a free man. There is but one Painkiller, Perry Davis, 25 and 50 cts.

Something New.

A new graphophone for $25, which uses both large and small cylinders is the latest development in the talking machine field. This new instrument has been provided to supply a demand which has manifested itself ever since the large cylinder appeared. Its posessor, while having only one instrument, costing considerable less than any previous machine capable of using the large cylinder, may now enjoy a large variety of selections at the nominal cost of small records, and is also enabled to avail himself of the great volume and superior reproduction of the Grand record, whenever desired, at no additional cost other than that of the records themselves. Besides its other advantages this instrument is provided with an entirely new feature which has never before appeared on any graphophone This is a dial speed indicator which, by the position of a pointer, enables the operator to tell at a glance, the speed at which the machine is running and to adjust the speed by merely moving the pointer.

The Columbia Phonograph Co., No 88 Wabash Avenue, Chicago, headquarters for graphophones and talking machine supplies of every kind, will send you catalogues on application.

PLUCKY MRS. PESCHEL

PROTECTS HER ENTIRE FAMILY WITH PERUNA.

HAS A HAPPY HOME.

This Beautiful Mother Says:

"I Cannot Help But Praise Peruna.

"I Am Never Without It.

"As Soon as I Find the Children Have the Least Cold, I Give Them Peruna.

"A Few Doses Helps Them."

One of the greatest foes with which every family has to contend is our changeable climate. To protect the family from colds and coughs is always a serious problem, and often impossible.

Sooner or later it is the inevitable fate of every one to catch cold. Care in avoiding exposure and the use of proper clothing will protect from the frequency and perhaps the severity of colds, but with the greatest of precautions they will come. This is a settled fact of human experience.

Especially is this true during the stormy and unsettled weather of early winter. Everybody must expect to be caught somewhere or somehow.

Perhaps it will be wet feet, or cold draught, or damp clothes, or may be too close confinement in hot rooms and then going out into the cold carelessly, or it may be one of a thousand other little mishaps, but no one is shroud enough to always avoid the inevitable catching cold.

Sometimes colds come like an epidemic; everybody seems to have one at once. The very air about us is poison to the head, throat and lungs.

There is no fact of medical science better known than that Peruna cures catarrh wherever located. Thousands of families in all parts of the United States are protected each winter by Peruna. Once in the family Peruna always stays. No home can spare Peruna after the first trial of it. A splendid example of this fact is found in the beautiful home of Mrs. Paul Peschel, of 14 Quitman street, Newark, N. J. Read her letter.

NEWARK, N. J., June 17, 1900.

Dr. S. B. Hartman:

Dear Sir---"My three children were sick and my husband had an attack of la grippe. I gave the children Peruna, and now they look as if they hadn't been sick at all. I also gave it to my husband until he was good and well. I do not know how I could have stood taking care of them and being up night and day, had it not been for Peruna.

"Last winter was the first winter in sixteen years that I did not have a cough. It is impossible to explain my thanks in words. I never looked as well as I do now.

"Peruna is our family medicine and always will be. I do my own housework and sewing, and get along lovely, now that I am so strong and well, thanks to Peruna and your good advice.

"I cannot help but praise Peruna. I am never without it, and as soon as I find the children have the least cold I give them Peruna. A few doses helps them, and I hope that every one who reads my testimony will try Peruna as it is a friend indeed." Thankfully yours, MRS. PAUL PESCHEL,
14 Quitman St., Newark, N. J.

A Safe Family Doctor.

Peruna has been used in many other homes with the same results. The following are samples: Mrs. M. E. Seymour, Dye, Ga., writes:

"I am ready to speak a few words in favor of Peruna and Manalin. I have tried them for nearly every ill of life for myself and family, and find them to be all the doctor claims them to be. Peruna cured me of female trouble when my doctor could not. My advice to all suffering women is, consult Dr. Hartman. What he has done for me he will do for you."—Mrs. M. E. Seymour.

Peruna Added 40 Pounds.

Mrs. Maria Goertz, Cleo, Oklahoma, writes:

"My husband, children and myself have used your medicines, and we always keep them in the house in case of necessity."—Mrs. Maria Goertz.

Dr. Hartman's latest book on catarrh will be sent free upon request to any address. This book contains ninety-five pages of interesting reading matter, and will be found invaluable to mothers in aiding them to guard against and cure the many little catarrhal ailments of children that come with the severe weather of winter.

Miss Lizzie Miller of Wisconsin has sued Henry J. Huening for breach of promise. In her petition she claims she has lost, as a result of her lover's faithlessness, thirty pounds weight, which she values at $166,66 per pound and accordingly prays the Court to allow her $5,000.

If the postal laws which govern second class matter were properly administered it would mean a saving to the government of $25,000,000 annually. This amount would come from the men who spend their money so liberally in the maintenance of a lobby in Washington to prevent such proper administration of the law.

The chief of the Zoological Division of the Chicago parks says that the prairie dogs in one of the parks have emerged from their burrows in January for the first time in thirteen years, from which he argues that there will be no more severely cold weather this winter. It has been found, however, that animals and birds are no more inerrant than the Weather Bureau.

According to reliable statistics, but 5 per cent of the pupils enrolled in the primary grades of the Chicago public schools ever reach the high schools and yet, when faced by a presumed necessity of retrenchment, the school board proposes to close the evening schools and reduce the length of the school term. Is there not some ground for the fear that the public school system is becoming topheavy.

While Gov. Durbin is as radical as any man can be politically, he is being commended by democrats in one respect, and that is on his appointments of democratic members on boards of various state institutions. The law requires one man on such boards to be chosen from the party out of power, Former governors were in the habit of doing this by appointing some democrat who sailed under the name but voted with the republicans, but Mr. Durbin has been appointing democrats who work for the democratic party and vote the democratic ticket.

Largest Daily Newspaper in the United States.

Chicago's great 6-day-a-week newspaper—THE CHICAGO DAILY NEWS—enjoys the double distinction of being the largest daily newspaper in the United States and of having the largest circulation. Its customary size is 12, 14, 16, 18, 20, 22, 24 or 26 pages, according to circumstances, and its circulation is the largest of any daily paper, morning or evening, in America—nearly 300,000 a day.

Its great special cable service, from all parts of the world; its complete market page, its unique daily page of original, up-to-date humorous pictures, its splendid women's department, its humorously illustrated sporting news page, its daily complete story, the inimitable "Bowser" sketches and a score of other bright and entertaining features—combined with the world's news every day *and the truth about it*—have made THE CHICAGO DAILY NEWS the most popular, most widely circulated newspaper in the United States.

BUTLER HERALD

Butler, Ind., Friday, Jan. 24, 1902

Entered at Butler as Second Class Matter—But First Class Literature.

O. H. DOWNEY, PUBLISHER.

It must have been a spirit of irony that induced the Younger brothers, after they were pardoned out of the penetentiary where they were serving terms for the shooting of eight men in Stillwater, Minnesota, to return to that town and engage in the tomb stone business

Some good man gives out the following criticism of the rampant party paper: "There is no good reason why a paper which represents a party should perennially make a fool of itself. The journal which has nothing but good to say of its own side, and nothing but evil of the other, simply makes itself contemptible in the the eyes of all people. That sort of thing is really gone by, and a newspaper which does not know it is badly belated."

The surveyors who have been deputed to re-establish and remark the Mason and Dixon line, have discovered that many of the stone posts with which the line was previously marked have been appropriated and used for door sills and steps, and one was even employed in the construction of a church.

In refusing he injunction asked for by the B. & O. against the Wabash in the St. Joe crossing case the supreme court says: This court has no authority to issue injunctions except in aid of the exercise of its appellate jurisdiction, or to enforce its judgements or orders. If the party applying for injunctive interence, from this court, does not ask the prevention pending the appeal of anything authorized by the judgement of anything appealed from, but consents that until final hearing the judgement of the court below shall be carried into effect, and it is not alleged or suggested that anything is being attembted or threatened except what is authorized by the judgement of the court, there is no occasion for issuing an ancillary injunction by this court.

In a seven up card game a Texas man is said to have "begged" with the ace and deuce in his hand. The dealer gave one, and the other fellows made nigh, low, Jack, game and the gift. The dealer got mad and shot the man who "begged," and a jury acquitted him of murder, they reasoning that a man who begs with two points in his hand ought to be killed.

A young man asked an old gentleman for his daughter in marriage. The answer was: "Go into the orchard and bring me a parcel of apples. Give me one-half of the whole number and to the mother one-half of the balance and half an apple over, and to the daughter one-half of the remainder and half an apple over and have one apple yourself without cutting an apple. Then if she is willing you can have her." He solved the problem. How many did he bring?

The Quincy Journal says that a well known railroad man was passing a hotel in Keokuk the other day, when a pretty little woman stepped out of the door and said, in a very sweet, theatrical voice: "Come deary, let's take a walk." "Beg pardon, madame, but I am busy just now," replied the railroad man, with becoming modesty. "Speak when you are spoken to, sir; I am talking to my own dog. Come on, Fido," came the sharp answer. And the railroad man felt like biting Fido's leg.

Something New.

A new graphophone for $25, which uses both large and small cylinders is the latest development in the talking machine field. This new instrument has been provided to supply a demand which has manifested itself ever since the large cylinder appeared. Its posessor, while having only one instrument, costing considerable less than any previous machine capable of using the large cylinder, may now enjoy a large variety of selections at the nominal cost of small records, and is also enabled to avail himself of the great volume and superior reproduction of the Grand record, whenever desired, at no additional cost other than that of the records themselves. Besides its other advantages this instrument is provided with an entirely new feature which has never before appeared on any graphophone This is a dial speed indicator which, by the position of a pointer, enables the operator to tell at a glance, the speed at which the machine is running and to adjust the speed by merely moving the pointer.

The Columbia Phonograph Co., No 88 Wabash Avenue, Chicago, headquarters for graphophones and talking machine supplies of every kind, will send you catalogues on application.

An example in mathematics is causing considerable debate among a number of our exchanges. The question is this: A man bought thirty five cents worth of fruit cans; he gave the clerk a dollar and she gave him back sixty-five cents. A little afterwards the man told the clerk that he had given her a bad dollar and if she would give it back to him he would give her good money in return. She gave him the bogus dollar and he gave her two fifty cent pieces. Now the proprietor thinks that he was beaten in the deal, and others think the man with the bogus dollar lost fifty cents. How do you figure it out; did either lose anything? If so, which one and how much?

It Takes a Remedy of Uncommon Merit to Draw the Unqualified Praise of a Successful Practicing Physician.

Dr. J. W. Bates of Corfu, N. Y., states: "A most remarkable case has come under my hands of late and has fully convinced me of the wonderful power of Dr. A. W. Chase's Nerve Pills over diseases of the nerves.

"A young lady who was treated for over two years for epilepsy by two doctors was given up to die. I found that her sickness was not epilesy, but nervous troubles, due to menstrual derangements, and prescribed four of Dr. Chase's Nerve Pills a day, after meals and at bed-time. Since that time she has not had a single bad spell. Her health has rapidly improved, she has gained about 15 pounds in weight, and I do not hesitate to state that Dr. A. W. Chase's Nerve Pills have saved her life and restored her to health."

Mrs. Fawcett of Marietta St., St. Clairsville, O., says: "I have used Dr. A. W. Chase's Nerve Pills and can recommend them to others as a good sound reliable nerve and general tonic. When I got the box of the Pills I was complaining of nervousness, weakness and pain through the shoulders—rheumatic in type—digestion not over good as usual. The effect of the medicine has been very satisfactory indeed. So marked has been the change towards health and comfort I can conscientiously say they are fine and what they are represented to be. At my advanced age I feel I am getting all the benefit possible."

Mrs. M. J. Hubbard of Railroad Avenue, Sistersville, W. Va., says: "I like Dr. A. W. Chase's Nerve Pills. I was nervous, excitable, unable to sleep. I had not taken the medicine long when my nerves were steady and strong—my physical strength and energy back and my sleep sound and natural."

See that the portrait and signature of Dr. A. W. Chase are on every box. Price 50 cents a box.—Six boxes for $2.50. Manufactured by the Dr. A. W. Chase Medicine Co., Buffalo, N. Y.

Sold in Butler at Stone's DrugStore.

New Orleans Mardi Gras.

The surviving veterans of the Campaign and Siege of Vicksburg, and their friends, will please note that the Illinois Central Railroad Company will run a low-rate excursion to the New Orleans Mardi Gras, with a two nights and a day stopover at Vicksburg, leaving Chicago at 6:10 p. m. Freeport at 9:40 a. m., St. Louis at 10:15 p. m., Cincinnati at 6:00 p. m. and Louisville at 9:40 p. m., on Tuesday, February 4. Both Standard Pullman and Excursion Sleepers will be run from Chicago and from Cincinnati and Louisville to New Orleans; and in addition Excursion Cars will be run from Freeport and from St. Louis to New Orleans. The price per double berth, whether occupied by one or two people, will be as follows to New Orleans: In Standard Sleepers from Chicago, $8.00; from Cincinnati and from Louisville, $7.00; in Excursion Cars from Chicago and from Freeport, $3.50; from St. Louis, Cincinnati and Louisville, $3.00.

Applications for berths should be made as follows, accompanied by the price of same, on or before January 28. For the Chicago and Freeport Cars, to J. F. Merry, A. G. P. A., Dubuque Iowa; for the St. Louis Car, to C. C. McCarty D. P. A., 308 N. Broadway, St. Louis, Mo.; for Cincinnati Car, to F. W. Harlow, D. P. A., Arcade and Vine St., Cincinnati, Ohio; for the Louisville Car, to W. J. McBride, C. P. & T. A. Fourth and Market Sts., Louisville, Ky.

This will be a great trip, and every veteran, every son and daughter of a veteran, and everybody else who wants a good time, should at once apply for their sleeping-car accommodations.

The price of berths as quoted above includes the two nights at Vicksburg, and this special excursion will arrive at New Orleans, Friday morning, February 7, in ample time to secure rooms at nominal prices, and to take in the attractions in and about the city before the Carnival of fun and frolic that begins Monday morning, February 10. Write the nearest of the undersigned at once for a copy of "Historical Vicksburg," "Survivors of the Vicksburg Campaign," and the "Tourist Guide to New Orleans" For specific train rates (which will be the special Mardi Gras rates,) limits, etc., consult your home ticket agent, or address the nearest of the undersigned.

J. F. Merry, A. G. P. A., Dubuque; W. A. Kelland, A. G. P. A., Louisville; C. C. McCarty D. P. A., St. Louis; F. W. Harlow, D. P. A., Cincinnati.

Cause of Cold.

A fashonable little woman, all muffled up in furs called on her physician complaining of a bad cold, says the Michigan City News. What, again? said the gruff medical person. Didnt I tell you you several months ago how to avoid such affictions? Remove your boa, please. Ah, just as I thought. Your throat is tightly wound in a yard or so of ribbon. Now my dear Mrs. Blank, if you wish to avoid taking such violent colds you must positively abandon that fashion. Please realize that the high collars that women wear around their necks are responsible for nearly all the colds that your sex gets. Winter and summer alike you insist upon wrapping your delicate necks in high silk, velvet, cloth, linen chiffon covering. With the first draught there is a cough. My advice is to you as a friend and physician is to go straight home and when you cure this cold to throw away ribbons and other neck traps. Leave the neck bare. Never mind what the other women do. You will find your health much improved if you give your neck a chance to get acquainted with the natural order of things.

Pointed Remarks by Ben Deering, the Missouri Evangelist.

Being religious to keep out of hell is like living in jail to keep away from small-pox.

The blindest people in the world are those who see everything but their own sins and faults. The first effort of the gospel is to open men's eyes to their own darkness. Then they will seek the light.

This is a good world to live in if we learn how to live. It is the only world we know about. We believe that there is a better one, we can't go there till we get done with this. I want to stay here as long as I can.

The Persians worship the Good Spirit on the hill tops in the groves, and then decend to the dark places in the valleys and caves and worshipped the Evil Spirit. Many so called christian people have learned the same trick,

Blind Bartimeus had lived in the world forty years before he had seen a human face or a bird or a flower, or sky or star. So the man blind in sin never sees what is beautiful in humanity or in the world about him till Jesus opens his eyes.

Every beggar in Palestine had to wear the beggar's robe with broad stripes of red or black. It was a certificate of worthiness. A good idea—it ought to be adopted in this country. It would make beggars less and charity more helpful.

Don't be in a hurry to get to heaven. You will have plenty of time to walk the golden streets. Better help us pave the highways of life in this world for the millions who have to walk them. That is the best way to get in condition to walk the golden streets of the New Jerusalem.

We are not called on to fight the great cloven foot and forked tongued devil of the theologian, but the little devils who infest our minds and hearts. They are "our size" and we can "knock the stuffin out o' them," as the little boy said to his Sunday School teacher.

R. H. Ramsey expects to leave for Colorado in a few days.

When a woman sees a doctor go in at the next door, she is one part sympathy and three parts curiosity.

Yes, Charley, the girl who knows enough to wash flannels so they won't shrink, knows enough to get married. Go ahead you have our blessing.

David B. Hill is said to want Major Harrison to run as vice-president on the ticket with the New Yorker. When Major Harrison is out looking for second place he will telegraph Mr. Hill, but David should not waste any time waiting around the telegraph office for the message.

There is in Knasas just now the revival of a very shocking story. It seems that at Pie City at a church social, a Miss Lurrywell, an exceedingly small and demur old maid, a vocalist of some local talent, was announced as next on the program by a decon in the following language: "Miss Lurrywell will now sing 'Put me in my little bed' accompanied by the minister.

We only had time last week to make a brief announcement of the election of Wm. H. O'Brien as chairman of the democratic state committee for the ensuing two years. The contest was exceedingly spirited, and the radical gold men, led by editor Morss of the Sentinel Hugh Daughterty, G. V. Meuzies and a few others, championed the candidacy of Stephen B. Fleming, of Fort Wayne, while the conservative silver men were for anybody to beat Fleming and having nine out of the thirteen committee-men were able to name the chairman. They first decided to offer it to Jo. Fanning committeeman of the 7th district but he declined, believing by doing so he would contribute to the harmony of the party. The chairmanship was then offered to Hendren who also declined for the same reason. They then offered it to Mr. O'Brien and he accepted and was elected the following committeemen voting for him; Hendren, Dixon, McNutt. McGee, Livergood, Simons, Fanning, Duffin and Fletcher, 9. Those who voted for Fleming were Nolan, Adair and France 3—Mr. Fleming decliding to vote. It was a crushing defeat for the "reorganizers" and a distinct victory for the loyal democrats of the state. Mr. O'Brien is known as being opposed to the free coinage of silver at 16 to 1 but has always been loyal to the democratic national and state tickets, being energetic worker and a liberal contributor to the campaign fund. His selection was a happy solution of a vexed question and was decided upon as a sort of "olive branch of peace" to the radical gold democrats as the contest is now ended, "Let us have peace."

Millions are daily finding a word of comfort in Bucklen's Arnica Salve. It kills pain from Curns, Cuts, Bruises; conquers Ulcers, and Fever Sores; cures Eruption. Salt Rheum, Boils and Felons; removes Corns and Warts. Best Pile cure on earth. Only 25c at S. G. Stone's drug store.

Frank Treadwell, Bennett, Ia., was troubled with kidney disease for two years. He writes: "I had taken several kinds of kidney remedies, but with little benefit. Finally I tried Foley's Kidney Cure. The first bottle gave immediate relief and three bottles cured me permanently. I gladly recommend this wonderful remedy." Take no substitute. Geddes & Harding.

Fred Briggs, who recently left this city for Reading, Michigan to engage in the furnitnre business, has sold out and will soon move to Butler where he has purchased the undertaking business of his cousin A. S. Briggs. Fred is a graduate and thoroughly understands his his business and the people of Butler will find him a pleasant young man in every respect.—Churubusco Truth.

Maude Muller—the same old Maude once more—was out engaged in her old time chore. But as she raked at the meadow hay, she was all togged out in a scrumptious way and all could see as that way they trod; that there was nothing special the matter with Maude; and she had a saucy quirk to her eye that the old judge stopped as he rode by; but when through the gate he fain would pass, Maude cried, "Say Whiskers keep off the grass."

A parent writes to us that he is annoyed and pained by his son staying out nights, and asks us if we can present a remedy for this rapidly growing evil. The boy's spine can be broken with an axe, or he can be nailed to the floor with a red hot railroad spike driven through one hand; but the most effectual way is to compell him to wear patched cloths. An observing editor, after looking over the situation concludes that some people go to church to weep, while others go to sleep. Some go to tell their woes, while others go to show their clothes. Some go to hear the preacher, others to hear the solo screecher. Boys go to reconnoiter, girls go because they orter. Many go for reflection, precious few to help collections.

A good story is told of a farmer who wore his old suit until everyone was tired of it, and his estimable wife was almost ashamed of the hustling farmer who had been inside it so long. But one day while selling produce in town he determined to buy a new suit and, a happy thought, surprise Eliza. So he bundled a new suit in the wagon and drove homeward. It was after night as he hurried home, and at the bridge he stood upon the wagon and "peeled" and threw the despised old suit in the river. Then he reached for the new cloths. They were gone—had jolted out of the wagon! The night was cold and his teeth chattered as he scurried for home. He surprised Eliza even more than he anticipated.

An absent-minded man, a few days ago, walked into a clothing store and asked to look at a pair of trousers. He was shown several different patterns, and finally selected a pair, stepping inside the dressing room to try them on. After making some suggestions as to alternations, ect, he concluded to take them, and again went into the dressing room to make the change. He emerged a few minutes later with his long ulster closely buttoned up around him, paid the amount of his purchas to the pretty cashier girl and passed out into the street. He had no sooner came in contact with the cool January air that he turned and rushed back into the store. Did you forget something? asked the clerk, noticing his agitation. Yes, he exclaimed, his teeth chattering and face blanched with horror, I forgot my pants.

He Who Would Thrive Must Either Hold or Drive.

That would do in the olden times but now he must both hold and drive.

Men everywhere are driving and climbing for dear life (or gold). It is this being everlastingly at it that shortens men's lives. Every nerve is put on the stretch and sooner or later the system begins to give out. The stomach is of the greatest possible importance in sustaining life and vigor, and is liable to be the first to give out. The work performed by the bowels is no less important. The overstrain caused by rush and worry of life soon results in indigestion, dyspepsia, constipation, liver and kidney troubles. Headache, nervousness, and every conceivable trouble soon follows unless the right thing is done. The old philosophers searched for the elixir of life but failed to find it. We have found it.

Congressman Emerson and Congressman Connell as well as Ex-Treasurer of United States, Wyman, Senator Brackett, Judge Houghton, Mayor, Knapp, Attorney-General Smyth, not only speak in the highest terms of our Company but of our great remedy, Dr. Kay's Renovator, and thousands of the most eminent people who know by experience, endorse Dr. Kay's Renovator, as the greatest known remedy.

If you are beginning to give out or if you are down where other remedies have failed to help you, don't wait but go at once to your druggist and get Dr. Kay's Renovator. It strikes to the very root of the whole trouble, beginning with the stomach, bowels, liver and kidneys and renovates and invigorates the whole system, giving new life, health and vigor to the whole body. It is not only very efficient but perfectly safe for all ages and conditions. Ask for our pamphlet giving reports of the most marvelous cures known to the medical profession, or send to us for a copy. Free advice, sample and book for the asking. Prices 25c, 50c and $1. Dr. B. Zoa Phora Cures Change of Life.

The Greatest Known Cure For Leucorrhea, Change of Life, Painful Menses, Kidney, Liver or Bladder Trouble.

It is the Only Safe, Sure and Ever-Ready Remedy in the Three Danger Periods in Woman's Life—Large Trial Bottle Free.

MRS. MARY A. BLOUNT, Montpelier, Ind.

Zoa Phora cures leucorrhea, painful or suppressed menstruation, flooding, laceration, kidney, liver or bladder trouble, falling of the womb and change of life.

It is one of the most marvelous of modern remedies, serves as a steady hand to guide the frail and sickly girl to and through the trying period that opens to her the untraveled path of womanhood. It proves through the trying times of pregnancy and motherhood a "woman's friend" in the truest sense of the word, buoying and strengthening and building up when all physicians and all other remedies fail; and as she passes from the period of motherhood to the last period in life Zoa Phora is still her friend and mainstay—bringing her through the third dangerous change in woman's life, safe and soundly healthy. Women by the thousands testify to the wonderful effect of Zoa Phora on their general health as well as to its marvelous power in correcting and permanently strengthening when weak.

The story of Mrs. Mary A. Blount, of Montpelier, Ind., will interest you. She says: "When I began to experience change of life I was forced to employ doctors. I tried one after another with out relief. Then I turned to patent medicines. For four or five years I did this and steadily grew worse. Finally Zoa Phora was recommended to me and without any faith I decided to try it. The result was truly wonderful. I began to improve right away, and was soon completely cured. The Zoa Phora did it. From my own personal knowledge I know what a great benefit your Zoa Phora is to young girls during the change and I will be glad to furnish information to anxious mothers who may write me."

Zoa Phora is for sale by druggists, but will be sent direct, prepaid, on receipt of price, one dollar a bottle. If you are a sufferer you can make no mistake in taking Zoa Phora at once. If you are interested or have a friend who is a sufferer send for the book telling why Zoa Phora cures. It is sent free as is advice, on application from our lady physician. All communications strictly confidential.

We will be glad to send you a large trial bottle free upon receipt of 10c to cover postage and packing. Address Zoa Phora Co., Kalamazoo, Mich.

Over-Work Weakens Your Kidneys.

Unhealthy Kidneys Make Impure Blood.

All the blood in your body passes through your kidneys once every three minutes.

The kidneys are your blood purifiers, they filter out the waste or impurities in the blood.

If they are sick or out of order, they fail to do their work.

Pains, aches and rheumatism come from excess of uric acid in the blood, due to neglected kidney trouble.

Kidney trouble causes quick or unsteady heart beats, and makes one feel as though they had heart trouble, because the heart is over-working in pumping thick, kidney-poisoned blood through veins and arteries.

It used to be considered that only urinary troubles were to be traced to the kidneys, but now modern science proves that nearly all constitutional diseases have their beginning in kidney trouble.

If you are sick you can make no mistake by first doctoring your kidneys. The mild and the extraordinary effect of Dr. Kilmer's **Swamp-Root,** the great kidney remedy is soon realized. It stands the highest for its wonderful cures of the most distressing cases and is sold on its merits by all druggists in fifty-cent and one-dollar sizes. You may have a sample bottle by mail free, also pamphlet telling you how to find out if you have kidney or bladder trouble. Mention this paper when writing Dr. Kilmer & Co., Binghamton, N. Y.

Butler is now proud of her three railroads and property owners have boosted rents up nearly 50 per cent to encourage people to move to that town.—Waterloo Press.

Easy, Bro. Willis; while Butler is the best town in DeKalb county, still rents have not been boosted 50 per cent. This is a city of home owners and has few houses for rent. Some of them have advanced, it is true, but they are all occupied. What we need is more houses.

Telephones will soon supplant the telegraph on the entire Illinois Central railroad system. Contracts have been let for the equipment of the railroad's 5,000 miles of lines with the new service. The management plans to abandon the telegraphic means of communication in favor of the voice-carrying wires. All train orders and messages of every sort are to be transmitted with the long distance telephone instead of the telegraph key. The Illinois Central railroad owns and operates more than 5,000 miles of road. To equip this with the telephone will cost about $100 a mile, or $500,000 for the entire task. A number of American railway companies have been experimenting with telephones in transmitting train orders and for other purposes, but all have hesitated to substitute them for the telegraphic system.

James Mellon, of Omaha, was stabbed recently by a colored man, and the local newspapers were very severe in their condemnation of the act. But isn't it quite natural for a colored man to cut a Mellon.

There will be this advantage to the proposed line that is to run from Chicago to New York at the rate of 300 miles an hour. When there is a collision the passengers will never know what happened.

A recent writer on political economy says: "This country has more than a quarter of the world's riches." More than a quarter?" Well we should say so: we've had as much as thirty cents at a time ourselves.

The Wabash in order to avoid erecting a new depot at Butler, has moved its depot westward to the junction of the Butler and Toledo lines, and is fitting it up in more modern style.—Auburn Dispatch

Its good to go away from home to learn the news. The Wabash has a new depot built and now occupies it. The old depot belongs to the Vandalia. The Dispatch is off its trolly and should go way back—and rest.

"Don't beg so much of business men," says an exchange. "There is seldom a week passes, and sometimes hardly a day, when our citizens who are engaged in business are not called on to contribute something for charity's sake. It is always the merchants who are asked to shoulder this varied gratuitous giving. Some people seem to think that they who are in business can pick up dollars anywhere and ought to contribute willingly every time it is asked. We'll just say as a rule dollars are no more plentiful with business men than with any other vocation. Don't ask too much of them. Just remember that they have troubles of their own. Beg your alms for awhile of the retired men who live in fine houses and have money drawing interest. The business men would appreciate the change."

Hair Splits

"I have used Ayer's Hair Vigor for thirty years. It is elegant for a hair dressing and for keeping the hair from splitting at the ends."—J. A. Gruenenfelder, Grantfork, Ill.

Hair-splitting splits friendships. If the hair-splitting is done on your own head, it loses friends for you, for every hair of your head is a friend.

Ayer's Hair Vigor in advance will prevent the splitting. If the splitting has begun, it will stop it.

Repairing Neatly Done

Never thought of such a sign for a medicine did you? Well, it's a good sign for Scott's Emulsion. The body has to be repaired like other things and Scott's Emulsion is the medicine that does it.

These poor bodies wear out from worry, from over-work, from disease. They get thin and weak. Some of the new ones are not well made—and all of the old ones are racked from long usage.

Scott's Emulsion fixes all kinds. It does the work both inside and out. It makes soft bones hard, thin blood red, weak lungs strong, hollow places full. Only the best materials are used in the patching and the patches don't show through the new glow of health.

No one has to wait his turn. You can do it yourself—you and the bottle.

This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle.

A new breed of chickens just received in New York from China have tails twelve feet long. They are kept in cages, and when they are taken out for exercise an attendant goes along to hold up the feathers. The hens lay thirty eggs a year, which are hatched by other hens. We expect Geo. Powers or John Brown will have a pair of them before next fall.

A few days ago an innocent farmer called at the L. J. Dhlis jewelry store to inspect his clocks with a view to purchase one. Mr. Dhiel busied himself trying to show him the late improvements, and pointing to one of the best time pieces, said; "Here is one that will run eight days without winding." The farmer unhesitatingly asked, "How long will it run if you wound it?" The reporter then stepped out.

In New York city recently a husband had his wife arrested on the charge of going through his pockets while he slept and taking from them $57 and a lot of valuable papers. The magistrate before whom the case was tried held that the wife was guilty of theft, and, although he dealt leniently with her, he permitted it to be understood that she could have been indicted, tried and found guilty of larceny, reports the Chicago Inter Ocean. For the defense, as was quite natural, it was held that a wife could not possibly pick her husband's pockets, because, man and wife being one, his pockets were to all intents and purposes her pockets, and their contents to all intents and purposes were as much her property as his. One cannot rob one's self, and how, therefore, could this woman be found guilty of theft for taking what belonged to her husband—that is to say, what belonged to herself? For the prosecution it was held that the husband and wife are one in theory only, not in fact. The law recognizes this, it was contended, when it deals with husbands and wives as individuals. The law treats the wife as a separate person, it was held, when it grants her certain distinctive rights and protects her in the enjoyment of them, when she is permitted to hold property in her own name, and when she is privileged to do many things which her husband cannot legally prevent her from doing. The magistrate was influenced by the arguments for the prosecution to hold that, whatever a wife's privileges may be, she has no business to ransack her husband's pockets or to take anything from them without his consent. There is little danger that the New York case will establish a precedent, or that husbands in general will now have their wives arrested for going through their pockets. When the average man of good sense, good behavior and small means considers how often and how painfully his wife is disappointed as she goes through his pockets he will not think of depriving her of the privilege.

The Privilege of a Wife.

The exercise of the highest faculties of the mind is not only stimulating, but creates the highest character. Perhaps there is nothing else which has such a magical effect upon the brain, the nervous system, the whole man in fact, as the consciousness of achieving that on which his heart is set, says a writer in Success. There is a wonderful uplift in feeling that things which we take hold of will move. Achievement acts like a tonic on the whole system, it quickens the circulation, stimulates the digestion and enlarges hope. People who have been invalids for years, whom no medicine or physician could help, have been restored to health by suddenly hearing good news, or unexpectedly coming into some good fortune. This shows that the mind is master, that the body and its functions are good servants, and that the thoughts are reflected in the physical man.

Mastery of the Mind.

A Washington report says that Senator Daniel, of Virginia, lives in very modest style in that city and cannot afford to spend much money, because everything he gets goes toward the payment of his father's debts. Daniel has spent 30 years paying off these debts, and it will probably be a life work. His father was Judge William Daniel, of Lynchburg. He was considered well-to-do, but when he died it was found that his fortune had been swept away in the panic of 1873, and that his liabilities were more than $100,000 in excess of the assets. Although Senator Daniel could have repudiated these debts, he chose to assume them. That was nearly 30 years ago, and all that time Senator Daniel has been paying off the debts with interest.

Gladstone's humorous advice to the farmers to convert their superfluous turnips into beautiful jam has been abundantly acted upon, even in the vicious United States. Around one case of the agricultural department's exhibit at the Pan-American exposition, it is said, hang squares of cloth, originally white, now yellow, orange, scarlet, crimson, blue and purple, all colored by aniline dyes extracted from commercial jam and jellies. In comparison with such nefarious adulteration, comment would be colorless.

The first patent medicine, it is asserted, ever put up for sale in America was a proposed cure for consumption. It was called "Tuscarora Rice," and was compounded and sold by a Mrs. Masters, who erected a large establishment for its manufacture in New Jersey, about 1711.

At Derby, Conn., the other day, a leading pastor ran madly through the village and disappeared in the woods. A swarm of hornets had nested in the clergyman's rural free delivery mailbox. Two miles away the chase came to an end by the pastor plunging into the reservoir.

Wednesday evening, the Rathbone Sisters were visited by the Hamilton and Edgerton temples. After initiating one candidate, a general good time was had by all and later followed supper. Small tables were produced from apparently nowhere, tastefully decorated and four people seated at each and a fine lunch was served. After supper the floor was cleared and the ladies gave their famous drill. The drill team did themselves proud and were complimented on every hand going through the complicating manuvers better than ever before. A very fine duet was rendered by Mr. and Mrs Eugene Oberlin which pleased the audience so well that they were called back again. Two hours of fun and enjoyment followed during which time Manager Fred Moltz, by request, gave a drill with his suberb company of "Weary Willie's" which brought down most every thing but the ceiling and it is reported on good authority that parts of that came down. At any rate the Manager came down and required the assistance of two members of the company to get up. And Geddes was there with his little horn and when the rest didn't keeb things going, he did. He says the mortality of the Silk Worms in China is something fierce. At 1:00 A. M all had became rested up from laughing sufficiently to feel safe in venturing home after exchanging good night, wishes and fond farewells parted.

Saturday half holidays in summer are now practically universally observed in many trades and industries, and they send hundreds of thousands of people outdoors. It has brought a great social change of almost incalculable consequence to the indoor working classes, says World's Work. But it is a change that has so quietly and gradually taken place that it is now hard to recall the time—only a few years ago—when the half holiday was almost unknown. The change has had an almost revolutionary effect on the popular appreciation of outdoor life; and the popular appreciation of outdoor life may, without much risk of exaggeration, be called the most noteworthy development of popular taste and health and social sanity that this generation has witnessed. It is preventive social treatment of the highest value. It was the fashion not many years ago to discuss the danger of the permanent nervous breakdown of Americans. It is the fashion now to study nature outdoors. Bird books, flower books, animal books, the camera, walking clubs, bicycle clubs, of course—these have come into their present popularity in very large measure because of the Saturday half holiday.

Social Sanity in Summer.

A Chicagoan and his wife recently were visiting an old friend who owns a ranch near Phoenix. Mrs. Lakeside had gone there for her health, and a 17-year-old girl was detailed to wait upon her, relates an exchange of that city. One afternoon mistress and maid were seated in a room together, when the girl saw a good-sized rattlesnake coiled in a corner not far from the invalid's chair. The girl knew the delicate condition of the Chicago woman's health and quietly thought of a plan to save her any undue excitement. "I think I heard Mr. Lakeside calling you from the gate," she said, quietly. The invalid left the room in search of her husband, and as soon as she was out of hearing the girl ran for a whip and in a few moments had killed the reptile. She had just carried it away when Mrs. Lakeside returned, saying that she could not find her husband. Then the girl told her what had happened. The Chicago man was overwhelmingly and substantially grateful to the cool-headed maid, who is now installed in his South side home as his wife's personal attendant. The rattlesnake's skin is being fashioned into pocket-books as souvenirs of the nerve-trying occasion.

Nothing Too Good for This Girl.

It is an encouraging sign for the health of the modern American that the popularity of outdoor life in this country seems to be increasing. The number and variety of sports and pastimes which allure to open-air exertion has grown greatly. Not very many years have elapsed since the time when tennis and football were unusual and golf and the bicycle were almost unknown. Yet the influence of these and other sports has been so strong in recent years that open-air life has come to be enjoyed for its own sake and apart from the amusements associated with it. It is a great mistake to suppose that the pleasures of outdoor life are especial privileges of youth or of any given type of summer amusement seeker. The immense advantages they confer should be shared by all alike. In the present state of our social development they are among the richest of the blessings within the reach of the people.

On being ushered into the home of Dr. Parkhurst the other day, a visitor noted that a mammoth tiger rug was spread across the floor of the reception room. In his surprise, he remarked: "I should think, doctor, that you, of all men, would be the last to keep the emblem of Tammany Hall so prominently displayed in your home." Dr. Parkhurst smiled and replied: "I keep the tiger here to constantly remind me that my enemy is always near. Then, again, I keep the tiger here to walk all over occasionally."

In speaking of plagiarism a magazine editor said: "More than nine-tenths of the plagiarists who try to sell me manuscripts are women. As a rule they are prompted by a desire to see their names in print as authors. When I call their attention to the fact that the articles submitted have been published before they get angry and flounce out."

The champion jag record is possessed by a citizen of Auburn, Ind., who, according to a local informant, was recently arrested for the one hundred and sixty-ninth time on a charge of drunkenness. So far he has spent 1,420 days in prison, just for intoxication, on 169 commitments. The other 40 times he was merely reprimanded.

The estimate of experts is that the record of the year 1901 for gold production in the United States and in the territory appertaining to the United States will make the record; that it will be not far from $100,000,000.

FINGER RINGS.

Every Roman freeman was entitled to wear an iron ring.

Wedding rings were used in Egypt 3,000 years before Christ.

Luther habitually wore a small ring, in which the setting represented a death's head.

In many female religious orders the ring is used during the ceremony of receiving a novice.

Shakspeare's ring, or at least a ring supposed to be his, was found a few years ago in a meadow near the Avon.

In the tombs of ancient Egypt, dating probably not later than 3000 B. C., are found gold rings of fair workmanship.

In the fourteenth century astrological rings were fashionable in Italy. The settings were carved with various emblems and symbols.

Richard I. of England had a ring set with a bloodstone. His enemies attributed his daring and success to the influence of this jewel.

Dial rings were common in France and Germany during the last century. By holding one up to the sun the time of day could be approximately ascertained.

In the time of Augustus portrait rings came into fashion, probably for betrothals or engagments. The portraits of the happy pair were graven on the setting.

Quintillian laid down certain rules for the wearing of rings. He protested against the use of too many, and said that it was not in good taste to wear rings below the middle joint of the finger.

Anchor, or Christ, rings were frequently used among the early Christians. Many specimens have been found in the catacombs, bearing upon the settings the representation of an anchor and the Greek symbol for the name of Christ.

A CONTRAST

Of the face of a healthful woman with the face of one who is sick proves that quite often a sad face is a sick face. Many a woman has credit for a sunny disposition who would soon be sad of face and irritable of temper if she had to endure the womanly ills which many of her sex have borne for years.

Dr. Pierce's Favorite Prescription cures the diseases which are the source of so much pain and suffering to women. It establishes regularity, dries debilitating drains, heals inflammation and ulceration and cures female weakness.

Mrs. Cornelia Henson, of Coalton, Boyd Co., Ky., writes: "In October 1899, I gave birth to a baby and the treatment I received at the hands of the midwife left me with falling of the uterus. I had no health to speak of for three years. I had another baby which was the third child. My health began to fail and I found myself completely worn out. I had so many pains and aches my life was a burden to me and also to all the family, for I was nervous and cross and I could not sleep. Had four doctors come to see me but at last found I was slowly dying. The doctors said I had liver, lung and uterine trouble. I was in bed for months and when I did get up I was a sight to behold. I looked like a corpse walking about. I commenced to take Doctor Pierce's Favorite Prescription, 'Golden Medical Discovery' and 'Pellets,' and ever since then I have been a well woman. I have suffered all a woman could suffer at my monthly period until since I began the use of Dr. Pierce's medicines, but now I can say I have no pain. The dark circles around my eyes are going away and I feel better in every way. My cheeks are red and my skin is white, but before it was as yellow as saffron."

Accept no substitute for "Favorite Prescription" there is nothing just as good for weak and sick women.

Dr. Pierce's Pleasant Pellets are easy and pleasant to take. A most effective laxative.

A Good Cough Medicine.

From the Gazette, Toowoomba, Aust'a.

I find Chamberlain's Cough Remedy is an excellent medicine. I have been suffering from a severe cough for the last two months, and it has effected a cure. I have great pleasure in recommending it.—W. C. Wockner. This is the opinion of one of our oldest and mos. respected residents, and has been voluntarily given in good faith that others may try the remedy and be benefitted, as was Mr. Wockner. This remedy is sold by S. G. Stone, Druggist.

Condition of Miss MacGinnis.

We trust that the following extract from a letter to Mrs. H. G. Brown, written by Mrs. R. G. Osborn, a sister of Miss MacGinnis, will be of interest to many of our readers.

"Daisy is very much better. We have gotten her across the room and back a few times. She is very stiff and cannot bend so as to sit down, but the Doctor says that will be overcome. There is some little discharge from the wound yet and she is quite nervous but is so much better that I hope it will not be long before we can get home."

"Some time ago my daughter caught a severe cold. She complained of pain in her chest and had a bad cough. Is gave her Chamberlain's Cough Remedy according to directions and in two days she was well and able to go to school, I have used this remedy in my family for the past seven years and have never known it to fail," says James Prendergast, merchant, Annato Bay, Jamaica West India Islands. The pains in the chest indicate an approaching attact of pneumonia which in this instance was undoubtedly warded off by Chamberlain's Cough Remedy. It counteracts any tendency of a cold toward pneumonia. Sold by S. G. Stone. Druggist

Two Excellent Papers

The following is Supt. Brown's article at the M. E. Church last Sunday evening:

The preceding century was one of intense political activity. Monarchies and oligarchies passed away, no longer able to be nourished by the ancient traditions, which had prolonged their declining years beyond the period of usefulness. The doctrine of Divine Right of kings was securely entombed, and following its timely decrease, came to an end nearly all privileges of class and birth. Manhood and citizenship became king. Prince Public Opinion was born and legislatures, executives and even judges did homage to his sovereignty. In enthroning this prince vast treasuries were depleted, private fortunes were sacrificed and the soil of every civilized country was crimsoned by the blood of willing patriots. The Kossuths, the Garibalds, the Emanuels, the Lafayettes, Carrolls and scores of others whose names we love to cherish, sacrificed all under the standard of Equal Rights to all. Wilberforce, Gladstone, Garrison and Lincoln are of these. But what of the future? What will occupy men's mind most in the next century? For what will be sacrificed public treasuries and private fortunes? What is the item of greatest public expense today? Are our philanthropic wealthy equipping regiments. Are the savings of the farm, the store and the work shop hoarded to buy the trappings of war? Public schools must be maintained colleges and universities must be endowed. Our sons and daughters must be educated. Our Spartan mothers of today are not saying: "My son, go, and return with your shield, or upon it" but "My son go and return with a diploma or a —spade."

Not long ago at a banquet, the wealthiest man in the United States, arose and proposed three cheers for the man who has given away more for education than any other living man—Andrew Carnegie, native of Scotland. Eight million dollars to the universities of that country, libraries all over his adopted home land, and ten million dollars to the city of Washington for higher education and research. A man who declares it to be a disgrace to die rich. The man who proposed this ovation has given over a million dollars each year for twelve years to his favorite university, and now stands ready to increase his generosity by twenty six million more. It is not a question as to whether or not we approve of the methods by which these men amassed their fortunes. We at least must give them the credit of good business judgment, and we cannot imagine they would expend their money foolishly. In their judgment, these vast sums are put where they will do the most good to mankind.

The purpose of education is to enable man to live more completely. During the years that have passed, a vast amount of knowledge has been acquired by the human race. Science, philosophy, literature and art have been gradually developed. What any one man did in any one branch of learning is very little when compared with the acquisitions of all the past.

Franklin became famous as a scientist by a few simple experiments, that any ordinary high school boy in physics easily understands. The man who becomes famous today for discoveries in electricity must be able to do more than demonstrate that electricity causes lightning. He must be familiar with all of the discoveries of Franklin's time and of all that have followed since in the developing of that subject. The student of today has a long journey before he reaches new and untrodden paths. And while it is true that journey was made for the first time at a snail pace yet with the aid of competent instructors and good text books, it may be accomplished now at a lightening express rate. The knowledge in any one branch that the world has been acquiring for hundreds of years the modern student can master in a comparatively few years.

The days of the pioneer are passed in the elements of science and literature. The alchemist, the astrologer, the necromancer must stand aside for the scientist. The student of today who would do original research work is confronted first by a large library of knowledge which he must master else his efforts will be largely wasted. The ground work of all the natural sciences has been laid and upon that, with a knowledge of its structure, must the student of the present build.

The purpose of the schools of higher education of today is to furnish the student with proper facilities and instructions in mastering the known facts and to conduct him to the place where he may be independent and explore new fields, or make new application of previously discovered facts. And in this system of higher education the modern high school stands in the relation of a kindergarden to the university. When we consider this fact we are forced to the conclusion that our children are finishing the high schools too young. If more of our graduates were twenty one instead of seventeen and eighteen, we would have stronger students and we would not be compelled to recruit the ranks of our professional men and best business managers from the more mature product of the farm. And I also am inclined to the believe that more of our young people would complete a college course if they were compelled to enter upon it with better preparation and more mature judgment. It seems that many people of the present time cherish the idea that their offspring, for some unaccountable reason are mental prodigies, and expect their own sons and daughters to solve problems at the age of fourteen and sixteen, the principles of which did not find even a temporary habitation in their own minds at less than twenty or twenty five.

The mental aim of the modern college and university is to give the properly prepared novitiate the fullest culture possible in the present developed state of the branch which the student may be pursuing, and leave him free to enter new and undiscovered fields, if his natural abilities will permit him to do so. For the last fifteen hundred years a peculiar and intimate relation has existed between the church and education. When learning was confined largely within the walls of the cloister and monastaries, this relation was more intimate than at the present time. And often within the silent walls were engendered false notions, false theories and baneful bigotry. The bible was given first to a people whose knowledge of the sciences was exceedingly limited and whose ideas of the universe were almost childlike.

Men interpreted the scriptures in the way which seemed most consistent with their own notions of things. As a result of this there is a sad and shameful page of church history to record, altough in the nature of things a perfectly natural one. Men with new and correct ideas were imprisoned, tortured and even put to death, and masses over their departed souls were deified. Yet to day the organized church is carrying these same ideas to heathen and ignorant lands; the orthodox church finds that it can fully accept the facts of science and still be orthodox.

The ministry of today is largely made up of men whose ideas are broad and who scarcely dare give utterance to their own private convictions for fear of offending the more conservative members of their congregations.

There is no small number of people today who are possessed with the notion that in some way the higher education of the present time tends to make men skeptical. It is true that higher education often leads the student to the point where it is impossible for him to reconcile the ideas of the theologians with reason. God made the bible and he also made reason, but often theology is the creature of man's prejudice and narrow mindedness. Can Truth injure or destroy truth? Dare we so disgrace and disparage the bible as to be fearful that truth will destroy man's faith in it. Two errors in principle will often give a correct result in an algebraical prblem but it will never give a correct solution. Neither will distorted interpretations of the scriptures made to fit unscientific explanation of the phenomena of nature strengthen the faith of any man. Such rational sermons as the one recently delivred from this pulpit upon the subject of the creation and evolution are godsends to the faith of every thinking man. The human race is not in its infancy. It demands to know what is real and what is figurative. It needs to be told that if Christ in the new testament could use parables to teach eternal truth, that God in the old could use allegories and metaphors for the same purpose. For this we need institutions of higher education.

One more thought on this subject. Much of the bigotry and false theories of the past has been due to the manner of student life. The lonely monk in his cell or the isolated seeker after truth was likely to become confused in his conclusions and one sided in his thinking. But by the association of the student body of the college and university, in a large measure these evil tendencies are destroyed. Eccentricities are avoided. Liberty of thought and toleration of other men's views are a natural result of our present college and university life.

Now briefly in review. First we need institutions of higher education to satisfy our own ambitions for ourselves and our children. Second we need them to keep well grounded the eternal truths of which the race is at present cognizant and to the ambitious to think further the great thoughts of God after Him. We need them to reveal unto a doubting world the beautiful consistency of the scriptures themselves, and we need them to keep curious and ambitious man from error and superstition. God needs and wants them because there his blessings have often rested. They are worthy of our confidence and support.

—o—

By Mrs. L. Coats Potter.

In preparing my paper I have referred to eminent physicians of the Medical Association and educators for my thoughts. Thos. Hughs, school inspector of Canada; Prof. Seavers of Yale; Prof. John M. Tyler of Amherst College; (all of whom have lectured at Chautauqua) and Austin Bierblower of the Teachers World.

The object of all education is to bring out nature or keep one natural during his developement. It is to bring out all there is in man and preserve it in symmetry. As a tree grows in good proportion when unimpeded, becoming an object of strength and beauty, so a child should be reared with an all-round development, allowing every part of his being to grow without deflection from its natural bent. Growth is an entirety, all developing in system; and when one faculty gets out of harmony, there is an arrest of growth, and generally of use. As a person cannot stop maturing in one part while maturing in another, so he cannot sacrifice his strength or health in one part and build up a great physique or mentality in another. He must proceed all together or be impeded all together.

A child of seven years weighs about six times as much as at birth, it has attained one-half the stature, one-third to one-fourth the body weight, and nine-tenths the brain weight of the adult. The amount of material in the various tissues of the body has increased enormously. But the child has nowhere near one-fourth of the physical strength of the adult, much less has it the mental power. The tissues are flabby and undeveloped, almost embryonic. They are not yet ready for efficient use and service. These are the years of increase and growth, and we must trust nature to do the work. We can promote the growth by healthy surroundings, fresh air and sunshine (in the school room) abundant rest and nourishment and suitable exercise. Encourage the child to play, to use the grea trunk, shoulder and thigh muscles. Let him push and scuffle and wrestle all he will. Do not keep him quiet too long, or keep him too long at any one task, for brain and muscle weary very easily now. Now is the time to lay the foundation for a strong body and firm nerves which can bear the strain and stress of life. One cannot have a good mind, who trains his mind only; he must have a good body to support it. this is why we have the gymnasium. Satisfy yourself by looking in the Ladies Home Journal of Jan. at the pictures of girls, portraying the athletic side of a College Girls life.

Those nerve cells which are most active, develope most in increasing length complexity of their tree like branches. The development takes place during physical as well as mental activity, and the education of one cell group, directly stimulated, leads to the education of more or less remote cell groups by reason of this branch like contact. No matter, then, whether we reach the brain through the avenues of mental or physical activity, we shall have made a commencement in the education of the child just as soon as we can make him do something. We grow only through exercise. Every muscle, every organ has its corresponding convolution. Muscular activity alone developes intelligence, the more complicated and varied the movements, and the greater the period of time over which they are extended up to the age when developement ceases, the better will the individual be educated on his purely mental side.

There is a general disposition to consider the Rugby game of foot ball objectionable. The criticisms upon it have run in two general lines. First the innate roughness of the game and the likelihood of severe accident. The game is as safe as any outdoor game can well be, provided it is played with the careful preparation and training which are the rule in the larger colleges. The University team is selected provisionally; it is pitted daily against a second or "scrup" team of somewhat larger numbers. Both teams are kept under careful training and supervision; the playing is made short and gentle as possible at first—the playing is then gradually lengthened and made more severe as the men become able to endure it. The players are not only brought to a point of physical condition which make it a pleasure to watch them. They are taught how to fall when a fall is inevitable, in such a way as to retain control of the ball without hazarding a broken bone or a dislocation. When the closing games come on, the player can take what seems to the spectator a frightful fall not only without a bruise, but so skillfully that it is vegularly necessary for his opponent to "hold him down" lest he rebound and take to his heels again. With good physical condition in the players, the exquisite training and suitable grounds the game is one of the best of out door sports and one of the safest, and so I repeat that muscular activity alone developes intelligence.

Every day observation confirms this view. It is not uncommon to find skilled laborers devoid of book learning yet men of no little intellectual force. The children too of such men often display intelligence of and becoming hard and brilliant scholars. They are sometimes pointed out as exceptions to those who fail to see the unity of physical and mental stimuli in brain development. Often indeed some simple movements are all that the unfortunate defective can be taught to carry out; it is the one breach which can be made in the wall which seperates him from the ordinary physical and menal activities of mankind, but through this single avenue some developement is generally possible.

Said Dr. Martin Barr, Chief of Pa. Training School for Feebl: Minded Children: "The motto of the schools—'We learn by doing: the working hand makes staong the working brain'—shows manual training to be the basis of the scheme of developement, varied for each grade to suit the intelligence."

One cannot die in one part and live in another: he must operate an entirety and to guide and develope nature he must have many kinds of food. And Dickens away back two generations ago, saw clearly what we are beginning to see now, that nutrition is one of the most important educational questions. We are coming to see it now. A great book lately written in England is based just on these principles, educationally first that the children must be fed properly, and second that they must have the proper kind of exercise. You who have read Paul Dombey will remember that poor Paul had neither the one nor the other. It is true that for a few months he had a very kind nurse, a splendid healtthful woman; and if his fathers pride had not interfered, probably Paul might have grown up a strong boy. But the nurse took Paul home one day, to her own poor little cottage to see her own lovely children, whom she loved as much as any mother could, and when Mr. Dombey found out that his boy had been taken into so "low a place as that," and into such low company as that he rebelled and dismissed the nurse. Otherwise Paul might have been a strong boy; as it was he grew up, a very delicate boy, was sent away to school to a "child queller" a Miss Pipchin (the names given to Dickens characters have a significance that educators give them not without thought), such names as Gadgrind and Miss Chokum Child. The next morning Miss Pibchin sent for Paul and gave him a pile of books so large that he could not carry them to his room. He started with them and they fell off one by one, and droped down the stairs and he came back and picked them up. He finally got them to his room, and she encouragely told him she could give him more by and by. The books comprised everything—weights, measures, geography, all kinds of things, without any relation to each other. Poor Paul found that after he had spelled out number two, he had forgotton all about number one. He worked out his "grind" until one night he laid his head on Toots shoulder and finding that he could not work any more he was told that he might stop working. That was an excellent thing to do, after the boy had reached a condition where he could not work, to say that he must stop work. The time has begun in our land when we as in France have doctors to examine the children at least twice a year, and to turn them out when they are not growing rapidly enough, when they are not sufficiently strong and healthy and when they do not weigh as children ought to weigh, and are not allowed to go to school while they are not able to work, freeing them from study that is weakening them before it is too late; but not so with poor Paul. It was too late when he was taken home. You will remember the scene as the proud Father ("Domby and Son") stood in the hall crying as the little fellow came up; the hot tears

It Takes a Remedy of Uncommon Merit to Draw the Unqualified Praise of a Successful Practicing Physician.

Dr. J. W. Bates of Corfu, N. Y., states: "A most remarkable case has come under my hands of late and has fully convinced me of the wonderful power of Dr. A. W. Chase's Nerve Pills over diseases of the nerves.

"A young lady who was treated for over two years for epilepsy by two doctors was given up to die. I found that her sickness was not epilesy, but nervous troubles, due to menstrual derangements, and prescribed four of Dr. Chase's Nerve Pills a day, after meals and at bed-time. Since that time she has not had a single bad spell. Her health has rapidly improved, she has gained about 15 pounds in weight, and I do not hesitate to state that Dr. A. W. Chase's Nerve Pills have saved her life and restored her to health."

Mrs. Fawcett of Marietta St., St. Clairsville, O., says: "I have used Dr. A. W. Chase's Nerve Pills and can recommend them to others as a good sound reliable nerve and general tonic. When I got the box of the Pills I was complaining of nervousness, weakness and pain through the shoulders—rheumatic in type—digestion not over good as usual. The effect of the medicine has been very satisfactory indeed. So marked has been the change towards health and comfort I can conscientiously say they are fine and what they are represented to be. At my advanced age I feel I am getting all the benefit possible."

Mrs. M. J. Hubbard of Railroad Avenue, Sistersville, W. Va., says: "I like Dr. A. W. Chase's Nerve Pills. I was nervous, excitable, unable to sleep, I had not taken the medicine long when my nerves were steady and strong—my physical strength and energy back and my sleep sound and natural."

See that the portrait and signature of Dr. A. W. Chase are on every box. Price 50 cents a box.—Six boxes for $2.50. Manufactured by the Dr. A. W. Chase Medicine Co., Buffalo, N. Y.

"PROVE A HALIBI SAMIVEL"

Readers of Pickwick Papers are familiar with the simble plan which the elder Mr. Weller suggested to Sam as a way to help Mr. Pickwick out of the breach of promise suit against him by the engaging Mrs. Bardell. According to the New York Sun, the alibi is again to become conspicuous, this time in a case of contemporaneous human interest and involving more serious questions than those which were raised, in fiction to be decided by Sergeant Buzzfuzz. The Sun says: "The grahhophone will appear in an entirely new and unique role if, as is now intended, it is produced in court to establish an alibi for an accused murderer in Chicago. Louis G. Thoms, the purser of a steamboat, is charged with the murder of a young woman. Thoms says that on the night that the murder is alleged to have been committed, he was at the house of a friend, where he dictated a story to a graphophone, and investigation shows that one of the cilinders of the machine in question bears the record of his story. Apparently, therefore all that is necessary to complete the alibi is to fix conclusively the time when the record was made."

The Cost of Living.

The Chicago American of a recent date gives the following interesting information on the cost of living:

"According to Dun's Review, which, while not always absolutely accurate, is the best compendium of information published, a year's supplies for the average man now stands at the cost of $101.07. In July, 1897, the same amount of supplies would have cost only $72.45. This shows that the average American is now paying twenty-nine per cent more for his supplies than he paid in 1897, when the great trusts, which now dominate the trade of America, were in process of formation.

"An increase of twenty-nine per cent in the cost of a man's supplies practically means a decrease of twenty-nine per cent in the purchasing power of every dollar he earns, for house rent and service have increased just as much as supplies. The prices in Dun's are compiled by multiplying the quotations of all the nessaries of life by the per capita of consumption, and great surprise is expressed that despite recent improved methods of manufacture, the production of agricultural crops by labor saving machinery and improved method of distribution, there should have been such an enormous increase in the cost of the things that we eat and drink and wear.

"These figures will certainly be productive of the most extended discussion. During the last campaign all the stump speakers of the republican side asserted that a man was getting more for his money than he ever got previously; that clothing, boots and shoes, railroad transportation and household supplies were cheaper than they had ever been. It was difficult to disprove the statement, because some individual items did show a decrease, but now we have the summing up by the acknowledge American statistical authority, which shows that since 1897 there has been an increase of twenty-nine per cent in the cost to the average American of everything that he consumes.

The stern agony, the awful writhing pain of childbirth is known to every woman who is a mother who did not prepare for the terrible ordeal with Zoa Phora. With the use of Zoa Phora many women testify they find the labor of bearing children very easy, the pain almost nothing, and altogether a different time during confinement and the days preceding it.

MRS. EMMA DODSON, Jerseyville, Ills.

Mrs. Emma Dodson, of Jerseyville, Ills., says: "I have kept Zoa Phora in my house for twenty-one years, using it at monthly periods and preparatory to confinement. Before I used Zoa Phora I was very irregular and suffered terribly whenever I did menstruate, but by using it I became regular, and suffered very little. I have often said I had sooner go through childbirth without an attending physician, than do without Zoa Phora previous to confinement. I have been the mother of five children. Before the first two came I had not heard of Zoa Phora, and suffered labor with one fifty hours before delivery. The last three births I used Zoa Phora during each pregnancy and was not in labor over four hours for any of them. I have now passed safely and comfortably through the critical time, called change of life. I suffered very little pain, because I used Zoa Phora. It is the best medicine for painful menstruation I have ever seen, and I have given it to several women, and have never known it to fail."

Zoa Phora has brought the sunshine of health into the home of many a despairing woman. It has made it possible for women to have children who never in the world could have stood the pain and suffering and laceration that must surely have followed the birth of a child in their old condition. The stories of some of the women who now praise this great medicine, Zoa Phora are truly wonderful. They tell of monthly pain and misery suffered for years. They tell of the impossibility of bearing a child for the reason that the organs were not strong enough to carry the child to the end of the time, but would miscarry, greatly endangering the life of the mother. Now they assert they have had children with scarcely a pain and with little inconvenience after the birth was over, few pains and no bad after effect.

Get a dollar bottle of Zoa Phora at the nearest drug store, or the Zoa Phora Co., Kalamazoo, Mich., will send it to you prepaid on receipt of price. It is no experiment as hundreds of grateful women testify daily. The doctor is always glad to answer questions. Do not hesitate to write for information.

We will be glad to send you a large trial bottle free upon receipt of 10c. to cover postage and packing. Address, Zoa Phora Co., Kalamazoo, Mich.

"Don't beg so much of business men," says an exchange. "There is seldom a week passes, and sometimes hardly a day, when our citizens who are engaged in business are not called on to contribute something for charity's sake. It is always the merchants who are asked to shoulder this varied gratuitous giving. Some people seem to think that they who are in business can pick up dollars anywhere and ought to contribute willingly every time it is asked. We'll just say as a rule dollars are no more plentiful with business men than with any other vocation. Don't ask too much of them. Just remember that they have troubles of their own. Beg your alms or awhile of the retired men who live if fine houses and have money drawing interest. The business men would appreciate the change."

While Gov. Durbin is as radical as any man can be politically, he is being commended by democrats in one respect, and that is on his appointments of democratic members on boards of various state institutions. The law requires one man on such boards to be chosen from the party out of power, Former governors were in the habit of doing this by appointing some democrat who sailed under the name but voted with the republicans, but Mr. Durbin has been appointing democrats who work for the democratic party and vote the democratic ticket.

MARRIES SPIRIT.

Says She is Well Satisfied with Bargain Made.

DETROIT, Mich., Jan. 29.—Mrs. Sarah Williams, a buxom widow of 45, was the other night married to Theodore Comstock, who once was a successful Michigan miller, but who has been dead a number of years. The ceremony was performed by Mollie Ladell, a noted spiritualist medium in the presence of a numerous following of the cult. The courtship is said to have extended over a number of months, being conducted by Medium Ladell. The ceremony commenced by the singing of "Nearer My God to Thee."

In the boom days of Oil Creek a land owner had more money than he had ever dreamed of possessing. His daughter was ambitious socially and went to a boarding school. But is was impossible for her to get on to the curves of the higher education.

One day her father visited the girl at the school and found the young lady hopelessly discouraged. She admitted that she could not learn to perform an autopsy on grammatical sentences or get at the true inwardness of mathematical problems. The oil prince, her father, was indignant. He had a talk with the principal of the school.

He Who Would Thrive Must Either Hold or Drive.

That would do in the olden times but now he must both hold and drive.

Men everywhere are driving and climbing for dear life (or gold). It is this being everlastingly at it that shortens men's lives. Every nerve is put on the stretch and sooner or later the system begins to give out. The stomach is of the greatest possible importance in sustaining life and vigor, and is liable to be the first to give out. The work performed by the bowels is no less important. The overstrain caused by rush and worry of life soon results in indigestion, dyspepsia, constipation, liver and kidney troubles. Headache, nervousness, and every conceivable trouble soon follows unless the right thing is done. The old philosophers searched for the elixir of life but failed to find it. We have found it.

Congressman Emerson and Congressman Connell as well as Ex-Treasurer of United States, Wyman, Senator Brackett, Judge Houghton, Mayor, Knapp, Attorney-General Smyth, not only speak in the highest terms of our Company but of our great remedy, Dr. Kay's Renovator, and thousands of the most eminent people who know by experience, endorse Dr. Kay's Renovator, as the greatest known remedy.

If you are beginning to give out or if you are down where other remedies have failed to help you, don't wait but go at once to your druggist and get Dr. Kay's Renovator. It strikes to the very root of the whole trouble, beginning with the stomach, bowels, liver and kidneys and renovates and invigorates the whole system, giving new life, health and vigor to the whole body. It is not only very efficient but perfectly safe for all ages and conditions. Ask for our pamphlet giving reports of the most marvelous cures known to the medical profession, or send to us for a copy. Free advice, sample and book for the asking. Prices 25c, 50c and $1. Dr. B. Largest Daily Newspaper in the United States.

Chicago's great 6-day-a-week newspaper—THE CHICAGO DAILY NEWS—enjoys the double distinction of being the largest daily newspaper in the United States and of having the largest circulation. Its customary size is 12, 14, 16, 18, 20, 22, 24 or 26 pages, according to circumstances, and its circulation is the largest of any daily paper, morning or evening, in America—nearly 800,000 a day.

Its great special cable service, from all parts of the world; its complete market page, its unique daily page of original, up-to-date humorous pictures, its splendid women's department, its humorously illustrated sporting news page, its daily complete story, the inimitable "Bowser" sketches and a score of other bright and entertaining features—combined with the world's news every day *and the truth about it*—have made THE CHICAGO DAILY NEWS the most popular, most widely circulated newspaper in the United States.

Over-Work Weakens Your Kidneys.

Unhealthy Kidneys Make Impure Blood.

All the blood in your body passes through your kidneys once every three minutes.

The kidneys are your blood purifiers, they filter out the waste or impurities in the blood.

If they are sick or out of order, they fail to do their work.

Pains, aches and rheumatism come from excess of uric acid in the blood, due to neglected kidney trouble.

Kidney trouble causes quick or unsteady heart beats, and makes one feel as though they had heart trouble, because the heart is over-working in pumping thick, kidney-poisoned blood through veins and arteries.

It used to be considered that only urinary troubles were to be traced to the kidneys, but now modern science proves that nearly all constitutional diseases have their beginning in kidney trouble.

If you are sick you can make no mistake by first doctoring your kidneys. The mild and the extraordinary effect of Dr. Kilmer's **Swamp-Root**, the great kidney remedy is soon realized. It stands the highest for its wonderful cures of the most distressing cases and is sold on its merits by all druggists in fifty-cent and one-dollar sizes. You may have a sample bottle by mail free, also pamphlet telling you how to find out if you have kidney or bladder trouble. Mention this paper when writing Dr. Kilmer & Co., Binghamton, N. Y.

Repairing Neatly Done

Never thought of such a sign for a medicine did you? Well, it's a good sign for Scott's Emulsion. The body has to be repaired like other things and Scott's Emulsion is the medicine that does it.

These poor bodies wear out from worry, from over-work, from disease. They get thin and weak. Some of the new ones are not well made—and all of the old ones are racked from long usage.

Scott's Emulsion fixes all kinds. It does the work both inside and out. It makes soft bones hard, thin blood red, weak lungs strong, hollow places full. Only the best materials are used in the patching and the patches don't show through the new glow of health.

No one has to wait his turn. You can do it yourself—you and the bottle.

This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle.

SHOT WOMAN IN COURT.

Plaintiff in Alleged Theft Case Attempts Murder.

WILKESBARRE, Pa., Jan. 29.—Michael Joyce, of Pittston, had his boarding mistress, Mary Cadden, arrested yesterday for stealing, some money from his room. The hearing was held at the office of Magistrate Barrett, of Pittston. When on the witness stand the woman denied the charge. Without giving a sign Joyce, who sat near by, pulled out a revolver and fired at the witness. The ball struck the woman in the neck. Before he could fire the second shot Magistrate Barrett nocked the revolver from the man's hand. A physician was hastily summoned and Mrs. Cadqen removed to her home. Her wound is not a serious one.

THE OHIO FIGHT

If the Foraker men were in the least disconcerted by the coming of General Dick, there was not outward manifestation of it. There were all sorts of rumors flying, however. One of them was that if the Foraker men won they would district the State in such a manner as to make it impossible for General Dick to be returned to Congres. Another was that the Foraker forces would oppose General Dick in his aspiration to secure the nomination for Governor two years hence. The Hanna forces gave no attention to the rumors, however. They asserted there was no doubt that they were out of it

DICK TO FIGHT FOR HANNA.

Buckeye Contest is Becoming More Spirited.

COLMUBUS, Ohio, Jan. 24.—The chief development in the legislative contest last night was the announcement that Congressman Charles Dick was on his way to Columbus to assist the Hanna forces. General Dick left Akron last night and arrived here at 2 a. m. There was a show of greater confidence on the part of the Hanna followers as soon as it became positively known that General Dick was here. It had not been generally expected that he would take any active part in the contest. Rumor had it that he desired to keep entirely aloof from the present factional contention on account of his gubernatorial aspiryears past has been paying 7 per cent. dividends.

MINER'S THEATRE BURNED.

Chorus Girls Escaped Half Clad.—Loss Quarter of a Million.

NEW YORK, Jan. 27.—Miner's Theatre was destroyed by fire early this morning. The audience attending last night's performance had been out but half an hour when the flames burst forth, originating from a cigarette which one of the chorus girls had dropped in the scenery. The loss will reach a quarter of a million dollars.

A number of half-dressed chorus girls and other employes narrowly escaped death, fleeing from the burning building half clad.

MANILA, Jan. 23.—Lieutenant Charles D. Rhodes, of the Sixth cavalry, accompanied by two orderlies, when within six miles of Manila yesterday, came across 20 armed insurgents in a cuartel or barracks. The insurgents shouted "Americanos" and Lieutenant Rhodes feigned a retreat. But in reality he took the cuartel in flank and drove out the insurgents, capturing two rifles, three revolvers and some ammunition. Rhodes then rned the barracks down and pro-ub ceeded to Manila.

One of the worst "clerical errors" occurred in Bradford recently, according to the veracious Era. A maiden lady who has quite a growth of down upon her features received as a present a shaving set. The mistake of a clerk in a store had caused a transposition of gifts. The card of the donor of the shaving set was that of a gentleman friend of the maiden lady and great excitement prevailed when the original package was delivered. There was an exchange of notes, an explanation, and the missent present was returned. A lovely toilet case that had been delayed in transmission, finally reached the woman in the case and all was well—excepting the embarrassment which the incident produced.

MANY ARE STARVING.

Agrarians Compelled to Eat Their Dogs for Food.

BERLIN, Jan. 23.—The distress among the Agrarians is most serious. Farmers are flocking to the city, hoping to obtain food. Many have been compelled to eat their pet dogs in order to escape starvation.

Matters have reached such an extremity that the authorities of the village of Gebent are seriously considering the establishment of a big butchery in order to properly prepare cases for consumption.

FOUR CHARGED WITH MURDER.

Van Wormer Brothers and Bruce Held For Trial.

HUDSON, N. Y., Jan. 29.—Last night in the county court house the three Van Wormer brothers and Harvey Bruce had the charge of murder in the first degree read to them. The place was packed with onlookers. The prisoners bore the strain of confinement well and appeared little concerned about their terrible position. The coroner committed all four to the care of the sheriff on the charge of murder in the first degree in killing Peter A. Hallenbeck. All waived examination and entered pleas of not guilty. The grand jury will act in the case on January 13 and the trial will probably take place in May.

The January number of The Arena begins the twenty-seventh volume and the fourteenth year of that well-known review. It opens with a fine essay on "Anarchism," by the Revn R. Heber Newton, D. D., in which the writer discusses the e hical, sociological, and political aspects of that burning question. "The English Friendly Societies," by Elwood Pomeroy, A. M., is an intersting descriptin of a recent visit to the scene of the "Rochdale experiment" in cooperation. Theodore F. Seward describes the "Spiritual Birth of the American Nation," and in addition to his regular departments of "Topics of the Times" and "Books of the Day," Editor B. O. Flower contributes a luminous essay on "The Rise of Photography and its Service to Mankind." T. St. Pierre discusses "Responsibility in Municipal Government," and W. A. Curtis considers "Race Reversion in America." Other features are: "Corporations and Trusts," by Thomas Conyngton; "The Development of Brotherhood," by Prof. Eugenia Parham; "Ibsen's Peer Gynt," by Walter Leighton; "The Work of Wives," by Flora M Thompson, and "What Shall it Profit?" a New Year's story by M. P. Stuart. The Alliance Publishing Company, Fifth Avenue, New York.

No Time to Lose

You cannot afford to disregard the warnings of a weak and diseased heart and put off taking the prescription of the world's greatest authority on heart and nervous disorders—

Dr. Miles' Heart Cure.

If your heart palpitates, flutters, or you are short of breath, have smothering spells, pain in left side, shoulder or arm, you have heart trouble and are liable to drop dead any moment.

Major J. W. Woodcock, one of the best known oil operators in the country dropped dead from heart disease recently at his home in Portland, Ind., while mowing his lawn.—*The Press.*

Mrs. M. A. Birdsall, Watkins, N. Y., whose portrait heads this advertisement, says: "I write this through gratitude for benefits I received from Dr. Miles' Heart Cure. I had palpitation of the heart, severe pains under the left shoulder, and my general health was miserable. A few bottles of Dr. Miles' Heart Cure cured me entirely.

NASAL CATARRH CURED

Pe-ru-na Cures a Case of Five Years' Standing.

Mr. Rudolph M. Patterson, Chicago, Ill.

Hon. Rudolph M. Patterson, a well-known lawyer, of Chicago, Ill., writes the following letter to The Peruna Medicine Co., at Columbus, Ohio:

The Peruna Medicine Company, Columbus, Ohio:

Gentlemen---"I have been a sufferer from nasal catarrh for the past five years, and at the earnest solicitation of a friend I tried Peruna and am glad to say it has afforded a complete cure. It is with pleasure I recommend it to others."---RUDOLPH M. PATTERSON.

Mrs. J. C. Garrett, of 38 West 117th street, New York City, writes:

"I can honestly recommend Peruna as a great catarrh remedy. It heals and heals quickly and permanently.

Mrs. J. C. Garrett.

"This is simply the whole story in a word. I have for years suffered with catarrh, aggravated when I took cold and Peruna cured me. It is indeed a great medicine, and worthy the highest praise, for it is reliable and will never disappoint you."—Mrs. J. C. Garrett.

There are two things that the whole medical profession agree about concerning catarrh. The first is that catarrh is the most prevalent and omnipresent disease to which the people in the United States are subject. All classes of people have it. Those who stay indoors much and those who go outdoors much. Working classes have it and sedentary classes have it.

The doctor finds catarrh to be his constant and ever-present foe. It complicates nearly every disease he is called upon to treat.

The second thing about catarrh on which all doctors agree, is that it is difficult to cure it. Local remedies may give relief but they fail to cure permanently. Sprays or snuffs amount to little or nothing except to give temporary relief.

Catarrh is frequently located in internal organs which cannot be reached by any sort of local treatment. All this is known by every physician.

To devise some systemic internal remedy which would reach catarrh at its source, to eradicate it permanently from the system—this has been the desire of the medical profession for a long time. Forty years ago Dr. Hartman confronted this problem. He believed then that he had solved it. He still believes he has solved it. He cures thousands of people annually. During all these years Peruna has been the remedy upon which he has relied.

It was at first a private prescription, afterwards manufactured expressly for him in large quantities. This remedy, Peruna, is now to be found in every drug-store and nearly every home in the land. It is the only reliable internal remedy ever devised to cure any case of catarrh, however long the case may have been standing.

Mr. Camillus Senne, 257 West 129th street, New York, writes:

"I have fully recovered from my catarrhal troubles. I suffered for three years with catarrh of the head, nose and throat. I tried all kinds of medicine without relief, but at last I have been cured by the wonderful remedy called Peruna.

Mr. Camillus Senne.

"I read of Peruna in your almanac, and wrote you for advice, which I followed. After taking one and one-half bottles of Peruna I am entirely cured, and can recommend Peruna to anyone as the best and surest remedy for any catarrhal troubles."—Camillus Senne.

A course of Peruna never fails to bring relief. There is no other remedy like Peruna. Its cures are prompt and permanent.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

"The lecture course of Simpson M. E. church opened last night with a good attendance, and all present wers delighted with the presentation of Chaplain Lozier's great monologue 'Your Mother's Apron Strings.' Rev. Cocking was at his best and all who have heard him on other occasions know how the audience was entertained: 'Apron Strings' is of such a nature that it pleases all. It abounds with wit, wholesome instruction, tributes to mother and sound theology."—Fort Wayne Sentinel, Sept, 21, 1900. M. E. Church, Butler, Tuesday eve. Feb. 4. Admission 10 cents.

he had shed for years. And how the little boy lay upon his bed, hungry for love, dreaming about his Mother, and listening to the river as it rushed past him, always asking why it was talking about his mother, who died at his birth. Before his death on Saturday he was allowed to go home. These were happy days to be with his sister, Florence, and she finding that his little brain was muddled and he did not see anything clearly spent her own pocket money to buy the books he was studying and studied them so she might make them clear to Paul i. possible. One Saturday afternoon when for the first time in his life, what had been dark was made clear. You will remember how he turned to her and said: "I love you Floy" and she said: "Yes Pau. I love you too," and out of the little cot, several times during the night he called "I love you Floy."

If you know what it is, to have let in the light of knowledge and the light of love into the human soul for the first time, you know how Floy felt then. Teachers, mothers, fathers, those who deal with children, we have to represent God in no nobler capacity than making things bright and clear, and putting around the little ones an environment adapted to their stage of developement. so that all things may seem clear when they are little, and after awhile they may see the greater spiritual truths clearly when they reach the older time.

It is given out that he and his wife have mutually agreed to separate, she to take the children. It is said that Mr. Holp returned to Chicago feeling quite blue and dejected.

Bob Hanna, who also ran, made a speech at the republican district convention. The most remarkable feature of his speech was the claim made by him that he was instrumental in securing the establishment of nearly all the rural mail routes in the 12th district, and that Robinson had not secured a single one. No man ever gave a greater exhibition of gall, and if there is a man in the district with more nerve than Bob Hanna is displaying about rural mail routes, he is certainly a wonder. Bob is evidently warming up for the second heat.

Down in DeKalb county it has been the custom for several years to haul gravel and leave it lay in windrows in the center of the road for weeks and months of travel to wear down to a decent shape. Several bad accidents have happened on account of this reckless way of doing business, the last one occurring a few days ago to Mrs. Theodore Rempis and Mrs. Sophia Rempis, of Waterloo, while returning from Auburn. The township ought to be held responsible for all accidents caused by such careless obstruction of the public highway. The gravel should be leveled down properly as soon as it is hauled onto the road.—Steuben Republican.

LETTER FROM JUDGE ROBY.

At the meeting of the city council January 20 the matter of freight charges on coal by the Vandalia from the Junction to Auburn was discussed. The rate charged is twenty-five cents per ton, which compared with the charges of the B. & O. and Hocking Valley roads for the longer hauls this matter we have received the following letter from Judge Roby:

Indianpolis, Jan 25, 1902

Gentlemen:—Observing an item in the paper relative to transfer charges on coal by the Vandalia. I have taken the liberty to call on Mr. Malott, receiver and manager of the road, and to suggest to him the mutual interests of our city and his railroad. I think I am safe in assuring you that the matter of transfer charges will be properly adjusted at once and that the Vandalia will give us in a little while through train service to Indianapolis and points south, probably enabling us to leave Auburn, have several hours in Indianapolis and return to Auburn the same day. The change in management taking place in midwinter renders it inconvenient to adjust schedules instantly, but there is no doubt that the change will ultimately be a distinct advantage to the city. Mr. Malott appreciates the importance of Auburn as a manufacturing and shipping point and I am sure that further excessive transfer charges will not be made.

Yours truly,

Frank S. Roby.

Something New.

A new graphophone for $25, which uses both large and small cylinders is the latest development in the talking machine field. This new instrument has been provided to supply a demand which has manifested itself ever since the large cylinder appeared. Its posessor, while having only one instrument, costing considerable less than any previous machine capable of using the large cylinder, may now enjoy a large variety of selections at the nominal cost of small records, and is also enabled to avail himself of the great volume and superior reproduction of the Grand record, whenever desired, at no additional cost other than that of the records themselves. Besides its other advantages this instrument is provided with an entirely new feature which has never before appeared on any graphophone This is a dial speed indicator which, by the position of a pointer, enables the operator to tell at a glance, the speed at which the machine is running and to adjust the speed by merely moving the pointer.

The Columbia Phonograph Co., No 88 Wabash Avenue, Chicago, headquarters for graphophones and talking machine supplies of every kind, will send you catalogues on application.

A YELLOW CARAVAN.

BY BARRY PAIN.

The conversation having now taken a mystical turn, stories of the familiar type naturally began to be told. There was, of course, the story of the singularly cool-headed man who wakes one night and sees distinctly before him the apparition of his brother in Australia; the apparition vanishes, and the proprietor of the singularly cool head makes a note of the time. By the very next mail he receives the sad news that at the very moment when he saw the apparition of his brother—but why go on? You know how those stories always end. Then there was the dear old narrative in which it is a dog that sees the ghost; the man sees nothing, but the dog suddenly flies in howling terror. The usual family ghosts, whose appearance betokens a death, had their innings. And after each stale and unprofitable lie the narrator made the regulation remark: "I merely give you the facts. I do not profess to explain them." This in its turn produced the absolutely inevitable response — the Shakespearean misquotation with reference to the contents of Heaven and earth and philosophy.

And all the time the melancholy little man in the corner had sat silent, listening attentively and without comment. But at last when a lull came in the mystical and imaginary output, he straightened himself up in his chair, cleared his throat, and told the story which is here given in his own words.

I wonder now—perhaps some of you have heard the story of the yellow caravan of Tory Dale. No? I had rather an interesting personal experience in connection with that . . . Certainly, if you wish to hear it I have no objection at all.

I was stopping with an uncle of mine who lives near Belham, a village in the dale, and it was there that I heard the tale first. A road runs through the bottom of the dale, and along this road one winter night many years ago came a yellow-painted caravan, drawn by a white horse. With the caravan was one man only—an old gypsy, a tinker by trade. According to all accounts, he was an evil old man and a hard drinker. It was a terribly cold night, a blizzard was blowing, and the roads were in a bad state. At a public-house where he had been drinking he had been warned not to go further. "The devil himself couldn't stop me from getting into Belham!" he answered in a surly way. He got on his box and went off. Early next morning the caravan came quietly into the village street and stopped. The driver sat motionless, but his hands still held the reins, and it was thought at first that he was asleep. He was dead!—had been dead for some hours.

Since then, from time to time, and always on a winter night, travelers from Belham have met a yellow caravan, drawn by a white horse. The driver is an old man, who sits huddled up, with his head drooped forward as if he were asleep. Sometimes it goes creaking on its way; sometimes it disappears suddenly. Once a shepherd who met it walked right through it, and described his sensations afterwards. He said it was like passing through a cold mist. Everyone in the neighborhood believes in the apparition, and in winter they shirk being on the road to Belham alone at night. I have heard children frightened by the threat that if they were not good the yellow caravan would come for them.

Well, the story (which was told to me with much more detail than I have given you) made a good deal of impression on me. It was remarkable to hear commonplace countrymen, men without a grain of imagination in them, point to the exact spot where they had seen the apparition. It was less important to them than a question of wages or weather, but it was every bit as much a fact. I looked out for contradictions in their stories, and I found none. Amongst those who had seen it was the old vicar. He declined to talk about it, but he said very much what you have been saying tonight—that there are more things in Heaven and earth than a casual observer might suppose.

One afternoon while I was on that visit to my uncle I walked out some miles to call on an old acquaintance in whose work I took a great interest. He would not let me go, but persuaded me to stay to dinner. When I hesitated he chaffed me about being afraid to meet the yellow caravan on my way home at night. As a matter of fact I was afraid, but like most cowards I was most afraid of being thought a coward. After dinner the conversation turned on ghostly subjects; he told me of several similar apparitions to the yellow caravan to be seen in different parts of the country. By the time I left I was perfectly certain that I should meet the caravan, and had quite made up my mind what to do.

I had gone a couple of miles on my road home without meeting anyone, when I came to a point where the road turned sharply. There I heard the sound of wheels coming very slowly along towards me. My first instinct was to run back as hard as I could go. But I managed to stand my ground, and with my stick firmly grasped I waited.

Round the corner came the white horse, its head down. Behind it, clear in the moonlight, was the yellow caravan, with the driver huddled up as if he were asleep, but still holding the reins. The ghastly thing came stealthily towards me. As it passed I made a cut at the horse with my stick.

And the stick did not pass through it as I had expected. The horse flung up his heels and started off as hard as he could go. The man sat up, swore at me, and lugged at the reins. A dog fastened under the caravan began to bark. In a few yards the driver brought the old horse to a standstill. I had come on a real and ordinary caravan, and not the ghostly variety. I shouted out to the man that it was my mistake entirely, and that I was sorry. And he got down from his seat, unchained that dog, and said something to it.

After that I came away. So did the dog. It turned out to be a most expensive and unsatisfactory business altogether.

The Boer's Little Joke.

The British officers in the Transvaal, who are inclined to enjoy a joke, whatever the reaction, are delighted with an anecdote relating to an interview between Kitchener and the Boer general, Botha.

At the conclusion of the fruitless conference to arrange terms of peace Botha said:

"Well, I must be gone."

"Don't be in a hurry," said Kitchener, hospitably. "You haven't got to catch a train."

"But that's just what I've got to do," answered Botha, as he took his leave.

And so he had, for two days later he caught and looted a train on the Delagoa line not far from the place of meeting.

Seeking to Solve a Mystery.

The little East end girl who had hash for breakfast the other morning looked at the last mouthful of her share long and earnestly as she poised it on her fork. Then she passed it out of sight. But the mystery still engrossed her mind.

"Daddy," she said, "what was hash when it was alive?"—Recollections of Mrs. Minnie E. Leo, in What to Eat.

No man is wise in the eyes of a fool.

Mrs. O. W. Fisk of Pleasant Lake, Ind., spent Saturday and Sunday with her daughter, Miss Lily Fisk.

Sometimes a man's neighbors consider him ungrateful because he insists on managing his own affars.

After being turned down by an heiress it is difficult to convince a young man that every cloud has silver lining

Some fellows in this town ought to have their lives insured so they would sometime be of some value to their friends.

We dont need money ourselves but the fellows we owe want us to pay them. Pay your subscription so we can help these fellows out. They threaten to kill us if we don't "whack" up soon. Don't be the cause of having a murder committed.

A few months ago Mr. Randers, a middle aged man at Laporte, married the young daughter of a neighbor. Rander's son soon fell in love with his pretty step mother, who was perfectly willing. The husband and father soon discovered the attachment. He did not hunt up his old rusty revolver by any means, but immediately procured a divorce and then accompanied his son and ex-wife to the county clerk's office where the young couple were speedily wedded.

A Lake Shore engineer while running his train between Middlebury and Goshen one night last week beheld a lantern swinging vigorously across the track, and fearing great danger ahead he quickly brought his train to a stand still. The man with the lantern came up and in an excited manner asked the engineer if there was a veterinary aboard the trrin, and if so he desired his services very much to treat a sick horse. Unluckily no such person was on the train.

The devil is not a monster with hoofs and horns and head light eyes. He is a gentleman or a lady in silks and diamonds. He is "up-to-date" and "in the fashion." He smiles and looks pleasant. He could not gain our confidence otherwise. We would run from the orthodox devil. Look out for the devil when he comes in good clothes' with the glitter of diamonds and jewels and the polish of "sassiety." He is dangerous then. Pride is the best key the devil holds to our hearts. Passion is the front door he seeks.

A citizen of Indiana has brought suit against a neighbor for $10,000 damages, alleging the neighbor hugged his wife over a barbed wire fence. We think the Indiana citizen is unreasonable. If it is worth $10,000 to hug a womon over a barbed wire fence how much would it be worth to hug a woman over a smooth wire fence? And again, how much would it be worth to hug her in the old man's parlor on a settee by a good warm fire? If you start with $10,000 with a barbed wire fence obstruction, country editors could never reach the parlor. You're too high old man, too high.

Old Ben Franklin when a boy asked his father why he did not say the blessing over the whole barrel of pork at one time and thus economize the time that was spent at each meal. During the last generation the custom of saying grace was exceedingly common. Almost every family observed it. Now the Springfield, Mass., Republican declares that it is seldom heard in New England families, even when they are descended from Puritan forefathers and have inherited the whole body of Puritan traditions. Anciently the blessing was little short of a long prayer in which everything was mentioned and the Lord was asked especially to protect the appetites of the family. Perhaps this was the reason why the New Englanders fell to with such hearty good will. The blessings enabled them to keep their stomachs in trim.

An exchange remarks: "It were better for the average boy not to be born at all, than to be born rich. It is safe to say that the boy who is babied and petted will grow up a worthless good-for-nothing. Now theories may prove all right in time, but the strong sturdy manhood that came up through a lively acquaintance with the rod and the slipper, and an abundance of hard work, will be difficult to improve upon."

There is a whole lot of truth in the sentences quoted. Just what to do with and for boys in order to equip them for future usefulness, is what puzzles many a father. But it is safe to put them to work of some kind, and keep them at it. Tramps develop from idleness quite as much as from any other cause. Instead of gratifying a boy's whims and caprices by getting for him everything his fancy may suggest, it is better to deny him sometimes, and at others to have him do something toward earning what he wants. Help him but do it judicially.

NOTE.—Alum baking powders are low priced, as alum costs but two cents a pound; but alum is a corrosive poison and it renders the baking powder dangerous to use in food.

'Twas a False Alarm.

I have used your Dr. Caldwell's Syrup Pepsin and can truthfully recommend it. Some four years ago doctors told me that I had Bright's Disease. I was laid up three months and nothing I used helped me and no food would stay on my stomach. I used one bottle of your Dr. Caldwell's Syrup Pepsin and food would stay on my stomach and I craved something to eat. I got well. There was no Bright's Disease about me. It was a "false rumor." Ever since I have recommended Dr. Caldwell's Syrup Pepsin to friends and strangers. It is just splendid. I have full confidence in it.—Geo. F. Benedict, 639 West King St., Decatur, Ill. REMARKABLE CURE OF CROUP.

I have a few words to say regarding Chamberlain's Cough Remedy. It saved my little boy's life and I feel that cannot praise it enough. I bought a bottle of it from A. E. Steere of Goodwin, S. CATARRH

Catarrh has become such a common disease that a person entirely free from this disgusting complaint is seldom met with. It is customary to speak of Catarrh as nothing more serious than a bad cold, a simple inflammation of the nose and throat. It is, in fact, a complicated and very dangerous disease; if not at first, it very soon becomes so.

The blood is quickly contaminated by the foul secretions, and the poison through the general circulation is carried to all parts of the system.

Salves, washes and sprays are unsatisfactory and disappointing, because they do not reach the seat of the trouble. S. S. S. does. It cleanses the blood of the poison and eliminates from the system all catarrhal secretions, and thus cures thoroughly and permanently the worst cases.

Mr. T. A. Williams, a leading dry-goods merchant of Spartanburg, S. C., writes: "For years I had a severe case of nasal Catarrh, with all the disagreeable effects which belong to that disease, and which make life painful and unendurable. I used medicines prescribed by leading physicians and suggested by numbers of friends, but without getting any better. I then began to take S. S. S. It had the desired effect, and cured me after taking eighteen bottles. In my opinion S. S. S. is the only medicine now in use that will effect a permanent cure of Catarrh."

SSS is the only purely vegetable blood purifier known, and the greatest of all blood medicines and tonics.

If you have Catarrh don't wait until it becomes deep-seated and chronic, but begin at once the use of S. S. S., and send for our book on Blood and Skin Diseases and write our physicians about your case.

N Jackson, Danville, Ill., writes: "My daughter had a severe attack of la grippe and a terrible cough settled on her lungs. We tried a great many remedies without giving relief. She tried Foley's Honey and Tar which cured her. She has never been troubled with a cough since." Geddes & Harding.

"Do we believe in a hell as a place of future punishment?" Well we don't know. When we think of all the mean things that other people have done to us we would give ten dollars and ninety-nine cents to know there was a hell; but when we think of the mean things we have done to other people, we would give ten times that amount to know for certain there is none.

We are pleased to see ladies put forth endevors to swell funds of our different churches, but feel assured none in our town are foolish enough to propose as a last resort, the disgusting fad of "Hugging Socials," now in vogue in several adjoining towns. We need money and lots of it, but not earned by adoption of compulsory measures. There may be localities where so long a time has intervened "beteen hugs," that it would prove a luxury, and any price is demanded, but not here is even the smallest hug on the market, at any figure. Such may occasionally be indulged in, without remuneration during adsence of papa. We were once young

Master Sogback's Pleasing Recitation on Lynching Does Duty on Occasion.

"We will next have the pleasure, gentlemen," said Prof. Spriggs, the teacher of the Polkville (Ark.) school, addressing the members of the board of directors, who had gathered at the temple of learning on a certain Friday afternoon to see the pupils put through their educational paces, "of listening to an original composition on the subject of lynching, by Mr. Lafe Sogback."

Thus introduced, says a writer in Puck, young Sogback, a spindle-necked, bulging-browed youth of 14, advanced and unbosomed himself as follows:

"Lynchin' is harmful, debasin' and expensive. It breaks the limbs of the trees, disturbs the little birds in their nests, and is a mighty abrupt way of makin' angels. Like other bad habits, it grows on the persons who indulge in it—that is, it grows on the parties that do the lynchin'. It is not elevatin', except to the feller that is lynched. To everybody else that takes part in it it is debasin'. They get a sort of cravin' or appetite, after awhile, that nothing but lynchin's will satisfy. I have known men to ride 25 or 30 miles to help lynch some feller that wasn't even a distant relative of their'n; if he had fallen off'm a bluff and broke his back in two places they wouldn't have rid half so far to help him. Lynchin' is a very harmful amusement, and should not be indulged in except in moderation.

"Of course, the foregoin' remarks apply exclusively to white men. This is all I know about lynchin'."

WEIGHING GOLD COIN.

New Machine That Does the Work of Six Men Used in Chicago Banks.

A machine which does the work of six bank clerks in weighing gold coins has been introduced in several Chicago banks, and its operation caused consternation among the bank employes. George Sites, of the First national bank, is one of the two inventors of the machine. Under his direction 3,000 gold coins at the Commercial national bank the other day were weighed, sorted and counted, says a Chicago special to the New York Times.

The fact that gold coins are accepted at weight value and not at face value is responsible for the invention of the machine. For some time banks have been receiving gold by weight, and the work of the teller has become arduous. Every grain that has been worn from a gold piece in circulation means a loss of four per cent. in value, and this amount has to be deducted.

Mr. Sites conceived the idea that the work of weighing the coin might be done by machinery. With the assistance of his brother-in-law, C. M. Reeves, he worked out the delicate mechanism. The coins are fed to the machine much as wheat to a mill. The standard weight coins are returned to one compartment and the underweight coins to another. The machine makes no mistakes.

NO BEGGARS IN LOMBARDY.

The Northern Province of Italy Is Fruitful and Has No Mendicants.

To the tourist through Italy the contrast between the north and south provinces in the matter of beggary along the streets and highways has often been remarked. There is little or no begging in northern Italy, as there is in Naples. In the southern part of the peninsula the people are mixed with the scum of the levant. In the north the country is agriculturally rich and there are no crop failures. The irrigation system is so good and the water from the mountains so plentiful that the plains of Lombardy are a delight to the eye. The people are a business people, serious, self-contained and self-respecting. The south lives off what the tourists spend, the north lives on their business.

The average tourist stays in Naples, including Pompeii, Vesuvius, Sorrento, Amalfi ten days; Rome two weeks, Florence five or seven days, Venice four, Genoa one and Milan one or three. Tourists generally do not see Turin, and Milan and Turin gave me a distinct pleasure. The big opera house of Milan, known as La Scala, has been very little used of late years. It belongs to the past. Reputations were made there formerly, but not now.

To Establish Colonial Army.

The Lokal Anzeiger, reviving the report that the German government intends to establish a colonial army of volunteers, declares that Count von Waldersee has been consulted and that the project will be carried out soon.

Should the reichstag, as is expected, make the necessary appropriation, the colonial army will be formed of volunteers of the reserve and landwehr, who may settle in the colonies on the expiration of their term of service.

It is probable that Count von Waldersee will receive the chief command.

Czarewitch After a Wife.

According to society gossip at London the Connaught household is the Mecca of marriageable princes. In addition to the report that the crown prince of Germany is there to court one of the daughters of the duke and duchess of Connaught, it is said that the betrothal of Princess Margaret of Connaught to the czarewitch (Grand Duke Michael, brother of the czar) will shortly be announced.

HE FEARED HE HAD LOST

When Wu Ting Fang, the famous Chinese Minister to Washington, irritable and somewhat forgetful from a severe cold, missed one day from the front of his cap the immense diamond he always wears there, he was dreadfully frightened. A friend pointed out that the statesman had inadvertently donned his turban wrong side before, and that the diamond was safe in the rear. Had Wu Ting Fang been wearing a Benson's Porous Plaster on his chest or back to cure his cold, he never would have doubted its location. He would have felt it doing its work,—warming and making flexible the torpid muscles, extracting the pain and soreness, promoting the free circulation of the blood, stimulating the skin and lungs to proper action, and so *dissolving* and banishing the malady. Thus we perceive, beloved friends, that

THE BIG DIAMOND ON HIS HAT

while a pretty thing to look upon, was of no practical use. But Benson's Plasters are supremely useful. They relieve and cure gout, rheumatism, neuralgia, colds on the chest, lame back, etc., so quickly and completely as to make you wonder how it can be. Better *now*,—well *to-morrow*; that's the way they work. Get the genuine. All druggists, or we will prepay postage on any number ordered in the United States on receipt of 25c. each.

A Boon for the Bald-Headed.

What ho! ye baldheads, look up and be of good cheer. Here is glorious news for you, coming from a reliable source. It is always a pleasure to furnish encouragement for the bald. Baldheaded men are appreciative. To gain the gratitude of a baldheaded man it is only necessary to tell him his hair may be made to grow again. And he is ever ready to share his last penny with the man who has a hair restorer. Failure does not bear him down. He hopes on, hopes ever; he is always ready to try, try again. Therefore the following from the London Globe will no doubt come to the baldheaded as a thrice welcome message:

"The use of gas to make the hair grow is one of the latest medical discoveries. The gas employed is oxygen. A large cap fits tightly round the head, and is supplied with oxygen from a bag which is slung over the patient's shoulders. It is worn for a few hours every day, and even in cases of absolute baldness is said to produce a more or less luxuriant crop of hair. The discovery was made at the Oxygen hospital, Fitzroy square, an institution of which Princess Louise is patron. The gas is used for the cure of quite a number of diseases. A woman was undergoing the oxygen cure for skin disease, and one of her arms had for many days been placed in a light airtight box filled with the gas. It was soon noticed that on that part of the arm that was unaffected by the disease the growth of hair was much stimulated, and this naturally suggested oxygen as a cure for baldness. The first experiment was made upon a woman who had completely lost her hair, and it was found that after a few weeks' treatment there was quite a strong growth."

It is further estimated that the oxygen treatment is found to benefit weak eyes and to cure consumption in a large percentage of cases, but these virtues may be lightly passed over if it will really restore even a fuzz upon the head of the bald. Let us hope, chips in the Chicago Record-Herald, that the day may be speedily coming when the bald-headed man may, instead of paying over his hard-earned savings to the hairless drug clerk for hair restorer that refuses to restore, go about with his little oxygen bag slung over his shoulder, adding to the gayety of nations and blissfully fostering the hope that never dies.

The Rural Postal System.

The postal department has issued a bound book of receipts for rural mail carriers, which resembles in a general way a check book, each page containing a stub, with a perforated line between to facilitate separation, says the Washington News. The book is kept by the carrier, and the stubs show the disposal he made of the money intrusted to him by the patron who holds his receipt. He is always supplied with blank applications, which the patron fils out himself and gives him with the money. The carrier's receipt in this manner becomes the patron's voucher, showing that he has given the carrier his money and his application; the stub becomes the carrier's voucher that money and application have been given to the postmaster, and that a money order has been made out in accordance therewith; and the postmaster's voucher is found in his own money order book, where a carbon duplicate of the order he has drawn is preserved. The postmaster may, if the patron desires and sends him by the carrier's hand an addressed envelope or letter, slip the order inside and mail it himself, or he may give the order to the carrier to be handed over to the patron on his next trip past the latter's place of residence.

That was rather a stalwart prayer that the little Gardiner boy put up and was expressive, if not wholly reverent, says the Kennebec (Me.) Journal. Living as near neighbors is a family that is in a deplorable condition, the mother dead and the four or five children coming along almost any way. One of the younger male members of this family has a decided fancy for climbing the trees on the premises and has received a few quite serious falls; so when the little four-year-old tot in the next house was saying his prayer the other night his mother was horrified to hear the following clause injected into it: "O God, take care of the Blank family. Tommy climbs the trees, and, O God, see that he doesn't fall and break his cussed neck." It is needless to say that that prayer came to a very abrupt ending.

The London Lancet, a high medical authority, says that the habit of self-drugging has grown to be a source of untold mischief. The practice has been greatly assisted by the enormous improvements in pharmaceutical preparations. Treating symptoms without medical advice may be temporarily satisfactory, but what if the physical disturbance be the sign of fatal disease? A little knowledge, coupled with overconfidence, is a dangerous thing in dealing with the ailments which come in so many forms. Varying the adage, it may be said that a man who is his own doctor has a fool for a patient.

There is a physician in Philadelphia who, according to a local exchange, is so fond of the music of Richard Wagner that whenever a child is born in a family of his patients he will suggest a name for it, invariably a name from one of the Wagner music dramas. Triplets, three little girls, were born the other day that will be named, thanks to the doctor's suggestion, Eva, Elizabeth and Brunehilde.

An example in mathematics is causing considerable debate among a number of our exchanges. The question is this: A man bought thirty five cents worth of fruit cans; he gave the clerk a dollar and she gave him back sixty-five cents. A little afterwards the man told the clerk that he had given her a bad dollar and if she would give it back to him he would give her good money in return. She gave him the bogus dollar and he gave her two fifty cent pieces. Now the proprietor thinks that he was beaten in the deal, and others think the man with the bogus dollar lost fifty cents. How do you figure it out; did either lose anything? If so, which one and how much?

SHERIFF SALE.

By virtue of a certified copy of a decree to me directed from the clerk of the circuit court of DeKalb county, Indiana, in a cause wherein Alvin Livergood is plaintiff, and Catharine Whitman is defendant, requiring me to make the sum of one hundred thirty-eight dollars and twenty-five cents, with interest on said decree and costs, I will expose at public sale to the highest bidder, on

Saturday, the 22 day of February A. D. 1902,

Between the hours of 10 o'clock a. m. and 4 o'clock p. m. of said day, at the door of the Court House, in Auburn, DeKalb County, Indiana, the rents and profits for a term not exceeding seven years, the following real estate to wit:

Commencing at the north east corner of the north west fourth of the north east quarter of section twenty (20) in Township thirty-five (35) north of range fifteen (15) east from thence running south forty (40) rods fourteen feet (14) and eight (8) inches thence west forty (40) rods fourteen (14) feet eight (8) inches thence north forty (40) rods fourteen (14) feet and eight (8) inches, thence east forty (40) rods, fourteen (14) feet and eight (8) inches to the place of beginning containing ten (10) acres and sixty-three (63) rods except chool house lot; all in DeKalb County Indiana.

If such rents and profits will not sell for a sufficient sum to satisfy said decree, interest and costs, I will at the same time and place expose at public sale the fee simple of said real estate, or so much thereof as may be sufficient to discharge said decree, interest and cost. Said sale will be made without any relief whatever from valuation or appraisement laws.

A CONTRAST

Of the face of a healthful woman with the face of one who is sick proves that quite often a sad face is a sick face. Many a woman has credit for a sunny disposition who would soon be sad of face and irritable of temper if she had to endure the womanly ills which many of her sex have borne for years.

Dr. Pierce's Favorite Prescription cures the diseases which are the source of so much pain and suffering to women. It establishes regularity, dries debilitating drains, heals inflammation and ulceration and cures female weakness.

Mrs. Cornelia Henson, of Coalton, Boyd Co., Ky., writes: "In October 1889 I gave birth to a baby and the treatment I received at the hands of the midwife left me with falling of the uterus. I had no health to speak of for three years. I had another baby which was the third child. My health began to fail and I found myself completely worn out. I had so many pains and aches my life was a burden to me and also to all the family, for I was nervous and cross and I could not sleep. Had four doctors come to see me but at last found I was slowly dying. The doctors said I had liver, lung and uterine trouble. I was in bed for months and when I *did* get up I was a sight to behold. I looked like a corpse walking about. I commenced to take Doctor Pierce's Favorite Prescription, 'Golden Medical Discovery' and 'Pellets,' and ever since then I have been a well woman. I have suffered all a woman could suffer at my monthly period until since I began the use of Dr. Pierce's medicines, but now I can say I have no pain. The dark circles around my eyes are going away and I feel better in every way. My cheeks are red and my skin is white, but before it was as yellow as saffron."

Accept no substitute for "Favorite Prescription" there is nothing just as good for weak and sick women.

Dr. Pierce's Pleasant Pellets are easy and pleasant to take. A most effective laxative.

Mr. Farmer.

REALLY, are'nt you as much of a business man as the man in town who runs a store in town? Of course. Isn't your correspondence sometimes just as important? Certainly it is. Wouldn't a little printed stationery be a good thing for you just as well as for him? Sure it would. We print lots of it. Let us take your order. It dosen't cost much and you will find it a great convenience.

REV. W. T. CULLISS.

The series of illustrated lectures given at the Lutheran church last week and Monday evening of this week were liberally patronized and richly enjoyed by all. Dr. Culliss is a well informed man and his subjects were ably handled The Luteran curch is to be congratulated over, being the means of securing such a remarkably fine entertainment presented along a religious line. The lecturer has traveled with Moody and Spruegeon all through Europe and the Holy lands and of course was in a position to present his subjects in an admirable manner.

Everybody was well pleased and the entertainments were beneficial to the public in every way.

BYRON W. KING.

It is with peasure that we announce the return of Byron W. King to Butler. He will again lecture at the M. E. Church in this city on Friday evening of this week and of course he will be greeted with a full house. He is beyond question the most popular lecturer who ever appeared in this city without any exception whatever. Personally the Herald editor believes him to be the best of his class in the United States. We advise all our readers to make every sacrifice necesssary and avail themselves of the opportunity of hearing him. It will be time most profitably spent.

THE LAKE SHORE GANG.

A correspondent of the Indianapolis News thinks that the fact that Ed Briddle the desperado killed by officers at Butler, Pa., and then into Michigan, confirms to a great extent the view that he was a member of the notorious "Lake Shore gang," one of the most powerful and compact criminal organizations that ever terrorized any section of Indiana. The rendezvous of the gang, who are now out of prison, with the most of their sympathizers, live in Toledo though they had a secret headquaiters at different places in Indiana and Michigan. The second most important "hang-out" was in Elkhart, the two principal lines of the Lake Shore extending from there east-ward. The Lake Shore gang robbed banks and safes, burglarized homes, pilfered from box cars and broke into freight depots. They drew around them influences which were able always to employ the leading lawyers where arrest occurred. It has been charged that in some places officers in with them, either from fear or greed and that at different times men who represented the state have profited by the depredations. Evidence of a positive nature was always at hand in behalf of the gang's members in trouble, and perjury was one of the very ordinary violations.

A LOCAL OIL TANK.

Col. Hope of Angola and Chicago was in the city last week and succeeded in working up a sufficient number of patrons for an oil tank to be erected in Butler. The tank is to be placed in free, after 72 barrels of gasoline were contracted for at nine cents a gallon. A sufficient amount was subscribed and we presume the tank will be erected in the near future. We now look for a fight from the Standard Co. and how it will terminate the future alone can tell.

A HUMANE SOCIETY.

Could Find Plenty To Do In This Little City.

That Butler needs a humane society all observing persons living in this city will admit. It is no uncommon thing to see a team standing for hours at a time in the cold, piercing winds without a blanket, while their owners are toasting their shins around town.

The religious belief of a certain sect, that after death, man comes back to earth in the shape of an animal; if true, and vice versa, your team might be your own father and mother; well that don't matter. A man who abuses dumb animals, would mistreat his parents without any transitory methods.

There should be a law to punish such unfeeling individuals—a law that would get them "good and plenty" and put a little brains, where none, now, apparently exist.

THE BUTLER BUGGIES.

A word to those who are anticipating buying buggies this season; we would ask you to call on Price & Maxwell, at Butler, and examine the home buggies at Butler factory. There are none better made, materials and workmanship first class, and we ask you to call and go with us to factory and examine goods for yourselves, and know just what you are getting. Leave your order and have buggy to suit you, having sold quite a number this way. We are able to save you from five to seven dollars on each job over competitors, as we have no rents, freight or drayage to pay.

Price & Maxwell.

RURAL MAIL ROUTES.

Three rural mail routes will be established out of Butler and applications for carriers should now be filed with postmaster Rudd. It is necessary that they be all in before the arrival of the special agent.

Route 1 is north, west and east.

Route 2 is south across the B. & O. tracks and back via Madden's school house.

Route 3 is via Artic and vicinity, and that post office is to be discontinued.

The following have already applied for position as carriers: Frank Stage, E. W. Imhoff, Samuel Adams, Chas. C. McNabb. Anyone who wishes can apply by calling at the Butler post office.

Senator Fairbanks writes that he has recommended all three routes and they will, now, of course be inaugurated. It is a good move and one that cannot help but result favorably for our little city.

TO ADVERTISERS.

The recent completion of the Wabash offers new possibilities to the newspapers of Butler in-as-much as it offers a new field of advertising that can be secured by the asking; merchants of the city are anxious to get space in outside papers when they are on a direct line. Waterloo, Auburn and even Garrett papers carry Fort Wayne advertising, and why not Butler. The fact is that the business men of this town, as a rule, have not been very generous with advertising favors, and they should now come out in a different light. This paper has so much space to sell and it proposes to sell it. The home merchant shall have the preferance, but unless he uses it we shall sell it elsewhere. We want to do business and intend to do business on business methods. The Herald is a good medium, and its space will not go begging. Fifty or sixty dollars a year spent in advertising is not much but there is not two firms in town who spend so much. Many keep their appropriation within ten dollars for an entire year.

SOMETHING THAT WILL DO YOU GOOD.

We know of no way in which we can be of more service to our readers than to tell them of somthing that will be of real good to them. For this reason we want to acuaint them with what consider one of the very best remedies on the market for coughs, colds, and that alarming complaint croup. We refer to Chamberlains Cough Remedy We have used it with such good results in our family so long that it has become a household necessity. By its prompt use we haven't any doubt but that it has time and again prevented croup. The testimony is given upon our own experience, and we suggest that our readers, especially those who have small children, always keep it in thir homes as a safeguard against croup.—Camden (S. C.) IN CHURCH CIRCLES.

Revival services at the U. B. Church every day and night this week 2:00 P. M. and 7:00 P. M. Everybody invited to attend these services.

—o—

At the U. B. Church 10:30 A. M. last Sunday morning occured the funeral services of the little son of Mr. and Mrs. Blanchard. Age 6 mo. 8 days. C. H. Bell officiating.

—o—

Rev. T. F. Frech delivered his popular lecture "Love, Courtship and Marriage" at New Haven, Wednesday night. Dr. Frech is an able orator and is frequently called to the lecture platform, a position he fills to the delight of his hearers.

—o—

The revival meeting at the Church of God is moving on with much interest. Congregations have been large during all the severe weather. Rev. Mary A. Strickland's lessons of Soul developement are highly appreciated by the Church and all who have listened to the words of eloquence as fell from her lips. She is an earnest consecrated worker. No one can hear her sermons without being impressed with the thought that God has truly called every life into his work. Her earnest pleading for souls to give up the paths of sin, and enter the christian life, has brought tears to many eyes, and quite a number thus far have been converted and united with the Church.

The song service, conducted by Rev. Emma L. Isenberg, the pastor, has been filled with good cheer. All are urged upon to sing, and thus the voices of many are heard hymning the praises of God. The song book used is, The Shepherds Evening Songs, published by Rev. Mrs. Strickland's husband, and the music is certainly most excellent. Mrs. Strickland's subjects for Sundty services, 10:30 a. m., The Vision of the Seven Blessings to the Church; 7:00 p. m., Queen Esther. Come early if you want a seat.

NEW VANDALIA EXTENSION.

A line from Terre Haute, Ind., to Louisville, Ky., has been established by the Vandalia. A train will depart from Terre Haute at 6:23 a. m. and will reach Louisville at 1.23 p. m.

We are pleased to announce that Dr. King President of the Pittsburg School of Oratory will be with us again on Friday evening of this week Everybody who was fortunate enough to have heard him on his former visit will surely hear him again. He is able to entertain the same audience for many nights in succession but by special requests he will repeat some of his former work in addition to a new programe.

Imitation may be sincerest flattery, but the proprietor of a patent medicine is never flattered when the druggist offers something "just as good."

The Chicago council has decided that builders of sky-scrapers may go to heaven with their buildings if they choose.

The twentieth century will have twenty-four leap years, the greatest number possible. The first leap year is 1904 and the last 2000.

They now call Mrs. Soffel's infatuation for Briddle by the convenient name of hypnotic control. Better hope it was insanity.

The president is said to be anxious to promote Capt. Charles E. Clark to the rank of vice admiral. It would be a reward worthly bestowed.

THE AUDITORS REPORT.

From the county auditors report, we glean the following regarding Wilmington township:

Value of lands,	$495,110.
" " Imp.	123,685.
" " Personal,	111,875.
" " Telegraph, telephone express, etc.,	12,905.
Value of Ry. prop.,	362,725.
Total value,	$1,087,320.

Wilmington township filed mortgage exemptions of $82,112, of which $47,331 was allowed. The sum of $2,575 of hidden personal property in this township was added to the tax duplicates. This township expended $527.01 for the poor for the year ending Jan. 1, 1902.

SOME COLD FACTS.

An ice-man in Ft. Wayne salted the ice in the ice-house of another ice-man in Ft. Wayne, and now the ice in the ice-house of the ice-man whose ice was salted, is melting away like a beautiful dream or a dollar and a half at a church fair. But, to return to cold facts. The ice in the ice-house of the ice-man, who salted the ice of the other ice-man, has been attached by the ice-man whose ice was salted. Now, how would you like to be the ice-man whose ice—but what t'll Bill. Let it go at that.

OPERA HOUSE, SATURDAY FEBRUARY 8.

Those who have seen Mr. John Griffith in such roles as "Sparticus" "Richard III," and other tragic creations, would little think that the actor is also a gifted comedian.

Several years ago, a noted phrenologist was spending a few days at Mr. Griffith's summer home up the Hudson and gained the reluctant consent of the actor to let him make a reading of his head. The usual attributes and characteristics were detected and called off, by the professor, until he surprised the assembled guests by exclaiming: "John, you ought to be a comedian. Your bump of humor is positively abnormal."

Mr. Griffith soon forgot the incident but it has been forcibly recalled this season by his phenominal success in a high comedy role in "A King's Rival." Mr. Griffith now thinks there is something in phrenology after all.

The Herald will be sent to any address in the U. S. until May 1st. for 25 cents.

ODDS AND ENDS.

The Garrett Clipper has been improved mechanically. Now if it was improved editorially it would be a fair country newspaper.

The crowd that bade Croker good-by was smaller than ever before, but the crowd that hopes he will never come back is correspondingly larger.

It is possible that the visit of Prince Henry will inspire Edwin Markham to the writing of a poem to commemorate the occasion. It could be called "The Man With the Ho—enzollern."

Easter comes early this spring, and some say this will bring early spring weather. We know it will bring pretty early Easter hats and bonnets and the milliners are now preparing to meet the demand.

On Thursday, January 23, the 10,000 mark was passed in the number of bills presented for consideration at this session in the House of Representatives. Congress has been in session only twenty-eight actual work days.

Attorney-General Knox, the father, has been requested by the Humane Society to relieve the tension of the over raw check-reins on his fast horses, and Attorney Knox the son has been arrested and fined for fast driving. Hard Knocks.

The Hobert Gazette says although there are many lodges and societies there, yet there is abundant material in that place for another one and it could easily embrace the largest number of them all in point of membership and suggests as an approprite name, "The Social Scandal Club." Possibly Hobert is not the only town where such an organization could find many people eligible to membership.

The old black slidders and winter christians are again availing themselves of the opportunity of having their sins forgiven. We once heard a Methodist minister say that the only way to save some people was to take an ax along to church during a revival and when they were converted and happy to knock them in the head and send them on to glory. That was ten years ago, but we believe it is true yet today.

When is a lie not a lie? When you kiss the bruised flesh of a baby's finger and tell him it will hurt no more. When you tell the dear sick ones looking with eager and anxious eyes toward the shoers of health, how bright they look and how they are improving day by day. When the doctor with happy smiles assures the patient he is on the mend and will soon be out. When the captain on the wide waste of the sea with a sinking ship calms the rising, frantic fears till he can launch the boats away. When the boy at the crossing in New Jersey was asked by the pursuing red coats which way Washington went, pointed in the opposite direction. When the genius of the world weaves fiction that enriches all mankind and leads them to the way of eternal right. Indeed the between truth and untruth, has puzzed mighty minds for ages.

A FEW INEALLIBLE SIGNS.

I am an ardent believer in signs and omens. The following are infallible: It is an ill omen to stumble when crossing a track in front of an express train. Falling against an active buzz-saw is the worst possible luck; It frequently preceeds an accident of some sort. To walk out of a fourth story window in one's sleep is an almost unfailing sign of approaching death. No man with an atom of superstition in his make-up should go to sleep at the juncture of two railroad lines. Trying to stop a descending pile driver with the hands is a portent of mutilation. Arsenic taken in large quantities is believed to have a very marked effect upon the taker's future life. To meet a bull in the middle of a lot, while wearing red, signifies you will soon rise in the world. It is unlucky to sleep out of doors in such a position that the full moon will shine in the face when the temperature is below zero. Wearing a crash suit during a blizzard, unless accompanied by a rabbit's foot, is apt to cast a malign spell on the lungs.

A THOUSAND DOLLARS THROWN AWAY

Mr. W. W. Baker of Plainview Neb. writes "My wife had lung trouble for over fifteen years. We tried a number of doctors and spent over a thousand dollars without any relief. She was very low and I lost all hope when a friend suggested trying Foley' Honey and Tar, which I did; and thanks be to this greatremedy it saved her life. She is stronger and enjoys better health than she has ever known in ten years. We shall never be with out Foley's Honey and Tar and would ask those afflicted to try it. Geddes & Harding.

THE LAKE SHORE NEW PASSENGER STATION, CHICAGO

Work incidents to the erection of a magnificent new passenger station in Chicago for the Lake Shore & Michigan Southern Railway is now under way.

All through trains of this road for the present arrive at and depart from the Grand Central Station in that city corner Fifth avenue and Harrison street.

Among other features incident to better accomodations for its patrons is the abandonment of the Twenty-Second street station, Chicago and the opening of a new station at Thirty First street where all through Lake Shore passenger trains stop except No. 32.

FOR SHATTERED NERVFS.

A remedy that will soothe, build up the wasted tissues and enrich the blood is indispensable. Lichty's Celery Nerve Compound has been wonderfully successful in cases of nervousness, as thousands of grateful people will testify. Sold by Geddes & Harding.

PYTHIANS PLAN RANK WORK —Governor LaFollette of Wisconsin is to be the candidate from Wisconsin at the Jubilee of K. P. to be held in Chicago March 24. Teams from the western states are to compete for the championship in a test of conferring degrees. Mayor Harrison is to be the candidate for Illinois and Senator Beveridge for Indiana. It is expected that 11,000 members of the order will be present at the ceremonies which are to be conducted with an elaborateness never before attempted by a similar body.

SOUTHERN EXCURSIONS.

On February 3rd. to the 9th. inclusive the Lake Shore and Michigan Southern Railway will sell excursion tickets to New Orleans, Mobile and Penacola at low rates. These tickets will be good returning until February 15th, inclusive.

This presents a very fine opportunity for seeing the famous Mardi Gras at New Orleans as well as an enjoyable visit to the beautiful coast resorts of the South.

Particulars from any ticket agent or A. J. Smith, G. P. and T. A. Cleveland Ohio.

Mrs. Strickland of Huntington is holding a very interesting revival at the Church of God and much interest is being taken in the work. She is a good talker and very pleasing to all who hear her.

SUICIDE STATISTICS.

Suicide continues to increase in the United States. The total number reported to the Chicago Tribune for 1901 is 7,245, as compared with 6,755 in 1900 and 5,340 in 1899. Of this total 5,850 were males and 1,395 females, which curiously shows the same proportion of nearly five males to one female for several years past. Physicians, as usual, head the list among professional men, the record standing: Physicians, 33; attorneys, 10; bankers, 6; journalists, 6; college professors, 1.

DEAFNESS CANNOT BE CURED. by local application, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing and when it is closed deafness is the result and inflamation can be taken out and this tube restored to its normal condition hearing will be destroyed forever nine cases out of ten are caused by catarrh which amounts is nothing but an inflamed condition of the mucous surfaces. We will give one hundred dollars for any case of deafness that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

FACTS AND NO MISTAKE.

If chewing gum you do use
Try the Best and don't refuse.
The reason why it's called The Best
It's away ahead of all the rest.
Now if you possess the nickel
Get The Best it has more chicle
Sugar pure and flavors fine
Than any gum in this clime.
For indigestion it is good
Combined with sugar Pepsin's good
Although it's fine as food
Pure, wholesome and a dainty.
For the teeth it has no equal
Does not contain any treacle
The Best is what its name implies
For the breath it purifies.
Don't be a goose and spend your nickel
For chewing gum that has no chicle
Ask your dealetr for the Best
Then to the truth of above attest
Chewing gum's been made for years
But none like The Best it appears
At this time to fill a place
Long sought for by the human race.
A gum so fine The best is sure
To be the stu for rich and poor
Big, little old
It's fame will soon be on every tongue
Now perhaps you' like to know.
It's made by Hatrford Chemical Co.
The Best has started and set the pace
Regular users of gum want it good
and together set with new beginners
should all ask their dealers for Hartford's best.

TAKE HEART.

Now, let us take heart from that Georgia philosopher who chirps as blithely as a blue bird on a telegraph wire—

We miss the rose
Whar it hails an' snows
An' the bare trees shake an' shiver;
The good Lord knows
We're almost froze,
But we'v got His love for kiver!"

PREVALENCY OF KIDNEY TROUBLE

So prevelent and deceptive is kidney trouple that it very often becomes well anvanced before it is even suspected, therefore, it behooves all to be on the lookout. Should you be ill, or not feeling well, it would be wise to first pay attention to the kidneys and ascertain if they are the cause of your trouble.

A simple method of finding out if your kidneys are at fault has often been called to the attention of our readers through Dr. Kilmer's Swamp-Root advertising in the columns of this paper, and it is now repeated for the benefit of those who may be interested. Viz; "Fill a bottle with urine and set aside for twenty-four or so, and if it shows a brick-dust sediment or cloudy appearance or if it is found necessary to go often through the day, or get up many times during the night, you may be sure your kidneys need attention.

After careful inquiry we find Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy is remarkably successful in the quick relief and cure of the diseases for which it is recommended. There is hardly a drug store in the land that does not keep and highly recommend this celebrated preparation for kidney, liver and bladder troubles. By special arrangements every reader of this paper may have a sample bottle of Dr. Kilmer's Swamp-Root by mail free (if they have not already had one) by sending their address to Dr. Kilmer and Co., Bringhamton, N. Y.

The Gaff farm is now divided and we have the east two thirds with buildings for sale. If you want a fine farm near Butler do not delay. Webster & Wartenbe.

ECZEMA'S ITCH IS TORTURE.

Eczema is caused by an acid humor in the blood coming in contact with the skin and producing great redness and inflammation; little pustular eruptions form and discharge a thin, sticky fluid, which dries and scales off; sometimes the skin is hard, dry and fissured. Eczema in any form is a tormenting, stubborn disease, and the itching and burning at times are almost unbearable; the acid burning humor seems to ooze out and set the skin on fire. Salves, washes nor other external applications do any real good, for as long as the poison remains in the blood it will keep the skin irritated.

BAD FORM OF TETTER.

"For three years I had Tetter on my hands, which caused them to swell to twice their natural size. Part of the time the disease was in the form of running sores, very painful, and causing me much discomfort. Four doctors said the Tetter had progressed too far to be cured, and they could do nothing for me. I took only three bottles of S. S. S. and was completely cured. This was fifteen years ago, and I have never since seen any sign of my old trouble."—MRS. L. B. JACKSON, 1414 McGee St., Kansas City, Mo.

S. S. S. neutralizes this acid poison, cools the blood and restores it to a healthy, natural state, and the rough, unhealthy skin becomes soft, smooth and clear.

SSS cures Tetter, Erysipelas, Psoriasis, Salt Rheum and all skin diseases due to a poisoned condition of the blood. Send for our book and write us about your case. Our physicians have made these diseases a life study, and can help you by their advice; we make no charge for this service. All correspondence is conducted in strictest confidence.

The Cause of Many Sudden Deaths.

There is a disease prevailing in this country most dangerous because so deceptive. Many sudden deaths are caused by it—heart disease, pneumonia, heart failure or apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs or the kidneys themselves break down and waste away cell by cell.

Bladder troubles most always result from a derangement of the kidneys and a cure is obtained quickest by a proper treatment of the kidneys. If you are feeling badly you can make no mistake by taking Dr. Kilmer's **Swamp-Root**, the great kidney, liver and bladder remedy.

It corrects inability to hold urine and scalding pain in passing it, and overcomes that unpleasant necessity of being compelled to go often during the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases.

Swamp-Root is pleasant to take and sold by all druggists in fifty-cent and one-dollar sized bottles. You may have a sample bottle of this wonderful new discovery and a book that tells all about it, both sent free by mail. Address Dr. Kilmer & Co. Binghamton, N. Y. When writing mention reading this generous offer in this paper.

INFORMATION DEPARTMENT.

DEAR DOWNEY—I enclose herewith my photograph and a lock of my hair, all wrapped in a dollar bill to apply on my subscription as directed. I believe that I am too much ongbongpwan, as we say out here in Osage Grove, Kansas. Am I right? What would you direct me to do to train down to the proportions of a fairy sylph? With deep affection,

Minnyette.

Eat prunes at every meal and sidestep carmels and chewing gum. Do not walk more than seven or eight miles a day, and breathe air as much as possible. Go in for calisthenics. Procure at the grocer's a broom, and taking it back to the house grasp it firmly near the upper end of the wood part. Move the broom briskly back and forth, so that the brush parts rub on the carpet. Do this frequently, and I am sure the happiest results will follow. You must report to me often and always enclose a dollar. Write soon.

BRAIN FOOD NONSENSE

Another ridiculous food fad has been branded by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for brain another for muscles, and still another for bones. A correct diet will not only nourish a pecular part of the body, but it will sustain every other part. Yet however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. You must prepair for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. A few doses aids digestion, stimulates the liver to healthy action purifies the bolod, and makes you feel buoyant and vigorous. You can get Dr. G. G. Green's reliable remedies at Geddes & Hardings. Get Green's Special Almanac.

WANTS THEM TO GET TOGEATHER

Bishop Walden of the Methodist Episcopal church has sounded a new note for the reunion of the northern and southern wings of the church. He thinks it the height of business folly, not to speak of other considerations, that the two churches should maintain two large publishing concerns in Mexico, and rival publishing houses at Kiobe and Tokio in Japan, with separate missionary systems every where. From a lay point of view the bishop is clearly right.

SAVED HER CHILD'S LIFE.

In three weeks our chubby little boy was changed by pneumonia almost to a seleton, writes Mrs. W. Watkins, of Pleasant City, O., A terrible cough set in that in spite of a good doctor's treatment for several weeks, grew worse every day. We then used Dr. King's New Discovery for consumption and our darling was soon sound and well. We are sure this grand medicine saved his life. Million know its the only cure for coughs, colds and all lung diseases—S. G. Stone guarantee satisfaction.—Trial bottle ree.

A NIGHT ALARM.

Worse than an alarm of fire at night is the brassy cough of croup, which sounds like the children's death knell and it means death unless something is done quickly. Foley's Honey and Tar never fails to give instant relief and quickly cures the worst forms of croup. Mrs. P. L. Cordier, of Mannington Ky., writes: "My three year old girl had a severe case of croup; the doctor said she could not live. I got a bottle of Foley's Honey and the first dose gave quick relief and saved her life." Refuse substitutes. Geddes & Harding.

The action will be brought if the trustees fail to make settlement within the prescribed time the case will be taken to court.

RUNNING FOR OFFICE.

Running for office is not always pleasant. In fact it embraces about as many trials and perplexities as anything to which man can turn his attention. It is not pleasant, because for the most part men are dissapointed and always count upon a little more than they actually get in the way of support. Why this should be so, is hard to explain, but all who have tried it will tell you that it is so. For this reason The Herald would like to say a few words on the subject of "coming out for office." It is a step that should be well weighed and considered before it is taken, and each man should rely largely upon own judgement. Do not allow any man to decide the question for you. It is all well enough to consult your friends, but friends are sometimes over-sanguine or indifferent and will say yes without thanking. Besides the candidate maker is abroad in the land just now and he is a dangerous quantity. His purpose is not always plain and he may desire to use you to accomplish his ends. The candidate maker may belong to the same party you do, and again he may train with the opposition. Weigh his advice carefully before acting upon it. You may thereby discover his ulterior motive. Every man has a perfect right to aspire for office, but the purpose of this article is to simply put men on their guard, for it is no small ordeal to make a hard fight for a nomination and then be compelled to face defeat at the convention or at the polls. So we say let all candidates become such of their own free will and accord, and then, if successful, they can claim the honor, and if defeated they know where to place the blame.

MUSICAL SENSATIONS IN SURGICAL ANESTHESIA.

A Paris dentist, Drossner, has discovered that while his patients succumb to the influence of an anesthetic he has noticed that the hallucinations were invariably connected with the sounds from the street below. The auditory sensations seem intimately connected with the anesthetic sleep, and the idea occurred to him to substitute for the discordant, terrifying sounds of the street harmonius musical sounds. He arranged a graghophone with a receiver for each ear. As the patient took his seat, the receivers were placed in his ears, and the nitrogen gas administered. He could hear nothing but the music. The operation over, the patient is aroused with none of the hallucinations from the street noises, but calm and cheerful as before, saying he heard nothing but the music.

This ingenious device is certainly a definite advance on the part of the anesthetist. Not ouly can it be used in the case of the temporary anesthesia of nitrous oxide gas, but it can be called into action in ether and chloform narcosis. It is a common experience that one of the most disagreeable features about taking an anesthetic is the terrifying noises heard by the patient. These can all be avoided by using a graphophone. It was pointed out to the Academy of Medicine of Paris that the general anesthesia may be begun with nitrous oxide gas, using the graphophone, and then the anesthetic state kept up with ether or chloroform. This proceedure certainly robs the patient of a most painful part of the anesthesia, and should be practised wherever practicable. The French dentist who first advocated it is certainly a resourceful man. The proceedure may seem a refinement to some, but it certainly will win the gratitude of those who suffer so much from the auditory hallucinations of anesthetization.

ONCE IS ENOUGH TO SEE

Gustave Dore's portrait of Dante is worth seeing—once. But once is enough. Some such look you notice on the faces of those who have suffered, and still suffer, much physical pain; people subject to rheumatism, gout, neuralgia, periodic headache, lumbago, or pain from some old lesion. This pain-habit puts its marks on them, as the custom of handling ropes crooks a sailor's fingers; or as too much riding of a bicycle stamps a worried expression on certain faces. No wonder people said of the Italian poet as he passed along, "There goes

THE MAN WHO NEVER LAUGHS."

The complaints above named all yield to the action of Benson's Porous Plasters, and quickly too. Not only those, but colds and coughs, kidney and liver affections, all congestions and muscular strains, diseases of the chest, asthma and all ailments which are open to external treatment. It is frequently said that *Benson's Plaster is Pain's Master*. It cures when others are not even able to relieve. For thirty years the leading external remedy. The old-style plasters, as well as salves, liniments, oils, etc., have little or no efficacy as compared with it. Use it. Trust it. Keep it in the house. Ask for Benson's Plaster; take no other. The DeKalb County Herald

PUBLISHED WEEKLY.

O. H. DOWNEY, Editor and Publisher.

The Herald is the Only All-Home-Printed Newspaper in DeKalb Co.

FRIDAY, FEBRUARY 7, 1902.

OUR NEW TYPE SETTING MACHINE.

In our editorial columns this week, it is perhaps in order to explain why the HERALD has installed a type-setting machine on a weekly newspaper. Of course, it is an extraordinary event, but we desire to make this paper in the future, so much better than it has ever been in the past, that we need modern methods with which to accomplish it. Setting type by hand is a slow process, and a newspaper is always handicapped in getting up enough type to fill its columns, and then the rush of going to press is so great that important events are frequently overlooked. Our machine is the Thorne, and it sets and distributes the actual type. In distribution, the machine places 10,000 ems or about 22,000 type in their proper places per hour, which it does without any assistance except the shifting of a belt, and only requires one-fourth horse power to run it. It will set and distribute type at the same time, or do either simgly. In setting type, all depends upon the skill of the person at the key board, which requires a few weeks practice before much speed is attained. The machine is capable of setting up a newspaper like the HERALD in ten hours, when an experienced person is operating it. The key board is like that of a type-writer, in fact there is very little difference. The machine is in operation daily and the public generally is invited to call and see it in operation. It is certainly a mechanical wonder.

DR. F. H. HINES.

In the selection of Dr. Hines, treasurer of DeKalb county, as chairman of the county central committee, the democrats made a wise choice. He is a keen, sagacious individual, who possesses the faculty of listening while the other fellow does the talking. He is a man of the highest sense of honor, whose integrity is known to all. He will lead the democracy to a grander victory than ever before and he will accomplish it on honorable lines. Dr. Hines is an excellent politician and the old democratic craft could not be in safer hands. Here is to you Chairman Hines—the HERALD will co-operate with you at every opportunity.

THE Plymouth Democrat of last week says:

A new fraternal society to be known as the American Standard Bearers is being organized at South Bend and Mishawaka and includes the names of some of the prominent business people of the two towns. Besides the life, accident and sick insurance, it will erect a $100 monument for each member when he dies. The latter feature will, of course, appeal to everybody.

A monument, of course, is something desired by nearly every man. It should bear some appropriate epitaph, so future generations can, as they journey through the silent city of the dead, be made to understand that here lies somebody, who was born sometime, and who is still dead. The fact that we will have a monument after we are dead, is some consolation to most of us—we will not be so quickly forgotten. The cold unfeeling marble slab out in the cemetry will tend to remind our friends and others that we once existed. With many of us, that will be the only rememberance we leave behind us, except possibly the immediate members of our families—even a tombstone will crumble and fall to earth, and like the person, it is erected to commemorate. In the language of Byron W. King, "I would rather be able to write one poem like Eugene Field's "Little Boy Blue," which will go echoing through the ages long yet to come, than to have the finest tombstone in this great world of ours. Man is the only animal that desires a tombstone—he is so fearful lest the world forget that he once lived and formed a part of it." The cold stone conveys no knowledge except in a few cases.

William Jennings Bryan received the first degree in Masonry at Lincoln, Neb., last Tuesday evening. The lodge will give a banquet to the class of which Mr. Bryan is one, after they have taken the third degree, at which Mr. Bryan will respond to a toast. It will be an easy matter for him to make a speech on the subject of Masonry. All his life he has been advocating one of the principal tenents of the order—"The fatherhood of God and the brotherhood of man."

A bill has been introduced into congress providing for the resumption of the coinage of 2½ pieces. There are a lot of half-cent people in the world who would be afforded considerable satisfaction by putting such a coin in circulation.—Columbia City Post.

A bill to issue fractional paper currency would be more suitable, as it would permit people to send small sums through the mail. Fractional paper currency is a commercial necessity and congress should provide for it.

Hon. H. C. Smith, who has attracted attention recently by declaring in favor of electing women to congress, is now serving his second term from the Second District of Michigan.—Ft. Wayne Journal.

The Hon. Mr. Smith has bees in his bonnet. Congress as it now exists, with its saloons in the basement, its wine rooms, and we might add its "jags" is no place for a woman. Too many members of congress are so loose in morals that it would be a national disgrace to send our wives, mothers and daughters as fellow members.

DeKalb county advertises nearly six hundred delinquent tax descriptions to twenty for this county. Quite a contrast, but then DeKalb is overwhelmingly democratic.—Ligonier Plain Dealer.

That has a whole lot to do with the payment of taxes hasn't it. The consistency of the republican press in general is a jewel.

We believe The Herald under its present management has improved both in style and matter, and if you give us the encouragement of your support, we promise further improvement. If you are with us you will not wound our feelings by saying so.

STAND THEM UP AND COUNT THEM!

About the luckiest man in the senate today is Senator Mason. He has raised an issue out of which he can have a lot of fun and make a reputation for himself that will be popular from ocean to ocean.

The other day he introduced resolutions to recognize Admiral Schley as the real commander in the battle of Santiago, to present him with a sword and to strike medals in honor of the victory to be presented to the Admiral and those who served under him.

Naturally, Senator Hale moved to refer the resolutions to the naval committee, of which he is himself the chairman. Everybody understood that to be a proposition to strangle and entomb the resolutions.

Senator Mason, however, is not to be so easily sidetracked. He announces that he will wait for the usual ten days for a report from the naval committee and then failing to get it, will move in open senate to discharge the committee from further consideration of the resolutions. That will be a privileged motion on which he can move a call of the roll and so develop before the whole nation who and how many of the senators are the enemies of Admiral Schley.

It is to be hoped that he will persist in his programme and, if necessary, force that revelation. That Admiral Schley has been grossly outraged, demeaned and persecuted by the naval department is believed by more than nine-tenths of the American people. They are not at all satisfied to let his case rest where it has been put by a trucelent majority of the court of inquiry. They are determined that the wrongs perpetrated upon the battle-winner of Santiago shall be righted, and congresses and presidents will be changed until that righteous end is accomplished and the nation's records tell the truth.

Senator Mason has gotten hold of an intensely popular question and will redeem the vagaries of his past, and assure his future by pushing it to a successful conclusion. The public is behind him and justice is with him. He should use every weapon at his command to win this fight. It will make him famous with the people, and in the present temper of the patriots of Illinois should guarantee his reelection to the senate.

If Richard Olney will whirl in and make Massachusetts democratic this year he would have a bobtail flush to draw to in the 1904 nomination game.

Joint jurisdiction of the Cincinnati Northern has been assumed by the Lake Shore and the Big Four roads. The former will operate the Michigan portion of the road while the Big Four will use the Cincinnati division, this making about an equal division of the road.

Commissioner Yerkes has been appointed by the president to the yob of yerking in the Kentucky deligates in 1904. They are likely to yump as Yohn tells them.

An admirer of Ella Wheeler Wilcox has been arrested in Washington for mutilating library files. Any man who admires Ella's poems that much must be nutty.

That Oregon man who said from the scaffold that there is no happiness in being hung fully confirmed a suspecion that many people have long entertained.

There is a kicker in the cabinet. Secretary Wilson is sticking up for the beet sugars crowd and the president begins to think he has taken on too much Iowa.

Á SPANISH COUNT CURED OF LA GRIPPE!

Count Segundo de Ovies was a Carlist exile. The signature of his uncle, Louis De Ovies, is found with that of John Quincy Adams ceding Florida to the United States in a treaty with Spain. The Count is forty-six years of age, an exile from Orietto, situated in the northern part of Spain, and has been exiled since 1876; he is wealthy, and has traveled and studied the customs, habits and languages of twenty-five different nations.

In a recent letter to The Peruna Medicine Co., of Columbus, Ohio, the Count gives his endorsement to their great catarrh remedy, Peruna, in the following words:

The Canfield, Atlantic City, N. J.

The Peruna Medicine Co., Columbus, Ohio:

Gentlemen—"Last winter my secretary had a severe attack of la grippe which was cured effectually by the use of four bottles of Peruna, so when I contracted the same unpleasant sickness last fall I at once sent for a bottle. It truly worked wonders, and removed the sickening and sore feeling I had within a few days. I would not be without it now for any money, and when I go away I carry Peruna as a valuable perquisite to my traveling outfit."---JULIAN SEGUNDO, CONDE DE OVIES.

NEARLY everybody is having la grippe again. It resembles somewhat in the beginning a severe cold. A chill or cold spell is followed by aching bones, sore throat, headache, cough, and general weakness. Its course may be quite slight or severe, but in either case it nearly always leaves one in a miserable condition.

Unless Peruna is taken it will be weeks or months before a person regains his usual health. If the victim is fortunate enough to begin the use of Peruna at the commencement of the attack the course of the grip is much shortened, and the system is left in a natural state.

People who have had la grippe, but are still suffering from the after-effects, should not neglect to take Peruna, as it will promptly restore them to health.

Henry Distin, the inventor and maker of all the band instruments of the Henry Distin Manufacturing Co., writes the following from 1441 South Ninth street, Philadelphia, Pa:

Henry Distin.

"I had a bad attack of la grippe last December which lasted more than three months, and which left me with catarrh, and several of my friends advised me to try Peruna. I began with a bottle the first week in March and it certainly did me a great deal of good. I was so well satisfied that I purchased another bottle and followed the directions, and can say that it has cured me."—Henry Distin.

A large per cent of those who are afflicted with this epidemic, instead of getting well as they ought to, will have chronic catarrh as the result. This is almost invariably the case unless Peruna is taken as soon as possible after the grip begins.

Every one who has observed the effect of Peruna during the last three epidemics of la grippe positively knows that this remedy will cure it permanently.

The fact is, however, that a great multitude of people will not take Peruna, and a foundation for chronic catarrh will be laid.

Even in cases where chronic catarrh has affected the lungs, and the early stages of catarrhal consumption have been developed, Peruna can be relied upon as a prompt and lasting cure. La grippe and catarrh are at present the two great enemies of life in the land. Peruna is a cure for either.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

So runs the old saw, and as "FASHION" usually comprises the good things of life, why not enjoy them when they are in reach

We have but one life to live, and that a short one.

The fashion in New York and London, this seasion, is a veverish interest in Spain and matters Spanish—Especially is this demonstrated in the unprecedented patronage accorded to Broadway theatres where a Spanish Comedy Drama is now running under different titles, headed by two actors of note. The same play under the title of

"A KING'S RIVAL"

Will be seen in

Committees Are Welcome.

We like to see committees at our office—committees who are looking for printing.

Never yet saw a printing committee which wasn't open to suggestions.

We want to be the one to make these suggestions.

We want to see at our office the printing committee from every lodge, club, society, church or social organization.

We want to make you welcome and give you seats right near our desk.

We want to show you the way we print invitations, programs, membership blanks, application blanks, constitutions and by-laws—in fact, all the one hundred and one kinds of society printing which is usually so badly done and which could be made so attractive.

Are you on a committee?

Then this is a special invitation for your committee to come to our office and let us help you with our ideas.

Your knowledge of what you want with our knowledge of good printing will produced something which you, your committe and the society you represent can be proud of.

Committee printing is the kind of printing we are looking for.

Our prices are not high. The printing part costs as much as anybody would charge, but we buy our type, paper and other things cheaber than most people do. The thing comes out even as far as price is concerned, but you get the benefit of better printing.

The Indiana supreme court handed down a decision last week in the damage case of John Butts vs the Lake Shore & Michigan Southern railway that involves the last brief written by the late Senator Bell of Fort Wayne. When tried in the Whitley circuit court the finding was against the Lake Shoie railroad, represented by Bell and Doughman, and an appeal was taken. The brief in the case was written by Senator Bell and was the last from his pen before his fatal illness. The Supreme court sustains his contentions, as well as the oral arguments of Mr. Doughman in this matter, holding for the railroad company.

The Garrett Clipper man uses about two columns every week to explain what a great paper the Clipper is. How it has labored for the tax payer, and shown up "de gang." Something New.

A new graphophone for $25, which uses both large and small cylinders is the latest development in the talking machine field. This new instrument has been provided to supply a demand which has manifested itself ever since the large cylinder appeared. Its posessor, while having only one instrument, costing considerable less than any previous machine capable of using the large cylinder, may now enjoy a large variety of selections at the nominal cost of small records, and is also enabled to avail himself of the great volume and superior reproduction of the Grand record, whenever desired, at no additional cost other than that of the records themselves. Besides its other advantages this instrument is provided with an entirely new feature which has never before appeared on any graphophone This is a dial speed indicator which, by the position of a pointer, enables the operator to tell at a glance, the speed at which the machine is running and to adjust the speed by merely moving the pointer.

The Columbia Phonograph Co., No 88 Wabash Avenue, Chicago, headquarters for graphophones and talking machine supplies of every kind, will send you catalogues on application.

Eczema for Forty Years.

The Unqualified Statement of a Well Known Attorney, St. Ignace, Mich.

Some of the cures made by Dr. A. W. Chase's Ointment of stubborn and long continued eczema and skin diseases are causing much comment. People are beginning to realize that this Ointment is a wonder worker with all kinds of skin trouble. Attorney James J. Brown, St. Ignace, Michigan, writes as follows:

Dr. A. W. Chase Med. Co. Buffalo, N. Y.—Gents:—I cannot refrain from expressing my acknowledgement for the relief I have felt from Dr. Chase's Ointment. For 40 years I was afflicted with a skin disease which was located in one spot—on my leg. I have spent at a rough estimate five hundred dollars trying to effect a cure, and not until I applied this ointment did I get relief. You are strangers to me and this letter is prompted directly because I want to say and I feel as though I ought to say it. That Chase's ointment has effected a complete cure of my affliction. Three boxes did the work on my leg. I was also suffering from itching piles and applied the ointment which gave the best of satisfaction by affording me rest at night and rapidly causing the disease to disappear. I have received such relief and comfort from the ointment that I cannot withhold expressing my gratitude. I was so long afflicted with the tortures of eczema. I feel now that I am cured, a word of recommendation is due from me. Yours truly,

JAMES J. BROWN.

Dr. Chase's Ointment is sold at 50 cents a box at all dealers or Dr. A. W. Chase's Medicine Co., Buffalo, N. Y.

A HEAD OF ANY IN THE COUNTRY

The general equipment and condition of the Lake Shore are the equals of any railroad in the country. For the last nineteen years the company has been putting hundreds of thousands of dollars of its earnings in every portion of its property. How high a standard it has reached may be seen by comparing its train-loading with that of the other railroads. The average train-load is not over 240 tons, while the average of the Lake Shore was 322 tons in 1898, 427 tons 1899, 455 tons in 1900 and 500 tons in 1901.—Indianapolis Journal.

IF YOU WERE SCARED.

easily you might suppose that the pain in the lower part of your back meant kidney trouble. But being a person of sense you know it is only muscular stiffness, from cold and that prompt treatment with Perry Davis' Painkiller will prevent it from growing into lumbago. Act accordingly and you will be glad you saw this. There is but one Painkiller, Perry Davis'.

A story has leaked out on two of Butler's young men who attended the Pan-American exposition at Buffalo last summer. They went into one of the numerous resturants there and one was given a bill of fare. Looking over this, to most persons, unintelligible part of the up-to-date resturant, they put on a know-it all look which was meant to convey the impression to the waiter that they had travelled round the world not once or twice, and inquired of him with a tired feeling, "Do you serve lobsters?" Now the waiter was onto his job. He knew a regular traveler from a country dude at first glance, and he promply replied "Yes sir, what will you have?

COLD CURE FOR BUSY PEOPLE.

Many people neglect a cold because they say they have no time to attend to it. Krause's Cold Cure is a remedy which can be taken without danger while performing your daily duties, and will relieve the most aggravated case in 24 hours. Price 25c. Sold by Geddes & Harding.

A rag man who was gathering up worn out clothing in the country purchased a pair of discarded trousers at a farm house and remarked to the man of the house as he paid for the stuff he bought: I see sir that you are just about to lose your land on a mortgage. Guess you are right, said the discouraged looking farmer, but will you tell me how in the Sam Hill you found that out. Easy enough, said the cheerful ragman as he settled back on his peddling. I notice that these old pants are completely played out as far as the part of 'em you sat on is concerned but they show mighty little wear anywhere else.

THE BEST IN THE WORLD.

Dr. J. W. Hamilton of San Francisco, Cal., says:" I have sold Warners White Wine of Tar Syrup for years It is the best cough medicine in the world and has no equal for asthma Geddes and Harding.

The editor of the Rochester Sentinel gets pretty close to the truth in the following: Many newspapers are changing ownership at the beginning of the new year. This is largely due to the fact that many publishers lack business acumen and they lose money through bankrupt management of their papers. There are publishers who give advertisers below cost rates and permit subscribers to take the paper until they are ready to pay or mark it "refused." Such publishers are the ones who must do all their work, who keep up the howl about the poor editor and then sell out. A newspaper which is industriously and consistently edited and managed business principles is a good thing for both the owner and the community at large, but it requires enterprise and everlasting energy and tact to make such a success.

The name of Rev. Richard Pengelly, M. D. brings recollections of a Christian life devoted unceasingly and uncomplainingly to good works.

REV. RICHARD PENGELLY, M. D.

He was universally loved and respected in life and deeply and sincerely mourned in death. To the pioneer women of Michigan and the great western prairies the name of Dr. Pengelly was one revered and loved. It was the need of a physician by the pioneers that brought the famous pioneer preacher to study medicine, and as he gained in his knowledge he strove to produce a home remedy that would relieve the wretchedness, the misery and the frightful drains of female weakness when the physician was far away. In doing this he brought forth from his laboratory the now far famed Zoa Phora—christened by the grateful women of the early days of western statehood—"Women's Friend." If you suffer from female weakness, leucorrhea, suppressed or painful menstruation, laceration, weak or lame back, disordered liver or stomach, sick kidneys, rheumatism, neuralgia, nervous headache or highly nervous condition of the body or mind, if your face is pale or your skin rough, your hair falling or you have any other of the many distressing maladies produced by female weakness you will find Zoa Phora the only true tonic. It revives and regulates the menses, revitalizes the nerves, tones up the stomach, brightens the eyes and restores the bouyancy of youthful health and happy disposition. In change of life, preparation for motherhood, or restoring to health after childbirth Zoa Phora has no equal. "I was troubled with nervous headache for eight years," says Mrs Frank P. Scott, Redman, Mo. "Several doctors had treated me but failed to cure. One bottle of Zoa Phora did more for me than all the doctors." Mrs. S. E. Cryle of Salida, Colo., says:—"I cheerfully recommend Zoa Phora for all female weaknesses. Three bottles completely cured me of leucorrhea and ulceration." Get a dollar bottle at the nearest drug store, or send 10 cents to cover postage to Zoa Phora Co., Kalamazoo, Mich., for a free trial bottle. It never fails to cure all diseases of women.

Clyde E. Brown, of Butler, Ind., spent Sunday with friends in town. Must be some attraction here, eh?—Fayette Review.

There is no doubt of it as he is always in better humor when he returns.

W. D. Miller of Indianapolis, who subscribed for the Herald a few weeks ago, did so only upon a solemn pledge from the writer to abstain from the expression "Blessed Butler." So in order to prove faithful to our promise we have "cut it out." We have 2,164 other expressions that we would be pleased to "chop out" of our vocabulary at one sub per chop. Who will be the next?

"The tendency everywhere" remarks the South Bend Times "is to reduce the number of newspapers. It has become the settled conviction of those interested that fewer and better newspapers is the proper thing. Too many newspapers are a burden upon the community and usually have a deteriorating effect.

That is a good idea and one that we would like to see put in practice here in Butler. If Brother Higley would close up his shop and return to the farm it would be duly appreciated by the Herald.

A correspondent writes The Review from Butler, Ind., that there is no doubt but what the Fayette Branch will be extended to that place, or rather that the Vandalia will build its line to this place to connect with this road, in the early part of the coming summer.

If this is done there will be no better shipping point in this section than Fayette and then look out for some good factories and a boom for the town.—Fayette Review.

Before next summer comes we expect nearly everybody from Fayette to locate in Butler and we cannot see how they expect to boom. Of course they will get a new depot, but that is about all.

THE SOCIABLE CANDIDATE.

A story which is part of the flotsam and jetsam of a recent political campaign is worthy of a more permanent place in the annals of human nature. A candidate found, to his surprise, that a voter somewhat ignorent but of influence in his neighborhood had suddenly decided to vote for him. This was the reason the man gave for his change of base:

"I was against ye at first, sir, and when ye stood by that pigsty and talked with me for half an hour ye didn't budge me an inch; but after ye had gone away I got to thinking how ye had reached yer hand over the rail and scratched the pig's back till he lay down with the pleasure of it, and I made up me mind that when a man was so sociable as that with a poor fellow-creature I wasn't the one to vote against him."

Undoubtedly, if the candidate had scratched the pigs back as a mere electioneering expedient, it would not have had the same effect, for your thorough going farmer is very quick to detect a thing which is done for show. The city man frequently gets the credit of such sharpness, but the fact is that he is so prone to consider all things frauds that he is sometimes inclined to reject an honest man in favor of a sharper, because the latter appears to be clever. It is pretty safe to conclude that when a man is immensely popular with the plain people of the country there is something genuine in him which they instinctively feel; and in this case the candidates impulse to make the pig happy appears to have been half unconcious and all the more impressive on that account. It would hardly be safe to conclude that any candidate may go to Congress by the simple process of pig-scratching, but honest friendliness toward "fellow-creatures" never comes amiss in politics or in life.

SHERIFF SALE.

By virtue of a certified copy of a decree to me directed from the clerk of the circuit court of DeKalb county, Indiana, in a cause wherein Alvin Livergood is plaintiff, and Catharine Whitman is defendant, requiring me to make the sum of one hundred thirty-eight dollars and twenty-five cents, with interest on said decree and costs, I will expose at public sale to the highest bidder, on

Saturday, the 22 day of February A. D. 1802.

Between the hours of 10 o.clock a. m. and 4 o'clock p. m. of said day, at the door of the Court House, in Auburn, DeKalb County, Indiana, the rents and profits for a term not exceeding seven years, the following real estate to wit:

Commencing at the north east corner of the north west fourth of the north east quarter of section twenty (20) in Township thirty-five (35) north of range fifteen (15) east from thence running south forty (40) rods fourteen feet (14) and eight (8) inches thence west forty (40) rods fourteen (14) feet eight (8) inches thence north forty (40) rods fourteen (14) feet and eight (8) inches, thence east forty (40) rods, fourteen (14) feet and eight (8) inches to the place of beginning containing ten (10) acres and sixty-three (63) rods except chool house lot; all in DeKalb County Indiana.

If such rents and profits will not sell for a sufficient sum to satisfy said decree, interest and costs, I will at the same time and place expose at public sale the fee simple of said real estate, or so much thereof as may be sufficient to discharge said decree, interest and cost. Said sale will be made without any relief whatever from valuation or appraisement laws.

The Centennial anniversary of the first time coal was burned in this country will be celebrated February 11, at Wilkesbarre, Pa. It was tried on an open grate, word having been received that the "black rock" so plentiful near Manch Chunk would burn and give heat. The old grate is in existence, although it was twice stolen, once at the close of the Phildelphia Centennial, where it was on exhibition. It is now in the same spot that it was when first used.

The Baltimore and Ohio Railroad company is building fourteen miles of line in Pennsylvania, which is beleved to be the crookedest railroad in all the United States. This little road will extend from Boswell, Pa., to Friedens on the Somersat and Cambria branch of the Baltimore and Ohio. The air line distance is about five miles, but the configuration of the country makes it necessary to loop a number of hills in order to get an easy grade. The new road doubles on itself four times, and at one point making a loop of five miles, the road comes back to within 300 feet of itself on a grade 50 feet lower.

Sam Brilhart, postmaster at Kendallville, retired Saturday last and succeeded by George P. Alexander. Mr. Brillhart was so vexed because he was not re-appointed that he refused to allow his successor, or deputy a chance to learn the business. A daughter of Mr. Alexander spent last week in the Waterloo post office. Four years ago when Senator Fairbanks turned down Editor Conlogue and appointed Mr. Brillhart he was a statesman. Today he is a cheap skate (because Brillhart was not reappointed) in the eyes of the same crowd. It is now Senator Conlogue, who has forgiven the wrong of four years ago, and who will vote for Fairbanks as Senator because—Brillhart walks the rope and Brother Conlogue named his successor. It's a long lane that has no turn. It will take considerable congressional garden seed to heal Sam Brillhart.

The celebration of the 200th anniversary of the founding of Mobile, Ala., recalls to historians the fact that the flags of France, Spain, England, the United States, the Confederacy, and the United States again, have all waved over the city. Dr. W. T. Culliss occupied the M E. pulpit last Sunday morning and his hearars were treated to a most excelent sermon, one of the best that we have ever heard. Dr. Culliss has an excellent delivery and his language is simply perfection; he preaches Christ and Him crucified, and does not hesitate to portrait hell fire exactly as the bible does. His illustrations were superb, so much so that a full comprehension was easily arrived at.

When we sell our paper we shall take to running a church paper. Everybody in the church works for subscriptions for the paper. The preachers from the pulpit urge the people to subscribe, and we never heard of a preacher advising anybody to take this paper. We hold that the church papers have the best of the deal. Furthermore, nobody ever objects to anything that is printed in the church paper. Not a week goes by that there are not a great many people mad at this paper, and yet it is the purpose of this paper to hurt nobody's feelings.

If you like the Herald this week, don't be afraid to say so. If you are behind on your subscription try to pay a little on account; if you can't pay it pay a little. Our expenses our enormous of late—all incurred for the benefit of our readers and we hope they will antie up.

In speaking of Mrs. Egnew's funeral, we want to thank Mr. and Mrs. Brown and also Mr. Clyde Blaker for the fine music that was rendered. Her friends who were present from out of town were Mr. and Mrs. Harvey, of Bryan; Mr. and Mrs. Wingler, Mrs. Elder, Mrs. Egnew's sister, of Columbus. Contributed.

The press of today stands at the head as a factor of civilization. Take away the newspaper and the greatest preacher, teacher and detective would be silenced. The newspaper elevates worthy men and women and dethrones unworthy ones. No other power moulds public opinion like the newspaper and it is important that it be of the highest order of excellence without fear or favor, and cannot be bought with a price. To the upright man and the newspaper is his greatest assistant. To the evil-doer it is a lion in his pathway, and in this way alone the influence of the press is admired by the good and feared by the evil.

WROTE IT OUT IN FULL.

A great many farmers who have public sales find it difficulty to write them in the form ordinarily used. After making a stagger they usually give it up and with a list of articles they have for sale, they go to the printer and have him write up the rest. A Minnesota farmer however, felt equal to the occasion and wrote out his bill in full. We produce it for the benefit of those who have had trouble in that line. They will no doubt enjoy it. Here it is:

"Whereas I haf got mi farm to sell and want to go tee west out I make offer to sell a lod of oads, corn and haf several dons oder stuff. More also som bull, heifers, fresh milk gow und steers and hogs, a pig fat sow and pigs by me Jonas Schnoogh. Derms cash if you got him, if nod, nodes segured by sombody.

AND STILL ANOTHER.

It begins to look as though Butler, Ind., would like to have us all come over there. Griffin Bros. and Co., have been looking over that town with the intention of locating their excelsior factory there, but no definite arrangements have been made. They have been doing an extensive and prosperous business here, and we would be sorry to lose them. Geo. Griffin was here Tuesday in the interest of that concern.—Fayette Review.

There is no place like Butler and we are improving very rapidly. Our shipping facilities are unequaled by any town in Northern Indiana: Come to Butler.

FROM AN OHIO MINISTER.

I have used Dr. Warner's White Wine of Tar Syrup for sore throat, weak lungs coughs colds and for any disease of the kind it surpasses all other remedies. With many thanks to the doctor for his valuable remedy, I remain Rev. C. W. Hagans, Clyde, Ohio.

DO YOU KNOW.

That a man doesn't necessarily have to be a farmer in order to have hay fever?

That, giving you credit with being exdeedingly wise, you never yet saw a goat drink water, and still you can't tell why he doesn't, can you?

That a change of air is good for the health, a change of scenery good for the brain, and any old change above a penny is good for the average editor?

That these are the days some blasted idiot digs down into the grave of the past and spring the same old gag about the church oyster?

That a single man imagines he knows all there is to know concerning women, and after he is married it only takes about three appliances of a mop handle to take the conceit out of him.

That every time some people go to a show they feel called upon to display their marvelous knowledge by explaining everything to you beforehand, and that such people are a nuisance?

That you might sit out on the back fence until the nails in your shoes turned to salted peanuts and wonder why you don't get rich, and unless you get down and run around the barn a couple of times you'll never never know?

The January number of The Arena begins the twenty-seventh volume and the fourteenth year of that well-known review. It opens with a fine essay on "Anarchism," by the Revn R. Heber Newton, D. D., in which the writer discusses the ethical, sociological, and political aspects of that burning question. "The English Friendly Societies," by Eltweed Pomeroy, A. M., is an intersting descriptin of a recent visit to the scene of the "Rochdale experiment" in cooperation. Theodore F. Seward describes the "Spiritual Birth of the American Nation," and in addition to his regular departments of "Topics of the Times" and "Books of the Day," Editor B. O. Flower contributes a luminous essay on "The Rise of Photography and its Service to Mankind." T. St. Pierre discusses "Responsibility in Municipal Government," and W. A. Curtis considers "Race Reversion in America." Other features are: "Corporations and Trusts," by Thomas Conyngton; "The Development of Brotherhood," by Prof. Eugenia Parham; "Ibsen's Peer Gynt," by Walter Leighton; "The Work of Wives," by Flora M. Thompson, and "What Shall it Profit?" a New Year's story by M. P. Stuart. The Alliance Publishing Company, Fifth Avenue, New York.

One of the most valuable of the many sporting books on the market is the Police Gazette Annual and Puolistic Record for 1902. It has just been issued for this year in a vest pocket sie and contains the most important records which have a bearing upon all branches of sport. This i the biggest ten cents worth of information ever given.

No Time to Lose

You cannot afford to disregard the warnings of a weak and diseased heart and put off taking the prescription of the world's greatest authority on heart and nervous disorders—
Dr. Miles' Heart Cure.
If your heart palpitates, flutters, or you are short of breath, have smothering spells, pain in left side, shoulder or arm, you have heart trouble and are liable to drop dead any moment.
Major J. W. Woodcock, one of the best known oil operators in the country dropped dead from heart disease recently, at his home in Portland, Ind., while mowing his lawn.—The Press.
Mrs. M. A. Birdsall, Watkins, N. Y., whose portrait heads this advertisement, says: "I write this through gratitude for benefits I received from Dr. Miles' Heart Cure. I had palpitation of the heart, severe pains under the left shoulder, and my general health was miserable. A few bottles of Dr. Miles' Heart Cure cured me entirely."

A NIGHT ALARM.

Worse than an alarm of fire at night is the brassy cough of croup, which sounds like the children's death knell and it means death unless something is done quickly. Foley's Honey and Tar never fails to give instant relief and quickly cures the worst forms of croup. Mrs. P. L. Cordier, of Mannington Ky., writes: "My three year old girl had a severe case of croup; the doctor said she could not live. I got a bottle of Foley's Honey and the first dose gave quick relief and saved her life." Refuse substitutes. Geddes & Harding.

SAVED HER CHILD'S LIFE.

In three weeks our chubby little boy was changed by pneumonia almost to a seleton, writes Mrs. W. Watkins, of Pleasant City, O., A terrible cough set in that in spite of a good doctor's treatment for several weeks, grew worse every day. We then used Dr. King's New Discovery for consumption and our darling was soon sound and well. We are sure this grand medicine saved his life. PRACTICAL GARDENING.

Vick's Garden and Floral Guide for 1902, just received by us, is by far the handsomest and most valuable book ever issued by the old and well-known enterprising firm of James Vick's Sons. Doubtless many of our readers remember their grand display at the Pan-American Exposition at Buffalo, N. Y., and for which they were awarded many prizes, among them the gold medal for asters. These beautiful flowers are shown in all their lovely colorings on the covers of the Guide, while the 130 pages are profusely illustratrd with handsome half-tore cuts, true to nature, of everything for the garden and farm. Their many specialities are mentioned, such as Danish ballhead cabbage, Rochester beet, lemon cucumbor, golden, self-blanching celery, crisp as ice lettuce, Irondequoit muskmellon, Vick's daisy and Gradus peas, Vick's scarlet globe radish and Earliana tomato.

Our readers can obtain the Guide free by writing to James Vick's Sons, Rochester, N. Y., mentioning the plants which most interest them.

The pupils of the high school were at a loss to know the extreme happiness of their instructors this week, but upon inquiry the mystery was soon divulged. Another son has been added to the household of Prof. Brown Saturday, and on Friday evening the bride of Mr. Walker came to pay him a visit. They are making their home at Mrs. Crises' on Railroad street for the present.—Auburn Dispatch.

FORT WAYNE—Miss Lulu Ortman of this city was disappointed in love and attempted to kill Chick Stahl last week. Come to Butler Chick, the girls over here have no guns.

When the story of Chinese atrocities filled the papers and shocked the world, it was the women who drew the pity and sympathy of all. Doubtless many a wife who heard her husband's words of sympathy for these women thought with a pang, of the blindness of men to the suffering under their very eyes. It is true. The suffering of women in China was severe but short. Many a wife suffers for years with a daily agony of pain, her nerves shattered, her strength almost gone, and never hears a word of sympathy.

To women such as these Dr. Pierce's Favorite Prescription brings the opportunity of a new life of health and happiness. It establishes regularity, dries the drains which weaken women, heals inflammation and ulceration, and cures female weakness. It makes weak women strong and sick women well. Accept no substitute for the medicine which works wonders for weak women.

"I had falling of internal organs and had to go to bed every month; had irregular periods, which would sometimes last ten or twelve days," writes Mrs. Alice L. Holmes, of Coolspring St., Uniontown, Pa. "Had also indigestion so bad that I could hardly eat anything. Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery' cured me. I took three bottles of the 'Favorite Prescription' and one of the 'Golden Medical Discovery.'"

Sick people are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

A. D. MORSE GOES IN BUSINESS.

A. D. Morse, one of the hustling old time business men of Butler, is to again enter the mercantile arena and on Wednesday he leased both of the rooms occupied by G. Wolff, for a period of five years. He will put in a complete stock of groceries and perhaps other lines, although on his point we are not informd. He will try to purchase the Wolff stock but if he does not get it he will put in a new line.

He is a genuine hustler, a liberal advertiser and a shrewd buyer, which coupled with his personal popularity makes him a valuable addition to the business circle of our thriving little city. We wish him abundant success. The building will be improved in the spring by the addition of a plate grass front.

THE METHODIST EPISCOPAL CHURCH ITS DOCTRINES AND POLITY.

By Rev. Theo. F. Frech D. D. Pastor First M. E. Church, Butler, Ind.

Editor's Note—This is the first of a series of articles which we hope to print setting forth the doctrines faith and rules of the different religious denominations of this county.

Dr. Chalmers said, "Methodism is Christianity in earnest." John Wesley's definition of a Methodist was this: 'A Methodist is a man who loves the Lord his God with all his heart and all his soul, and all his mind, and his neighbor as himself. Dr. John Hall says: "Don't be ashamed if your neighbors do say you are a Methodist; for if you are a live one, the angels won't be ashamed of you. Prof. Green in his short history of the Engish people, writes: "But the Methodists themselves were the least results of the Methodist revival. Its action upon the church broke the lethargy of the clergy and the evangelical movement, * * made the fox hunting parson and the absentee rector at last impossible. Mr. Lecky writes; "Although the career of the elder Pitt and the splendid victories by land and sea that were won during his ministry form unquestionably the most dazzling episodes in the reign of George II, they must yield, I think in real importance to the religious revolution which shortly before had been begun in England by the preaching of the Wesleys and Whitefield." John Wesley, founder of our beloved Methodism, is regarded to day as being "the world's greatest evangelist since the Apostle Paul." Dr. Philip Schaff says; "John Wesley was the most apostolic man that the Anglo Saxon race has produced." Wesley was the greatest character of the 18th century. And after the establishment of the American Republic, the institution of Methodism is the greatest event of the 18th century. Of all the men who lived in that century; there is none whose influence upon after ages equals that of John Wesley. Southey expressed no more than the bare truth when he said, "I consider Wesley as the most influential mind of the last century—theman who will have produced the greatst effects centuries or perhaps millenniums hence, if the present race of men shall continue so long."

This judgment is coming to be acknowledged more and more.

Hon. Wm. T. Harris, U. S. Commissioner of Education, Washington, D. C. wrote; "The Methodist Church I believe has a larger number of church members than any other denomination in the country today. It is perhaps our strongest denomination. Its strength lies in the fact that it has a great power to reach people of all classes, high and low."

Drs. Schaff and Cook both say; "The Methodist church is the leading denomination in the U. S. The former says; "She has produced the greatest religious revival since the day of Pentecost.'

What reasons can be assigned for the unprecedented growth of Methodism?

It cannot be attributed to one reason alone. There are several reasons.

1. Because of her doctrines.
2. Because of her polity.

Our strength as a church lies in the fact that Methodism has a great power to reach people of all classes high and low. Let us notice some of the doctrines peculiar to Methodism from the beginning.

I. The doctrines of Methodism—

a. Methodism preaches a free, full and universal atonement which is available to every human being.

b. Methodism teaches that salvation is possible for every man.

c Methodism teaches the doctrine of justification by faith.

This is at the foundation of what are called peculiarly Methodist doctrines. In one sense this was not a new doctrine.

d. Methodism teaches the doctrine of freedom from the dominion of sin in this life.

e. Wesley taught the philosophical doctrine of the freedom of the human will, a dogma now accepted by the leading philosophers.

f. Then came the doctrine of the witness of the Spirit to those who are regenerated.

g. After this came the doctrine of christian perfection.

h. The possibilities of Christian attainment.

i. The new birth.

j. Responsibility and accountability.

k. The certainty of future rewards and punishments.

The ten doctrnes of grace as held in the Methodist Episcopal church are;

I. I believe that all men are sinners.

II. I believe that God the father loves all men and hates all sin.

III. I believe that Jesus Christ died for all men to make possible their salvation from sin and to make sure the salvation of all who believe in him.

IV. I believe that the Holy Spirit is given to all men to enlighten and to incline them to repent of their sins and to believe in the Lord Jesus Christ.

V. I believe that all who repent of their sins and believe in the Lord Jesus Christ receive the forgiveness of sin.—This is justification.

VI. I believe that all who receive the forgiveness of sin are at the same time made new creatures in Christ Jesus.—This is regeneration.

VII. I believe that all who are made new creatures in Christ Jesus are accepted as the children of God.—This is adoption.

VIII I believe that all who are accepted as the children of God may receive the inward assurance of the Holy Spirit to that fact.—This is the witness of the spirit.

IX. I believe that all who truly desire and seek it may love God with all their heart and soul, mind and strength, and their neighbors as themselves.—This is entire sanctification.

X. I believe that all who persevere to the end, and only those, shall be saved in heaven forever.—This is true and final perseverance.

Methodism recognizes two sacraments, 1, Baptism and 2, The Lord's Supper.

In regard to mode of baptism the Methodist church is very liberal giving the candidate his choice of mode, either sprinkling, pouring or immersion. Methodism does not believe in baptismal regeneration. Baptism is a sign of profession, a mark of difference whereby Christians are distinguished from others that are not baptized and a sign of regeneration or the new birth.

2 The polity of Methodism-The class meeting has been called the primordial call of organic Methodism.

Then comes the society, then the quartery conference, then the district conference, then the annual conference, last of all the general conference.

The peculiarities of Methodism are:

1—The class meeting.
2—Probation.
3—Local preachers.
4—The itinerancy.
5—General superintendency

Much of the success of Methodism is ascribed to her form of church government. In our system every preacher has a place to preach and every church has a preacher.

The phenomenal growth of Methodism may then be attributed to her doctrines, her piety and zeal, and to her peculiar form of church government. But I wish to mention some other elements which have contributed to her great success as a church.

1—Methodism has a heart. Even at its best, creed is cold, lifeless and powerless. Creed is head, experience is heart; either alone is fragmentary; both together are full-orbed life.

2—Methodism is loyal to the common people. The masses heard our fathers gladly. The classes were not greatly moved by the early Methodists.

3—Methodism sings the gospel. They believe singing to be a part of divine worship. The theology of Chas. Wesley's hymns is faultless.

4—Methodism is intensely revivalistic. Four fifths of her members were brought in through revivals.

Bancroft, America's greatest historan says "that Methodism saved the north west from barbarism. "She did it by her revivals.

5—Early Methodists were dead in earnest. They believed with all their hearts that men were lost, that sin was death, that judgment was near, and that doom was certain. Believing these things, they put forth every effort within their power to win men to God. Let us now consider the relation of Methodism to some of the leading questions of the day.

1—Methodism and slavery. Our church took a very firm stand at the very beginning, against slavery. John Wesley called it "the sum of all villainies." Lincoln said, "The Methodist church sends more soldiers to the field, more nurses to the hospitals and more prayers to heaven than any."

Before any other prominent voice was lifted up for the slave in England John Wesley published in 1774, a tract against the iniquitous traffic. That tract is both a classic and a standard today.

2 — Methodism and temperance. Methodism has been a temperance organization, or society, from the very beginning. Wesley was the pioneer in this modern reform. In 1743 he prepared the general rules for the guidance of his people, warning them against "drunkenness, buying or selling spirituous liquors, or drinking them, except in cases of extreme necessity." By this advice he leaped at once to a position that other men have not surpassed in a hundred years. The Discipline of Methodism contains the strongest possible terms that could be used to denounce the manufacture, sale and use of intoxicating liquors.

3—Methodism and Missions. Eight years before the formation of any missionary society known to the general public there was a regular "plan for the establishment of missions among the heathen." and this plan orignated in the Methodist church. Fifteen years before that, missionaries were sent to the heathen without any special society. Methodism itself being a missionery organization. From the beginning, Wesley's motto was, 'The world is my parish." Before he had a convert in England he was a missonary to the Indians and colored men in America. When it comes to missions the Methodist church has always been in the front ranks. It was a missionary movement in its origin and has thus continued to the present day. The annual contribution of all Methodism for missions is over three million dollars.

4—Methodism and education. Our church was born in a university. Wesley founded and lived in a school, was a classical scholar, educated in the languages, arts and sciences of his day. Robert Raikes has the honor of founding the first Sunday School, but Wesley had children organized into some such institution before Raikes organized it. Green says that "the Sunday School introduced by Wesley through the country was the beginning of popular education." The elegant Edward Everett says: "No church in this country has so successfuly engaged in education as the Methodist Church." Dr. Wm. Harris, U. S. Commissioner of Education says nearly the same.

Methodism has under her auspices about 200 academies, seminaries, colleges, universities and theological schools. These Christian schools are the glory and boast of Methodism. It is conceeded today that we have an educated ministry. You may examine the catalogues of our colleges and you will find that the studies required in the whole course necessary for graduation in any one of them are not as extensive or severe as those in the five year's course required of every Methodist preacher. Wesley required the preachers whom he sent out to be students. If they were unwilling to form studious habits, he dismissed them from his ranks. In an age of skepticism, such as this is we must have a ministry and people standing in the first ranks of learning and intelligence. With the Bible in one hand and the products of a sanctified press in the other and with the old time fire of enthusiasm in the heart, the world will be brought to the feet of its Creator and King.

True Economy

The difference in cost between an alum baking powder and the highest-class cream of tartar baking powder would not amount for a family's supply to one dollar a year.

Dr. Price's is the standard cream of tartar baking powder. It makes the food delicious and healthful.

NOTE.—You cannot, if you value good health, afford to use cheap, low-grade, alum baking powders. They are apt to spoil the food; they do endanger the health. All physicians will tell you that alum in food is deleterious.

A REMARKABLE GATHERING.

One of the most remarkable incidents that has occurred in Butler for a long time took place Thursday, Feb. 6th. The four Showalter brothers, met at the residence of John and Chas. Showalter in North Butler, where they partook of a bountiful feast, spread in honor of the occasion. This was the first time in eight years they had met to enjoy a meal togather. These four brothers are all old men, all white headed as age can make them. Their ages in the aggregate, numbers 310 years, making an average of 77 years and 6 months. Peter Showalter, who resides in LaGrange county, Ind., is 85 years old. Noah, who resides with his sons Henry and Wesley 1-2 miles south of Butler, is 81 years old. John, who resides with his grandson, Charles Showalter, in north Butler, is 78 years old. Abraham, whose home is in OneKama, Manistee county, Michigan, is 66 years old. These old pioneers are apparently hale and hearty men, considering their ages. That they have undergone many hardships, is plainly visable as they all show marks of hard labor. The Herald begs to congratulate them all over their long lives and to sincerely trust that they may be spared many years yet to enjoy many more such happy events.

A Noble county bard addresses these lines "To a Fair One:"

"Oh pale, sweet dove,
For whom I sigh,—
Could I win your love
I'd be willing to die!"

John Krontz expects to go to Tennessee in a few days where he has a position.

HIGHER EDUCATION.

Discussed with Reference to its Relgious Influence.

Paper Read at the Educational Services at the M. E. Church in Butler on Sunday Evening, Jan. 26,

By L. H. HIGLEY.

The benefits of higher education physically and mentally, are considerable and well worth its cost, but its moral benefits are by far the greater. It is well worth its cost financially, but its true value is not to be measured in dollars and cents I don't think you could come any nearer measuring the true value of higher education in dollars and cents than you could measure electricity with a yard stick.

Soloman says: "Receive my instruction and not silver and knowledge rather than choice gold," and "Happy is the man that findeth wisdom and the man that getteth understanding, for the merchanbise of it is better than the merchandise of silver and the gain thereof than fine field. She is more precious than rubies and all things thou canst desire are not to be compared unto her."

Higher education finds its true value in its moral and religious influences, in its power to make men not only wiser and more powerful but better. Though Soloman seems to have realized that fact ages ago, humanity is only now coming to understand it. Throughout history, or at least until the latter part of the last century, there seemed to be a constant antagonism between higher education and religion. Science has, from time to time, discovered the grand laws of nature which upon their first introduction have been regarded by the church as serious enemies to religion. These laws, when they became fully comprehended and established were no longer regarded as enemies, but rather as co-workers with religion in the civilization and elevation of mankind.

Higher education has done much for religion. It has taught the religious world to think rationally, that is according to cause and effect, and has by so doing delivered religion from its greatest enemy, superstition. Earthquakes and tempests are no longer regarded as imports of an angry deity, but the natural results of physical law. A flaming sky, the beautiful northern lights, has been shown to be, not a warning of divine displeasure but a display of electricity. Men no longer observe the phenomena of nature with the painful sensation of fear, but with interest and with reverence for the Divine Creator of all nature.

Men at one time worshipped the sun, the moon and other objects of nature and our Sunday and Monday moonday, are memorials of man's ignorance before higher education taught him what the sun and moon really are. But you ask why do not the ignorant of today worship the sun or moon. It is because the educated have taught them better things. The educated people of the age lead. They have more to do in shaping our beliefs and our worship than we are often aware. I believe that higher education has had as much to do with showing humanity the error of the worship of false Gods as the Bible itself. Education turns us from idolitry and directs us to the rational, intelligent worship of a true God.

Science or education has broadened our conception of creation and thus deepened reverence. The Hebrew worshiped the God of his own narrow country. He thought the earth was stationary and the center of the universe and around it circled, in some mysterious way, the sun, moon and stars. Higher education has taught us that the earth is one of the smallest in a system of planets which are moving in silent harmony around one great center, and that large as the earth seems it is but as a tiny speck, quite invisible amid the innumerable throng of flaming suns that make up God's great universe, the emenaity of which mocks expression and leads men to ask, "What is man that thou Lord art mindful of him." We are like as many little microbes infecting as it were but a handful of creation.

When Capernicus presented his famous theory of the planetary system, that doctrine which proves that the earth is nothing more than a planet and that it is constantly moving with the other planets according to certain fixed laws, around one common centre, the sun, it seemed to remove God from all nature. It was looked upon as a very pernicious theory and the church trembled with fear lest men should accept it and become atheists.

When Newton presented the law of gravitation, that law that guides alike the apple in its fall and the great planets in their course about the sun, many honest hearts were fearful lest such teachings should prove fatal to religion. But these scientific discoveries have not injured religion in the least, but have broadened our conception of God and his creations, and proved fatal to nothing but superstition.

One of the last scientific theories to cause commotion in the religious world was the doctrine of evolution. Evolution in the sense of a series of successive creations extending over a long period of time, is incontrovertable and firmly established. But the doctrine of the gradual merging of one specie into another, as for instance the gradual change from monkey to man, has never been proven or established and I have no fear that it ever will be. Evolution in the sense in which it has become established in no wise conflicts with the teachings of the Bible, but rather proves the Bible story of creation to be true.

Evolution in no way eliminates the necessity of a creator. When scientific men first discovered the fact that only the lower forms of life first appeared on the earth and that there was a gradual development from the lower to the higher, from the simplest forms of life to the more complex, men made the mistake of supposing that animal life developed or evolved itself from lower forms to higher But that doctrine, the doctrine which supposes that man is the offspring of the ape or monkey, has come far short of proof and is not accepted as an established scientific principle.

The falacy of the idea of creation without a creator might be illustrated by referring to what might be called the evolution of harvesting machinery. I set before you, first the sickle, then the cradle and then the various stages in the development of the reaper and the binder The fact that we see a gradual development step by step in the evolution of harvesting machinery does not in the least eliminate the necessity of an inventor or a maker. But on the other hand the gradual development from step to step rather proves that there was intelligence behind this developement.

The fact that science has made extended research into nature and failed to prove that man is the result of a gradual or spontaneous developement from the lower animals, leaves the Bible doctrine of creation on a firmer foundation than as though such research had never been made.

Science has proven also that the spontaneous generation of life is impossible—that life can only come from pre-existing life, which drives us back to the fact that "In the beginning God created the heavens and the earth." We can find no other explanation. John says that "without Him was not anything made that was made," and in Psalms we read that the "Heavens declare the glory of God and the firmament showeth His handiwork." All things visible and invisible are God's handiwork. Nature is only another of God's great books in which by the aid of education we can read of his laws and ways of doing things as truely as we can read them in the Bible. Every step made by science, every new discovery in the relms of nature through higher education means the re-adjustment of our intellectual telescopes to a broader view of God and his works.

In higher education, in whatever branch it may be, we are studying either directly or indirectly God's handiwork. Science is only what man has found out about God's creations, and extended research in nature cannot help but impress one with not only the existance of a creator, but with his intelligence and wisdom. The honest seeker after knowledge, who digs down deep into the mysteries of nature, cannot help but have his belief in God strengthened and his reverence deepened. It is only the superficial observer of nature that finds supposed causes for atheism.

The poet Pope says:

A little learning is a dangerous thing,
Drink deep or taste not the Pierian spring,
Their shallow draughts intoxicate the brain,
And drinking larger sobers us again.

There are many points of analogy or similarity that prevades all nature, that leads us to believe that one and the same hand created it all, and that that hand was the hand of an all wise Creator.

Let me call your attention to one very easily observed general principle. In plant life I find duality necessary to reproduction or generation of the specie That is two or a pair are necessary to reproduction. You must have the pistilate and the staminate flower to produce seed, and the two flowers must be of the same specie. In animal life we must have the male and the female of the same specie to reproduce or generate. I go higher into the relms of mental philosophy or logic and I find the same idea prevails. You give me but one fact, one idea, and I can evolve nothing from it. I have no basis for reasoning. For instance you give me the number 6. That is six and that is all I can make out of it. But you give me another number of the same denomination, we take 2 for instance, and by multiplying the 6 by 2 I get 12, by addition I get 8, by division I get 3 and so on. I must have two facts of the same denomination, we might say of the same specie for a basis of reasoning and to generate or obtain other facts. I have traced the same idea through three relms of nature and reason tells me that one and the same mind created them all, and I can attribute it to nothing but God.

Not only is this principle common to the physical and mental world, but it extends also into the spiritual world. Henry Drummond, in his famous book, Natural Law in the Spiritual World, shows that the same laws that govern physical life and growth govern also spiritual life and growth. The Savior often made use of that fact, and by parables taught that the same laws that govern in natural things also govern in spiritual things. Take for instance the quotations, "I am the vine, ye are the branches. He that abideth in me and I in him, the same bringeth forth much fruit, for without me ye can do nothing." We are born of the spirit, grow in grace and bear the fruit of the spirit.

In spiritual life as well as plant life and animal life duality is necessary to or regeneration. Man cannot save himself alone, but touched by the holy spirit is regenerated or born again.

Then, too, this is a world of opposites. We have action and reaction, the positive and the negative, light and darkness, heat and cold, life and death, right and wrong and I am led to believe that there is a God and a Devil, that there is "A Heaven to be won and a Hell to be shun."

Not only does a broad general view of nature strengthen religion, but it seems to me that a deep study of any one branch of science cannot help but impress one with not only the necessity of a creator but with His wisdom and righteousness. From a study of the mind, Cicero comes to this conclusion, "Whatever that is which thinks, which understands, which wills, which acts, it is something celestial and divine, and upon that account must necessarily be eternal.

The educated mind that not only sees the wisdom of the creator displayed in each department of nature, but that reaches out and grasps the great universal eternal principles that prevade the whole universe about us, lays a firm foundation for a substantial, rational, religious character.

If you want to consider the value of education from a financial stand point, I will say that I think that a good education is worth $5,000 to any young man of energy when he starts out in life, and if he has a firm, reliable religious character, that is worth another $5,000 to him. I think that on an average the young man who starts out in life with nothing but a good education and a good christian character has equal chances with the young man who starts in life with $10,000, but without education or christianity. I believe I would even rather take the chances of the educated christian for financial success alone to say nothing of the hereafter.

Most of our richest men and practically all men of influence started in life with nothing but plenty of vim and push, a good education and a christian character, while most of those who start in life with a fortune of $10,000 or more, end life poor, and they are unremembered for any good they have done.

But many have a wrong conception of the true valve and purpose of education, One writer has said that "The true purpose of education is to cherish and unfold the seed of immortality already sown within us; to develop to their fullest extent the capacities of every kind with which the God who made us has endowed us."

The man or woman that is educated aright is not only "conducted" as another has said "to that enjoyment which is at once best in quality and infinite in quantity," but he or she is better fitted for the duties and responsibilities of life and has deeply impressed on his or her nature the fact that "It is not all of life to live nor all of death to die."

In closing let me say to christian parents, if you want your children to become firm, substantial, rational, useful christians, educate them.

Young man or young woman, if you want to not only enjoy the highest and best there is in this life, but you want to also do all you can to make this world brighter and better and "departing leave behind you, foot prints on the sands of time," educate yourselves. If you want to make the most of this life and accomplish all that you can and should in the Master's vineyard and truely merit the divine benediction, "Well done, thou good and faithful servant," I admonish you to develope the talents with which God has endowed you.

Schley and Santiago

BY GEORGE EDWARD GRAHAM.

The intrepid Associated Press war correspondent, who was aboard the U. S. S. Brooklyn during the first four months of the campaign. Illustrated with photographs taken by the Author during the fight.

The Most Sensational Book of the Day.

The true story of the famous return of the Flying Squadron under Commodore Winfield Scott Schley, including the blockade and destruction of the Spanish fleet. TOLD FOR THE FIRST TIME.

Contains an autograph endorsement and personal account of the battle by Rear-Admiral Schley.

"The facts of the story of the movements and operations of the Flying Squadron as the author tells them in this book are correct."
—W. S. SCHLEY.

An interesting narrative of facts. Explains the so called "Retrograde Movement," the "Loop," the "Coaling Problem," and settles conclusively every adverse ruling of the Court of Inquiry.

PRESIDENT ROOSEVELT, when Governor of New York, said:—"Mr. Graham's story is the best account I have heard or read of the naval fighting during the war. It needed just as much courage to go about taking photographs as it did to work the guns."

THE NEW YORK HERALD says:—"Mr. Graham, in the telling of facts, leaves the reader free to make the deduction that several naval officers need a Court of Inquiry to re-establish their reputations, if they can be re-established."

No subject has ever been before the public that has interested everybody as the manner in which Admiral Schley has been treated, and the American people demand the *full recognition of the Hero of Santiago.* This book tells everything just as it occurred and as the eyewitnesses saw it. Book is selling like wildfire. Liberal commissions. Outfit and books now ready. Send seven 2-cent stamps for canvassing outfit. ACT QUICK. Now is the time to MAKE MONEY.

MUSICAL SENSATIONS IN SURGICAL ANESTHESIA.

A Paris dentist, Drossner, has discovered that while his patients succumb to the influence of an anesthetic he has noticed that the hallucinations were invariably connected with the sounds from the street below. The auditory sensations seem intimately connected with the anesthetic sleep, and the idea occurred to him to substitute for the discordant, terrifying sounds of the street harmonius musical sounds. He arranged a graphophone with a receiver for each ear. As the patient took his seat, the receivers were placed in his ears, and the nitrogen gas administered. He could hear nothing but the music. The operation over, the patient is aroused with none of the hallucinations from the street noises, but calm and cheerful as before, saying he heard nothing but the music.

This ingenious device is certainly a definite advance on the part of the anesthetist. Not only can it be used in the case of the temporary anesthesia of nitrous oxide gas, but it can be called into action in ether and chloroform narcosis. It is a common experience that one of the most disagreeable features about taking an anesthetic is the terrifying noises heard by the patient. These can all be avoided by using a graphophone. It was pointed out to the Academy of Medicine of Paris that the general anesthesia may be begun with nitrous oxide gas, using the graphophone, and then the anesthetic state kept up with ether or chloroform. This proceedure certainly robs the patient of a most painful part of the anesthesia, and should be practised wherever practicable. The French dentist who first advocated it is certainly a resourceful man. The proceedure may seem a refinement to some, but it certainly will win the gratitude of those who suffer so much from the auditory hallucinations of anesthetization.

The liability to disease is greatly lessened when the blood is in good condition, and the circulation healthy and vigorous. For then all refuse matter is promptly carried out of the system; otherwise it would rapidly accumulate—fermentation would take place, the blood become polluted and the constitution so weakened that a simple malady might result seriously.

A healthy, active circulation means good digestion and strong, healthy nerves.

As a blood purifier and tonic S. S. S. has no equal. It is the safest and best remedy for old people and children because it contains no minerals, but is made exclusively of roots and herbs.

No other remedy so thoroughly and effectually cleanses the blood of impurities. At the same time it builds up the weak and debilitated, and renovates the entire system. It cures permanently all manner of blood and skin troubles.

PRACTICAL GARDENING.

Vick's Garden and Floral Guide for 1902, just received by us, is by far the handsomest and most valuable book ever issued by the old and well-known enterprising firm of James Vick's Sons. Doubtless many of our readers remember their grand display at the Pan-American Exposition at Buffalo, N. Y., and for which they were awarded many prizes, among them the gold medal for asters. These beautiful flowers are shown in all their lovely colorings on the covers of the Guide, while the 130 pages are profusely illustratrd with handsome half-tone cuts, true to nature, of everything for the garden and farm. Their many specialities are mentioned, such as Danish ballhead cabbage Rochester beet, lemon cucumbor, golden, self-blanching celery, crisp as ice lettuce, Irondequoit muskmellon, Vick's daisy and Gradus peas, Vick's scarlet globe radish and Earliana tomato.

Our readers can obtain the Guide free by writing to James Vick's Sons, Rochester, N. Y., mentioning the plants which most interest them.

Chas. Voigt will handle the same old reliable brand of oysters this year; remember there is none better.

WIFE WHIPPING.

A Calfornia court has decided that under certain circumstances a man has aright to whip his wife, and now comes a Maryland court with a ruling that the nagging of a husband by the wife is insufficient cause for a divorce. This leaves a border liberty to such party to the contest than was supposed to exist, and it will require future decisions by the learned courts to clearly define the deadline in the matter of connubial punishment, beyond which the courts cannot promice immunity. It seems to be a matter of agreement on the part of the courts that wife-whipping and husband-nagging occupy equal positions of honor in the marital house of correction, and are allowable sufficient provocation, of which the one who is to administer the punishment shall be the sole judge. It has has been generally considered by the victims and those not addicted to the habit that wife-beating was about the most reprehensible act that a brutish or any other kind of a man could be guilty of, but it stands alone no longer since nagging has been placed alongside of it as a proper adjunct in the government and correction of a husband. Verily, the world it do move.

A CONSCIENTIOUS MINISTER.

Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urinates too often, if the urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of **Swamp-Root** is soon realized. It is sold by druggists, in fifty-cent and one dollar sizes. You may have a sample bottle by mail free, also pamphlet telling all about it, including many of the thousands of testimonial letters received from sufferers cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper.

NOTICE TO SUBSCRIBERS.

The Herald has several classes of subscribers on its list. One class pays for the paper at the end of the year. These we know where to look for. They are the first class substantial kind, who are aware that it required funds to conduct a news-paper and the expenses of the same do not come at the end of the year, but start in with the first day of January and recur each day, week and month till the first of the next January. Then there is a class who pay up any time before the year is up. They are all right. We have no quarrels with them. Then coms the subscriber who pays promptly when he has received the paper for the year. He is all right too. He is also our friend. Then there is another subscriber who forgets (?) to pay at the end of the year, and if you dun him he wants you to understand that his name is good for ten times the value of you you and your paper together; paying up, orders his paper stopped immediately and continues your enemy for life, or perhaps orders your paper stopped through the pest-office. He forgets your kindness in carrying him on your list for two or three years, becomes insulted at your modest request to liquidate a just account and throws your gift back in your face. Then last, but not least, comes the most contemptible, pusillanimous being to the bunch who after you have carried him like a barnacle on your list for three to ten years, pays no heed to your polite request to pay up, but goes to the post-office and takes your paper (not his) from the office and like a thief steals the news from its columns. He is worse than a thief because you have considered him your friend and sought to do him a favor. What class do you belong to, gentle reader. We leave the matter to your concience.

BRAIN FOOD NONSENSE

Another ridiculous food fad has been branded by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for brain another for muscles, and still another for bones. A correct diet will not only nourish a pecular part of the body, but it will sustain every other part. Yet however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. You must prepair for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. A few doses aids digestion, stimulates the liver to healthy action purifies the bolod, and makes you feel buoyant and vigorous. You can get Dr. G. G. Green's reliable remedies at Geddes & Hardings. INDIANA NEWS.

FORT WAYNE—Charles Dunn was sentenced to life imprisonment last week for the murder of little Alice Cothrell. He sustained his plea of innocence to the last.

EVANSVILLE,—The farmers of this end of the State report that thousands of quails are dying from starvation, as the ground is covered with sleet and ice and the birds cannot get anything to eat. The commissioners of this county will asked for an appropriation to feed the quails.

BRAZIL.—Fred Cox and Martin Decker got into an altercation over rent due on the house occupied by Cox and the latter drew a revolver. Adam Arnold, a bystander, interfered and was shot and wounded in the thigh. Cox was arrested.

LAFAYETTE. Purdue University is now giving instructions to Spanish with an enthusiastic class of several members. The purpose is to give thorough education in this course to those who may aspire to positions in the former Spanish colonies, there being a popular demand that this study be added to the curriculum. Mme. P. Mariote Davless, professor of French, is in charge of the new department

Chicago,—"The Mills Brothers, of South Bend, Ind., who it is claimed, operated a peanut corner last year with success, are said to have a corner in pineapples. It is rumored that the pineapple deal involves $5,000,000. Practically the entire crop of Cuban pineapples of the year 1902, it is said, has been secured by the firm a controlling power in the pineapple market for the entire United States."

MICHIGAN CITY,—Edward Parker, colored can testify to Indiana's tuck method of dealing justice. Monday night the house of William Chaming was robbed. Parker was suspicioned and was arrested as he was about to take a train out of town with the stolen goods in his possession Tusday morning in the superior court he was arranged, pleaded guilty and was sentenced to the reformatory for from two to foureen years, all inside of twelve hours.

FORT WAYNE—The Rev. Father Delaney, of St. Patrick's Church, delivered a strong denunciation in his sermon Sunday morning of the police of this city for failure to enforce the liquor laws. He declared the saloons run as they please on Sunday and all night during the week, and that the police cannot be ignorent of the fact. He said the saloons could only show such disregard of the law by the countenance of the city administration.

Father Delaney often has preached against lax administration of the laws which, he said, is undermining the morals of the youth of the city, but his excoriation today was the severest philippic he has yet delivered.

ROCHESTER—The following resolution has been unanimously adopted by McClung post, No. 95, G. A. R.

"Whereas, For years we have felt a deep sorrow and have been humiliated by special legislation, giving greater pensions to the officers and their widows than to the private soldier, because when they were mustered out and became citizens they were all equal before the law, and hence in this country it is wrong and against the very theory of our government to favor a distinctive class; and,

"Whereas, we again see that there are now pending before congress bills to pension Mrs. McKinley and Mrs. Harrison, and an outrageous bill to give ex-presidents a pension of $25,000; therefore be it

"Resolved, That this post will forever condemn those who vote for and encourage such legislation and hold them responsible for thus aping at the traditions of effete monarchies and thereby insulting the intelligence and heroism of the soldier in the line who fought the battles and received meager pay."

A GREAT OPPORTUNITY.

Vick's Garden and Floral Guide for 1902, published by James Vick's Sons, comes to us full of everything relating to the garden and farm. It brings to our mind their display at the Pan-American Exposition—the gorgeous beds of Tulips and Hyacinths, the beds of Petunias, Geraniums, and various other plants, and the show of Asters and Dahlias in the Horticultural Building. Their great exhibit of over 1,200 heads of delicious Celery was considered by the manager of the expositiont to be the most attractive display in the vegatable department. The Guide is profusely illustrated with handsome half-tone cuts of all these and more. Any of our readers, by sending to James Vick's Sons Rochester, N. Y., can obtain the Guide free, merely stating what they most desire to grow.

A Ft. Wayne Journal man was in town Monday working up an increased list. The Journal is a most excellent paper and covers the field in a satisfactory manner.

THE LENTEN SEASON.

Easter Sunday, this year, will fall on March 30th. The Lenten season commences Ash Wednesday, six weeks before Easter and this makes the date February 12th. The rule for fixing the date of Easter Sunday is a rather complicated one. Commonly it is said to be the first Sunday following the fourteenth day of the moon or full moon after the vernal equinox, or the beginning of spring.

This rule applies in this instance, spring commencing on March 21st, and the first full moon thereafter being March 23rd, it will thus be seen that Easter Sunday could not come much earlier in the year than it does this time. In practice, this rule cannot be followed exactly for the reason that the moon would be full at different times in various parts of the world, so that Easter would follow a day earlier in the eastern hemisphere than in the western.

MILLIONS PUT TO WORK.

The wonderful activity of the new century is shown by an enormous demand for the world's best workers—Dr. King's New Life Pills. For constipation, sick headache, billiousness, or any trouble of the stomach, liver or kidneys they're unrivaled. Only 25c at Stones' drug store.

IT MAKES NO DIFFERENCE.

It is announced from Washington that President Roosevelt will decide the appeal to him of the case of Admiral Schley from the dicision of the court of inquiry against Schley and in favor of Sampson, who was forty miles away and had nothing to do with the destruction of the Spanish fleet at the battle of Santiago, and the naval clique in the Naval Department at Washington. This is what everybody knew would be the result. But it makes no difference. The people have decided that Schley won the victory and is entitled to the credit, and no power on earth can change that opinion.

FOR STOMACH TROUBLES.

"I have taken a great many different medicines for stomach trouble and constipation," says Mrs. S. Geiger of Dunkerton, Iowa, "but never had as good results from any as from Chamberlain's Stomach & Liver Tablets." For Sale by S. G. Stone, Druggist.

HAVE YOU BEEN VACCINATED?

Many towns and localities in Indiana are afflicted with smallpox and all health officers are urging people to be vaccinated as the surest way to prevent the disease spreading and becoming more dangerous and fatal. DeMoines Iowa, has 500 cases and the desease has such a start that it is almost impossible to check it or keep it from sweeping over the entire city. The best authorities claim that vaccination is the only practical thing to do and everyone should supmit to it with alacrity. No town or community is safe from the disease.

COLD CURE FOR BUSY PEOPLE.

Many people neglect a cold because they say they have no time to attend to it. Krause's Cold Cure is a remedy which can be taken without danger while performing your daily duties, and will relieve the most aggravated case in 24 hours. Price 25c. Sold by Geddes & Harding.

HEADACHE CAUSES.

Headache is usually caused by living in poorly ventilated rooms, overindulgence in food or drink, insufficient exercise, mental strain, excitement or malaria. Krause's Headache Capsules quickly cure the most severe cases and leaves the head clear and cool. Price, 25c. Sold by Geddes & Harding.

PRINCE HENRY TO PASS THROUGH THIS CITY.

Prince Henry, who will soon visit this country, is to be favored with a view of Kendallville, it is said. The itinerary of his tour through the United States has been arranged, and on his return to New York from St. Louis, Chicago and Milwaukee, he is scheduled to travel via the L. S. and M. S. railroad from Chicago to Buffalo, thus passing through this city. His special train will leave Chicago at 12:30 a. m. on March 5. However unless the prince is an early riser he may not, after all, gaze upon the metropolis of Butler.

THE TOUCH DOES IT

Benson's Plasters are like your other friends—they hate to see you in pain or in weakness and are dog-tired hearing you complain about it. They want to *cure* you and send you along to your business—whole and happy. They *can* do it and *will* do it. Try them on. What for? Why for any cough or cold you may be troubled with, or any bothering pain or ache, or worry with kidneys or liver. Possibly some old clutch of muscular rheumatism renders an arm or a leg worth only half price just now. For anything that makes the machine work slow and stiff, with pain maybe in the motion of it, clap a Benson's Porous Plaster squarely on the bad spot. They are the *get-out-to-morrow* plasters—not the sort that go to sleep on your skin like a cat on a cushion. There is comfort and speedy relief in the touch of them. No other external remedy, no matter how made or how called, is worthy to live in the same street with Benson's Plasters. Pains and ailments melt away under them as a sheet of ice does under the Spring sun. You cannot foretell the weather but you can always foretell the effect of Benson's Plasters; it is as sure as the effect of a hot breakfast in a hungry man's stomach. But look out for substitutes. Get the genuine. All druggists, or we will prepay postage on any number ordered in the United States on receipt of 25c. each.

A NERVY REPUBLICAN.

There is one man on the republican side of the house of representatives who is coming to the front like a thoroughbred in a field of selling platers. His name is Littlefield and he hails from Maine. Since that state lost Blaine, Reed, Dingley and Boutelle from congress she has been spelled down in prestige and influence by other states very rapidly. But Congressmen Littlefield is a warm number and is making the parties and the country look his way with increasing frequency and interest.

Mr. Littlefield is, of course, a republican, but he has what most of the partisians of that cult long since abandoned as useless impediments—has a conscience and the nerve to support it while it rises up and talks out in meeting. He made that evident when he bolted his party's position on the Roberts of Utah case and administered a tongue-lashing to those whom he intimated were acting like cowards and Pharisees.

Again when the Porto Rico bill that gave to that island only a partial reduction of tariff duties was before the house, the lanky and eloquent Maine statesman sailed into his party associates in a way that gave them several very uncomfortable jolts and much chagrin.

Now Mr. Littlefield announces that he is preparing to turn himself loose against the Philippine policy of the administration, and in doing so he will probably say things that his colleagues will hardly think fit to print. They will certainly not make easy campaign. Mr. Littlefield believes that the President and the party are wrong in the programme they are pursuing in the Orient and he proposes to show what would be the truly republican and American policy toward the little brown men of the East.

We will listen for his deliverance with much interest and will be curious to hear what his fellow-partisians can say in reply to what promises to be an eye-opening arraignment of republican methods by an honest and nervy member of the guild.

TO BEAT COAL WITH CLAY.

A wonderful fuel, composed of 90 per cent of clay, mixed with certain chemicals and gasoline, has been discovered by E. J. Hoffman, a former Chicago & North-western railroad engineer, who was forced to leave the road on account of ill health.

Hoffman's fuel burns readily under a boiler, in a stove or grate, and produces an intense heat without smoke or cinders and literally consumes its own ashes. It is claimed that a ton of it will go farther than two tons of the best coal and produce five times the heat.

A recent test in the furnace of a large boiler developed the fact that 250 pounds of clay fuel created 30 per cent more steam and lasted longer in burning than 600 pounds of first quality steam coal.

This remarkable fuel can be manufactured 1,000 miles from an oil producing locality for $2 a ton and near an oil field can be made for one-fifth that price.

For factories and manufacturing establishments, it is proposed to have a plant at or near the furnace doors. Dirt will be hauled, treated in a few moments, and the fireman shovels his fuel under the boilers.

Two Chicago-Omaha railroads will give Hoffman's fuel a thorough test in a couple of their locomotives in the near future. The immense packing houses of South Omaha are also preparing for a trial of the stuff.

VALENTINE DAY.

To-day is valentine day. It is also comic Valentine day and the gist of argument which some people present against it leads one to believe that they are not so comic. Americans as a race are fond of jokes and they give or take them with good grace. It seems to be morally impossible for two of them to become intimately friendly until they have ascertained each other's foibles and hobbies and learned to banter each other unmercifully. Much of this joking is fairly good fun; in general it is harmless. But between the good-natured, humorous quizzing which the sense of humor prompts and permits and the blunt vituperation of the "comic" valentine there is nothing in common. The "point" of the latter is usually a plain description of some personal deformity or deficiency or misfortune of the recipient. The writer of the comic doggerel soars to his highest plane of wit in informing a single woman of mature years that she is an "old maid" and a scare crow. Somewhere back in the primeval time, when man wore garments of wolfskins and carried stone hatchets, it is possible that this brutal vulgarity would have passed for humor. Among people whose minds have progressed beyond the stone-age period of development it is, of course, mere coarseness.

If you find anyone, infant or adult, preparing or sending a valentine that is genuinely comic—both witty and good-natured—let him alone. As to the cheap and brutal illustrated diatribe, which is anything but comic, the Herald is merely voicing the opinion of all persons having any perception either of humor or of decency.

Despite the fact that Senator Tillman once called Senator Beveridge "the wasp of the Wabash" and Beveridge informed him in a hot manner that a wasp has a long stinger, or words to that effect, the two are quite chummy these days. They can often be seen with arms about each other, and one can soon tell by the smiles and guffaws that the conversation is drifting to jokes or good-natured badinage. Most of the Indiana republican congressmen, while they abuse Tillman like a pirate on the stump, think a good deal of him and are willing to admit privately that he is a very able man.

Republican newspapers which charge that the Democratic party is "manufacturing" the issue of imperialism are making a grievous error. The Republican party is creating that issue, to the sore cost of the American people and of American principles. The Democratic party would rejoice if the issue had no existence in fact.

The *Herald* is all printed at home—inside and out. No plates, it is all set in this office.

Americans have become accustomed to many violations of old policies in national affairs, but it would be strange if they should approve the propositions before Congress for a subsidized Pacific cable or a government construction. A cable is already in process of manufacture, the owners of which are responsible and have agreed to all necessary Government regulation. Evidently a subsidy is unnecessary and would be a pure gift. It seems just as clear that there is nothing to justify the entrance of the Government into the field of competitive commerce.

REVIVAL MEETINGS.

Revival meetings are now in progress at three of the local churches, and we understand there are more to follow.

Revivals are a good thing, even if the majority only stick during the winter months. A man who does right part of the year is better than one who never does right. This theory may not be in accordance with the bible, but it is in accord with moral men.

And then again a man who has been shown the error of his ways during a revival meeting, should he back-slide, he is always a little better than he was before. The devine teachings are with him, and often hold him in restraint.

But then back-sliding is hyprocrital. If you "come out," stick to it.

A NEED FOR SUCH CANDIDATES.

Booth Tarington has set before the citizens of Indiana a good example. He has announced his candidacy for the Legislature, believing that every man owes a service to the state. He is frank enough to say that he will consider his duty to the public above that to his party.

To those who have read that delightful novel, "The Gentleman from Indiana," there will be no reason to doubt the ambition of the author. The principles which governed the editor who was finally elected to Congress are of the sort the country needs. If Tarkington, the legislator, mirrors the thorough hatred of corruption which animated the hero of his novel, his election would make for righteousness

A NEW SCHOOL BUILDING NEEDEED.

We believe the time has arrived when Butler cannot afford to longer neglect the building of a new school house. The present building is a disgrace to the city and is not in keeping with the advancement so much desired by all progressive citizens.

The building now used would be condemned by any city believing in up-to-date methods, and as our thriving little city is enjoying a solid and substantial growth, it behoves us to place our educational advantages to the front. Our instructors are of the best and the educational appliances at their disposal are very good. A new building—and we would soon head the schools of DeKalb county. Auburn is to have a new building in the spring and why not Butler?

We are able financially to erect one that would be a credit to the town and we owe it to the young people to give them a building suitable to their requirements.

A SPANISH COUNT CURED OF LA GRIPPE!

Cenat Segundo de Ovies was a Carlist exile. The signature of his uncle, Louis De Ovies, is found with that of John Quincy Adams ceding Florida to the United States in a treaty with Spain. The Count is forty-six years of age, an exile from Orietto, situated in the northern part of Spain, and has been exiled since 1876; he is wealthy, and has traveled and studied the customs, habits and languages of twenty-five different nations.

In a recent letter to The Peruna Medicine Co., of Columbus, Ohio, the Count gives his endorsement to their great catarrh remedy, Peruna, in the following words:

The Canfield, Atlantic City, N. J.

The Peruna Medicine Co., Columbus, Ohio:

Gentlemen—"Last winter my secretary had a severe attack of la grippe which was cured effectually by the use of four bottles of Peruna, so when I contracted the same unpleasant sickness last fall I at once sent for a bottle. It truly worked wonders, and removed the sickening and sore feeling I had within a few days. I would not be without it now for any money, and when I go away I carry Peruna as a valuable perquisite to my traveling outfit."—JULIAN SEGUNDO, CONDE DE OVIES.

NEARLY everybody is having la grippe again. It resembles somewhat in the beginning a severe cold. A chill or cold spell is followed by aching bones, sore throat, headache, cough, and general weakness. Its course may be quite slight or severe, but in either case it nearly always leaves one in a miserable condition.

Unless Peruna is taken it will be weeks or months before a person regains his usual health. If the victim is fortunate enough to begin the use of Peruna at the commencement of the attack the course of the grip is much shortened, and the system is left in a natural state.

People who have had la grippe, but are still suffering from the after-effects, should not neglect to take Peruna, as it will promptly restore them to health.

Henry Distin, the inventor and maker of all the band instruments of the Henry Distin Manufacturing Co., writes the following from 1441 South Ninth street, Philadelphia, Pa:

Henry Distin.

"I had a bad attack of la grippe last December which lasted more than three months, and which left me with catarrh, and several of my friends advised me to try Peruna. I began with a bottle the first week in March and it certainly did me a great deal of good. I was so well satisfied that I purchased another bottle and followed the directions, and can say that it has cured me."—Henry Distin.

A large per cent of those who are afflicted with this epidemic, instead of getting well as they ought to, will have chronic catarrh as the result. This is almost invariably the case unless Peruna is taken as soon as possible after the grip begins.

Every one who has observed the effect of Peruna during the last three epidemics of la grippe positively knows that this remedy will cure it permanently.

The fact is, however, that a great multitude of people will not take Peruna, and a foundation for chronic catarrh will be laid.

Even in cases where chronic catarrh has affected the lungs, and the early stages of catarrhal consumption have been developed, Peruna can be relied upon as a prompt and lasting cure. La grippe and catarrh are at present the two great enemies of life in the land. Peruna is a cure for either.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

THE KING LECTURE.

The second appearance of Byron W. King, in this city, at the M. E. Church last Friday evening was well attended and of course richly enjoyed by all. If any disappointment was manifest it was because Mr. King did not give more Shakespearean selections. Every seat in the house was occupied and the receipts were $45.00.

His selections were all good and he quickly won the audience. A dull story told by Byron W. King, becomes bright—such is the power of expression, gesture and oratory. We do not mean to infer that he told any dull stories, on the contrary his program was bright and instructive. It was well received.

GOLDEN WEDDING.

Saturday, Feb. 8, 1902, was the fiftieth anniversary of the wedding day of John and Sarah Lowe of near Hamilton, Ind. They very appropriately celebrated on the 9th, as their Golden Wedding. Friends and relatives to the number of forty-six gathered at their home to remind them of the day fifty years ago when they were united in the bonds of matrimony. The forenoon was spent in friendly greetings and conversation and every one felt as only friends can.

At the proper time two large tables were spread with the necessities and luxuries of life. A very fine wedding cake was a conspicuous object while other things almost innumerable filled the tables and could tempt the most delicate as well as satisfy the most unsatiable appetite.

Mr. and Mrs. Lowe were presented with a few valuable presents with which were extended the best wishes of all present.

These two people have lived in our community for about forty-one years and have done much for its betterment. They have always paid careful attention to the laws of health and although the cares of life have had their effect upon them, the smiles and pleasantness have not been erased from their faces.

Their hale and hearty appearances bid fair to usher them into many more years of happiness.

Jacob Staadecker of Toledo was in town on business Tuesday. Jake is a good business man, but we know of one deal that he made in which he fizzled. He attempted to corner the horse radish market over at Albion, Ind., but the supply swamped him.

120 ACRE FARM.

Near Butler, good buildings.

102 acres, fine, near Butler. 100 acre farm, good soil and well tiled, cheap. 80 acre farm near Butler, good soil. 50 acre farm for much less than it is worth. Two 40 acre farms. 70 acre farm in Williams Co. Ohio said to be good land; buildings not very valuable but it is certainly a great bargain at $1600. 69 acre farm not far from Butler, very fine and at a low figure. We have several 80 acre farms; and we have houses and lots and business property in Butler to suit everybody. If you want anything in the line of real estate, see Webster & Wartenbee.

OBITUARY.

Kate Anthony Wagner was born Sept. 1 - 1845 in Stark Co. Ohio and died Feb. 9 - 1902, aged 57 years 5 mo. 8 days.

She was married January 12 - 1859 to John Wayner. To this union eight children were born, seven of whom survive, three sons and four daughters, togeather with a devoted husband and three grand children are left to mourn her loss.

In early life she was baptized and confirmed in the Lutheran church.

The deceased was a kind neighbor, a loving mother and a devoted wife. The Herald extends its sympathy to the bereaved friends and relatives.

A GREAT OPPORTUNITY.

Vick's Garden and Floral Guide for 1902, published by James Vick's Sons, comes to us full of everything relating to the garden and farm. It brings to our mind their display at the Pan-American Exposition—the gorgeous beds of Tulips and Hyacinths, the beds of Petunias, Geraniums, and various other plants, and the show of Asters and Dahlias in the Horticultural Building. Their great exhibit of over 1,200 heads of delicious Celery was considered by the manager of the expositiont to be the most attractive display in the vegatable department. The Guide is profusely illustrated with handsome half-tone cuts of all these and more. Any of our readers, by sending to James Vick's Sons Rochester, N. Y., can obtain the Guide free, merely stating what they most desire to grow.

This has been a great week for "Lost" in Butler. Mrs. Oberlin lost a set of furs, Henry Showalter lost his pocket book containing about $25 and another gentleman lost a pocket book containing $140. The Herald lost a subscriber, but added five new names to the list. Consequently we are four ahead.

By a decision of the supreme court it is now possible, under the law of 1901 to appeal to the supreme court cases from the justices' courts when the cases involve the validity of a franchise or municipal ordinance even though the amount in controversy is less than $50. Under the old law this could not be done.

Last Suuday being Mr. D. Croninger's 51 birthday a surprise was prepared for him and when he came in for dinner he found a table just groaning with good things to eat and the following friends present: Henry Aldrich and wife, Sherm Robinett and family, Al Fisher and wife and daughter, Rand Bell and wife, Mrs. O. Campbell, Edith Wilson and Mrs. Chas Earnest of Peru.

An Anderson preacher has been relieved of his charge. The accusation is that he kissed lady members of his flock. The preacher does not deny the kissing act, and says he did it to heal the parties of certain nervous ailments. The practice caused much nervousness among the husbands of the ladies receiving the osculations. Such snide preachers would look better in a coat of tar and feathers than in the garb of a minister of the gospel.

IN CHURCH CIRCLES.

Presiding elder, Rev. W. H. Daniel, of Ft. Wayne, will be in Butler next Saturday night, and will in all probability preach at the Methodist church

—o—

Revival services at the Methodist church have begun. First services were held last Sunday morning and evening. All are invited. Good singing and a hearty welcome to all.

—o—

The 4th quarterly meeting will be held next Sunday February 16th. Presiding Elder, Rev. W. H. Daniels, of Fort Wayne will preach both morning and evening. Conferance Monday morning Feb. 17th at 8 o'clock. Everybody invited.

—o—

Great interest is still shown in the revival meeting at the Church of God. Large crowds attend each service, many coming in sleds as far as eight miles. The best of order is manifest among the young people and all seem eager to hear the sacred truths spoken by Mrs. Strickland, the evangelist. The Sunday morning and evening discourse was excedingly fine. Mrs. Strickland is an interesting speaker and one does not tire listening to her. Her sermons are full of instruction to the one who is endeavoring to lead a Christian life, and makes the way plain to the soul who is still away from Christ. The social serivce is an old fashioned love feast, conducted by Rev. Emma Isenberg, the pastor after or before the sermon has been very beneficial to all christians. Members from all the churches have attended this revival and much good has been done. Souls are still being converted. The singing is excellent.

Wm. Devore is working nights for the Vandalia.

L. A. Henning and J. D. Headly were in Waterloo on business, Tuesday.

Mrs. Wm. Dunn and daughter of Waterloo, visited with L. A. Henning and family, Wednesday.

A jolly sled load of 12 young people went to Hamilton and Waterloo Tuesday evening. Refreshments were served at Hamilton and all report a fine time.

Eczema for Forty Years.

The Unqualified Statement of a Well Known Attorney, St. Ignace, Mich.

Some of the cures made by Dr. A. W. Chase's Ointment of stubborn and long continued eczema and skin diseases are causing much comment. People are beginning to realize that this Ointment is a wonder worker with all kinds of skin trouble. Attorney James J. Brown, St. Ignace, Michigan, writes as follows:

Dr. A. W. Chase Med. Co. Buffalo, N. Y.—Gents:—I cannot refrain from expressing my acknowledgement for the relief I have felt from Dr. Chase's Ointment. For 40 years I was afflicted with a skin disease which was located in one spot—on my leg. I have spent at a rough estimate five hundred dollars trying to effect a cure, and not until I applied this ointment did I get relief. You are strangers to me and this letter is prompted directly because I want to say and I feel as though I ought to say it. That Chase's ointment has effected a complete cure of my affliction. Three boxes did the work on my leg. I was also suffering from itching piles and applied the ointment which gave the best of satisfaction by affording me rest at night and rapidly causing the disease to disappear. I have received such relief and comfort from the ointment that I cannot withhold expressing my gratitude. I was so long afflicted with the tortures of eczema. I feel now that I am cured, a word of recommendation is due from me. Yours truly,

JAMES J. BROWN.

Dr. Chase's Ointment is sold at 50 cents a box at all dealers or Dr. A. W. Chase's Medicine Co., Buffalo, N. Y.

Who Won the Battle of Santiago?

Who Commanded the Fleet?

SCHLEY OR SAMPSON?

Three Ways Open to the President

The Public Demand the Decision in Favor of Schley.

(Special from Commercial Ass'td Press

What is President Roosevelt going to do with the Schley Appeal? Admiral Schley is slowly wending his way to Washington, will probably be there within a week or ten days, and it seems to be the general openion that the President will render his decision when the Rear-Admiral returns from his western tour.

There are three ways open to the President to decide the appeal.

1. He may send the case back to the Navy Department, as having the sole jurisdiction, and make no other comment.

2. He may declare the appeal regular and also indorse the final action of Secretary Long.

3. He may declare the appeal regular and indorse some of the findings of the majority of the court and of its president, Admiral Dewey.

The fact that the President has accepted the appeal makes it reasonably certain that the conclusions arrived at by Secretary Long and the Navy Department are not conclusive.

It seems to be the President's duty to settle the controversy once and for all, so that Congress will not find it necessary to take action on the numerous bills now before it, and which are held in abeyance, pending the White House decision.

The President has already decided that the Court had ample jurisdiction and power to pass on the question of absolute command. The Navy Department has always serenuously denied this.

It seems the President is opening a way to concur with Admiral Dewey, who maintained what the Navy Department denied, and who did in fact pass on the question of command.

If this was a suggestion from the White House, it is generally conceded the President was paving the way to concur with Admiral Dewey, who had maintained what the Navy Department denied, and who did, in fact, pass on the question of command.

There is therefore warrant for the belief that the President may agree with the majority of the court in non-essentials, which the court magnified into high crimes and misdemeanors, but that as to the essentials of who was actually in command, who won the great victory, who issued the great orders for the actual conflict, etc., the President will sustain the broad and non-partisan propositions laid down by Admiral Dewey.

The Prerident was once Assistant Secretary of the Navy and is aware of the inner workings in the bureau and army offices which led to the "Schley controversy." He was on the board of strategy, and remembers, perhaps, a great many things which are generally supposed to be forgotten.

It may be further stated that the President is again reading George Graham's great book—"Schley and Santiago." He has once before expressed his openion regading it in the following words; "Mr. Graham's story is the best account I have heard or read of the naval fighting during the war. It needed just as much conrage to go about taking photographs as it did to work the guns."

The book published by the W. B. Conkey Company of Chicago contains nearly 500 pages of facts and fifty photographs taken during the fight Graham, the War Correspondent, which will give patriotic citizen the opportunity to judge the controversy on its merits.

We have read the book—it's worth a dollar and fifty cents—yes, more than that because it is the only truthful and authentic account of the battle of Santiago.

BEN STIEFEL IN CHARGE.

B. H. Stiefel has been placed in charge of a large cigar factory by the firm he represents at Colorado Springs Col.

The Telegram of that city in its issue of last Sunday says: "Colordo Springs will have a cigar factory in the near future which will add thousands of cigars to the alrady large output of the city. The factory will be established by the Baxter-Kearns Co., and the brand cigars to be made will be known as the "High Altitude" cigar. Already this brand has been registered and a contract let for the lithographing work. The company will erect a large building near its present one so the location for the factory will be a good one. The factory will be in charge of B. H. Stiefel, who is at the present time at the head of the cigar department of this company. Mr. Stiefel has been in this business for the past ten years in this and other states and understands it thoroughly.

A POSER BY JOHNNY.

A Kansas schoolma'am was attempting to instruct her classes in the mysteries of subtraction, the other day, and was explaining that the thing subtracted must be of the same denomation as the thing subtracted from. In illustrating the probosition she said that one could not take five from six peaches, or five lemons from six oranges, when up went the hand of a boy in the rear of the class. "What is it Johnie" asked the teacher. "Please, can't you take five duarts of milk from six cows?" Then she collapsed

SOMETHING THAT WILL DO YOU GOOD.

We know of no way in which we can be of more service to our readers than to tell them of somthing that will be of real good to them. For this reason we want to acuaint them with what consider one of the very best remedies on the market for coughs, colds, and that alarming complaint croup. We refer to Chamberlains Cough Remedy We have used it with such good results in our family so long that it has become a household necessity. By its prompt use we haven't any doubt but that it has time and again prevented croup. The testimony is given upon our own experience, and we suggest that our readers, especially those who have small children, always keep it in thir homes as a safeguard against croup.—Camden (S. C.) Messenger. For sale by S G. Stone.

The circuit court of Frederick county, Maryland, have decided that a girl under eighteen can not join church without her parents consent. She was to have been immersed by the German Baptist church, but her parents objected because the weather was too cold. She will be held under the court's jurisdiction until it gets warmer.

Hon. Frank S. Roby of Auburn, at present on the Appellate bench, will be a candidate for renomination to the place which he was appointed to fill a vacancy. The judge's qualifications and the experience that he has already had on the bench will be valuable to him should he be re-elected on the bench. DeKalb county will go in to the convention solid for Judge Roby.

The Garrett Clipper says that Auditor Siler intended to give the Butler Herald the delinquent tax list, but changed his mind at the last moment and gave it to the Clipper. Just why Mr. Siler changed his mind we are unable to say, but one thing is certain that the Clipper done the best it could by sending samples, free copies, etc., in order to give the notice publicity, but even then, the people of DeKalb county had hard work to locate it. The Clipper is a local newspaper only.

Dr. W. H. Milburn, the blind chaplain of the senate, thinks he may fairly lay claim to the title of "grandfather of the house." He entered the service of that body ten years before John Sherman, of Ohio, and Justin S. Morrill, of Vermont, who were termed "fathers of the house." Mr. Milburn was first elected chaplain of congress in 1845, being then a resident of Illinois and hailing from the congressional district represented by Lincoln.

Zoa Phora Cures Suppressed Menses

The Only Safe, Sure Remedy for Falling of the Womb, Change of Life, Flooding, Laceration, Kidney and Liver Trouble.

It Quickly Relieves the Distress, Cures Female Disease and Restores to Weak Women, Healthy Vigor---Large Trial Bottle Free.

MISS CODIE JOHNSON, Indianapolis, Ind.

Women can have health—when they have at hand Zoa Phora, the remedy that does for woman what no other aid on earth can or will do. It gives absolute and permanent relief from the dreadful pain and distress of womb disease, flooding, laceration and cures leucorrhea, suppressed or painful menstruation, displacement, kidney, liver and bladder disease and at the same time imparts new strength and vigor, builds up and gives tone to the nervous system. If you are a sufferer and still skeptical write to-day to any of the thousands of women who now bless Zoa Phora for saving their life and making it worth living. It is "woman's friend" all through life. Miss Codie Johnson, of 1937 College Ave., Indianapolis, Ind., says: "I have suffered for years with pain from menses. Had to go to bed each time. A friend induced me to try Zoa Phora and it has completely restored me. I am almost entirely free from pain at the monthly sickness. I think all young girls should use Zoa Phora."

Why suffer in silence and alone? Women who drag out a miserable existence, struggling through their housework as though a great weight were fastened about their waist and their shoes were filled with lead can find instant and permanent relief in the use of Zoa Phora. Thousands of well women testify to-day to the marvelous power of this great remedy in bringing them from sickness back to sound mental and physical health. It carries women safely through pregnancy without pain or danger.

Get a dollar bottle of Zoa Phora at the nearest drug store, or the Zoa Phora Co., Kalamazoo, Mich., will send it to you, prepaid, on receipt of price. It is no experiment as hundreds of grateful women testify daily. The doctor will always gladly answer questions. Do not hesitate to write for information.

We will be glad to send you a large trial bottle free upon receipt of 10c to cover postage and packing. Address Zoa Phora Co., Kalamazoo, Mich.

A Sanderson man who has 21 maple trees on his farm, the past year, shipped 500 gallons of "maple syrup" to eastern markets. To accomplish this the pump, red cobs and hickory bark were not slighted. He expects the 21 trees will produce about 1,000 gallons this year.

Indian is geographically the smallest of the western states and ranks but thirty-fourth among the forty-five states of the union in point size. Yet it stands sixth in population, fifth in manufactures, eight in value of farm products, (sixth in corn, fifth in wheat, ninth in oats,) sixth in the production of petroleum, second in the production of natural gas, seventh in out-put of building stone and sixth in the value of clay products.

"I do not think there is any doubt that Congressman Robinson will be renominated from the Twelfth district," said N. D. Doughman, of Fort Wayne, who was at the English yesterday. So far Judge Hench is the only avowed candidate against Mr. Robinson and I do not believe he will be able to defeat him. Both men hail from Fort Wayne so they are practically on the same footing so far as that goes. Robinson, of course, has the advantage of being in and this is sure to make him stronger with many people. Then too he is one of the best campaigners in the state. I do not believe he has his equal in this respect anywhere in this district. He is always on the alert to make friends and is a candidate at all times. This gives him a great stand with the people he comes in contact with for he is a capital mixer. Judge Hench is also a good campaigner and as he is making a systematic canvass he may make a better showing than I anticipate, but I do not believe he can beat Robinson.—Indianapolis Sentinel.

JUST A BUSINESS PROPOSITION.

If any person thinks the Herald is worth the price and would like to read it, we want that person's name placed on our list. We want all the subscribers we can get and would be only too glad to send the paper to every reader in the county, or state, for that matter. But we wish it distinctly understood that no one is asked to take the Herald "just to help the editor along." We are here to do business on business principles and not as a pauper begging for alms. If you want the paper, if you think it worth the price, it will be a pleasure for us to send it to you, but don't please don't take it out of charity. We'd rather have you borrow it of a neighbor than to take it merely to "help us along."

THE MAGAZINES.

The February number of Success might be called the Lincoln number. The cover design, by P. L. Hoyt, shows the great commoner resting at his rail splitting to study, and an article by Ex-Speaker Galusha A. Grow, a personal friend of Abraham Lincoln, tells in graphic manner of Lincoln's most trying week in the White House, when he was waiting for the Union troops to save, or the Confederate troops to destroy the capitol.

Table Talk is full of interesting articles relating ro household management and domestic topics. The February number has an article entitled, "A Winter scene on a Southern Plantation." It vividly describes the hog-killing time on one of those large plantations where help is colored. It is amusing and interesting. Many other excellent articles are in this number, which will be sent you for ten cents, and preceeding numbers sent free on request.

The Hon. Leslie M. Shaw, secretary of the treasury, by all odds the most picturesque figure that has lately emerged into public view, is the subject of a character sketch in the February Review of Reviews, by Mr. Johnson Brigham, Iowa's state librarian. Mr. Brigham writes with enthusiasm of Governor Shaw's oratorical gifts, and tells with keen appreciation the story of his rise from obscurity and poverty to a position of highest trust in the national government.

The World's Work for February publishes entire, for the first time in America, Rudyard Kipling's "The Islanders," which has been so widely discussed by all English speaking people, and which, thoroughly protected by copyright, is printed entire for the first time in America in the February number of this magazine. There is a number of illustrated articles, one of the most interesting being "Increasing Railroad Consolidation," by M. G. Cunniff, with a colored map for illustration, which locates clearly the control of the various railroad systems of the country. "The March of Events and Among the World Workers," run over their usual wide gamut of topics of contemporary interest.

The January number of The Arena begins the twenty-seventh volume and the fourteenth year of that well-known review. It opens with a fine essay on "Anarchism," by the Revn R. Heber Newton, D. D., in which the writer discusses the ethical, sociological, and political aspects of that burning question. "The English Friendly Societies," by Eltweed Pomeroy, A. M., is an intersting descriptin of a recent visit to the scene of the "Rochdale experiment" in co operation. Theodore F. Seward describes the "Spiritual Birth of the American Nation," and in addition to his regular departments of "Topics of the Times" and "Books of the Day," Editor B. O. Flower contributes a luminous essay on "The Rise of Photography and its Service to Mankind." T. St. Pierre discusses "Responsibility in Municipal Government," and W. A. Curtis considers "Race Reversion in America." Other features are: "Corporations and Trusts," by Thomas Conyngton; "The Development of Brotherhood," by Prof. Eugenia Parham; "Ibsen's Peer Gynt," by Walter Leighton; "The Work of Wives," by Flora M. Thompson, and "What Shall it Profit?" a New Year's story by M. P. Stuart. The Alliance Publishing Company, Fifth Avenue, New York.

"The reader may make up his mind to be pleasantly overwhelmen by the opulence and vivacity of 'Around the Pan', published by the Nutshell Publishing company, 1059 Third Avenue, New York.

The wonders begin with the frontispiece picture of President McKinley drawn in a single line beginning at a point on the cheek bone and going round and round in a constantly widening circle, with waverings and downbearings of the proper places to secure detachment and shading. We are told that this protrait "is considered the most unique work of its kind in the world", and if these are degrees of uniqueness we are willing to believe that this is most the thing of which there are no duplicates. Of course there is text in addition to the pictures, and we should be surprised indeed to hear from any purchaser the opinion that he had not got his money's worth $2.00."

THE RATHBONE SISTERS.

Wednesday evening, the Butler Temple of Rathbone Sisters was visited by Auburn and Waterloo Temples. Quite a number from each Temple was present and three candidates were initiated. After the candidates had been attended to, a dainty supper was served, followed by an informal reception to the visiting members. The District Deputy Grand Chief, Mrs. Laura Sinclair, of Waterloo, was present and gave the Sisters an interesting talk. A number of games followed and a fine time was had by all. A very interesting exhibition was given by Antonio Lorenzo and his trained bear assisted by Sacremento Maccai with his orchestra. Calvin Beard was the hero of a beautiful tableau immediately following the Ladies' Fancy Drill and his debute before the foot lights was hailed with enthusiasm by the entire Sisterhood. Mr. and Mrs. Eugene Oberlin sang two pieces of music which was very highly complimented. At 1:00 A. M. the friends parted, the visitors declaring that Butler is the place to have a jolly time and expressing the desire that they might visit them often.

OUR NEW RAILROAD SERVICE.

Since the Vandalia system began operating the old Wabash line, which the company come into possession of January 1st, Whitley county has had an exceptionally good passenger service. The Vandalia runs six passenger trains daily stopping at all stations in the county which makes local as well as long distance travel on that line a luxury. You can always count on the Vandalia trains being on time and the train service is excellent in every particular. The employees of the road are clever and courteous and have very materially assisted bringing the Vandalia into such popular favor.—Columbia Mail.

FIFTY PER CENT KILLED.

State Statistician Johnson is reported as saying of the wheat crop:

"The outlook for wheat is very poor. From what I have seen and from what I have learned from others should say that the wheat is almost fifty per cent killed." Mr. Johnson says the wheat got a bad start last fall, when the weather was so dry, and that the winter has been so dry and there has been so little snow that he thinks the roots are frozen. The acreage this yeas is larger than last Mr. Johnson says, but the crop will be by no means as good.

THE STAG BANQUET.

Monday evening occured the Stag Banquet which has been so long anticipated by the winning side in the K. of P. contest. None but the worthy were present. The exhibition was held in the K. of P. hall and all those who attended the "Big Show" remained for the concert. After an hour social chat the tables were spread and what a sight presented itself? The tables fairly groaned under the weight of those delicacies and after the table quit groaning the guests began. During the feast Jay Norford who is noted for his gastronomic feats, was served by a special committee and his wants were amply supplied. Ask him. John Mitchell was unanimously elected "Toastmaster" and he stood up under the ordeal nobly.

After the banquet cigars were passed and tales of love and war were related as the smoke began to ascend upward. It was at this point that the Crawl Comedy Company rendered that old familiar song so well beloved by us all "The day will soon be over." Tremendous applause followed this selection and it was only by a speech from Bro. Mitchell that the Quartet was excused. A candidate was then given the oriental degree which was appreciated very much by all present. The banquet and party was a success and the losers are very gratefully thanked by the winners who expect to eat off the same party next year.

NOTICE OF ELECTION.

Oberlin and Misses Elva Stoner, Charlotte Moltz, Myrtle Decker, Philo Smith, Mary Decker, Gladys Stone, Mabel Rogers, Agnes Decker and Harriette Brown. The evening was spent in feasting and jollyfying, and all enjoyed themselves. Doubtless the Butler boys "are not in it."—Waterloo Press.

HACKING.

That word hacking is expressive to those who have experienced the aggravating constant cough, which is called a hacking cough. Sometimes it is the result of a cold, or of grip, and sometimes it is a consequence of catarrh, which unchecked has gradually involved the lungs in disease. Such a cough finds its cure in Dr. Pierce's Golden Medical Discovery which cures bronchitis, obstinate coughs, lung disease, hemorrhage, and conditions which, if neglected or unskilfully treated, lead to consumption.

"For twelve years I was a sufferer from catarrh and was treated by one of the best physicians in the State of North Carolina, who said the trouble had reached my lungs," writes Mr. J. M. Patton, of Clotho, Transylvania Co., N. C. "I grew worse every day until I tried Dr. Pierce's medicines. Will say Dr. Pierce's Golden Medical Discovery with one bottle of Dr. Sage's Catarrh Remedy cured me, and to-day I am well and hearty, and I will say further that my former physician, Dr. W. M. Lyday, recommends Dr. Pierce's medicines to me and to others. I am sure your medicines will cure any case of catarrh that exists. I recommend them to all."

If you ask your dealer for "Golden Medical Discovery" because you have confidence in its cures, do not allow yourself to be switched off to a medicine claimed to be "just as good," but which you did not ask for and of which you know nothing.

Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of stamps to pay expense of mailing *only*. Send 21 one-cent stamps for the paper covered book, or 31 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

THE U. R. INSPECTION.

Wednesday evening in the opera house occured the inspection and installation of Herr Company, No. 63, Uniform Rank, Knights of Pythias On February 19th., 38 years ago, the order of Knights of Pythias was organized in Washington, D. C. by Justice Rathbone and this occasion was a fitting anniversary of that notable event. In a neat little speech, Captain G. W. Geddes welcomed the guests and gave them a short history of the order. The K. of P. band then rendered some excellent music after which came the inspection of the Company by Deputy Inspector General, L. C. Harding. This ceremony was gone through with very nicely, after which came a Piano Duet by the Misses Geddes and Bloyd which was listened to with pleasure by all. Installation of officers followed, the installing officer being Captain L. C. Harding. The retiring officers were Captain, G. W. Geddes; 1st Lieutenant, E. W. Gengnagel; 2nd Lieutenant, Al. Gengnagel; Guard, H. L. Tess; Recorder, Lee Wolff; Treasurer, R. A. Kinney and Sergent, Russell Young. The officers installed were: Captain, G. W. Geddes; 1st Lieutenant, E. W. Gengnagel; 2nd. Lieutenant, Al Gengnagel; Guard, Frank D. Fanning; Recorder, H. L. Tess; Treasurer, R. A. Kinney and Sergent, Eugene Oberlin. Regimental Officer, Major F. W. Fanning of the 2nd Regiment, was also present and witnessed the ceremonies. Miss Bell then gave a recitation which was praised very highly. Dr. H. Sargent came forward at this point with a Tuba solo accompanied by Mrs. Grace Berger, which was well rendered. Next followed a vocal solo by Eugene Oberlin. He was called back the second time before the audience would be satisfied. Mrs. Oberlin accompanied him on the piano. Next followed a Baritone solo by Archie Skeleton, accompanied on the piano by Miss Jennie Harger which pleased the audience very much. He was also called back and played "The Holy City" which reaches a tender spot in everybodies heart. Dr. Sargent accompanied on the piano by Mrs Grace Berger next rendered a Mandolin Solo which contracted excellently with the sober selection just preceeding it and was rendered as only an artist can render it. The Dr. was called back again and pleased the guests with more of his store of music. At this point a dainty lunch was served during which the band again showed their ability to render some very fine music. After an hour social enjoyment the floor was cleared and many of those present enjoyed a number of Waltzes and Two-Steps. Herr Company Uniform Rank is growing very rapidly, new members being taken in every meeting night. Indiana is the home of the Uniform Rank, being instituted first in our state and we at present have the Supreme Commanding Officers in this domain. Herr company has always been one of the foremost companies in this domain and it is expected that it will retain that enivable position indefinately.

THE LUTHERAN CHURCH.

An Interesting Article by the Rev. Oberholtzer.

The Lutheran church sets forth her Christian or Revealed Theology in the following four fold way:

a—Exegetical Theology.
b—Historical Theology.
c—Systematic Theology.
d—Practical Theology.

As to the source of all divine truth and power the Lutheran church teaches that it is found in Christ Jesus. To him we may look for the true interpretation of the father. The law was given by Moses but "grace and truth came by Jesus Christ. "In him dwelt all the fullness of the God head bodily. This is my beloved son in whom I am well pleased, hear ye him."

I. Under the division of Exegetical theology the holy scriptures are studied with reference to their origin. All truth is brought to light that may throw a fuller illumination upon the bible. Every possible channel of information is sought. All versions and vernaculars are correctly translated All the historic settings are considered as well as all circumstances under which any part of the word of God has been written. This then opens the fields of Archaeology, Hermneutics and Practical Theology. In this research we secure the material for the formulation of all ecclesiastical dogma. What theology proper secures comes from one of the other of these sources hence "this has the first place because of the dependence of all the rest upon its work. Such subject as the character, the history, and the interpretation and teaching are thus entirely covered.

II. In historical Theology we enter the field of the historial developement of the kingdom of God on earth. What exegetical study has been furnished is used to determine the influence of the age upon revealed truth. It deals exhaustively and impartially with the church history and the history of every kind of church doctrines Through it it such vital questions as sources, ecclesiastical writers and creeds are considered. All the conflicts, oppositions triumphs, defeats, and growth are noted in the entire movement of theology. Both the internal and the external influences are carefully considered and their possible results determined.

III. n Systematic Theology we have the revealed truths of Christianity arranged for attack and defnse and for the systematic study. Here the materials are gathered together in their logical relations, dependencies, and true bearings. In this way only may they be studied in the light of bibical and historical development.

IV. The fourth head is that of Practical Theology. This "directs the use of all theological truths for the conversion of men and their present and eternal salvation. "It passes beyond the merely intellectual apprehension of the Christian system, concerns itself with its practical application to all the purposes divinely meant in Christianiy." This involves such topics as

a—Religion.
b—Man's religious nature.
c—The difference between Natural religion and Revealed Religion. The falsity of the former and the reality of the latter.
d—The relation of Theology to religion. Considering the Christian scriptures a supernatural revelation from God given by Jesus Christ as Redeemer, Light and Savior, it cites the following proof:
I—The external—such as arise from
a—Miracle.
b—History.
c—Prophecy.
II—The Internal, viz:
a. The harmony of the scriptures.
b.—The Supernatural character of Christ.
c—The supernatural doctrines of the bible.
e—The adaption of its truths to the needs of the race.
f—The supernatural power of its doctrines. Without being able in the scope of this paper to dwell upon all the above divisions we pass to set forth the doctrines of the application of redemption. The acts or parts are a—Repentance, b—Justification, c—Regeneration and conversion, d—Sanctifiction. The many means of salvation are a—the word, b—the Sacrements, c—the church.

The subject in the scope of Eschatoegyhe lasting are a—death, b—the state of the soul after death, c—second coming of Christ, d—the resurrection of the dead, e—the general judgment, f—Heaven and Hell, g—the restitution of all things. In the doctrine is included the trinitarian view, the perfect atonement by Christ the priesthood of all persons born of water and the spirit of God; the heavenly presence of Christ in the encharist, in a sacramental, divine supernatural and spiritual way; and "the eternal purpose" of God to provide salvation for the whole world. He is the lamb of God that taketh away the sin of the world. The covenant of grace is extended to all born of the flesh. To you and your children hence the teaching of the parents in the home and at the alar.

So God has given his divine agencies through which the soul is called into life and redeemed even by the faithful use of the Word and the sacraments. Continual neglect and contempt of these will result in condemnation and death.

Concerning the church she is the agency of service or the visable means of grace. Properly defined "the church is the congregation of saints in which the gospel is rightly taught and the sacraments are properly administered." Those who have been redeemed by the sacrificial blood and who "call upon the name of the Lord."

All whose names are recorded in the Lamb's book of life, for Christ loved the church and gave himself for it. The design of the church is christlike fellowship, greater holiness of heart, united worship, a common use of the means of grace, edification in Christian faith and life, the etension of the kingdom of God and the restoration of redeemed humanity to love, unity, fraternity and communion with God.

"To restore from the division and alienation, caused by sin, to the unity of true brotherhood, the fellowship of redeemed men in redeemed society.

II

As to the polity of the Lutheran church she seeks to develop holiness of heart and life by leading to higher planes of life and conduct. Few persons who disregard the 1 sacred vows taken when being received into the church fellowship will influence by sumptuary laws. To obstain from the very appearance of evil and to prove all things and hold fast to that which is good is regarded as safe conduct for any person professing to be a christian.

To be truthful in the sight of God and man free from guilts and condemnation. Against such living there is no law for the concreated soul has that within which gives release.

BRAVE OLD DEWEY.

The Indianapolis Independent puts it this way: Brave old Dewey is allotted no share in the ceremony attending the welcoming of Prince Henry. There are obvious reasons why he should not, but they are all to Dewey's credit. His "call down" of the German naval commander at Manila and subsequent action when Prince Henry toasted all the nations represented at a banquet except the United States, naturally render him persona non grata with his highness. On this occasion referred to Dewey arose from the banquet table and left the room. The prince afterward apologized.

"Fighting" Bob Evans was elected to greet the prince and attend his movements, for "Fighting" Bob has never offended anybody except with his mouth so that the prince can heartily accept of his company.

THE BRUTE WON HER.

I DON'T know what it is," said the young man with the delicate chin, "but there's some weird influence about an automobile. That's the only way I can explain what happened down at Atlantic City a month ago. Incidentally, I never help a man with a broken-down machine. I used to.

"I went down to Atlantic City three months ago and took my automobile with me. There was about the stunningest girl staying at the hotel you ever saw. I knew the minute I laid my eyes on her that we'd take to each other. Less than a week after I got there we were old friends. I used to read to her an hour or two every morning. This was rather rough on the rest of the girls—there were a couple of dozen of them—because I was the only eligible man at the hotel. First I tried her on Austin Dobson and a little Omar Khayyam and then George Meredith, and finally, after I'd got my courage up, I brought out a few little things of my own. We were soul complements all right and I told her so. I guess she'd been thinking the same thing, because she laughed a lot when I told her. We enjoyed this sort of thing for about a week, and then one day I thought she was looking rather blue.

"'Well, I am,' she said, when I asked her about it. 'This place bores me terribly.'

"'I don't blame you,' I told her. 'Nothing but droves of gabbling women. You'll have to take some rides with me in my automobile.'

"She sighed and then said: 'That would be great fun, but I'm afraid mamma wouldn't approve, and you know there's no room for a chaperon.'

"'Well, if there's no other way,' I said, 'we could read in the afternoon as well as the morning. Then you'd only have to stand the bore evenings.'

"She seemed terribly pleased at that. She bubbled over so she couldn't speak for a while.

"'You're simply a genius, Mr. Willger,' she said. 'How did you ever come to think of anything so clever?'

"Then she laughed again. She was a very happy-hearted girl.

"But after all, nothing came of the idea she thought was so clever. She happened to have a headache the next afternoon and the next day was Sunday. And on Monday Bangs arrived. Bangs was a big, coarse-jawed man, whose looks showed what he amounted to. I believe his chief claim to distinction was that he played on a Yale football team. Ethel—she was the stunning girl, you know—came to me the same afternoon and asked me if I didn't think he was dreadful.

"'Oh, he might do for some girls,' I said.

"'Yes, I suppose so,' answered Ethel, shuddering. 'Isn't it disgusting?'

"The joke of the whole thing was that the poor lad seemed terribly taken with Ethel from the moment he saw her. The first week he was there he followed Ethel about from morning to night. It broke up our reading, but Ethel thought she ought to be polite to him, he being a stranger at the hotel. Pretty soon, however, matters began to get more serious. Two weeks passed and then three, and still we didn't do any more reading. He began taking Ethel walking and the walks began to get longer. Every time they started out together and the poor girl got a chance she'd make a face over his shoulder and shake her head despairingly. Finally I caught her alone one day and put it to her straight, whether she wasn't letting the chap impose too much on her kindness of heart. She confessed that perhaps she was, and said she'd see whether she couldn't get a hint through the fellow's head.

"But things didn't change, and about a week later I went to her and asked her if she could trust me as a friend. You ough to have seen the look she gave me when she said she hoped so.

"'Well,' I said, 'I want you to tell me perfectly frankly why you let that fellow continue to drag you off walking when you don't want to go?'

"She looked at me terribly queerly for a minute, and wouldn't tell for a long while. Then finally she said:

"'Well, if you must know, I simply can't help myself.'

"I smiled sarcastically at that.

"'You don't know that man,' she went on. 'I never saw anything like him. I can't tell you how he carries on if I don't put on my hat and go with him whenever he asks me to.'

"'Why,' I asked, 'do you have anything to do with him at all? Why don't you tell him you have a regular engagement to read with me, and send him about his business?'

"She was so nervous she actually laughed, although you'd better believe it didn't look like a laughing matter.

"'Well,' she said, finally, 'I'll try to. You're awfully clever. I should never have thought of it myself.'

"A week later I asked her what she had done. You ought to have seen the girl look around. She didn't want to say a word, but I told her it was her duty to tell me all.

"'He—he says,' she said, scarcely able to speak, 'if I don't walk with him whenever he asks me, that he'll—he'll do something dreadful, jump into the ocean or burn the hotel or something like that. I really don't know what to do.'

"I was so indignant that I felt like going out and telling the fellow what I thought of him. But I knew there was no use getting into an altercation with a man of that kind.

"'Do!' I said. 'Why, complain to the proprietor of the hotel or to your mother at once. He's merely taking advantage of your good nature and the thing ought to be put a stop to at once.'

"She sat thinking for a long time. Then she said:

SCHLEY vs LEMLEY

MALICE TOWARDS SANTIAGO'S HERO NOT TO BE TOLERATED.

SCHLEY WON THE BATTLE

AND DESTROYED THE SPANISH FLEET

And Lemley Can Not Change That Fact:

(Special from Commercial Ass'td. Press)

One of the most outrageous attacks that has as yet appeared comes now from Judge-Advocate-General Lemley. To read the dispatches as they come from Washington, and which are given publicity in the daily press, shows a very deplorable condition on the part of chiques, at the head of one of which Advocate-General Lemley seems to be.

Laying aside all personal animosities and reading Lemley's attack on Admiral Schley's appeal, no reasonable mind can overcome the impression that malice is the gist of the action.

Speaking of the Texas the commentators declare: "The question is not so much one of possible credit to, but of possible censure of Admiral Schley in connection with the work of that vessel in the battle of Santiago. The plain truth is that Admiral Schley did not during that battle in any way direct or control the splendid performances of the Gloucester and the three battleships Indiana, Iowa and Texas. The officers in command of these ships neither received nor obeyed a solitary order from him."

Next the commentators turn their attention to what they declare were resistent efforts by Schley's attorneys to show that in some way the Oregon at least was under his orders during the battle, first by answering the signal, "Close up," and afterward by firing its thirteen-inch guns under signal from the Brooklyn, and they say:

"But that attempt as the testimony to be quoted below shows, was a failure."

They quote therefore, passages from Captain Clark's testimony in which he said in regard to the order, "Close up," that was a standing order in the squadron to attack the enemy at once if they appeared, and to keep the heads of the ships always toward the enterance, and I remember a feeling of satisfaction that there was an order to close in, in case any accident had happened—and colliding with other ships.

Mr. W. B. Conkey, the Chicago publisher of "Schley and Santiago," was interviewed and here is what he says:

"The fact remains that Admiral Schley was in command at Santiago, controlled and directed every move of the squadron, that won the battle and destroyed the Spanish Fleet.

It strikes me that no amount of quibbling or political wire pulling can take that glory from Admiral Schley. At least that seems to be the openion of the American public and a great many of the leading men of that great puplic. The Milwaukee Sentinel, one of the leading papers of the West, in reviewing the book gives it a twe-column notice and in closing says to this offect:

No patriotic American citizen can afford not to read George Graham's great book—Schley and Santiago. It gives the facts, and proves that Sampson was at Siboney and Schley at Santiago, where the battle was fought and won.

The book contains nearly 500 pages of authentic facts and fifty instantaneous photographs taken by Graham during the battle.

Read this, a quotation from the book, and then say if the fleet did not work with Schley, and appreciate him as the Commander-in-Chief. After the battle, Schley compliments the Oregon, Texas, in fact all the fleet which took part in the battle.

Somebody raised a broom at our (the Brooklyn) masthead on one of the pennant halyards, and the crew of the Oregon followed suit, and then gave three cheers for Commodore Schley. On the Texas the men all lined up on the forward deck and at request from somebody aboard—I persume Captain Philip himself—gave three cheers for Commodore Schley. The little Vixen circled around us three or four times, her crew yelling themselves hoarse for the Brooklyn, for Schley and for the victory.

But from the New York there came never a sound of joyfulness and never a cheer.

The New York was Sampson' flagship and had just returned from Siboney after the battle, and Advocate-General Lemley is Sampson's friend.

Mothers can safely give Foleys Honey and Tar to their children for coughs and colds, for it contains no opiates or other poisons. Geddes & Harding.

Schley and Santiago

BY GEORGE EDWARD GRAHAM.

The intrepid Associated Press war correspondent, who was aboard the U. S. S. Brooklyn during the entire five months of the campaign. Illustrated with photographs taken by the Author during the fight.

The Most Sensational Book of the Day.

The true story of the famous cruise of the Flying Squadron under Commodore Winfield Scott Schley, including the blockade and destruction of the Spanish fleet. TOLD FOR THE FIRST TIME.

Contains an autograph endorsement and personal account of the battle by Rear Admiral Schley.

"The facts of the story of the movements and operations of the Flying Squadron as the author tells them in this book are correct."
—W. S. SCHLEY.

An interesting narrative of facts. Explains the called "Retrograde Movement," the "Loop," the "Colliding Problem," and settles conclusively every adverse point of the Court of inquiry.

PRESIDENT ROOSEVELT, when Governor of New York, said:—"Mr. Graham's story is the best account I have heard or read of the naval fighting during the war. It needed just as much courage to go about taking photographs as it did to work the guns."

THE NEW-YORK HERALD says:—"Mr. Graham, in the telling of facts, leaves the reader free to make the deduction that several naval officers need a Court of Inquiry to re-establish their reputations, if they can be re-established."

No subject has ever been before the public that has interested everybody as the manner in which Admiral Schley has been treated, and the American people demand the *full recognition of the Hero of Santiago.* This book tells everything just as it occurred and as the eyewitnesses saw it. Book is selling like wildfire. Liberal commissions. Outfit and books now ready. Send seven 2-cent stamps for canvassing outfit. ACT QUICK. Now is the time to MAKE MONEY.

Price $1.50, $1.75, $2.25, $2.75, according to style of binding desired.

MUSICAL SENSATIONS IN SURGICAL ANESTHESIA.

A Paris dentist, Drossner, has discovered that while his patients succumb to the influence of an anesthetic he has noticed that the hallucinations were invariably connected with the sounds from the street below. The auditory sensations seem intimately connected with the anesthetic sleep, and the idea occurred to him to substitute for the discordant, terrifying sounds of the street harmonius musical sounds. He arranged a graphophone with a receiver for each ear. As the patient took his seat, the receivers were placed in his ears, and the nitrogen gas administered. He could hear nothing but the music. The operation over, the patient is aroused with none of the hallucinations from the street noises, but calm and cheerful as before, saying he heard nothing but the music.

This ingenious device is certainly a definite advance on the part of the anesthetist. Not only can it be used in the case of the temporary anesthesia of nitrous oxide gas, but it can be called into action in ether and chloform narcosis. It is a common experience that one of the most disagreeable features about taking an anesthetic is the terrifying noises heard by the patient. These can all be avoided by using a graphophone. It was pointed out to the Academy of Medicine of Paris that the general anesthesia may be begun with nitrous oxide gas, using the graphophone, and then the anesthetic state kept up with ether or chloroform. This proceedure certainly robs the patient of a most painful part of the anesthesia, and should be practised wherever practicable. The French dentist who first advocated it is certainly a resourceful man. The proceedure may seem a refinement to some, but it certainly will win the gratitude of those who suffer so much from the auditory hallucinations of anesthetization.

The liability to disease is greatly lessened when the blood is in good condition, and the circulation healthy and vigorous. For then all refuse matter is promptly carried out of the system; otherwise it would rapidly accumulate—fermentation would take place, the blood become polluted and the constitution so weakened that a simple malady might result seriously.

A healthy, active circulation means good digestion and strong, healthy nerves.

As a blood purifier and tonic S. S. S. has no equal. It is the safest and best remedy for old people and children because it contains no minerals, but is made exclusively of roots and herbs.

No other remedy so thoroughly and effectually cleanses the blood of impurities. At the same time it builds up the weak and debilitated, and renovates the entire system. It cures permanently all manner of blood and skin troubles.

Mr. E. E. Kelly, of Urbana, O., writes: "I had Eczema on my hands and face for five years. It would break out in little white pustules, crusts would form and drop off, leaving the skin red and inflamed. The doctors did me no good. I used all the medicated soaps and salves without benefit. S. S. S. cured me, and my skin is as clear and smooth as any one's."

Mrs. Henry Siegfried, of Cape May, N. J., says that twenty-one bottles of S. S. S. cured her of Cancer of the breast. Doctors and friends thought her case hopeless.

Richard T. Gardner, Florence, S. C., suffered for years with Boils. Two bottles of S. S. S. put his blood in good condition and the Boils disappeared.

PRACTICAL GARDENING.

Vick's Garden and Floral Guide for 1902, just received by us, is by far the handsomest and most valuable book ever issued by the old and well-known enterprising firm of James Vick's Sons. Doubtless many of our readers remember their grand display at the Pan-American Exposition at Buffalo, N. Y., and for which they were awarded many prizes, among them the gold medal for asters. These beautiful flowers are shown in all their lovely colorings on the covers of the Guide, while the 130 pages are profusely illustratrd with handsome half-tone cuts, true to nature, of everything for the garden and farm. Their many specialities are mentioned, such as Danish ballhead cabbage Rochester beet, lemon cucumbor, golden, self-blanching celery, crisp as ice lettuce, Irondequoit muskmellon, Vick's daisy and Gradus peas, Vick's scarlet globe radish and Earliana tomato.

Our readers can obt in the Guide free by writing to James Vick's Sons, Rochester, N. Y., mentioning the plants which most interest them.

INDIANA FARMS TOO LOW IN PRICE.

An exchange says that there seems of late to be an active demand for Indiana farms by non-residents of the state. This would, to our mind, indicate that good land is selling at a less price in this state than in either Ohio or Illinois. When an Illinois farmer can sell his land for $100 per acre and buy Indiana land from $40 to $60 per acre that is as good or better he knows that he is making a good investment, and this will soon result in an increased value of our land.

INDIANA'S TAX LAWS.

At the recent meeting of the state tax board, Attorney General Taylor took occasion to say concerning "omitted property and delinquent taxes" that Indiana had the best tax law in the union and that taxable property here was more generally reached than in any other state. By way of comparison between this state and Illinois he said:

Although Illinois has fifty per cent more miles of railroad within the state than there are in Indiana, yet the total assessment on railroads in Indiana is about twice that of Illinois. You will further observe that although the wealth of Illinois is vestly greater than the aggregate wealth of Indiana, yet the total assessment on property is forty per cent above that of Illinois.

You say at once that our property is assessed too high and that there is certainly no omitted property in Indiana. Neither of these conclusions follow, for in Indiana the tax levy is low, while in Illinois it is very high. The total assessed value of property in Indiana in 1901 was in round numbers $1,400,000,000, while in Illinois in was only $1,000,000,000.

In some towns of Illinois the tax levy is as high af thirteen cents on the dollar. The utter confosion now existing in the tax laws of Illinois is proof of their inadequacy. The fundamental principal of the Indiana law is that property shall be assessed at its fair cash value.

THE LAKE SHORE NEW PASSENGER STATION, CHICAGO

Thousands Have Kidney Trouble and Don't Know it.

How To Find Out.

Fill a bottle or common glass with your water and let it stand twenty-four hours; a sediment or settling indicates an unhealthy condition of the kidneys; if it stains your linen it is evidence of kidney trouble; too frequent desire to pass it or pain in the back is also convincing proof that the kidneys and bladder are out of order.

What to Do.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy fulfills every wish in curing rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often during the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists in 50c. and $1. sizes.

You may have a sample bottle of this wonderful discovery and a book that tells more about it, both sent absolutely free by mail. Address Dr. Kilmer & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper.

WABASH EARNINGS.

The Wabash road is just about to establish a record for a railroad in regard to the passenger and freight receipts for the month of January. That the earnings of the freight department are far in excess of those of the passenger department is a fact thet has always been accepted. For the first week of last month the earnings of the Wabash amounted to $349,079, showing an increase of $37,422. Of that amount $16,890 was from the freight department, while the passenger department came in for nearly half or $16,804. This is a fact that is rarely if ever known to occur. The increase in the passenger traffic as is shown by the above figures.—Ft. Wayne Journal.

The wonderful activity of the new century is shown by an enormous demand for the world's best workers—Dr. King's New Life Pills. For constipation, sick headache, billiousness, or any trouble of the stomach, liver or kidneys they're unrivaled. Only 25c at Stones' drug store.

BRAIN FOOD NONSENSE.

Another ridiculous food fad has been branded by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for brain another for muscles, and still another for bones. A correct diet will not only nourish a pecular part of the body, but it will sustain every other part. Yet however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. You must prepair for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. A few doses aids digestion, stimulates the liver to healthy action purifies the bolod, and makes you feel buoyant and vigorous. You can get Dr. G. G. Green's reliable remedies at Geddes & Hardings. Get Green's Special Almanac.

INDIANA TO THE FRONT.

Another evidence that Indiana does not take a back seat for any of them is the following from a Washington paper:

"One of our Washington theatres seems to make a speciality of Indiana plays and players. Gracia Quivey Van Studdiford, formerly of North Manchester, recently sang there as prima donna of the Bostonians; Virginia Harned is appearing this week in Maurice Thompson's "Alice of Old Vincennes;" and next week General Lew Wallace's "Ben Hur" will be put on for a two weeks' engagement. Earlier in the season Julia Marlowe appeared at the same theater in Charles Major's "When Knighthood Was In Flower," and before that Richard Mansfield occupied the same stage with Booth Tarkington's "Monsieur Beaucaire."

"People of the great and cultured East will soon learn that Indiana is a great state, inhabited by great people. Even old Hoop Pole township is not to be sneezed at nowadays.

INDIANA NEWS.

ELKHART.—The engine drawing a Lake Shore passenger train containing the private car of W. K. Vanderbilt was partially derailed on Tuesday morning at Kendallville. Cinders and ice clogged the frog at a crossing, causing the accident. The passengers were shaken by the sudden stopping of the train, but no one was hurt.

A citizen of Colburn, this state, found a dead mouse imbedded in a plug of tobacco from which he had been chewing. It is to be hoped he has not been disturbed by the discovery. It is quite probable that "pressed mouse" is as offensive to the taste of the fastidious as "mouse in mince meat." At any rate the presence of mouse in either is not calculated to intensify one's desire for either. Plug tobacco may and probably does contain worse things than dead mice.

Mishawaka—Israel Schmid the pioneer wagon maker of the West, died here Tuesday. He built the first carriage for the famous Studebakers. The vehicle was sent to the Philadelphia Exhosition and won the gold metal. Schmid in his autobiography, relates how the now wealthy Studebaker brothers often left their little log factory early Saturday afternoons because they hadn't sufficient money to pay off their helpers. They were honest and lacked the heart, he says to remain and see the look of disappoinment upon the faces of the quartet in their employers.

MISHAWAKA—The sight of a woman with murder in her eyes and a long dirk in her right hand, chased Edward Berry through the dining room of the Milburn, the leading hotel of Mishawaka, created a panic while dinner was in progress, Tuesday. Many of the city's fashionable men and women were assembled, when the frightened man, followed by the enraged woman, rushed into the dining hall. Tables were overturned and dishes shattered and there was a hasty exodus of guests. Berry finally turned upon his pursuer, but was terribly slashed about the head and hands before the woman could be disarmed by Clerk Curtis and others. Berry declines to explain why the murderous assault was made. The woman has been arrested.

South Bend—The singer sewing machine factory was shut down Tuesday because of a strike of the 1,711 employes. There was no display or efforts to appeal to the sympathy of other workmen of the big factory, but before 8 o'clock every one of the employes had walked out The men say the new superintendent had ordered a new schedule to go into effect which would require the men to turn out more work without an increase in salary, which the men claim was impossible to do. This afternoon a meeting was held at the Harriton Club rooms and preliminary steps taken to have every employe become a union man. This work will be finished to-morrow. At the meeting a resolution was adopted pledging the employer not to retrrn to work until everything is settled to the entire satisfaction of everyone concerned. The strikers are orderly and there has been no treats of violence all seemingly being willing to follow the advice of the leaders to remain quiet.

A Good FILTER an Absolute Necessity

It has been proven many times, and there is no longer any doubt, that nearly all the great epidemics of typhoid fever and other diseases can be directly traced to the bacteria and other impurities in the water supply of the large cities. No practical method for filtering water for city purposes has yet been successful. It is therefore necessary for each household to adopt a means for filtering its own supply

THEY CRUSH THE POWERS

This is written in mid-October. The long, oppressive summer is quite gone. Fading leaf, withering tree and the rustling corn in the fields are signs of the season. Fog, frost, rain, snow,—they are coming. You remember last winter; of 1900 and 1901. The weather was cruel. Ah! the thousands it killed, and the hundreds of thousands it maimed and crippled. Oh, the rough grasp it laid on men at work, women at home, and children in cribs and cradles. Coughs that began before Thanksgiving Day are racking and tearing them still; yes, and growing worse as they dig deeper into the poor, tired throat and lungs. Many were cured by using Benson's Porous Plasters. For the soothing and healing power of these Plasters is wonderful. They conquer the complaints

THAT ARE KILLING THE PEOPLE.

No other plaster, no other medicine or application, can compare with them. Coughs, colds, backache, rheumatism, lumbago, kidney and liver troubles, asthma, influenza,—they all go down before Benson's Plasters like a snow image in the sun. You can't throw money away on a Benson's Plaster. Everybody is going to use them this season. But make certain you get the genuine. KENTUCKY MISREPRESENTED.

Congressman Wheeler of Kentucky, by his shallow speech in the House last Friday, did little more than to give his friends cause for profound regret that so discourteous a tirade should have emanated from the Representative of a State where good breeding is not so rare as Mr. Wheeler's own bearing would seem to indicate.

Especially is this criticism justified as being provoked by that portion of Mr. Wheeler's perfervid utterance in protest against the American plans for the reception and entertainment of Prince Henry of Prussia, shortly to be the guest of the people of this country. The point at issue is simply and solely that of the polite treatment of a gentleman who comes to visit us in all friendliness, and it is surely amazing that a Kentuckian should figure as advocating a shabby, indifferent and even semi-hostile welcome in such a case.

Every consideration of good manners and of national self-respect urges us to the most hearty and cordial treatment of Prince Henry. He visits this country as the representative of a friendly Government and his visit is distinctly intended as an expression of that friendliness. There could be nothing more ill-bred, more humiliating to sensible Americans, or less typical of the true American spirit, than an intentional failure to extend to Prince Henry the sincerest welcome, a welcome which is assuredly the right of a gentleman coming in good faith to a nation whose men are gentlemen.

If democracy is so feebly implanted in American bosoms that the courteous treatment of such a man as Henry of Prussia threatens to seriously impair our national character, then we are truly in a bad way. If American democracy is of such a nature that courtesy and good breeding are impossible to it, then democracy itself is in a bad way. Happily, however, there is no peril to American democracy in a polite reception and entertainment of the brother of the Emperor of Germany, and American democracy and and good breeding have been on excellent terms with one another since the days of the earliest American gentlemen. Congressman Wheeler of Kentucky has simply seen fit to make an ass of himself and to misrepresent his state in an unexpectedly humiliating manner.

FOUR SCORE YEARS OF SERVICE.

In directing attention to the approaching birthday celebration of the Reverend Doctor Edward Everett Hale, the Boston Transcript necessarily passes beyond the provincial importance of the occasion. April 3rd, this great American citizen will pass his eightieth milestone. Boston is arranging befitting exercises in honor of the event.

Wherever truest Americanism has been felt there has been the spirit of Hale. His interests have been so diversified that the uplift which has followed in his wake is little less than marvelous. No matter in what he has taken a hand, there has come about a kindlier feeling, a broader Americanism, a higher ambition and a more unselfish love for others.

For more than half a century he has charmed and instructed his fellows. If he had chosen to confine his efforts to any one line of intellectual pursuit his own native merit would have won him pre-eminent recognition; but in the very variety of his achievements he has laid a different foundation for enduring fame.

Doctor Hale's literary standing rests not only with the critics, but with the masses. Any writer who could produce "The Man Without a Country" is above hagging criticism. The very breadth of his humanity disarms. His original stories rank with the best, while his hymns and ballads are recognized as standard. His interest in education is natural. As overseer of Harvard College, trustee of Antioch College, councilor of Chautauqua and director of negro education, he has stood for the principles which make for broad culture.

He is among the foremost philanthropists of the world. His oratorical powers command the attention of every audience before which he speaks. In religion he has not only won a merited distinction because of his sermons, but because of his ability as an organizer.

But above all things, Doctor Hale's real eminence is as a great American. Well born, cultured, whole-souled, broad-minded, pure in heart and worthy of deed, he measures up to the highest type of citizenship. In love of country he is not a jingo. He holds that our sole reason for being a nation is that each may serve others. Social standing, he says, depends upon the measure of social service rendered by the individual. The humility and simplicity of this great American are shown in his suggestion of a motto for America: "Whosoever would be chiefest among you shall be servant of all."

COOKED CELERY FOR RHEUMATISM

Following the above caption, the Science News says: "One of the latest is that celery is a cure for rheumatism; indeed, it is asserted that the disease is impossible if the vegetable be cooked and freely eaten. The celery should be cut into pieces and boiled in water until soft, and the water drank by the patient. Put new milk with a little flour and nutmeg into a saucepan with the boiled celery, serve warm with pieces of toast, eat it with potatoes, and the painful ailment will soon yield. Such is the declaration of a physician who has again and again tried the experiment, and with uniform success. He adds that cold or damp never produces, but simply develops the disease as acid blood is the primary and sustaining causes, and that while the blood is alkaline there can be neither rheumatism or gout.

Is it not a trifle discouraging in our laudable endeavors to show the Filipinos what a high brand of civilization we are offering them—more or less strenuously—to have the Yale insurgents get into a free fight, resulting in quite a list of casualties?

A Florida dispatch says that a picnicing party down there "was pursued the other day by a snake which in diameter resembled a beer keg." Perhaps hat's what it was.

Have you Prince Henry's time card pasted in your hat?

An exchange refers in its headlines to "Fourteen Sad Funerals." It does seem queer that among so many of them there wasn't even one that was hilariously jolly.

It is with deepest regret that we note the decision of the King of Siam not to pay us a visit. Now that we are going into the business of receiving royalty, we want all the practice we can get. Perhaps, the king could spare us a dozen or so of his sons for a short time.

There is a rumor that two young men of South Bend, have cornered the pine-apple crop, having bought the entire Cuban output. We are not worrying about the fruit, but just to think of how many different brands of "kings" we are creating in this republic!

A congressman has a bill asking Cuba to apply for admission to the United States. He says it will help the island to join us and wrap her wounds in our flag. The tariff barons say they do not intend to give Cuba any tariff concessions. So she will either have to come in and join the sugar trust and be happy or stay out and starve.

A decision of more than ordinary importance was handed down in the Indiana Appellate court lately in the care of responsibility of saloonists' bondsmen sent up from Shelby county. The court holds that persons who go on the bonds of saloon keepers may be held responsible for damages to a man who looses money by gambling while under the influence of liquor in a saloon. That is to say that a man in a drunken condition losing money in a saloon where intoxicants have been sold him may successfully bring suit for damages against the bondsmen of the saloon keeper.

Our President has declared that if the "Princess Alice" goes to Europe and to the coronation, she must travel only as an ordinary American girl, and with nothing of the fuss and feathers that characterized royalty. Perhaps this worthy conclusion was reached with a full understanding that the "princess" has no royal claim and will not be officially recognized, but it is always well to be prepared in advance. That our young countrywoman will have the time of her life is quite well assured, and we venture to hope that she will have a good seat along the line of march, and will be treated to a ride in London on the top of a bus. No visit to London is complete without a bus ride and on the very top seat.

A very interesting article in the Indiana Medical Journal, by Dr. Nelson D. Brayton, develops the singular fact that smallpox is very much more virulent in the Atlantic states than in Indiana. The disease did not appear in New York after the return of the Spanish-American troops until it had been prevalent in the West for about eighteen months. Then it broke out in severe form. The mortality in New York has reached 13 per cent, while in the West it has been insignificant. The eastern cases are more generally accompanied by complications and more frequently result in permanent injuries, such as blindness. The disease is much more severe in its strain on the system, delirium being a common feature. No adequate explanation of this difference in the character of the disease has yet been found, though various theories have been offered.

The stationery printed at this office last month is giving the best satisfaction. Last week we printed a thousand statements for a man, and by their aid he collected a small fortune. Two months ago a man bought of us some fine paper and envelopes to use when writing to his sweetheart, and now he is married. Another young man forged a name on a check printed at this office, and is in the penitentiary. Another young man stole some of our paper to make cigaretts with—he is dead. A young lady bought some of our paper to curl her hair on and now she has a beau. (We have only a few packages of this kind in stock.) By using our stationery a person can collect old accounts, tell fortunes, change the color of hair, have teeth extracted without pain, find out the name of your future husband or wife, be successful in business andd get elected to office. Give us a call. Office hours from 7 a. m. to 9 p. m.

The industrial commission which was created by congress several years ago, and which has since been holding sittings at Washington and inquiring into economic and trade conditions, has made public the second part of its report. The commission recommends stringent legislation by congress against conspiracies in the form of trusts and the several state legislatures are advised to enact laws similar to the anti-stock-watering laws of Massachusetts to prevent over-capitalization. The report also points to the practice of the trusts selling abroad cheaper than at home and suggests that measures be taken to protect the consumer. The commission offers several other recommendations for the protection of the public from trust robbery, among which is one "that district attorneys of the United States be authorized and directed to institute proceedings for violations of the federal anti-trust laws." Now if the republican congress will pay a little more attention to the interests of those who are being robbed and not quite so much to the robbers, there will soon be some relief from trusts.

OBITUARY.

Mary Thayer was born in Massachusetts, Sept. 19th 1819, and came to this country about 60 years ago. She was married to a Mr. Olds which union resulted in four children. After the death of Mr. Olds she was united in matrimony to Mr. Fry with whom she lived till her death which occurred at her home near Edgerton, Feb. 8th 1902, at the advanced age of 82 years 4 months and 19 days. Three children were born to the second union. Of the seven children six are still living, Mrs. Swager having died several years ago.

Mrs. Fry coming to this wilderness country in the long ago, knew well the trials and inconveniences consequent upon a pioneer life. Her labors are now closed and her children and others enter into her labors. She was buried from the home, the remains being committed to their final resting place on the 10th inst, in the Clarksville cemetary. The six living children, all save one who is living in Iowa, with a large number of other relatives and old neighbors were present at the obsequies at which Elder A. C. Bartlett was the officiating minister.

THIRD ANNUAL POULTRY SHOW.

It has been decided to hold the third annual poultry show of the Butler Fanciers Association in this city Nov. 25, 26, 27, 28, and 29. The following officers have been elected:

Pres., Geo. B. Souders.
V. Pres., John W. Brown.
Treas., O. A. Gengnagel.
Supt., J. M. Shull.
Sec'y, D. D. Melroy.

The two Toledo Judges have again consented to be with us and there are none better than Messrs F. C. Shepherd and J. W. Mulinix.

The local promotors of the enterprise should receive all the encouragement possible and if the public cooperates in the manner thst it should the third annual meeting will eclipse the last one. Our rail road facilities have improved to such an extent that it will be much easier for exhibitors to reach our city.

DITCH PETITION.

In the matter of the petition and report of Peter Grube number 743 ditch in Stafford township. To whom it may concern: Notice is hereby given that a petition has been filed with the Auditor of DeKalb County, State of Indiana, and viewers have been appointed who have viewed and reported said view which is on file in my office. The hearing of said petition and report upon its merits will be on

Tuesday, the 8th day of April, 1902, the same being the 2nd day of the April term, 1902, of Commissioners Court of said county.

The prayer of said petition is that a ditch be constructed on the following route to-wit:

Beginning five hundred and forty one (541) feet south of the north east corner of section sixteen (16) township thirty four (34) north, range fifteen (15) east, DeKalb county, Indiana.

Ending in the Daniel Hook joint state ditch, said ending being five hundred and fifty five (555) feet north and fifteen hundred and ten (1510) feet east of the south west corner of section sixteen (16) Stafford township, DeKalb county, Indiana.

Also a Lateral Drain:

MEMBER ILLINOIS ASSEMBLY

AFFLICTED WITH CATARRH OF THE THROAT AND LUNGS.

CURED BY PERUNA.

HON. JOHN J. FURLONG, Member of the Thirty-fifth General Assembly of the State of Illinois, writes of Peruna as follows:

1353 Osgood St., Chicago, Ill.

The Peruna Medicine Co., Columbus, O.

Gentlemen:—"I can safely recommend Peruna as a remedy that will cure all catarrhal troubles.

"It was of great benefit to me as it cured me of catarrh of the throat and lungs permanently and in a very short time. I am glad to add my endorsement to that of others."—JOHN J. FURLONG.

Cures Made by Peruna are Permanent Cures.

A patient cured by Peruna is no more liable to catarrh than if he had never had it.

Cured of Catarrh of the Entire System.

Mr. William Flood, care Fifth Avenue Hotel, Louisville, Ky., says: "Your Peruna has completely cured me of that distressing disease, catarrh, which affected my head, nose, bronchial tubes, and, in fact, my whole system.

"For nine years I bought everything that was advertised as a sure cure for my complaint, but it so happened that I did not buy Peruna until nine months ago.

"After using your splendid remedy according to your directions I am today a well man. I find Peruna to be the greatest family medicine ever discovered. I shall always keep a bottle of it on hand.

"I can candidly state that had it not been for Peruna I would have given up my position, being too weak to do my work. For eighteen years life was a burden."—Mr. William Flood.

Congressman J. A. Barham, of Santa Rosa, California, writes:

"At the solicitation of a friend I used your Peruna, and can cheerfully recommend it as an excellent remedy for all catarrhal troubles. It is indeed a wonderful medicine."—J. A. Barham.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

The Scienlific American gives this receipt which the whole world should know. At the first indication of diptheria in the throat make the room close, then take a teacup and pour into it an equal quantity of turpentine and tar, then hold the cup over the fire so as to fill the room with fumes. The patient inhaling the fumes will cough out the membraneous matter and diptheria will pass off. The fumes of tar and turpentine loosen the throat and thus affords the relief that has baffled the skill of the physicians.

Chas. F. Phillips,

A HAPPY OCCASION.

On Wednesday of last week twenty ladies from West Unity and Montpelier arrived at the Wabash station evidently bent upon making the day one of festivity. Each one carried a suspicious looking package, which savored somewhat of a picnic occasion. They proved to be old friends of S. G. Stone and family who had planned a surprise for Mrs. S. which proved to be overwhelmingly successful.

Conveyances were at the station and the party soon reached their destination where they received a most hearty welcome. A more jolly company would be hard to find. A sumptuous dinner was soon spread by the ladies after which old times were talked over, old pictures were brought out—some that had been taken more than twenty five years ago. Dear faces had grown older but hearts seemed just as young and warm as when in girlhood. These same ones had often met on similar happy occasions. The hours passed far to speedily and at 6 o'clock they left for their homes.

Good bye old friends, and as we wave adieu,

Rheumatism

The liniment bottle and flannel strip are familiar objects in nearly every household. They are the weapons that have been used for generations to fight old Rheumatism, and are about as effective in the battle with this giant disease as the blunderbuss of our forefathers would be in modern warfare.

Rheumatism is caused by an acid, sour condition of the blood. It is filled with acrid, irritating matter that settles in the joints, muscles and nerves, and liniments and oils nor nothing else applied externally can dislodge these gritty, corroding particles. They were deposited there by the blood and can be reached only through the blood. Rubbing with liniments sometimes relieve temporarily the aches and pains, but these are only symptoms which are liable to return with every change of the weather; the real disease lies deeper, the blood and system are infected. Rheumatism cannot be radically and permanently cured until the blood has been purified, and no remedy does this so thoroughly and promptly as S. S. S. It neutralizes the acids and sends a stream of rich, strong blood to the affected parts, which dissolves and washes out all foreign materials, and the sufferer obtains happy relief from the torturing pains.

SSS

S. S. S. contains no potash or other mineral, but is a perfect vegetable blood purifier and most exhilarating tonic. Our physicians will advise, without charge, all who write about their case, and we will send free our special book on Rheumatism and its treatment.

Eczema for Forty Years.

The Unqualified Statement of a Well Known Attorney, St. Ignace, Mich.

Some of the cures made by Dr. A. W. Chase's Ointment of stubborn and long continued eczema and skin diseases are causing much comment. People are beginning to realize that this Ointment is a wonder worker with all kinds of skin trouble. Attorney James J. Brown, St. Ignace, Michigan, writes as follows:

Dr. A. W. Chase Med. Co. Buffalo, N. Y.—Gents:—I cannot refrain from expressing my acknowledgement for the relief I have felt from Dr. Chase's Ointment. For 40 years I was afflicted with a skin disease which was located in one spot—on my leg. I have spent at a rough estimate five hundred dollars trying to effect a cure, and not until I applied this ointment did I get relief. You are strangers to me and this letter is prompted directly because I want to say and I feel as though I ought to say it. That Chase's ointment has effected a complete cure of my affliction. Three boxes did the work on my leg. I was also suffering from itching piles and applied the ointment which gave the best of satisfaction by affording me rest at night and rapidly causing the disease to disappear. I have received such relief and comfort from the ointment that I cannot withhold expressing my gratitude. I was so long afflicted with the tortures of eczema. I feel now that I am cured, a word of recommendation is due from me. Yours truly,

JAMES J. BROWN.

A PHILOSPHER'S OPENION.

There isn't much difference in the conditions of men after all. Mr. Rockefeller saws wood to get an appetite and many another man saws wood because he has an appetite. The one needs a better digestion and the other needs something to digest. The one works diligently with imperfect results while the other one stands a pretty good chance to succeed. After it is all said and done, the advantages enjoyed by the very rich are more imaginary than real. It is largely in the thinking. Many a comparatively poor man, if fully advised as to the facts, would not exchange conditions with a single one of the very rich men in the land. When any man's possession become so great as to enslave him he is indeed unfortunate.

TO CURE LA RIPPE IN 24 HOURS.

NUTS FOR THE BOYS TO CRACK.

Here is a list of questions for the wide awake boy. Can you answer all of them? You can see any day a white horse but did you ever see a white colt? How many different kinds of trees grow in your neighborhood, and what are they good for? Why does a horse eat grass backward and a cow forward? Why does a hop vine wind one way and a bean vine the other? Where should a chimney be the larger, at the top or bottom and why? Can you tell why a horse when tethered with a rope, always unravels it, while a cow always twists it into a kinky knot? How old must a grape vine be before it begins to bear? Can you tell why leaves turn upside down just before a rain? What wood will bear the greatest weight before breaking?

FARM LANDS.

People with means, the country over, are investing their money in farm lands, generally at prices that will net but 3 to 5 per cent on the investment. Why they do so is summed up as follows by an agricultural paper:

There was never a time before when the desire to buy farming lands was so strong as it is now. The desire is born of the conviction that good farming lands are getting scarce and that the rapidly growing population of the country must create a demand thar will result in very much higher prices in the early future. In his eagerness to buy there is but little doubt that the future is being liberally discounted. That is prices are being paid for lands that their present net earning power does not warrent. But it does not follow that this is unwise; it may, in fact, prove to be a clearheaded foresight that will prove highls advantageous. The father, for instance, who is buying lands to put his growing sons on a few years hence, may pay what is regarded as a high price now, but it will probably be regarded as a low price by the time the boys are ready to occupy them. Fven if there be a reacrion, which is not improbable, it is difficult to see how it can be other than a temporary one, or to see how a steady rise in land values in the future can be prevented, though there may be important fluctuations in values from time to time. But where lands are needed at present or prospectively, and where they can be bought without assuming overmuch debt, variations in values will be regarded with indifference by their owners, for the final outcome will be all right.

HITCHING RACKS NEEDED.

It is certainly discouraging for a farmer to drive to Butler and be unable to find a place to hitch his team, but such is the case in Butler nearly every Saturday. That a matter of this kind exists is very detrimental to the wellfare of the city and should be corrected at once. It is to the merchants interest to see that this evil is corrected. Several farmers have complained in our hearing and we surely cannot afford to neglect such an important matter. The farmer is the li e of our town and we should encourage him to come to Butler. We want more hitching racks.

A GREAT OPPORTUNITY.

Vick's Garden and Floral Guide for 1902, published by James Vick's Sons, comes to us full of everything relating to the garden and farm. It brings to our mind their display at the Pan-American Exposition—the gorgeous beds of Tulips and Hyacinths, the beds of Petunias, Geraniums, and various other plants, and the show of Asters and Dahlias in the Horticultural Building. Their great exhibit of over 1,200 heads of delicious Celery was considered by the manager of the expositiont to be the most attractive display in the vegatable department. The Guide is profusely illustrated with handsome half-tone cuts of all these and more. Any of our readers, by sending to James Vick's Sons Rochester, N. Y., can obtain the Guide free, merely stating what they most desire to grow.

UNIQUE STOCK FARM

R. H. Patrick Raises Dogs for Tables of Chinese Epicures.

Has Large Industry in the Caroline Islands—In This Country to Secure Big Dogs for Breeding Purposes.

R. H. Patrick, a guest at the Auditorium at Chicago, has probably the unique stock farm of the world. It is near Midway, Caroline islands. Although Mr. Patrick raises animals for market, no bleating of sheep or lowing of kine disturbs the silence on his farm. Instead of these pastoral noises there is the sharp barking of dogs. These are the animals he raises for market, for the Chinese esteem a young dog's flesh as highly as the gourmands of more civilized countries esteem lamb or tender veal.

To the epicures of China Mr. Patrick looks for the patronage that keeps his business alive. He stumbled upon the peculiar business altogether by accident. He was traveling in China when he found that, although the Chinese considered dogs as staple articles of food, no attempt had been made to raise them for the market. Shortly afterward when he removed to the Caroline islands he put his idea into execution, and his stock farm is now the biggest institution on the island.

Up to the present Mr. Patrick has bred nothing but the native Chinese dogs. They are not so large as the average dog of this country, and, probably being so few generations removed from the wolf, they are tough and not a choice article for the table. It is to remedy this by cross-breeding that Mr. Patrick has visited the United States. He will go east, where he will buy a number of blooded St. Bernard dogs, which he will ship to Midway.

"I have been shipping the dogs to Amoy, China," said Mr. Patrick, "and each month I manage to send from 100 to 125 young animals. These animals are sent alive and are killed in the native butcher shops as they are needed. I hope within the near future to be able to send the carcasses in refrigerators, for then they will command a far better price."

CANADIANS PLAN COINAGE.

May Have New Denominations of Beaver, Half Beaver and Double Beaver.

Now that it has been fully decided that Canada is no longer to be dependent upon England for her coinage, but is to have a mint and coinage of her own, suggestions of all kinds are being made as to the denomination and form of the gold coins of the dominion. The well-known 50, 52, 10 and 5-cent silver coins of the dominion have hitherto been specially manufactured at the royal mint in London, and these are not likely to be materially changed, now that they will be made in Canada, except that the effigy of Edward VII. will replace that of the late queen on the obverse of the coins.

There is not the slightest intention of coining Canadian sovereigns, for it would be commercially impossible for the dominion to abandon decimal currency, even if she wished to, which she certainly does not. There is a prejudice against the coining of eagles or their fractions, and an evident desire to make the new currency as distinctively Canadian as possible. With this object in view there is now before the government a proposal for the selection of one of the national Canadian symbols—the beaver—as the prominent feature of the new coins. The suggestion is to designate them as the half beaver, one beaver and double beaver, having a value respectively of $5, 10 and $20.

AROUND THE WORLD RACERS.

The Matin of Paris Claims the Record for M. Gaston Stiegler, Who Made Trip in 63 Days.

The sensation of the day is the return to Paris of M. Gaston Stiegler, after having encircled the globe for the Matin, in 63 days. He was met at the station by an enthusiastic throng, and hailed as "the first reporter in the world."

"He deserves the title," says the Matin. "He has beaten all his competitors. All those who flocked after him, Europeans or Americans, have been beaten, no matter what they may say; no matter what they may claim to have done.

"Suppose we examine the various competitors, M. Fitzmorris, for example, who represents the Chicago American. M. Gaston Stiegler has not been beaten by Fitzmorris. Mr. Stiegler covered a part of the journey which Fitzmorris voluntarily left. The American journalist did not go through Paris, but joined M. Stiegler at Flushing and disembarked with him at Vancouver. There he left him to take a boat that had been waiting for him several days, and jumped into a train that had been under steam 48 hours. M. Fitzmorris need only have gone still nearer the north pole and he would have gone around the world even quicker."

China Learning Slowly.

The allied villages of China, who have succeeded the Boxers, have learned some things from the experience of their predecessors which will enable them to avoid a few serious mistakes. One of the most important things they have learned, remarks the Chicago Inter Ocean, is that the survivors in all such movements must pay the taxes.

Woman's Danger Periods.

Zoa Phora Revives and Regulates Menses, Prepares for Motherhood and is Indispensable in Change of Life.

Free Trial Bottle of Zoa Phora the Best Tonic for Pale, Sick Women, Sent to Any Name or Address.

In the three danger periods in woman's life the young girls period, motherhood and change of life, Zoa Phora is the only remedy that has always cured—never failed. In the attendant misery of suppressed menses, in leucorrhea, flooding, laceration, or the grave danger to a delicate woman in pregnancy or change of life, Zoa Phora, relieves pain and distress almost instantly, builds up and strengthens rapidly and surely every time. Jennie M. Cooley, of East Long Meadow, Mass., writes:—"I can truthfully add my testimony in regard to the use of Zoa Phora. At change of life I was troubled with a complication of female complaints and flooding. After taking Zoa Phora I was permanently cured and can cheerfully recommend this wonderful remedy to all sufferers from female weakness and its attendant evils."

JENNIE M. COOLEY, East Long Meadow, Mass.

Mrs. M. Hallock, Corner Pine and Second Streets, Michigan City, Ind., writes of her experience with the wonderful woman's remedy—Zoa Phora:—"During the past few years I have had the good fortune to witness a large number of remarkable cures by Zoa Phora. I know ladies who have taken the remedy during the change of life with the most pleasing results. Others whom I personally know have used Zoa Phora both before and after confinement, and the effect has always been most gratifying. I also know a number of young girls who have been spared a great deal of suffering and dangerous illness at monthly periods by the use of this medicine. I have used Zoa Phora myself with great benefit, when I have been all run down from nervousness and overwork, and would not be without it. You certainly have an excellent remedy, and I feel that it cannot be praised too highly."

Get a dollar bottle of Zoa Phora at the nearest drug store, or the Zoa Phora Co., Kalamazoo, Mich., will send it to you prepaid on receipt of the regular retail price, One Dollar a bottle, or if you wish send your name and address and 10 cents to cover cost of postage and packing for a large trial bottle, enough to show its wonderful effects on weak women. The doctor is constantly in attendance upon our mail so that you may write freely and be sure of good advice.

Miss Harriet Swartz, of Athens, Mich., went to Corunna, DeKalb county, last week to attend the funeral of her mother, Mrs. Johnathon Shook, who died of heart failure. Mrs. Swartz had arrived but a short time until she, too, suddenly expired from the same cause. It was a rather singular as well as a sad incident.

A Hudson bride wasn't up on cooking, but she knew all about battenburg, embroidery and frilling, and painted a sparrow so natural that it flew away. The president of the coming St. Louis exposition denies with some warmth a rumor that the date of opening it will be postponed and says: "There is not the slightest doubt that the buildings will be completed and the exhibits in place by April 30, 1903, the day set for the opening of the fair by congress."

Young man, be as smart as you can, of course; know as much as you can without blowing the packing all out of your cylinder-head. Shed the light of your wisdom abroad in the land, but don't dazzle people with it. Don't be too sorry for your father because he knows so much less than you do. Of course your clothes fit you better than your father's do him. They cost more too. They are more stylish. The cut of your hair is better looking than Pa's. But mind you, young man, the old gentleman gets bigger wages, and his homely scrawling on the business end of a check will draw more money out of a bank in five minutes than you can with your copper-plate signature in six months. Young men are useful. We could not engineer a picnic without them. But they are no novelties, my son, nothing of the kind. The world has been so full of smart young men that their feet stuck out of the upper story windows. The world has great need of you, but no greater need of you than you have need of the world. Don't be too fresh, young man, so that you will have to be put away in an ice box to keep from spoiling. Don't be afraid you will not be discovered. People all over the world are hunting for you, and if you are worth finding they will find you. Remember, young man, hard work is the secret of success. It does not kill. "Fun" kills men. The "good times" the boys have lays them out. If you can't be a leader, be something just as useful, but never be a loafer in the presence of working people as it makes them very tired, and they will soon learn to hate you.

A POLITICAL PROPOSAL.

A politician down in Southern Indiana proposes to his sweetheart in language after the following manner:

"My dear miss: I hereby announce myself a candidate for your hand and shall use all fair and honorable means to secure the nomination. I know that there are many candidates in the field, and I hesitate before entering the race but now I am in to stay. My views on love and matrimony have often been expressed and need not be repeated here. You know I favor the gold standard of love—and a maintenance of standard. If you decide to confer upon me the favor I seek, please fix a date for caucus with your mother. I have no objections to her acting as temporary chairman of the permanent organization. Should the result of the caucus prove satisfactory we can soon hold the primaries and select a date and place of convention. I never believe in long campaigns, so if you decide to honor me, I will ask you to make the convention date as soon as possible Devotedly yours."

The young lady answered as follows by telegram.

"Caucus unnecessary. Nomination unanimous. Come at once and fix date for ratification."

Barnum's Monkeys

"All well—all happy—lots of fun". That is the regular report from the monkey cage of Barnum's Circus ever since the keepers began dosing the monkeys with Scott's Emulsion. Consumption was carrying off two thirds of them every year and the circus had to buy new ones.

One day a keeper accidentally broke a bottle of Scott's Emulsion near the monkey cage and the monkeys eagerly picked it up from the floor. This suggested the idea that it might do them good. Since then the monkeys have received regular doses and the keepers report very few deaths from consumption. Of course it is cheaper to buy Scott's Emulsion than new monkeys—and that suits the circus men.

Consumption in monkeys and in man is the same disease. If you have it or are threatened with it can you take the hint?

This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle.

A BUTLER HORSE.

John Wimmere Known as "Potatoe John" Shows Them a Trick.

The people who resorted to the speedway on Washington Bouleyard yesterday are still smiling and laughing over what happened to Frank Gruber, Will McKinnie, Oscar Woprock and a number of others who were out with their horses looking for trouble in a good natured way they were spurting up and down the drive, when an ungainly looking, long-legged, raw-boned, country-looking horse was driven up the street. In the sleigh was a stranger with all the marks of a farmer. He wore felt leggins, big over shoes, a slouch hat and there was a sprinkling of hay seed on his yellow rain proof coat. He felt his way along and the urchins made fun of him. When the fast ones turned east Mr. Farmes joined them. In the string was Mr. McKinnie, Mr. Gruber, Charley Centlivre, Frank Bogash, Mr. Wobrock and a few other trailing. Everybody was smiling at the big bay horse and his driver, little dreaming that a surprise was in was in store for the harness kings and their admirers. When the flyers turned at Broadway for a race to the enterance, the new comer was in line. He passed Gruber, then McKinnie and all the rest, but he did not lead them very much. Bogash took things easy. There were shouts of laughter as Frank Gruber and Will McKinnie yelled at their horses, while oscar and the others ran. But Mr. Farmer said not a word. When asked where he hailed from he uttered not a word. Old timers could not locate the ringers. Some of the boys said that Charley MacDougal was behind West Wind for he has been ringing in some new ones on them lately. Others credited him to Major Tillo, still others to Frank Pearse, but no one could uncover the mystery and when the big fellow was driven away they were as much in the dark as to his idenity as ever. It is understood that he will be out again this afternoon and is worth a trip to the speedway to see him.

Last night the stranger said he was from Waterloo and that his horse was right fresh from work on the farm. Horsemen who saw his performance are disposed to doubt this, however, for he handled his animal like a professional.

DEAFNESS CANNOT BE CURED by local application, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing and when it is closed deafness is the result and inflamation can be taken out and this tube restored to its normal condition hearing will be destroyed forever nine cases out of ten are caused by catarrh which amounts is nothing but an inflamed condition of the mucous surfaces. We will give one hundred dollars for any case of deafness that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

MUST HOLD YOUR HORSES.

The Indiana supreme court handed down a decision last week in the case of John Butts of Kendallville vs. the Lake Shore that may be of general interest. This decision is a reversal of the decision of the Whitley county circuit court when the case was decided against the Lake Shore. In brief the decision shows that a plaintiff cannot recover damages from a railroad company for injuries caused by his horses running away by reason of taking fright at the escape of steam, rattling of cars and other usual and ordinary noises incident to starting a locomotive and train of cars, where it is merely shown that the same were started without warning to plaintiff when he was driving his horses over a highway crossing and was 40 feet distant from the train and that the railroad employes knew that praintiff and his team were on the crossing close to the train when it started, no reason being shown why such employes should anticipate that the usual noises incident to starting a train at the time would so frighten plaintiff's horses as to cause them to run away.

"The reader may make up his mind to be pleasantly overwhelmen by the opulence and vivacity of Around the Pan', published by the Nutshell Publishing company, 1059 Third Avenue, New York.

The wonders begin with the frontispiece picture of President McKinley drawn in a single line beginning at a point on the cheek bone and going round and round in a constantly widening circle, with waverings and downbearings of the proper places to secure detachment and shading. We are told that this protrait "is considered the most unique work of its kind in the world", and if these are degrees of uniqueness we are willing to believe that this is most the thing of which there are no duplicates. Of course there is text in addition to the pictures, and we should be surprised indeed to hear from any purchaser the opinion that he had not got his money's worth $2.00."

BAD BABIES
Are often only hungry babies. They cry and fret because they are ill-fed. The healthy mother is sure to have good babies; babies that coo and sleep and grow. Mothers who use Doctor Pierce's Favorite Prescription, are generally healthy and happy, and have healthy, happy children. "Favorite Prescription" prevents nausea, soothes the nerves, promotes the appetite and causes sleep to be sound and refreshing. It gives a great physical vigor and muscular elasticity so that the baby's advent is practically painless. It is the best tonic for nursing mothers, restoring strength and promoting an abundant flow of nutritive secretions.

"I can cheerfully recommend Dr. Pierce's Favorite Prescription as one of the best medicines for women," writes Mrs. Mary Murdock, Murdock, of 1045 Woodard Ave., Topeka, Kan. "I sider it the best medicine made. I know it has no equal. I am the mother of ten children and only one living—the tenth one. She is one year old and is as well and hearty as can be. She is a beauty. Of my other babies, one lived to be one year old, but she was always feeble. I tried different doctors, but none of them could tell me what my trouble was. They said I was well and strong. I was examined by surgeons but they found nothing wrong, and they were puzzled to know what my trouble was. I did not know what to do, so I thought this time I would try Dr. Pierce's Favorite Prescription. I took it the entire nine months and now have a fine baby girl, and I cannot praise your medicine enough for the good it did me."

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

Dr. Pierce's Pleasant Pellets are easy and pleasant to take. A most effective laxative.

Mrs Moody, of Auburn visited her sister Mrs. Dr. Fanning several days last week and attended the valentine party at the G. A. R. Hall.

Cards were received by many friends of Ira Good and wife, of St Louis, Mo., last week announcing the birth of little Miss Helen Ernertine Good, February 1, 1902. We congratulate the happy parents.

In Wabash nearly every body wears a red ribbon on the left arm. This is due to the fact that nearly everybody in Wabash has been vacinated and the red ribbon is a warning not to "slap or touch my sore arm" Those who are vaccinated on the leg do not wear the red sign.

LOGANSPORT.—A. P. Jenks, manager of the Logansport and Wabash Valley Gas Company is credited with saying that there would be no gas next winter. He also said that they only had pressure of twelve pounds on Tuesday, where as there were over 300 pounds when the company was started.

Your correspondent received a letter from Mrs. Higgins, formerly of Butler, wife of J. J. Higgins, who used to be editor of the Butler Review. They are located in Seattle, Washington, and are in the grocery business, and are well and prospering. Their son Listen is now a young lawyer and very happy in his profession, and the best of all he says he is coming back to Butler for his bride. Who can tell which of our bright young ladies will go west to share his lot? Who will be the lucky girl?—Butler cor. to Press.

OBITUARY.

Charles H. Boyd was born in DeKalb county, Oct. 4, 1877, where he also died, Feb. 24, 1902, aged 24 years, 4 months and 20 days.

He was the son of William and Ada Boyd. He leaves to mourn his untimely death his parents, Mrs. Blanch Collins, Mrs. Jane Ridge, Mrs. Dora Marks, Cecil and Muriel, four sisters and a brother, who were all present at the funeral.

He was taken sick and died of a virulent pneumonia at the home of his sister, Mrs. Blanch Collins.

Deceased was a popular and promising young man, much loved, and esteemed by all who knew him. Although sick but a few days, he suffered intensely, but bore it with great patience, never complaining or finding fault with any thing that was done for him.

"A precious one from us has gone,
A voice we loved is stilled.
A place is vacant in our home,
Which never can be filled."
"God in His wisdom has recalled
The boon His love had given,
And though his body slumbers here,
His soul is safe in Heaven."

Funeral services were conducted by Rev. W. O. Butler at Saw Dust church, Feb. 26, which were largely attended, and at which place the interment took place.

KRAG-JORGENSON RIFLES.

Under the new bill introduced into both branches of congress for the reorganization of the national guard, Krag-Jorgenson rifles will be issued to all the states in exchange for the old Springfields and that the national guard shall take part in field maneuvers with the troops of the regular army and that officers and men shall receive the same pay for this service as the regular troops. It also provides travel pay, subsistance and quarters for officers of the guard who may desire to take a course of instruction at any of the military schools supported by the government.

THE BUTLER BUGGIES.

A word to those who are anticipating buying buggies this season; we would ask you to call on Price & Maxwell, at Butler, and examine the home buggies at Butler factory. There are none better made, materials and workmanship first class, and we ask you to call and go with us to factory and examine goods for yourselves, and know just what you are getting. Leave your order and have buggy to suit you, having sold quite a number this way. We are able to save you from five to seven dollars on each job over competitors, as we have no rents, freight or drayage to pay.

Price & Maxwell.

IKE HOSE BUILDING SOLD.

An important real estate transfer occurred in Butler last week, in which Ike Hose sold his business room now occupied by Andy Dilman as a bakery to John Boos. Mr. Boos will move his meat market into the building as soon as possession is had. Mr. Dilman has not been able to secure quarters as yet and has not fully made up his mind what he will do.

LIKENS—HOSTETLER

On Saturday evening, March 1st, 1902, at the home of Sylvester Likens of this city, and in the presence of a large company of relatives and friends, occurred the marriage of Mr. John H. Likens and Miss Laura Hostetler, D. W. Steward, J. P. officiating. After extending congratulations to the happy couple the company retired to the dining room and partook of a bounteous repast which had been prepared for the occasion. The handsome young bride was appropriately and neatly arrayed in pure white while the groom wore the conventional black. This worthy young couple will make their future home in Butler.

MASON'S HOUSE ROBBED.

Warren Mason's residence was robbed of a small amount of money, about six dollars, one day last week. It is presumed that the trick was turned by a lady who was seen coming from the door a short time after the robbery was discovered. Mr. Mason noticed the woman, but as she was well dressed, presumed that she was a caller and did not pay any further attention to her, as he was busy around the lumber yard.

It since developed that Mrs. Mason was not at home, and circumstantial evidence would lead one to connect her with the disappearance of the money. No clue to the identity of the woman has been discovered.

FURNITURE STORE SOLD.

S. L. Hamlin has traded his furniture store, both stock and building, to John Hamilton for a farm. Mr. H. took possession Wednesday of last week, and as he is an enterprising citizen will no doubt succeed in his new venture. We wish him abundant success in his new business.

Mr. Hamlin will remain with him for a few weeks until his son get ready to assist his father in the store. Mr. Hamlin was an upright business man, and while we regret to lose him from the mercantile arena we wish him success in whatever he may engage.

NORTH BUTLER.

Everything seems to be in applepie order on the north side at present, except the roads and they can't be beat for mud and roughness.

Mon. Husselman left Butler on the 22nd of February for Cincinnati where he was negotiating for a dairy farm, and returned last Saturday without a purchase.

John H. Showalter, Uncle John as he is generally called, s confined under the weather, however he is not confined to bed but has got to stay indoors this kind of weather. He says it seems pretty hard to be housed up.

Our townsman, Gabe Strauss, will soon leave for Colorado Springs where he is offered a good position. Luck to Gabe is our wishes.

It is reported that John Moore, Sr., will soon return from Ft. Wayne. The writer is informed that he has a buyer for his blacksmith shop.

Abram Showalter, who has been visiting with his brother Peter in La Grange county, has returned to Butler for another short visit.

Dick Abrams has again started in the junk business. He is hauling in a great deal of junk and has stacks of it on hand. Dick is a good fellow and we hope he will attend to business in earnest.

The old Methodist church has been put in readiness for the ladder manufacturer to go to work. It has been a regular rendezvous for the kids since it has been vacated. The noise that is going on after school hours sometimes sounds like thunder.

SHAKE INTO YOUR SHOES.

DANGERS OF PNEUMONIA.

A cold at this time if neglected is liable to cause pneumonia which is so often fatal, and even when the patient has recovered the lungs are weakened making them peculiarly susceptible to the developement of consumption. Foley' Honey and Tar will stop the cough, heal and strengthen the lungs and prevent pneumonia. Sold by Geddes and Harding.

K. OF P. TO Build.

The K. of P. lodge of this city is seriously thinking of building a business block in Butler in the near future. We understand that a committee is now out and that two localities are in view. Our city needs more business rooms and no trouble would be experienced in securing suitable tenants. One of the locations in view is the J. N. Boyle and C. A. Newman lots on Broadway. The lodge seems to be divided on the question of location as well as whether it would be wise to buitd or to rent the proposed third story of the new bank building.

A PLEASANT SURPRISE.

On last Saturday evening the Royal Neighbors planed a surprise on Tillie Hostetler before her departure to Ft. Wayne to reside. About 8 o'clock in marched about 25 Royal Neighbors and their husbands and was greatly surprised themselves to find her not at home. This was soon explaned as their only daughter Laura having been married that evening to John Likens Jr. Mrs Hostetler was at the home of the grooms parents on West Railroad St, so they had nothing to do but to wait until her return home which was about half past nine. She was greatly surprised to see her house taken possession of (not burglers) but friends. Mrs. H. Clark in behalf of Purity Camp No. 2470 then presented Laura with a chin salad dish and Mrs. Hostetler with a water set showing their apretiation of her as a member of Purity Camp. In loosing Mrs. Hostetler from our city the Camp has lost one of its best members. But what is our loss is Ft. Waynes gain and hope she may find as good friends there as she had here. At a late hour all departed for their homes feeling that a very pleasent evening had been spent togeather.

A NEW LOCATION.

We understand that when the new bank building is erected, a room will be erected for the Geddes & Harding drug store that will be a beauty. It will have an entrance on two streets, and be constructed in a manner that will greatly facilitate the display of wall papers, etc.

Several parties have been working to get the location now occupied by the drug store, but we are not prepared to state who will get it, as Mr. Fosdick has not as yet closed a lease we understand. It is a most excellent room a fine location and will not want for a desirable tenant.

IN CHURCH CIRCLES.

Preaching at the Church of God next Sabbath morning and evening.

The meeting at the Church of Christ is starting off with splendid interest. Good audiences have greeted Evangelist A. P. Cobb and are well pleased with the sermons.

Sunday afternoon at 2:30 o'clock at the Christian church, there will be a meeting for men only, which will be addressed by evangelist A. P. Cobb. Boys under 14 will not be admitted.

Elder A. P. Cobb of Decater, Ill. commenced a series of revival meetings at the Church of Christ Tuesday evening of this week. He just closed a very successful revival at Waynsburg Pa., in which 94 joined church. After his meetings close in this city he will return to Waynsburg where he has acceptpd the regular charge of that church.

WILLIS DANNELS A CANDIDATE.

According to the following from the Courier it seems that Willis Dannels of this township is a candidate for treasurer.

Willis A. Dannels of Wilmington will be a candidate for treasurer before the democrat convention and believes himself entitled to this consideration of the party and the citizens of the county. It will be remembered that six years ago he received the nomination for commissioner, and he entered activaly on the canvass for the election. Then came the union with the populist party and was agreed to give them a part of the offices Dr. Dannels at the suggestion of the manager promptly stepped aside and gave the place to Mr. Gunsenhouser. This act added greatly to the party's success and this among other good reasons Mr. Dannels believes should entitle him to a favorable consideration. He asks the people to study the matter.

Since our last report the following marriage licenses have been issues: Henry Snyder and Sadie Moor, A. H. Kiger and Captorial Davis, Sherman Rinehold and Cora Miller, Harry Stout anc Addie Showers, C. W. Burke and Ada Mae Quinn, John Likens and Laura Hostetter.

The Finest Cake

Is made with Royal Baking Powder. Always light, sweet, pure & wholesome.

AN IMPORTANT SHIPMENT.

The Butler Co., shipped 11 rural mail wagons this week to be used in the rural districts of the city of St. Louis. This is quite an important shipment and speaks well for the company, as their wagon was selected in competition with many others and of course it carried off the prize. The company is having about all it can do in this line which is very gratifying to the people of Butler. The prosperity of this company is earnestly desired by every loyal citizen.

THE ROYAL TRAIN.

The tour through the United States of Prince Henry of Prussie is being made in a train containing examples of the highest art of the car builder. The two compartment sleeping cars "Iowa" and "Ohio" were picked out from the equipment of roads covering the entire country as being the most luxurious and comfortable cars now in operation. They are part of the new "Great Western Limited running every night beteen Chicago, St. Paul and Minneapolis vis Chicago Great Western Railway.

THEATRE TRAIN.

On Mar. 12 the Lake Shore & Michigan Southern Ry. will run a theatre train to Toledo, leaving Butler at 1:24 p. m. Fare 1.45 for the round trip. For attractions at different theatres see hand bills.

There is a strong sentiment for the nomination of John J. Oberlin of this city for county commissioner. We do not know Mr. Oberlin's views of the matter, but the fact does exist that he would be a vast help to the tax payers in that exacting office. He is a practical business man, and would run like a whirl wind. The democratic ticket would be s sengthened by his nomination.

The friends of Miss Myrtle Boots and Mr. Kines, principal of the Spencerville school, will no doubt be some what surprised to hear of their marriage which occurred about four months ago at the Lutheran parsonage.

STOCK PANIC.

A panic on Wall street, involving millions of dollars, is no more nerve-racking than the panic which seizes the man who realizes that he is hopelessly in the grasp of constipation, dyspepsia or any form of Stomach or Bowel trouble. Dr. Caldwell's Syrup Pepsin is the only guaranteed cure for these troubles. Sold by Geddes & Harding.

CHAS. REIGN SCOVILLE.

Chicago is to have the latest thing in church architecture—a five-story house of worship, with a roof garden and a gymnasium in connection. The auditorium of the church will be in the rear. The main entrance will be through a commodius arcade.

This unique structure will become the permanent home of the Metropolitan Church of Christ, which now holds Sunday morning services in the People's Theatre, formerly the People's Institute, at Leavitt and Van-Buren streets. It will be erected in immediate vicinity of the same corner. The pastor, Rev. Charles Reign Scoville, says that nearly all the money required to purchase the land and build the church has been raised.

Rev. Mr. Scoville said: "If roof-gardens are profitable for pleasure and entertainments why not for places where, during the hot weather, men and women can be gathered by the hundreds to enjoy the fresh breezes of heaven while they listen to the gospel in sermon and in song."

There is only one roof-garden church—the Church of Christ in Columbus, Ind. This has proved a great success during hot summer nights. Rev. Mr. Scoville explains that ice cream socials and musical entertainments will be given on the roof of his church. "I will rent the roof garden to political parties for campaign meetings," he said.—Chicago Record-Herald.

A SEVERE COLD FOR THREE MONTHS.

The following letter from A. J. Nusbaum, of Batesville, Ind., tells its own story. "I suffered for three months with a severe cold. A druggist prepared me some medicine, and a physician prescribed for me, yet I did not improve. I then tried Foley's Honey and Tar, and eight doses cured me." Refuse substitutes. Sold by Geddes & Harding.

HOW TO CURE THE GRIP.

Remain quietly at home and take Chamberlain's Cough Remedy as directed and a quick recovery is sure to follow. That Remedy counteracts any tendency of the grip to result in pneumonia which is really the only serious danger. Among the tens of thousands who have used it for the grip not one case has ever been reported that did not recover. For sale S. G. Stone.

THE LAWS OF SPIRITUAL SUCCESS.

BY A. P. COBB.

Success in anything does not come by chance, but by compliance with the laws of SUCCESS. It is therefore of the highest importance that we ascertain what are the conditions of a successful reend al. We believe that God's Word vestructs us as to these conditions. Hnwise who listens when God speaks, a learns when God is teacher. We belie the following are the chief Biblical conditions for success in winning souls:

I. We reap WHAT we have sown: Gal. 6:7-10. (Please read carefully each passage of scripture quoted.)

II. We reap AS we have sown. If we sow sparingly, we reap sparingly; if bountiful in sowing, we shall have a bountiful reaping. 2 Cor. 9:6.

III Our reaping will vary with the fertility of the soil we are cultivating. Read the Parable of the Sower. Matt 13:3-8.

IV After our best efforts have been put forth, we must look to God for His blessing without which we cannot succeed. How strikingly this is set forth in Paul's figure: "I have planted, Appollus watered, but GOD GAVE THE INCREASE" I Cor. 3:6.

V. When we have done our best, and believe that God is co-operating with us, let us have patience while we wait for results.

Remember, it was our Lord Himself who said (Mark 4:26 29.) "So is the Kingdom of God, as if a man should cast seed into the ground; and should sleep, and rise night and day and the seed should spring and grow up, he knoweth not how For the earth bringeth forth fruit of itself; first the blade, then the ear, after that the full corn in the ear."

He who works with God cannot fail, or be discouraged.

Admiral Schley is threatened by his enemies, and the cause is attributed to George E. Graham, the War Correspondent and his book—"Schley and Santiago."

This book contains an autograph letter of Schley's address to Graham, in which Admiral Sampson is by inference er tized for not having been present when the Spanish Fleet was distroyed. What a horde of pretty politicians are clamoring against Schley and for what reason?

It has been suggested that President Roosevelt is looking with great concern on the great and wonderful popularity Admiral Schley is creating in his trip around the country.

Is it possible Schley may prove a formidable presidential candidate?

Certainly, Roosevelt is too brave and sincere a man to assist Schley's enemies because of he having become a possible candidate.

Sampson's friends are afraid of the wonderful success this new book of Graham's is meeting with. Why?

Because this book with its 500 pages of eloquent facts and its fifty pages of actual photographs of thoroughly refutes all the charges made in the first court-martial and puts it entirely out of the question to start a second one, that the press antagonistic to Schley are turning heaven and earth to stop its sale and thus kill the wave of enthusiasm for Schley and his cause which is sweeping the country.

Mr. W. B. Conkey the well known Chicago publisher, is keeping his great million dollar plant at Hammond busy night and day and the mail orders that are coming in each letter containing one dollar and fifty cents for each copy of this wonderful book serve to keep a small army of clerks very, very busy.

Here is an anecdote taken at random from Graham's book:

The Brooklyn was alone—"On our starboard side were the four Spanish vessels each one of them plainly in view and each of them firing. If Schley had given the slightest indication at that moment that he was afraid of the result or if he had ordered the helm put over to take the Brooklyn out of the fight it is perfectly possible that panic would have seized us all. But as coolly as if he were saying he would join a pleasure cruise. Commodore Schley said to Cook all in the same breath, 'Well, we are going to stay with them,' and in the next instant, to Ellas. 'Get that range Ellis.' Ellis stepped out from the shadow of the turret and took the range. 1,200 yards, he sang out and turned to step back. The next moment his headless body dropped to the deck. A six pound shell had knocked the head off. Two men were about to throw the body overboard but in the mist of a rain of missiles, with every indication that the Brooklyn was to be sacrificed with almost everything depending up on this man in front of the conning tower, Schley said quickly. 'Don't throw that body overboard. Take it below and we'll give it a Christian burial."

Schley's enemies must be right. He must be a coward and not a Christian

POINTED PARAGRAPHS.

Love is one kind of praise and envy is another.

Your life isn't worth living unless you think it is.

Self inspection is said to be a sure cure for self-esteem.

Men with narrow views are apt to be broad in their conversation.

The average man deceives himself oftener than he does others.

A woman never feels comfortable unless her shoes are uncomfortable.

If a man says only what he thinks he is not likely to be a great talker.

Many a man grows wealthy by acting contrary to the advice of the majority.

A women would rather other women would talk disrespectfully about her than ignore her.

After a girl who married for money becomes a widow she is very likely to be married for her money.

That student who lingers around the foot of his class may eventually become a first-class chiropodist.

It is not wisdom to tell everything you know, but some people can't avoid it if if they tell anything at all.

An egotist is a man who insists on telling you the things about himself that you want to tell about yourself.

The candidate who places himself in the hands of his friends at the convention is likely to be left on their hands after the votes have been counted.

DANGER OF COLDS AND LA GRIPPE.

The greatest danger from colds and la grippe is their resulting in pneumonia. If reasonable care is given however, and Chamberlain's Cough Remedy taken all danger will be avoided. Among the tens of thousand who have used this remedy for these diseases, we have yet to learn of a single case having resulted in pneumonia which shows conclusively that it is a certain preventive of that dangerous malady. It will cure a cold or an attack of la grippe in less time then any other treatment. It is pleasant and safe to take At S. G. Stone.

The annual convention of the state Christian Endeavor union, to be held at Tomlinson hall, Indianapolis, June 26 to 29, promises to be one of the largest and best meetings ever held.

Auditor Siler came over from Auburn Friday and renewed acquaintances with his many Butler friends He is a good fellow and possesses the qualifications so necessary to the office he fills.

E. Stergeon of Statler's Run W. Va., sends us an annual renewal of his subscription for which we are very thankful. He says that he tips the scales at 210 pounds which would indicate that the south agrees with him.

Considerable interest was manifested in the republican caucus Saturday. Several of the faithful are not satisfied with some of the delegates chosen and a hot time is expected.

Rev. Shirley, pastor of the Presbyterian church at Columbia City, has been tendered and has accepted a call at Lagrange. He is a personal friend of the writer and we take pleasure in commending him to the people of Lagrange as a most excellent minister.

The editor who is afraid to speak out on public questions, lest some subscriber will stop his paper, will never secure a very large circulation or an extensive influence. The editor who expects to please everybody will wind up his career by pleasing nobody. The first lesson of independence for the newspaper man is to keep his paper as nearly right as possible without fear of the subscribers who stop his paper.

The business men in numerous towns have established what is known as public "rest room" to be used as shoppers coming to town to buy goods The plan is to rent a room equip it with seats, fire and a check room, presided over by young women to care for children during their mother's absence. They have proved drawing cards to the towns having them and are of necessity being established at many others. It would be a splendid idea for Butler to adopt.

Schley and Santiago

BY GEORGE EDWARD GRAHAM

The intrepid Associated Press was aboard the U. S. S. Brooklyn throughout the months of the campaign. The photographs taken by the Author during the fight.

The Most Sensational Book of the Day

The true story of the famous Cervera Squadron under Commodore Winfield Scott Schley, the blockade and destruction of Cervera's fleet, TOLD FOR THE FIRST TIME.

Contains an autograph endorsement of the account of the battle by Rear-Admiral Schley.

"The facts of the story of the movements and operations of the Flying Squadron the author tells them in this book."—W. R. Hearst.

An interesting narrative of facts. Explains so called "Retrograde Movement;" the "Loop Loop Problem," and settles conclusively every charge of the Court of Inquiry.

ROOSEVELT, when Governor said:—"Mr. Graham's story is the most brave heard or read of the Spanish war. It needed just the man to go about taking photographs of the work the guns."

THE NEW YORK HERALD says: "Graham, in the telling of facts, has left the reader free to make the deductions. The several naval officers need a Court of Inquiry to re-establish their reputations, if they can be re-established."

Has been before the public that has interested everybody. Admiral Schley has been treated, and the American people want *Schley and the Hero of Santiago.* This book is required and as the eyewitnesses saw it. Book of commissions. Outfit and books now ready. NEARLY ALL OF INDIANA'S SUCCESSFUL FARMERS

Business Men and Home Folks Read The Indianapolis Journal.

IT IS THE BEST ALWAYS

Because it is a splendid representative American morning newspaper, carefully edited, clean, bright and able, a wise counselor for old or young, patriotic and national from end to end.

Because it is accurate and fully reliable. Time spent reading the Journal is never wasted. The matter is so well arranged that you always know just where to find what you want. Then, too, you feel that you can believe what you read in the Journal without affidavit.

Because it gives, by actual comparison, more columns of news than any other Indiana paper. It is an 8 to 12-page paper every week day; 20 to 32 on Sunday.

Because it prints the most complete and accurate Market Reports.

Full Associated Press Markets, with special wires to New York, Chicago, Buffalo and Louisville.

Highest, lowest, opening and closing bids on Stocks and Bonds.

Representatives at Union and Interstate Stockyards here at home, with special articles daily.

Representative sales and Indianapolis Wagon Market.

Afternoon papers are printed too early to get full market reports. Make comparisons and see. The Journal reaches you early in the morning with fresh and reliable information with which to proceed to your day's business.

Because it prints an abstract of every Indiana Supreme and Appellate Court decision. Also all local court news and many important court decisions handed down in other States.

Because it has the best Washington correspondent in the field. He keeps you thoroughly informed on all National Affairs, and often has special signed letters.

Because it carries the full reports of the Associated Press, with cables all over the world.

Because it has a special correspondent in every Indiana town of size. All important happenings are promptly chronicled.

Because it has a special department of farm news.

Because it prints a better sporting page than any other Indiana paper.

Because it prints all those features dear to the heart of most women. It leads in foretelling changes of fashion, in society matters, cooking recipes and other subjects of interest to good housekeepers.

Because it prints every class of news that any other paper circulating in Indiana prints, and much more than most of them.

Because it does not use cartoons and illustrations merely as space fillers—good and poor indiscriminately—as do many papers. Good cartoons and illustrations are used moderately.

Because it does not print vile or offensive news or advertising matter. The majority of patent medicine advertisements, with their awful illustrations, are considered objectionable, and are not admitted.

Because it is Republican and conservative, and confines its politics to its editorial columns. The news columns give the truthful, impartial facts.

Because it costs only 10 cents a week (Sunday 5 cents extra), and puts before you fresh, clean news of the city, State and country up to the hour of going to press.

CANCEROUS ULCERS

Are in many respects like other ulcers or sores, and this resemblance often proves fatal. Valuable time is lost in fruitless efforts to heal the sore with washes and salves, because the germs of Cancer that are multiplying in the blood and the new Cancer cells which are constantly developing keep up the irritation and discharge, and at last sharp shooting pains announce the approach of the eating and sloughing stage, and a hideous, sickening cancerous sore begins its destructive work.

No ulcer or sore can exist without some predisposing internal cause that has poisoned the blood, and the open discharging ulcer, or the festering sore on the lip, cheek or other part of the body will continue to spread and eat deeper into the flesh unless the blood is purified and the Cancer germs or morbid matter eliminated from the circulation.

In February, 1899, I noticed a small lump on my lower lip. The doctor cauterized it but another came and broke out into an open sore. I began to take S. S. S. and after I had taken seven bottles the place healed entirely and no signs of the disease have been seen since. W. F. Brown, Hollands, S. C.

S. S. S. cleanses the blood of all decaying effete matter. It has great antidotal and purifying properties that soon destroy the germs and poisons and restore the blood to its natural condition. And when pure blood is carried to the ulcer or sore the healing process begins, the discharge ceases and the place heals over and new skin forms. S. S. S. is a strictly vegetable blood purifier containing no mercury or minerals of any description.

If you have an ulcer or chronic sore of any kind, write us about it, medical advice will cost you nothing. Books on Cancer and other diseases of the blood will be sent free. THE SWIFT SPECIFIC CO., Atlanta, Ga.

TO INDIFFERENT CHURCH MEMBERS.

What are you doing? Nothing? Would that it might be nothing rather than what you are doing You are neglecting the salvation of your own soul. We are taught that we must "work out our own salvation," but when one grows indifferent to his duties he is certainly loosing the opportunities offered him for spiritual culture. No one lives but that weilds an influence, and an influence which is not for Chr st is against Him. The world looks to you for an example in Christian living, but alas! is disappointed, and where it should find rich fruitage, discovers "nothing but leaves."

"Nothing but leaves; the Spirit grieves
O'er years of wasted life,
O'er sins indulged while conscience slept
O'er vows and promises unkept,
And reap for years of strife—
Nothing but leaves! nothing but leaves!
Nothing but leaves! No gathered sheaves
Of life's fair ripening grain;
We sow our seeds, lo! tares and weeds,
Words, idle words, for earnest deeds;
Then reap with toil and pain
Nothing but leaves! Nothing but leaves!
Nothing but leaves! sad memory weaves
No veil to hide the past;
And as we trace our weary way,
And count each lost and mis-spent day,
We sadly find at last—
Nothing but leaves! Nothing but leaves!
Ah! who shall thus the master meet,
And bring but withered leaves?
Ah! who shall at the Saviors feet,
Before the awful judgement seat,
Lay down for golden sheaves,
Nothing but leaves! Nothing but leaves!"

"Woe unto them who are at ease in Zion" was the warning to indifferent Israel. Then arouse yourself careless christian and fill your days with noble deeds, lest you come at last before the judgement seat of Christ with no rich sheaves and a soul unfit for the glorious association of the redeemed.

HOW TO CURE A COLD.

Don't go to bed. Don't stop work. Don't take a Turkish bath and render yourself liable to an attack of pneumonia. Krause's Cold Cure in convenient capsule form will cure you in 24 hours. TO CHRISTIANS.

Those whom Christ has blessed with precious opportunities should remember that much will be required of them. Christians, arm, arm for the conflict! Christ our captain will lead us to certain victory. Do not doubt nor fear for he will not suffer his followers to be vanquished. Buckle on the whole armor of God and go forth to fight in the noblest cause that ever claimed the attention of man. Let no task be thought to be too hard to undertake, nor no work too insignificant for the Lord's servants to do. Let every Sunday School teacher say, "My class for Christ." Let the Endeavors feel the responsibility which rests upon them, knowing that they have influence with their young friends, and that if they will sanctify this influence to the Lord's cause they may win their friends to Christ. Let parents look well to their children and remember that if they are out of Christ they are unsaved. Bring them to the house of God. Pray with and for them. "Awake, awake; put on thy strength, O Zion, put on thy beautiful garments, O Jerusalem, the holy city!"

INDIANA NEWS.

WARSAW—Mrs. Kate B. Saxton, an aunt of the wife of the late President William McKinley, and one of the early settlers of Kosciusko county, died Tuesday at the home of her daughter, Mrs. William Conrad, of this city. Mrs. Saxton was seventy-six years old, and had been an invalid for several years.

MUNCIE—Victor E Silverburg, proprietor of the Star and Andrews drug stores, and for five years a member of the Board of Metropolitan Police Commissioners, was attacked by a foot-pad early Monday morning and murderously assaulted. He was felled to the sidewalk at the corner of Main and Liberty streets, two squars from the court house with a blow behind his left year from a slugshot making a dangerous wound.

FORT WAYNE—At 3 o'clock Monday morning a watch dog at the Summit City Soap works office began to bark savagely. Neighbors telephoned Psesident Berghoff, of the company, and he notified the police. Upon arrival the combination of the safe was found on the floor and a large hole drilled in the door. A charge of nitroglycerine had been injected and a fuse attached. The safe blowers did not have time to ignite the fuse. They escaped.

ELWOOD—As the result of a quarrel over a game of pool the Klondike saloon, in the south part of the city, was partially wrecked Sat. evening. Harley, Orlando and Edward Smith, brothers, assaulted George Charlesworth, the proprietor, when he attempted to eject one of them from the place, striking him in the eye with a pool ball, and inflicting a serious wound. Windows and mirrors were broken, and the furniture wrecked. The Smiths fled but will be arrested.

WARSAW—The act passed by the last Legislature conferring the powers of a justice of the peace on the clerks of all incorporated towns was held unconstitutional in a decision handed down by judge Hiram S. Briggs in the Kosctusko Circuit Court Tuesday. The decision was made on the ground that, while under the Constrtution the General Assembly has the power to create new courts, it has the power to confer judibial powers on persons or on tribunals already established.

AN IRRISISTABLE ARGUMENT.

We propose to meet the prices of the catalogue houses and department stores. All we ask is that you deal with us on the same basis that you deal with catalogue houses, and give us the same amount of time to get the goods, which it would require to get them from the city houses. Plank your money down when you order the goods and we will meet each and every price they make, and furnish you the same goods at the same prices they offer you. We will go further. We don't ask you to take any goods where mistakes are made in ordering; we will shoulder the mistakes. If any of you have ever had anything come wrong you know what a nice little job it is to have it corrected, no matter how willing the firm is to do so, it takes correspondence, stamps and freight on the goods to get them exchanged, to say nothing of the loss of time. Some people prefer to buy away from home because it sounds big to be able to say they ordered from Chicago, etc. We know of one party who is actually paying more for goods bought away from Butler than he could buy them of his dealer here. This kind of people we can do nothing for, but the kind who are making the dollar go just as far as they can we can and will do something for. Give us a trial on the proposition we make. If you are one of those buying away from home, bring your catalogue with you, if we fail to furnish the goods without a reasonable excuse don't give us your confidence again. Try us once; we don't fear the result. We are residents of Butler; we are home merchants; we help pay taxes, we have to live and consume your products. Is our proposition wrong? The whole trouble about our people around Butler is the same with which so many communities are suffering, that old, slow-coach, credit. Some of it is slow we never get it. No merchant can sell goods cheap on that plan. The dollar invested in goods to-day and sold for cash to-morrow can be invested in more goods the following day, and the same process of sale may be repeat, but the dollar invested in goods to-day and sold on credit to-morrow is tied up, just so long as you don't get it back, and its earning capacity is stopped for the merchant until he gets it back again. Can you wonder why the catalogue houses have the advantage in prices over most of your home merchants? The catalogue house won't trust you, even demanding the money in advance, with no goods in sight.

Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urinates too often, if the urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of **Swamp-Root** is soon realized. It is sold by druggists, in fifty-cent and one dollar sizes. You may have a sample bottle by mail free, also pamphlet telling all about it, including many of the thousands of testimonial letters received from sufferers cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper.

FOR SCHLEY FOR PTESIDENT.

Speaking of the different members of the Democratic State committee who were in Indianapolis Saturday the Indianapolis News has the following in regard to the member of the committee from this district:

"One member of the democratic state committee came to town last night with a conviction as to whom the party should nominate for president in 1904. J. C. Fletcher, of Knox, chairman of the thirteenth district, declared for Admiral Schley and predicted his nomination by the democrats. "I think," said he, "that President Roosevelt in his treatment of the Schley case has settled the question of who will be our candidate for president in 1904. Schley will be the man and President Roosevelt will have the chagrin in 1904 of riding to the Capitol beside the man he has just condemned."

"Have you heard other party leaders in Indiana favor Schley for President?"

"No, I have never talked with anyone about the matter, so I don't know if there is any sentiment for president. What I have said is just my own opinion."

"Fletcher added that the democratic leaders were here today for the purpose of discussing the situation in Indiana and not to help make candidates for president."

It is possible that Mr. Fletcher's prediction may come true. The American people are slow to act but they have a sense of justice which generally rights all wrongs. That Admiral Schley has been grievously wronged by the combined influences of the administration is believed by a large majority of the American people and they may right the wrong by making him president of the United States.

WORTH $300,000,000.

The President of a certain big Oil Company is said to be worth $300,000,000. A tidy bit of money and no mistake. And yet he isn't happy. In an address to a Bible class he spoke of trials and troubles of the rich and the loads they have to carry. A young lady whispered to a friend that he might wear a Benson's Porous Plaster on his back or, better still, divide the money among the members of the class. I don't know why her idea about the plaster makes me want to laugh, but it does. All the same I have seen plenty of people laugh after putting Benson's Plasters on their backs or chests, or on any other spot where there was weight, heaviness, weakness or pain. It may be the sharp stabs of neuralgia, the aches and wrenches of rheumatism; it may be colds in muscles or bones; it may be those kidney or lumbago thrusts that make you yell as at a dog bite; or it may be a strain or cramp, *anything* that wants quieting and comforting. Dont bother with salves, liniments, lotions, etc., or with any of the stupid and useless old style plasters. Clap on a Benson's. It relieves *at once* and cures quickly. It stops the pain and makes you laugh for the very ease and good feeling of it. But watch out against imitations and substitutes. THE CHURCH OF CHRIST.
ITS FAITH AND PRACTICE.

Believing that every professed christian should use every means to disseminate the teachings of the bible, I gladly accept the invitation of the editor of this paper to present an article sett ing forth the faith and practice of the Church of Christ. Knowing however that mankind is not looking for the opinions of men, and that hearing and believing the Word of God leads to Salvation, I shall therefore endeavor to give "a reason of the hope that is in" (1 Rev. 3:15) us.

In common with all evangelical churches we teach the following doctrines:

1, The Fatherhood of God.
2, The divinity of Christ as God's Son and his atonement for the sins of mankind.
3, The Holy Spirit as the third person of the Godhead, and his work in the redemption of the human race.
4, The divine insbiration of the Holy Scriptures.
5, The lost condition of the race "and their dependence on the truth, mercy and grace of God, as manifested in Jesus, the Christ, and revealed and confirmed to us by the Holy Spirit in the gospel, for regeneration, sanctification, adoption, and life eternal."
6, The necessity of faith, repentance and obedience toward God in order to obtain salvation from sin in this world and eternal life in the world to come.
7, That baptism and the Lord's Supper are to continue through all ages as ordinances of the church.
8, The first day of the week as the Lord's day, commemorative of the resurrection of Christ, should be kept sacred by all christians.
9, The Church is a divine institution with a two fold mission—the edification of saints and the conversation of the world.

But as a distinct organization of believers we believe that the Church of Christ has a special mission, and hence it presents some peculiarities, thus differing with all other religious organizations. These are set forth as follows with the reasons for such beliefs:

1-That Christ "is the head of the church; and hence we repudiate all organization that would usurp the authority of Christ. His word must be law. All legislative councils of the Church which make laws for the government of the church contravene Christs authority, since he is "head over all things to the church." (Eph. 1:22.)

2, We accept the bible as our only rule of faith and practice, for "all scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness; that the man of God may be perfect, thoroughly furnished unto all good works." (2 Tim. 3:16-17.) Hence all human authoritative creeds are repudiated by us and the bible alone is our guide in all our activities.

3, While agreeing with all evangelical bodies as to the inspiration of the Scriptures we differ as to the equal binding authority of the Old Testament and New Testament. The Old Testament was for the jew, while the New Testament is for the present, or christion, dispensation. For confirmation of this view read carefully the following passages of scripture: (Rom. 7:1-8; 2 Cor. 3:6-11; Gal. 3:10-25; 4: 1-7, 21-31; Heb. 8:6-13; 6:1-4.) Jesus said "one jot or one title shall in no wise pass from the law till all be fulfilled" (Matt. 5:18), and when he gave his life on the cross and arose from the dead he had then fulfilled all prophsies concerning him and we conclude that all passed from the law, or that the Mosaic institution, with all its rites and ceremonies, was no longer to be recognized as of authority in the religion of the human race. We do not wish to be understood by this to mean that the Old Testament is of no value at present. As a matter of anthentic history we believe that great value attaches to it; besides, it is the key with which the New Testament is unlocked, for all bible students well know that many statements, illustrations of the New Testament, etc., would not be intelligable without the Old Testament. This is notably true of the Hebrew letter. Hence we lay much stress on Paul's injunction to Timothy: "Study to show thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth."(2 Tim. 2:15.) There are distinctons to be drawn, and one must study to know what the Lord intends to teach in a given scripture, otherwise the way of salvation is not plain as declared by the prophet.

4, We believe that the Lord's people should be one, and that denominationalism is wrong in the sight of God. Our reasons for this are as follows: (a) Jesus prayed that his disciples might be one (John 17:21-23) and on this oneness based the evidence to the world that he had been sent by the Father. In the first chapter of 1 Corinthians Paul condemns divisions, and declares that they all should "speak the same thing—that ye be perfectly joined together in the same mind and in the same judgment." (v. 10.) Again we are told (Acts 11:26) that the "disciples were called Christians first in Antioch" and whether this name was given in derision or not that is just what they were. Also Peter (1 Pet. 4:16.) says that "if any man suffer as a Christian let him not be ashamed; but let him glorify God on this behalf. Hence we repudiate all names except those found in the New Testament, prefering to honor our Savior even by our appellation and thus avoid the distinguishing titles which mar the beauty of Christs body and detract from his glory. To have the privalege of wearing his name should be considered the highest honor accorded to mortal man.

(b) Divisions came not by mutual agreement but by dissension hence are wrong.

(c) The divided state of Christendom limits the possibilities of the church since, instead of combating evil, church people are often found opposed to each other.

(d) There is also a waste of means. Instead of five church houses and five preachers to be supported in a given community, one or two would be sufficient to accommodate all the people, and the remainder of the means could be sent into destitute fields to do mission work.

5, We do not accede to the miraculous element in conversion as taught by some; for "the gospel of Christ is the power of God unto salvation" (Rom. 1:16.) and we must "hear with the ears and understand with the heart" in order to conversion. Jesus says (John 6:44-45) "No man can come to me except the Father which hath sent me draw him.—It is written in the prophets, and they shall be all taught of God. Every man therefore that hath heard and hath learned of the Father cometh unto me." He also says (Matt. 28.19-20) that his disciples must go into all the world and teach. But if man can be converted in a miraculous manner why let so many people perish just because christian people are so slow about sending the gospel to all nations.

In practice the distinguishing difference pertains principally to baptism and the Lord's supper.

1, we practice immersion only as baptism, repudiating affusion as being nothing more than a substitute. Our reasons for taking this position are:

(a) The meaning of the Greek word, baptism. All scholars agree that it means immerse. Let us hear the testimony. Martin Luther "On the Sacrament of Baptism" says, "The name baptism is Greek; in Latin, it can be rendered immersion, when we immerse anything in water, that it may be all covered with water. And although that custom has now grown out of use with most persons (nor do they wholly submerge children, but only pour on a little water), yet they ought to be entirely immersed and immediately drawn out; for this, the etymology of the name seems to demand." Calvin in his "Institutes of the Christian Religion," Book IV, chapter 15 says, "The word baptize itself signifies immerse; and it is certain that the rite of immersing was observed by the primative Church." Bremner says "For thirteen hundred years, was baptism generally and regularly an immersion of the whole person under the water; and only in extraordinary cases, a sprinkling or pouring with water. The latter was moreover disputed as a mode of baptism, nay even forbidden."

John Wesley says, "Buried with him by baptism—alluding to the ancient manner of baptism by immersion."

(b) The teaching of the New Testament indicates immersion. (1) Water. Acts 8.36. (2) Much wawater. John 3.23. (3) Going to the water. Acts. 8.38. (5) Coming up out of the water. Matt. 3.19 Acts 8.39. (9) Form of birth. John 3.5 (7) Form of burial. Col. 2.12. (8) Form of resurrection. Rom. 6.4. (9) Form of pladting. Rom. 6.5

2, We baptize none but penitent believers, hence exclude infant baptism since they cannot believe. Jesus says, "Go ye into all the world and preach the gospel to every creature. He that believeth and and is baptized shall be saved." (Mark 16.15-16.) Without belief there can be no christian baptism. See Acts 2.41; 4.4; 6.7; 8.12; etc.

3, We partake of the Lord's supper every Lord's day for we read that "the disciples met together on the first day of the week to break bread" and throughout the history of the Apostolic church as givin in Acts of the Apostles much was made of this ordinance. In fact it seems to have been the chief object for which they gathered. "The Lord's day without the Lord's table is like the rose without its perfume; like the setting without the gem."

We believe that the Lords death should be commemorated each week as well as his resurrection.

Eczema for Forty Years.

The Unqualified Statement of a Well Known Attorney, St. Ignace, Mich.

Some of the cures made by Dr. A. W. Chase's Ointment of stubborn and long continued eczema and skin diseases are causing much comment. People are beginning to realize that this Ointment is a wonder worker with all kinds of skin trouble. Attorney James J. Brown, St. Ignace, Michigan, writes as follows:

Dr. A. W. Chase Med. Co. Buffalo, N. Y.—Gents:—I cannot refrain from expressing my acknowledgement for the relief I have felt from Dr. Chase's Ointment. For 40 years I was afflicted with a skin disease which was located in one spot—on my leg. I have spent at a rough estimate five hundred dollars trying to effect a cure, and not until I applied this ointment did I get relief. You are strangers to me and this letter is prompted directly because I want to say and I feel as though I ought to say it. That Chase's ointment has effected a complete cure of my affliction. Three boxes did the work on my leg. I was also suffering from itching piles and applied the ointment which gave the best of satisfaction by affording me rest at night and rapidly causing the disease to disappear. I have received such relief and comfort from the ointment that I cannot withhold expressing my gratitude. I was so long afflicted with the tortures of eczema, I feel now that I am cured, a word of recommendation is due from me. Yours truly,

JAMES J. BROWN.

WHAT SHALL I DO TO BE SAVED?
THE BIBLE PLAN.

1.—Believe on the Lord Jesus Christ. Read Jno. 3:16; Acts 10:43, also 16:31.
2.—Repent—Turn away from sin. Luke 24:47; Acts 17:30. 3:19
3—Confess Christ before the world. Matt. 10:32; Acts 8:37; Rom. 10:9 10
4—Be baptized in the name of the Father, Son and Holy Spirit. Matt 28:18 20; Acts 2:38; Rom. 6:3-4.
5—Do all in sincerity, calling on the name of the Lord. Acts 22:16; Rome 10:13; Joel 2:32.
6—Lead a faithful, prayerful christian life. 2 Peter 1:5-11; 1 Thess. 5:16-23; Rev. 22:14.

Dear reader, the above scriptures clearly explain to you your duty. Remember, they set forth God's requirements, not man's. This matter should be taken earnestly therefore, and you should not rest until you have complied with every condition of salvation.

In becoming a Christian you have everything to gain, nothing to lose. Then why hesitate? "Today if you will hear His voice, harden not your heart."

Decide promptly, for your eternal destiny hinges upon what you do with Christ. Life is short and very uncertain. Death is on your track. Get ready for the Judgement! "Blessed are they who do His commandments."

Please study our Lord's requirements as set forth in the above references, and then ask your conscience if you have complied therewith. If lacking in anything, delay not to arise and obey that you may have peace from Above.

WHAT COUNTS?

What counts when day is over?
What counts for profit or loss?
The trinkets we hold?
The vesture of gold?

What counts when time's space is ended;
When clay neither struggles nor calls:
When the feet are stayed,
The record made
The hand lies still where it falls?

What counts? Time's onyx and sapphires,
It's emeralds and trophies of pearls,
It's breadth of domain,
The vigor to reign,
To command time's billows and swirl?

What counts? The things that must perish,
The mists we may catch in the hand,
Or the triumphs we gain
Over sin with its stain,
As we tread through the strange land?

—C. E. World.

ONE KIND OF STANDARD TIME.

If one would keep one's reverence for an authority, it is sometimes better not to pry into the facts too closely, as Prof. E. H. Johnson, of Crozer Theological Seminary, found in an instance which he tells as follows:—

Not long ago it was the custom in a pretty village on the south bank of the St. Lawerence to set all the clocks and watches by her majesty's gun which was fired at noon from a fort on the Canada side. Everybody knew just how many seconds to allow the sound for crossing the wide stream, and those good Americans were as happy in possessing the Queen's time as though it had been telegraphed to them from Greenwich.

I happened to be in the Canadian fort one day when the old sargent came out from the barracks to fire the noon gun. And lo! he had in his hand a little round American clock, one of those Ansonia products which could be bought for half a dollar or so.

"And do you fire the gun always by that clock?"

"Always," said the brave sergeant.

"And what do you set the clock by?"

"By the town clock," quoth he.

"And the town clock, what is that set by?"

That was as might happen; he didn't know. And so the American villagers, who reverently set their clocks on the pompous authority of a British cannon, were defering after all to the cheapest kind of time piece made in their own land of liberty. I dare say they do it still. Americans are reverent of loyalty.—Christian Endeavor World.

This brings to mind the fact that even in church matters we may defer to some creed, tradition or authoritive statement simply because it carries the weight of age or emanates from some high dignitary, when if we were to search for its foundation in truth it would be utterly false and unworthy a moments attention on the part of candid minded people. The weight of ages is sub-werting and the ring of authority exasperating unless emanating from God, whose word is truth and whose law is just.

A GREAT OPPORTUNITY.

Vick's Garden and Floral Guide for 1902, published by James Vick's Sons, comes to us full of everything relating to the garden and farm. It brings to our mind their display at the Pan-American Exposition—the gorgeous beds of Tulips and Hyacinths, the beds of Petunias, Geraniums, and various other plants, and the show of Asters and Dahlias in the Horticultural Building. Their great exhibit of over 1,200 heads of delicious Celery was considered by the manager of the expositiont to be the most attractive display in the vegatable department. The Guide is profusely illustrated with handsome half-tone cuts of all these and more. Any of our readers, by sending to James Vick's Sons Rochester, N. Y., can obtain the Guide free, merely stating what they most desire to grow.

A Baltimore paper in order to secure a "scoop" on the news of the arrival of Prince Henry was compelled to send its message from Nantucket by wireless telegraphy to Sinscousett, Mass., thence to Boston, to Buffalo and to New York City. As the wires were all down between New York and Baltimore the message was sent back to Buffalo, from there to Chicago, from Chicago to Birmingham, Ala., and up the coast to Baltimore.

A NEWS SERVICE WITHOUT PARALLEL.

There is ample justification for the claim made by the Chicago Record-Herald that its readers enjoy every day in the week, Sundays included, a news service that is without parallel in range and completeness. The reason is obvious—the combination of the varied and extensive facilities of the two great dailies, the Chicago Record and the Chicago Times-Herald. In addition to the independent news facilities of both papers, The Record-Herald receives the complete news service of the New York Herald and the Associated Press, and when it is considered that its news columns are supplemented by all the special features so popular in The Chicago Record and the Chicago Times-Herald, it will be seen that The Record-Herald holds a unique place among the great newspapers of the United States.

BRAIN FOOD NONSENSE

Another ridiculous food fad has been branded by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for brain another for muscles, and still another for bones. A correct diet will not only nourish a pecular part of the body, but it will sustain every other part. Yet however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. You must prepair for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. A few doses aids digestion, stimulates the liver to healthy action purifies the blood, and makes you feel buoyant and vigorous. You can get Dr. G. G. Green's reliable remedies at Geddes & Hardings. Get Green's Special Almanac.

PRACTICAL GARDENING.

Vick's Garden and Floral Guide for 1902, just received by us, is by far the handsomest and most valuable book ever issued by the old and well-known enterprising firm of James Vick's Sons. Doubtless many of our readers remember their grand display at the Pan-American Exposition at Buffalo, N. Y., and for which they were awarded many prizes, among them the gold medal for asters. These beautiful flowers are shown in all their lovely colorings on the covers of the Guide, while the 130 pages are profusely illustratrd with handsome half-tone cuts, true to nature, of everything for the garden and farm. Their many specialities are mentioned, such as Danish ballhead cabbage Rochester beet, lemon cucumbor, golden, self-blanching celery, crisp as ice lettuce, Irondequoit muskmellon, Vick's daisy and Gradus peas, Vick's scarlet globe radish and Earliana tomato.

Our readers can obtain the Guide free by writing to James Vick's Sons, Rochester, N. Y., mentioning the plants which most interest them.

THE MINISTER WE WANT.

"Dear Brother—Send us a young man who can convert our church members, revive our office bearers, save the sinners, enthuse our young people, increase our finances, popularize our Sunday night service, spiritualize our mid-week prayer meeting and draw men to our church; and let him add to the above grace of person, sweetness of disposition, gentleness of speech, social ability, political inactivity, pastorical care and a gentle gracious helpmate, without children, who will assist but not run the church or the pastor. Let us hear when you find him and we will give him a call promising him in the Lord six hundred dollars per annum, without a manse, and as much strife for what he does and indifference to what he asks as will bring him gray hairs and careworn features, and within three years at the most send him from us a prematurely old man with a broken hearted wife.—The Session."

After mature thought and calm judgment this letter was written and is respectively dedicated by the author to the average church congregation of all denominations, with the hope that in its perusal the reason may be found for the great decline in the number of candidates for the ministry.

WHAT WE PLEAD FOR.

The Christianity of the New Testament, taught by Christ and His Apostles versus the theology of the creeds taught by falliable men—the world's great need.

The divine confession of faith on which Christ built His church, versus human confessions of faith on which men have split the church.

The unity of Christs disciples, for which He so fervently prayed, versus the divisions in Christ's body, which His apostles strongly condemned.

The abandonment of sectarian names and practices, based on human authority, for the common family name and the common faith based on divine authority, versus the abandonment of scriptural names and usages for partisan ends.

The hearty co-operation of Christians in efforts of world-wide beneficence and evangelization, versus petty jealousies and strifes in the struggle for denominational pre-eminence.

The fidelity to truth which secures the approval of God, versus conformity to custom to gain the favor of men.

The protection of the home and the destruction of the saloon versus the protection of the saloon and the destruction of the home.

For the right against the wrong;
For the weak against the strong;
For the poor who've waited long
For the brighter age to be.
For the truth, 'gainst superstition,
For the faith, against tradition;
For the hope, whose glad fruition
Our waiting eyes shall see.

—J. H. Garrison.

ARE YOU A CHRISTIAN.

If not you are unsaved. No matter who you are or what your moral attainments may be. No matter how much wealth you may possess or how much power you may weild, this is of no avail unless it be consecrated to the Lord. You say you believe in Christ? The devils believe and tremble, yet no one would think for a moment that they were saved. Christ says "he that loveth me will keep my words." Have you done all he has told you to do, if not you cannot claim to be his desciple. Too many hypocrites in the church? Yes there are but there are a great many more out in the world since more than half of the human race is outside of the church. A man who is a professed christian and does not live up to his profession is no more a hypocrit than you are when you try to make the world believe that you are really better than you are. Besides the only hope I know of to avoid living with hypocrites now and eternally is to be a christian in this world, and thus be free from their company in eternity. Why not become a christian today? Tomorrow may be too late. Thousands are passing from the world daily and you may join that great throng before another day has passed. You say you know it is right to be a christian; then why not act at once since delay is dangerous, and above all leads you to waste precious time which does not belong to you only for your own soul culture and in seeking to save others.

The church requires too much you say? Be a man, be a woman, in the truest sense. Don't shirk the responsibility resting upon you by the very fact of your existance in the world. Accept whatever may come to you in the spirit of heroism. Do your duty. Leave the stamp of a righteous character on the world, "They that be wise shall shine as the brightness of the firmament; and they that turn many to righteousness, as the stars for ever and ever."

God's love gives in such a way that it flows from a Father's heart, the well-spring of all good. The heart of the giver makes the gift dear and precious; as among ourselves we say of even a trifling gift. "It comes from a hand we love," and not so much at the gift as at the heart.—Luther.

In the matter of the petition and report of Albert Cherry "et al" ditch number 748 in Wilmington township.

To whom it may concern;

Notice is hereby given that a petition has been filen with the Auditor of DeKalb county, state of Indiana, and viewers have been appointed who have viewed and reported said view which is on file in my office. The hearing of said petition and report upon its merits will be on Tuesday, the 8th day of April 1902, the same being the 2nd day of the April term, 1902, of commissioners court of said county.

The prayer of said petition is that a ditch be constructed on the following route to-wit:

Beginning one hundred and eighty (180) feet north of the south west corner of the north west quarter of section four (4) township thirty-four (34) north, Range, fourteen (14) east, DeKalb county, Indiana.

And ending in the W. A Dannell's ditch number 662, said ending being two hundred and seventy-six (276) feet south of the center of section four (4) Wilmington township, DeKalb county Indiana.

This proposed work will affect the lands of the following persons:

Leverert A. Higley, John M. Lowe, Albert C. Cherry, Geo. N. Smurr, Martin Smurr, Eugene Hubbard' Solomon Sattison and Wilmington township.

FRANK P. SEILER, Auditor DeKalb County.
COMMODORE P. HARMAN, Indiana. Surveyor DeKalb County.

Zoa Phora Cures Leucorrhea.

New Discovery that Quickly, Positively Cures Falling of the Womb, Painful Menstruation, Laceration, Kidney and Liver Trouble and Change of Life.

The Only Known Remedy That Will Carry the Little Miss Safely and Painlessly Through to Womanhood. Large Trial Bottle Free.

IDA E. JOHNSON, Otsego, Mich.

The experience of the women who have used Zoa Phora is no less interesting than remarkable. It tells of pain and suffering from carelessness and neglect, folly or indiscretions. It tells of turning to the one true "woman's friend" when all doctors and all other remedies have utterly failed to even bring relief from pain, much less cure the disease. It is good for the young girl just budding into womanhood. It is a staunch supporter of the woman approaching the frightful hours of labor pain. It never fails to bring relief from womb troubles of any nature, Suppressed Menses, Change of Life, Flooding, Laceration or Leucorrhea, Kidney, Liver or Bladder Troubles, corrects displacements and builds up the system. In the hundreds of cases where it has been used as a last resort it has never failed and the grateful women rise up from their beds of pain and call it blessed. Here is a letter from a young woman that well illustrates what a place the remedy has in the hearts of women who know it.

Otsego, Mich., Dec. 10, 1900.—Zoa Phora Co., Kalamazoo, Mich. Gentlemen: "For almost two years I had leucorrhea, or whites, and remembering that Zoa Phora saved my life about 12 years ago, I bought a bottle nearly six weeks ago, and now have my second bottle and find I am free from pain and the discharge is entirely cured. You can publish this for the benefit of other sufferers. I remain, as ever, a friend to Zoa Phora.—Ida E. Johnson, P. O. Box 229."

Zoa Phora goes direct to the seat of the trouble. Corrects the disorder, stopping unnatural and disagreeable discharges, creates a healthy action of all the organs, brings about regular and painless menstruation and stimulates and invigorates the entire system. It is equally effective with the pale, weakly woman or the confirmed invalid. It sells for a dollar a bottle at any drug store and will save many times its cost in pain and doctor's bills. If you do not find it on sale at your nearest drug store it will be sent direct, prepaid, on receipt of one dollar.

We will be glad to send you a large trial bottle free upon receipt of 10c to cover postage and packing. Address Zoa Phora Co., Kalamazoo, Mich.

THE OFFICIAL CALL.

Indianapolis, March 3, 1902.

To the Democracy of Indiana:

The democracy of Indiana will assemble in state convention at Tomlinson hall, in the city of Indianapolis, at 10 o'clock a. m., on Wednesday, June 4, 1902, for the purpose of nominating candidates for state offices, the adoption of a platform, and such other business as may properly come before the convention.

The basis of representation to said convention as fixed by the democratic state central committee, is one delegate for each 200, and one delegate for each fraction over 100, of the vote cast for Judge Allen Zollars for presidential elector in 1900.

Under the apportionment the convention will consist of 1,547 delegates, divided among the counties as hereafter stated.

The offices for which nominations will be made are as follows:

Secretary of state, auditor of state, treasurer of state, attorney-general, clerk of the supreme court, superintendent of public instruction, state geologist, state statistician, one judge of the supreme court for Fifth district, six judges for the appellate court.

William H. O'Brien, Chairman.
Joe Reiley, Secretary.

HORSE NOTES.

Most horses are disposed to do as they are desired to.

Rough usage and neglect will not improve the horse or make him hardy. Most horses yield nicely to kind treatment.

Perfect good temper in the handler of colts and horses usually produces good tempers in the animals.

Statements made in selling horses by owners or agents are just as binding from a legal standdoint as if made in any other line of business. Some horse dealers, however, do not act as if they thought so.

Neglect the foal in care for one or two years and he is permanently injured.

Why blame a country horse for running away at sight of a trolley car or an automobile, or a city horse bolting when he meets a cow in the road? Might just as well think of preventing the small boy from crawling under the canvas at the circus.

"Just wait a while," said the youth as he slipped on another record, "and I'll explain it to you,"

"Oh, I understand it all right," responded Reuben. Understand it all except one thing."

"Whats that said the youth.

Well, answered Reuben, with an asbashed grin, "I understand how these sleight-o-hand fellows pull big rabbits and pigeons out o' little hats, but I'll be danged if I understand how you get a full brass band in that box."

THIS CLIMATE IS GOOD

enough for anybody with weak lungs. The patient needs I. He can get well here with the help of Allen's Lung Balsam, taken frequently when coughing and shortness of breath after exercise serve notice upon him that serious pulmonary trouble is not far away. Allen's Lung Balsam is free from any form of opium.

The other fellow is the one who always has the real snap. The farmer sees the merchant take in more money in a week then all his farm products in a year will sell for and that keeping store is a bonanza. He forgets that the merchant's expenses that week may be larger than all his cash outlay for two years. He does not realize that it requires a rare combination of business abilities to make a successful merchant. The merchant envies the farmer his independence and longs for his freedom while he probably knows nothing of the thousand and one little things the farmer has to do to keep the farm in shape, a work which is exacting and trying to anyone not in love with the farm. If a man is succeeding at his occupation the chances are a thousand to one that he will not better himself by changing for what looks so prosperous under the other man's management.

Help... Nature

Babies and children need proper food, not forcing medicine. If they do not thrive on their food something is wrong. They need a little help to get their digestive machinery working properly.

SCOTT'S EMULSION OF COD LIVER OIL WITH HYPOPHOSPHITES OF LIME & SODA

will generally correct this difficulty.

If you will put from one-fourth to half a teaspoonful in baby's bottle three or four times a day you will soon see a marked improvement. For larger children, from half to a teaspoonful, according to age, dissolved in their milk, if you so desire, will very soon show its great nourishing power. If the mother's milk does not nourish the baby, she needs the emulsion. It will show an effect at once both upon mother and child.

LA GRIPPE QUICKLY CURED.

In the winter of 1898 and 1899 I was taken down with a severe attak of la grippe says F. L. Hewett, a prominent druggist of Winfield, Ill. The only medicine I used was two bottles of Chamberlain's Cough Remedy. It broke my cold and stopped the coughing like magic and I have never since been troubled with la grippe Chamberlain's Cough Remedy can always be depended upon to break up a cold and ward off any threatened attack of pneumonia. It is pleasant to take too, which makes it the most desirable and one of the most popular preparations in use for these ailments. For Sale by L. G. Stone.

PREPARATION.

The Church of Christ will begin a series of meetings in the near future with the hope of strengthening the faithful, confirming the weak and converting sinners to Christ. In this connection a few observations may be helpful in making the meeting a success.

First of all I want to call attention to the man who is to assist in the meeting. Mr. A P. Cobb, of Decatur, Ill., will do the preaching. He comes to us with a splendid record, having held meetings in prominent places as in New York, Boston, Mass., Lexington, Ky., Washington, D. C., Cincinnati, O., and Des Moines, Iowa. During a six years pastorate at Springfield, Ill., he took six hundred members into the fellowship of the church, holding his own meetings during this time. In a meeting at Kendallville during January of this year in which Mr. Cobb did the preaching, there were 53 additions. The church appreciated his services so heartily as to engage him for a meeting next winter. He is scholarly, genial, and with all combines a warm-hearted christian spirit. A cordial invitation is extended to everybody to come and hear him.

But the highest attainment as an evangelist will not insure success in a revival meeting. The evangelist must have the most hearty support of the pastor and people with whom he labors. As for the former, I will insure that such support will be accorded, and hope and believe that the people will do all they can for success. Let every member be on the alert for opportunities to do good, and be willing to be used as instruments in God's hand to save those about us.

A chorus choir of about twenty voices is being trained. It is intended to make the music a leading feature of the meeting. We do not intend for the choir to do all the singing, but that they shall take the lead in the songs. All are invited to join in the song services and bring gladness and good cheer to all hearts, and drive away the dull cares which settle down over our hearts at times like a nightmare. Open the windows of the soul and let God's sunlight of joy and happiness dispell all fears. "O, let the nations be glad, and sing for joy."

Let all come to the services with reverent hearts banishing all worldly matters from the mind, and seek to learn the way of the Lord, remembering that it is the truth of God that makes us free from ignorance, doubts and sins, and that it is this truth which will be preached. Come prepared for a rich feast each night, desiring also that souls may be blessed by entering into the fold of Christ.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

AFTER THE GRIP COMES CATARRH.

LIKE A TERRIBLE CYCLONE grip bacillus has passed over our country, from the Atlantic to the Pacific, leaving behind it a dark cloud of anguish and despair.

Catarrh follows grip as effect follows cause.

A multitude of catarrh victims will spring up in the trail of the awful epidemic of grip that has just passed over our fair country.

The hope to these people is Peruna.

Most people know this already.

Everyone who has had the least touch of grip, should not fail to take a course of treatment with Peruna.

Peruna eradicates every vestige of the disease and leaves the system in a normal condition.

Hon. Joseph B. Crowley, Congressman from Illinois, writes from the National Hotel, Washington, D. C., as follows:

"After giving Peruna a fair trial I can cheerfully recommend your remedy to anyone suffering with coughs, colds, la grippe and all catarrhal complaints."—J. B. Crowley.

Hon. George H. White, Congressman from North Carolina, writes:

"I am more than satisfied with Peruna, and find it to be an excellent remedy for the grip and catarrh. I have used it in my family, and they all join me in recommending it as an excellent remedy."—George H. White.

Hon. J. P. Megrew, Superintendent U. S. Capital Police Force, of Washington, D. C., says:

"Having suffered from the grip, I was advised by a friend to use your Peruna. I also used it for my catarrh, and I can now cheerfully recommend your remedy to anyone who is suffering from the grip and catarrh."—J. P. Megrew.

Miss Anna Russell, Past Worthy Counselor, Loyd Mystic Legion, 293 Endicott Building, St. Paul, Minn., writes:

"For years I have unfortunately found my system in a peculiarly receptive condition for catarrh when I was exposed in any way to inclement weather. At those times I would be severely afflicted with la grippe and its unpleasant consequences.

"Now for the past year and a half I have used Peruna in such cases and have found that it not only cures me quickly, but it also cleanses my blood and renders me less liable to catch cold. It is the finest preventative of colds that I know of and a very superior tonic."—Anna Russell.

Miss Emily Milburne, President of the Westside Young Woman's Club, No. 152 West Congress street, Chicago, Ill., writes of several members of the club of which she is president, who have had the Grip and have been quickly restored to health by Peruna.

Mr. Nicolas F. Rossiter, of 463 Norwood avenue, Cleveland, O., had a severe attack of the Grip, was very sick and under the physician's care. He, like many others, passed the acute stage but did not receive strength. Peruna not only quickly restored him to his former health, but to much better health than he has had for years. He gives Peruna all the praise.

Hon. Max J. Porges, Alderman of the Eighth District, residing at 36 Rivington street, New York, suffered with the Grip. two bottles of Peruna cured him. He also writes that he knows a large number of people who have been cured of the Grip by Peruna.

Hon. Charles W. Culkin, Alderman of the Seventh Assembly District of the Borough of Manhattan, residing at 45 Eighth avenue, New York, writes that he was laid up several days with the Grip. On the fifth day he was advised to try Peruna. He did so and found himself better within twenty-four hours. This remedy soon restored him to his usual vigorous health.

Mr. Martin Edwards, President of the County Clare Men's Benefit Society, 522 West Forty-Ninth street, New York, writes that he was cured of the Grip by a short course of treatment with Peruna.

Miss Blanche Dumont, President of the Athenia Club, 4110 Aldrich avenue North, Camden Place, Minneapolis, Minn., says she was cured of the Grip. Nothing helped her until she tried Peruna. Felt better next day after beginning its use. Was able to be out of bed the third day. She also tells of others who were cured by Peruna.

La Grippe is epidemic catarrh. Peruna cures catarrh, hence Peruna is a specific for la grippe.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Many of our citizens attended the sale of horses by the Smith Bros. at Edgerton Tuesday. The horses averaged well and many of them sold very reasonable.

The mail carriers from Edgerton goes over the route every day. Monday he gathered about 70 letters. The route is about 26 miles long.

An item in the Herald of last week under the heading of "North Butler" was partly erroneous. It stated that the bridges south of Gypsy hill was condemmed and removed last July This is a mistake. It was broken down by some teamsters after it had been examined by the Supervisor and the County Commissioners who reported it good for another year. The delay in building a bridge is partly caused by the tedious legal way of getting a bridge and partly by one bridge company failing to furnish a bridge according to contract.

Glenn Beechler writes home from Ann Arbor that he has passed all of his mid-winter examinations without a failure.

Announcements of the spring opening of F. L. Farnsworth will be made next week. Watch for big bargains on spring goods.

J. M. Lingenfelter and wife have come back to Butler and are now occupying rooms in Mrs. Boyer's dwelling on West North street. Mr. Lingenfelter is, we regret to say suffering severely with asthma, and is unable to do any work. In fact he is compelled to remain in doors most of the time.

Mrs. J. J. Skinner and little daughter, of Peru, were in the city last week the guests of Mrs. D. H. Knisely. Mrs. Skinner was on her way home from Washington, where she represented Peru chapter in the Daughters of the American Revolution. Mrs. Skinner is also a Colonial Dame.

John E. Danes, general foreman of the bridge department of the Wabash, was struck over the stomach by a falling timber and hurled into the creek. He was brought to Butler and Dr. Frank Fanning was called. He was taken to the hospital at Peru on a special train, Dr. Fanning going with him part way. He had partially recovered from the shock at last reports and was resting much easier.

PRINCE HENRYS VISIT.

Prince Henry of Prussia in ninteen two,
Came to the land of the red, white and blue.
At New York where he landed to his surprise—
Beheld buildings that made him open his eyes.
Then he preeeded to our capital city,
He thought the White House was then very pretty.
Then to the Navy Yard he went by train,
Where he was greeted by a drenching rain.
He reached the Milwaukee on March the third,
Mid cheers that he never before had heard.
Chicago a visite next he payed;
The people there greeted him with a parade.
Then back to New York he went by train,
To start for his home across the main.
To home he went, an account he gave
Of the home of the free and the land of the brave.

E. P. MASTERS SURPRISED.

On Tuesday evening, March 11, as the members of Forest Chapter, No. 44, O. E. S., were gathering at their hall for their regular meeting, it was noticed that eight of the sisters carried suspicious looking bundles which were quickly made to disappear on their arrival. Those same bundles proved to show the good will of the sister Stars, who had planed a surprise on their Worthy Patron, Brother E. P. Masters. In those bundles were delicious cake, doughnuts, flaky biscuit, nice ham and delicious hot coffee. After partaking of all these good things, Sister Sarah Hazlett, in a neat little sbeech, which she knows so well how to deliver, presented Brother Masters with a masonic button as a slight token of their esteem.

At a late hour all departed for their homes, feeling that they had spent a very pleasant evening together.

120 ACRE FARM.

Near Butler, good buildings.

102 acres, fine, near Butler. 100 acre farm, good soil and well tiled, cheap. 60 acre farm near Butler, good soil. 50 acre farm for much less than it is worth. Two 40 acre farms. 70 acre farm in Williams Co. Ohio said to be good land; buildings not very valuable but it is certainly a great bargain at $1600. 69 acre farm not far from Butler, very fine and at a low figure. We have several 80 acre farms; and we have houses and lots and business property in Butler to suit everybody. If you want anything in the line of real estate, see Webster & Wartenbee.

NOT ANY FOR US.

We Would Hesitate to Buy Goods With Our Eyes Shut.

The following letter is self explanatory, and we publish it to show the methods employed by the mail order houses:

O. H. Downey, Butler, Ind.

Dear Sir:—We have been informed that you contemplate the erection of a residence and want to call your attention to the fact that we sell hardware and building material of all kinds with the exception of lumber. We can furnish you metal roofing, nails, doors, windows, paints, plumbing material, porch trimmings, mouldings, grills. steel ceilings and in short all the material that goes into the construction of a modern and up-to-date house.

If you have already arranged for the building material, we would like to have you look over our prices on house furnishings. We have everything that is needed in this line from the parlor to the kitchen, and the attic to the basement: furniture, carpets, curtains, shades, chandeliers, wall paper, stoves, ranges, etc., all of which are offered at about the regular wholesale prices.

Our entire line of goods is listed in our General Catalogue and Buyers Guide, a book of 1000 pages, which illustrates and quotes prices on the articles named above, as well as every thing else that one ever needs. We started nearly thirty years ago to sell directly to the consumer and save them the enormous profits of the middleman, always paid by those who use the goods.

We make no charge for this catalogue and only ask people who are interested in our way of doing business to send 15c to partly pay the postage. We have made a study of handling orders by mail, shipping goods promptly, and guaranteeing their safe arrival at destination. We ship goods to all parts of the world. If you are not already one of our numerous customers we hope you will decide to give us a trial.

Are you paying too much for the goods you buy? Send 15c to-day for our catalogue which quotes correct prices on all lines of merchandise.

Yours truly,
MONTGOMERY WARD & CO.

It's fake, we are not ready to build for some time yet, until delinquent subscribers show a different disposition than manifested at present. If we were contemplating the erection of a residence, etc., we would not let loose of our coin until we inspected the goods. We are from Missouri.

In the second place we would buy of home dealers, and quality of goods considered, would do fully as well as from the mail order house. Not any for us dear Montgomery, all the profits you realize from this source would make the smallest building in the world. We are loyal to home every time.

TO THE PEOPLE OF BUTLER AND VICINITY—GREETING.

With great pleasure we are now prepared to say to the many people who have accorded us their patronage and have submitted to the constant hammar and saw and muss dirt and dust of the past six months business, that we have at last finished our store rooms and are now prepared for the first time in our town of Butler to keep store in a modern painstaking manner and compete with any up-to-date store in the country.

If you are an out of town buyer, either from catalogue or otherwise, why not drop it and see what you can do at home. Patronize the people that patronize your town and help support its institutions. Bring us your catalogue, we have never saw a price in any of them yet that we could not and would not willingly meet. If you want something special or exclusive don't hesitate to ask us to serve you, no matter how large or small or unimportant we will do it with pleasure and even without profit rather than have you buy out of town.

It is our purpose that our store shall be one of credit to Butler and worthy of the confidence and patronage of the people. It is the peoples store, fitted up for their accommodation, provided with ladies toilet room, a ladies sitting room and arranged altogether looking to the general comfort and convenience of the people in every particular and to make trading a pleasure. We wish to take this opportunity to thank the people here very kindly for their courtesy and good will and trust that we shall merit their continued confidence and patronage. Very Respt.,

F. L. FARNSWORTH.

SHALL WE INCOPERATE.

The question as to whether Butler should incoporate as a city is again being agitated and a paper is being circulated and liberally signed, asking the Honorable town board to call a special meeting for the purpose of again voting on the question.

That is the proper plan to adopt and if a majority declare for a city charter then we should have it, regardless of the views of other men. The ballot box will tell the story. Both plans have their advantages and a city would be more preferable to the present method a great many oppose it on the grounds of increasing corporotion expenses. The Herald does not care to take sides on the question, and will open its columns to either side for public discussion.

If a city is declared for it cannot become effective at once, as it would interfere with men already elected and who are entiled to serve out there term. If you want a city, vote for it; if you don't want it vote against it. One thing is certain that the majority rules.

Mrs. Elden has gone east this week to visit the different wholesale millinery houses.

THE PUBLIC SCHOOLS.

It is with pleasure that we resume this week our special reports from the different departments of our public schools. We submit below the names of the pupils and a pedagogical article from the fifth grade; Mrs. Eva Kenestrick has charge of the work of this department and by her devotion to social questions and to all that pertains to the best interests of society and her pupils she is able to impart many helpful lessons to those under her care. This departmen has the special honor of being the only room that has a perfect grade in tardiness for the month just ended.

A. Section.

Frank Abrams, Roscoe Blair, Arthur Brunkhart, Valma Brown, Harry Wilson, John Blaker, George Headly, Coy Pifer, Floyd Smith, Eunice Bothwell, Hazel Blair, Georgie Cummings, Maole Harn, Bessie Jewel, Mabel Kenestrick, Mary Myers, Ruth Packer, Marie Stewry, Erma Voigt, Elsie Wiler, Laura Slessman.

B. Section.

John Clark, Arlington Frech, Tom George, Willie Wreenwood, Frank Hall, Harry Hatch, Arden Imhoff, Glen Kinney, Roscoe Livergood, Guy Moore, Bust Oren, Ollie Rosenbauer, Lynn Shoub, Lester Shoub, Elton Van Dusen, Clyde Zimmerman, Myrtle Boyle, Ethel Baker, Mildred Chandler, Dessie Deck, Fern Fridenberger, Bertha Olds, Jeanette Scott, Rose Stell, Ethel Tess, Dessa Veley.

The average age of pupils in this grade is ten years.

This has been designated as the "storm and stress" period of childhood, and one of the most difficult with which to deal. It is an era in which the laws imposed by others seem to have served their purpose. Heretofore they have been followed blindly, but at this period they are scrutinized, questioned, and rejected or accepted according as the individual may see fit, for he is now following the law of his own individual nature. This development of individuality leads to a bold, fearless spirit. The child vigorously manifests his likes and dislikes, and shows a contempt for weakness of any sort. It is not unusual for a boy at this age to boastful, before his companions. He is ever the victor. He invariably, in his own estimation, comes out best with his teacher or antagonist

Because of the desire to set aside every law, it is the aim to develop right ideas, and to train the child to do right, because it is right, not because they may or may not like the teacher, or the teacher like them, but rather to teach the child, that all through life, the highest approbation comes from a consciousness of having done that which he knows to be just. We are adverse to the plan of holding before children the thought, that if they do thus, and so we will not love them.

That the children may more clearly comprehend, and develop a love, instead of an aversion, for law, we have been studying the why, and how, laws are formed.

They are led to see that laws are a protection to those who do right, as well as to punish those who do wrong, and that our school is a community where the rights of all must be respected, and that this may be so, some restraint must be put on our actions. The ideal character imbodied in literature for this grade is "Siegfried," whose adventurious, fearless spirit is shown in his killing the dragon, and the rescue of Brunhill; his desire for what is noble, is shown by the story of "The Curse of Gold" also by his purpose to right the wrong and to punish the evil.

In a child of this period his desire to do good is closely entertwined with his spirit of adventures.

The history work for this term is well adapted to cultivate and centralize the thought and action of the child. "The Story of Roland" is read and it is well suited to arouse chivalrous impulses, and enable the child to see that true Knighthood is true manhood, and that it consists of service, reverence respect for woman, truth, and purity of heart and life.

The geography work of this grade begins with the study of Europe. Special attention is paid to map drawing as it is a great aid in vividly picturing the shape and position of countries and continent, as well as the location of cities, mountains and rivers in the mind of the children.

The children are allowed rulers, as accuracy is required in drawing lines and fixing main points of outline.

The outline is put in by eye measurement, Divisions of countries, rivers, mountains, cities and principal seaport, are then accurately located, when possible from memory, if this can not be done, the text book is refered to, that the pupils may form a true mental picture.

The Imperial Dramatic Co. played at Scott's Opera House all last week. They are a good strong company composed of seven people who not only exhibited talent upon the stage but were real ladies and gentleman of the best class. Heretofore we have been rather slow to say anything favorable of an opera company until we have seen something of their merit. In this company has been found young men and ladies who are far above the average characters in moral sentiment as well as acting. They were pleasant people to do business with and they gave our people a good show every night and all who attended speak in praise of their entertainment Unfortunalely their principal humorist was very sick and could not take part in the several exercises. But the company acquitted themselves nobly and are deserving of commendation for their excellence of character. We hope they will have occasion to come a sin in the future.—Wauseoe, O. Tribune, March 7, 1902.

Mrs. Chambers will have her easter opening March 21 and 22 one week.

CLARANCE L. BURGDERFER COMING.

Clarence L. Burgderfer, the noted impersonator, humorist and mimic will give one of his superb entertainments in Butler, Wednesday evening March 19th, at the M. E. church, for the benefit of the school library.

The admission, 15 and 25 cents, is very small and we hope every seat in the house will be occupied.

The Citizen, of Jacison, Mich., says:

"At the Ida F. Styles M. E. church last evening was given an entertainment by Clarence L. Burgderfer, impersonator and humorist. Mr. Burgderfer as an entertainer, is a decided success, and the expectations of the audience for an evening's enjoyment were more than realized. His readings were mostly of a numerous character, and his impersonations of an old maid, an old man and other characters wers remarkably true to life. His rendition of a scene from "Quo Vadis" was fine, the audience being carried with intense interest through out the thrilling events of the entire scene. "Silly Sam," the last selection given, and one of Mr. Bergderfer's own compositions, completely captivated his hearers. During the rendering of this number, his imitations of various kinds of animals and musical instruments proving himself to be a thorough entertainer, as was evidenced by the repeated outburst of laughter and applause, and was perfectly at home, whether giving a reading of humor, pathos or tragedy. The Epworth league were well pleased with the entire entertainment."

Mr. Burgderfer gave a fine entertainment of impersonations. He is a born artist at the business and needs only to be heard to be appreciated. Everybody was delighted with him and he can have a full house in Albion any time he sees fit to return. —Albion Democrat.

Geo. F. Mosher, President Hillsdale College.—"I have heard Mr. Clarence Burgderfer read, and witnessed his impersonations, with much pleasure and satisfaction. He is an excellent mimic, and he also has good independent ideas about the proper rendering of most selections. His power of expression covers the whole scale from grave to gay, and both in serious and the comic he is well at home."

Mary G. Warner, Chautauqua, N. Y., Y. C. L. S. C. Round the Table leader, says: "I have indeed enjoyed Mr. Clarence L. Burgderfer's work as an entertainer. His keen sense of the funny side of things is catching, and the best of it is that his fun is of the character that always elevates."

R. Clark Hubbard, Musical Director of Island Park Assembly, Rome City, Ind: "It gives me pleasure to say concerning Mr. C. L. Burgderfer and his work here at this session of the assembly, that he has given genuine pleasure and satisfaction to his audiences, and that the annauncement of his appearance brought applause even the tenth day of his appearance here, as his repertoire is so large and well selected and full of fun that we never got tired of hearing him."

MISS BLOYD'S RECITAL.

Miss Edwina Bloyd and her pupils will give a musical recital at the M. E. church Saturday evening of this week. Miss Bloyd is a superb musician and togeather with her pupils will render an evening's entertainment that cannot fail to please all who attend. Prof. German who has charge of the musical department of Rochester University will be present and assist Miss Bloyd. Mr. German is one of the best in his line in this country. The Herald Editor has the pleasure of his acquaintance and can promise a rich treat to all who hear him. Remember the date, Saturday evening of this week at the M E. Church.

Attorney Dunten got up early Tuesday morning, made a hard drive into the country got back 4 minutes before train time caught the train for Auburn took two cases on the way attended court, made some collections on his return trip and had office business until the electric lights went out. Mr. Dunten is getting to be some what of a bustler.

NORTH BUTLER.

W. S. Troyer is on the sick list with grip.

The John Moore blacksmith shop is about to change hands.

Born to Err Sleutz and wife Wednesday March 5 a boy.

Frank Fee moved into the little brick building on the north side owned by Al Livergood.

Colds and coughs among the younger people seems to prevail through the north side.

We understand that Miss Emma Graf is noted in the Herald office as a very industrious girl. She attends strictly to business.

We understand that Jemima Troyer likes her position with Morse & Co., and that the proprietors are well pleased with her.

Sam Nelson is going to move to St. Joe, soon. Will Baker, the pump man, will move into the Nelson property as soon as vacated.

Mr. and Mrs. Melser will move into their new home on Broadway on the corner south of the McNabb hotel. The north side will lose a good neighbor.

Several Germans on the north side seems to feel very much slighted since Prince Henry passed through Butler and failed to stop off. We think the Prince didn't know those fellows lived here, but think he will certainly stop the next time he comes through Butler.

A PLEASANT SURPRISE.

A surprise party was given on Miss Edwina Bloyd by her pupils at the home of Mrs. H. E. Chilcothe, Monday evening March 10th.

Interesting games were played which were throughly enjoyed by all.

Just as ice cream and cake were being served, Mrs. Philips in behalf of the class and friends presented Miss Bloyd with several pieces of beautiful china as gifts in honor of her birthday.

All departed at a late hour, wishing her many more happy surprises.

A LOCAL SENSATION.

Maude Keller a young girl between the age of 14 and 15 years who has lived with Mr. and Mrs. Chas Voigt for a long time is in an interesting condition. The author of her troubles is unknown at this time as the trial has not yet occured. Monday morning Shiriff Hathaway came after the girl and took her to Auburn to await the pleasure of the grand jury. Tuesday Chas. Voigt was taken over to testify and was placed under $500 bonds; the next morning the bonds were increased to $1500 and in the absence of bail Mr. Voigt is in jail. We sincerly trust that he may be able to clear himself of the charge and that it will all end well. The public generally is reluctant to believe that he is guilty of such a horrible crime. His family has the sympathy of all in their troubles. The intention is to continue the business at the old stand and the Herald wishes to urge upon its readers to give Mrs. Voigt a generous patronage and to help her in her troubles in every way possible.

Mrs. Piefer, of near Moores, is spending the week with her son Wm. Piefer and wife.

If a man has a boil, his true friends call it an abscess, and those whose friendship can't be relied upon calls it a pimple.

Miss Anna Trentman stopped in Butler Wednesday afternoon the guest of Mrs. M. F. Long. She was on her way to Auburn from Detroit and other cities where she has been in the interest of the millinery business.

He is blind who can not read in the signs of the present times plenty of proof that the tendencies of American life are now toward the concentration and against the diffusion of wealth. Our present enormous burden of taxation is laid upon consumption and thus proportionately greater on the man of small income than the man of large; our huge industrial combination which crush out the small and aggrandize the big capitalist; our reckless granting of enormously valuable public rights into the hands of private owners, are all uniting for the further concentraction of wealth.

Eczema for Forty Years.

The Unqualified Statement of a Well Known Attorney, St. Ignace, Mich.

Some of the cures made by Dr. A. W. Chase's Ointment of stubborn and long continued eczema and skin diseases are causing much comment. People are beginning to realize that this Ointment is a wonder worker with all kinds of skin trouble. Attorney James J. Brown, St. Ignace, Michigan, writes as follows:

Dr. A. W. Chase Med. Co. Buffalo, N. Y.—Gents:—I cannot refrain from expressing my acknowledgement for the relief I have felt from Dr. Chase's Ointment. For 40 years I was afflicted with a skin disease which was located in one spot—on my leg. I have spent at a rough estimate five hundred dollars trying to effect a cure, and not until I applied this ointment did I get relief. You are strangers to me and this letter is prompted directly because I want to say and I feel as though I ought to say it. That Chase's ointment has effected a complete cure of my affliction. Three boxes did the work on my leg. I was also suffering from itching piles and applied the ointment which gave the best of satisfaction by affording me rest at night and rapidly causing the disease to disappear. I have received such relief and comfort from the ointment that I cannot withhold expressing my gratitude. I was so long afflicted with the tortures of eczema. I feel now that I am cured, a word of recommendation is due from me. Yours truly,

JAMES J. BROWN.

THE CONQUEST OF FAITH.

Be not carried about with divers and strange doctrines.—Hebrews xiii,9

Suppose that it should be possible for some one to prove the invalidity of the Holy Scriptures as the devine revelation of human origin, faith and destiny—what then? To whom would we then go for the words of life, either temporal or eternal? Upon what, or whom could the faith of men center as their infallible source of truth as their ever-reliable mentor, as their ultimate hope of salvation from sin and its consequences?

Faith that energizes and qualifies life must have a center. It seeks it in sun or moon, or constellations; in stocks and stones; in images, or beasts or mythical men. But human experience teaches us that the highest and most potent faith that affects life centers upon personality—a personality higher, nobler, holier than the believer. The subject will seek him in his sovereign, the soldier in his commander, the patriot in his archetype, the student in his author-teacher and the partisan in the chief of his party. What ever the field of endevor, there exists some one superior personality whose authority is commanding.

The truth is essential in religion. It is manifest in the apotheoses of Confucius, of Buddha, of Mohomet, of Jehovah and of Christ. To the Christian world the Hebrew records which tell the history of Jehovah and His relations with men are sacred because they embody the foundations of our faith in the one and only true God. The subsequent records by the evangelists with the Acts of Apostels by Luke, are sacred because they embody the story of Jesus and generate a solemn and solid faith that He is the Son of God because "in Him was all the fullness of the God-head bodily." The epistles are sacred because they are the commentaries upon the doctrines of Christ in their applications to daily life given to us by philosophers who were nearest to their deliverance and earliest in conformity to their revuisitions.

Because therefore from these Scriptures the world obtains a convincing sense of the authority of Jesus, and because daily experience corroborates faultlessly the thruths of His doctrines faith holds fast to the absorbing transforming and glorifying fact that both the Teacher and the teachings are from the Father.

Seeing how great things have followed in the wake of that faith, what should it profit any man or sect to agitate it with oppositions and with strange doctrines of contradictions? What benefit should come to the world to find that all the purities of human lives for sixty centuries have sprung from a false concept of God and His will concerning men? What great advantage is mankind to obtain by turning away from "the record God hath given of His Son" and falling in with the ipse dixits of Renan Strauss, and all the others who profess to see nothing essentially divine in Jesus and only "old wives fables" in the record of His mighty works.

If the anti-Christs could destroy the validity of the Bible from lid to lid, and could reduce Jesus to the ranks of impostors they could put no other Book in its place and enthrone on other personality in His Mastership. They would rob the world of truths that destroy faiths that never could be replaced, they would remove a Lord whose kingdom none other could never inherit. They would transform the brotherhood of earth into an embattled pandemonium and light and love, and life would die in one great holocaust of hate and hell.

They only are wise, then, who refuse to be carried about by every wind of doctrine, by every claim of science, falsey so called by the vain babblings of the musk-rakers who pretend to have found great and grievous faults in the foundations of the Truth of God, either the records of revelations or in the life and deeds of Christ. Be steadfast in the assurance that the same God who gave those things is the God who made all the science to which the gainsayers appeal and He does not contradict His moral laws by His physicial laws in His own time and in His own way He will confute and confound these purveyors of divers and strange doctrines that would dishonor His Truth.

It is enough that every inward pure and holy aspiration of the mind and heart of man has been provided for in the revelations of Holy Scripture. It is enough that every desire of the spirit of man to live above the clods, to conquer the earth and to dwell beyond the stars is met in the consels and promises of the gospel. It is enough that the soul yearns for wisdom, for spiritual power, for the sense of divine growth unto perfection, finds its living exempler and loving guide in the person of the Christ.

The soul which believes in them shall not be unstable, or wavering but fixed and immovable in the faith once delivered to the saints.

One can never judge by the out side of a man, or tailor made jacket, the condition of the lining.

A NEWS SERVICE WITHOUT PARALLEL.

There is ample justification for the claim made by the Chicago Record-Herald that its readers enjoy every day in the week, Sundays included, a news service that is without parallel in range and completeness. The reason is obvious—the combination of the varied and extensive facilities of the two great dailies, the Chicago Record and the Chicago Times-Herald. In addition to the, independent news facilities of both papers, The Record-Herald receives the complete news service of the New York Herald and the Associated Press, and when it is considered that its news columns are supplemented by all the special features so popular in The Chicago Record and the Chicago Times-Herald, it will be seen that The Record-Herald holds a unique place among the great newspapers of the United States.

BRAIN FOOD NONSENSE

Another ridiculous food fad has been branded by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for brain another for muscles, and still another for bones. A correct diet will not only nourish a pecular part of the body, but it will sustain every other part. Yet however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. You must prepair for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. A few doses aids digestion, stimulates the liver to healthy action purifies the blood, and makes you feel buoyant and vigorous. You can get Dr. G. G. Green's reliable remedies at Geddes & Hardings. DEAD MAN'S BAGGAGE.

A dead man has the same baggage privilege on a railway as a live passenger. This is the conclusion arrived at by a party of passenger agents, who were called upon to discuss the question. Recently a funeral party consisted of five persons with the corpse, and the party had 900 pounds of baggage. The travelers demanded that one of the trunks be checked on the dead man's ticket. The agent objected, but consented to refer the matter to the association for adjustment, and it ruled that a full fare ticket for a dead man carried the same baggage privileges as a ticket for a live person—150 pounds.—Fort Wayne Sentinel.

Kendallville and vicinity now have the sugar beet fever, a complaint that reaches every locality if you give it time, but one that has no return date in this part or the country. This vicinity has had sugar beet experience to last for a decade or two and that in a favorable year at that. Next year the sugar beet boom will move on to greener fields.—South Bend Times.

THE TRUE TEACHER.

Harriet C. Taylor.

She was born for her work as surely as the artist was born with a special genius for creating beautiful pictures or the composer with a special talent for writing grand harmonies. From her youth up she has had a definite aim in life. One of her childish pleasures was gathering together her play-mates and forming them into a school of which she was the teacher. She is fond of children, understands them, enjoys telling them stories and entertaining them in various ways. She may not be a remarkable student, in fact, she may not attract any attention by her preponderance of mental power, but the gift is there and when the time comes and she is placed in charge of a room full of children it shows itself, and her power begins to develop.

She has much to learn from that best of teachers, experience, but it is easy to learn where one's heart is in the work. She is glad to be independent, to be one of the great class of bread-winners, and it makes her happy to have her efforts appreciated by an occasional raise of salary, but this is not all. She loves her work. She sees in the children committed to her charge, not a roomful of little machines who are to imbibe a certain amount of knowledge in a given length of time, but a number of little men and women whose bright eyes see—oh, how much!—whose little ears are wide open to hear good and evil and whose small minds ponder over many things that one does not give them credit for.

She realizes she has a vast responsibility resting on her. She has these children in her charge a large part of the time. She teaches not only the regular required subjects, but morals, manners, a love for the beautiful and so on. The little natures are in a receptive state. Youthful impressions are strong in forming character. Character makes the man and the man makes the American citizen. Her work is surely a noble and useful work. Her personality affects those in her charge to a great degree. Her love and thoughtfulness are rewarded by the love of the children. They bring her all their small joys and sorrows and none are too insignificant for her notice, and her sympathy is freely given.

She studies each child and finds the best way to develop his nature and kindle his ambition No effort goes unrewarded. If it is only one letter done well in writing it is praised and thus the desire for better things is awakened, so that more is found worthy of praise on the following day. One is impressed by the home atmosphere on entering the room. There is no fear on the part of the children. The teacher is their friend and helper. They learn from her the value of truthfulness, cleanliness and good manners. She develops in them a love for their country, a love for nature ann the beautiful which grows and broadens to bear fruit in later years. She inculates a regard for others, a love of unselfishness.

She is always ready to reward honest effort by innocent pleasure. Her motto is "Work first and then play." She is just and shows no partiality. The parents soon discover her worth and are contented to leave their children in such wise and careful hands. They often consult her and many times her influence reaches farther than she thinks.

Things do not always run smoothly. She has her trials and many days seem full of disappointment, but still she labors on and does her work faithfully. She broadens herself by attending good lectures at times, by reading good books, by enjoying good music and by cultivating the society of the best and wisest. She realizes that she needs outside interests to take her mind from her work and give her the needed rest. But, even then, she guards herself from late hours and overmuch dissipation. She is wise enough to anticipate the evil effect this will have on her work.

And this is her life. Is it not a brave and loyal one? No wonder she is filled with contentment in spite of many failures. She is giving herself and her honest effort, and no such giving is wasted in this old world of ours. Let us honor her, the brave common-school teacher, and encourage her with our sympathy in the days to come.—Popular Educator.

The standard fuel of the poorer and middle classes of Germany consists of brown coal briquettes. The briquettes are made by reducing brown coal to powder and then molding it into little bricks with the addition of a quantity of bitumen. The briquettes sell for from $2 to 2.75 a thousand in Berlin, and burn without smoke. Under a new process briquettes for use as fuel are being made from peat, of which there are nearly 5,000000 acres available in the empire. It is expected that these peat briquettes will drive coal and other fuels out of the market.

Zoa Phora Co., Kalamazoo, Mich.

Gentlemen:—I feel it my duty to inform you what Zoa Phora has done for me. Ten years ago I was married. I had always had painful menstruation and was all run down and people said I could not live, but my husband sent for one bottle of Zoa Phora which cured me. Two years later I was troubled with Falling of the Womb and the doctors said I would have to wear a pessary, but one bottle of Zoa Phora cured me. Four years ago I had a miscarriage and came near dying, but one bottle cured me again. Since then I have kept it always in the house and would not be without it at any price.

Yours respectfully,

Mrs. J. E. Connor.

Zoa Phora is for sale by druggists, or it will be sent direct, prepaid, on receipt of price, one dollar a bottle. If you are a sufferer you can make no mistake in taking Zoa Phora at once. If you are interested or have a friend who is a sufferer send for our great book telling why Zoa Phora cures. It is sent free. All letters strictly confidential and answered by the doctor.

We will be glad to send you a large trial bottle free upon receipt of 10c. to cover postage and packing. Address, Zoa Phora Co., Kalamazoo, Mich.

The doer of these thefts will be caught before he is aware of it and then he should be punished to the full extent of the law.—St. Joe News.

An exchange says that there seems of late to be an active demand for Indiana farms by non-residents of the state. This would, to our mind, indicate that good land is selling at a less price in this state than in either Ohio or Illinois. When an Illinois farmer can sell his land for $100 per acre and buy Indiana land for from $40 to $60 per acre that is good or better, he knows that he is making a good investment, and this will soon result in an increased value of our farm land.

A special to the Journal Gazette from Angola says:—On Saturday February 22, the two and one half-year old daughter of Mr. and Mrs. Barnhart near Fremont, in this county, swallowed a hat pin 6 1-2 inches in length. A physician was called who said it could not be possible, but as the child continued in pain it was brought to Woods' hospital in Angola and placed under the X-ray, when the pin was located in its stomach and esophagus. Last Saturday morning an operation was preformed and the pin removed. The temperature of the child this moruing is normal, and there is every indication that it will recover.

An exchange has struck a philosophical streak and remarks: "Some people hang to their money as though they wished and expected to take it to heaven with them. They deny themselves of the comfort of life, neglect their education and stand as stumbling blocks to others. If they ever get to heaven it will be on the penurious line. They will be so thin in substance and worth as to go through a crack in the gate with great ease. It is moral and intellectual worth that fits a person for eternity. The brain was not given to be neglected or turned to miserism. It is safer to take a reasonable amount of money and time and lay it out in the improvement of one's self. A person may gain the love of a few by being rich, but at the same time he gains envy. But when he advances his knowledge and general worth he is doing the Lord's will and increases his chance for eternal happiness at every step."

Asthma

"One of my daughters had a terrible case of asthma. We tried almost everything, but without relief. We then tried Ayer's Cherry Pectoral, and three and one-half bottles cured her."—Emma Jane Entsminger, Langsville, O.

Ayer's Cherry Pectoral certainly cures many cases of asthma.

And it cures bronchitis, hoarseness, weak lungs, whooping-cough, croup, winter coughs, night coughs, and hard colds.

The inscrutable and devious ways of economics: The wane in the use of the bicycle has tended to lessen sickness. The decreased demand for rubber for tires has made cheaper crude rubber and therefore cheaper overshoes; more persons bought them and there was less sickness. This is a fair sample of the syllogistic teaching of cause and effect that the average college graduate acquires, rather than facts based on experience.

An exchange says that the quickest way to warm a house in the morning is to open the doors and windows a few moments, long enough to change the air. The philosophy of this is that the air of a room is impure and sluggish, somewhat like muddy water. Fresh air is pure, buoyant and active and will circulate quickly through the rooms, carrying the warmth of stoves or radiator swiftly to every corner.

Mrs. Kate Soffel, who aided the Biddles in their escape from prison and fled with them, and was severely wounded when they were recaptured, has recovered from her wounds and been taken back to Pittsburg where she will be tried on three charges, one for aiding in the escape of prisoners, and two for being an accomplice in muderous assaults upon prison officials committed by the Biddles in their escape. The insanity dodge will hardly work in her case, but she may claim to have been hypnotized by the miscreant she fell in love with. No doubt she is beginning to realize that the way of the transgressor is hard, very hard.

The average was highest on the most intensively cultivated farms, being $789 for nurseries, $608 for florists establishments, $83 for market gardens, $47 for dairy farms, $45 for fruit farms, $35 for live-stock farms, and $31 for hay and grain farms. Managers expended on an averge, $166; owners, $43; share, tenants, $35; and cash tenants, $34 per farm. White farmers expended $45 per farm, and colored farmers $13. Fertilizers purchased in 1899 cost $819,680, an average of $14 per farm, and an increase since 1890 of 79.6 per cent. The average expenditure was greatest for nurseries and least for hay and grain farms, the amounts being $152 and $6, respectively. For vegetable farms the average was $52; for florists' establishments, $44; for fruit farms, $10; for dairy farms, $11, and for live-stock farms, $9.

SULTANA'S SURVIVORS.

The survivors of the ill-fated Sultana are to meet at Fort Wayne on the 29th and 30th of April, and the people of Fort Wayne will entertain them in a consistently hospitable manner. The Sultana, a union transport on the Mississippi, was blown up about the close of the war, and of the 2,200 on board, only 400 were saved, some of them being fearfully injured. The survivors have gone on holding reunions, but slowly and surely the ranks are thinning and of the 400 who lived to read the story of the disaster, as it was told by a member of the band or by others, only half a hundred now remain to tell the tale to their proud descendants.—Kendallville Sun.

LOCKJAW FROM COWEBS.

Getting Thin

is all right, if you are too thin and all wrong, if too thin already. Fat, enough for your habit, is healthy; a little more, or less, no great harm. Too fat, consult a doctor; too thin, persistently thin, no matter what cause, take Scott's Emulsion of Cod Liver Oil.

There are many causes of getting too thin; they all come under these two heads: over-work and under-digestion.

Stop over-work, if you can, but, whether you can or not, take Scott's Emulsion of Cod Liver Oil, to balance yourself with your work. You can't live on it—true—but, by it, you can. There's a limit, however; you'll pay for it.

Scott's Emulsion of Cod Liver Oil is the readiest cure for "can't eat," unless it comes from your doing no work—you can't long be well and strong, without some sort of activity.

The genuine has this picture on it, take no other.

If you have not tried it, send for free sample, its agreeable taste will surprise you.

THE APRIL DELINEATOR.

A further generous supply of the spring fashions, which have now taken definite shape, is given in the current Delineat r. The modes of the season are graceful and becoming and in unusual harmony with the new goods and triummings. The literary features make this number a notable one. Charles G. D. Roberts contributes a novelette The Chatelaine of Cheticamp, the scene of which is laid in Acadia, which the author pictures so delightfully; the action is rapid and full of interest. Dr. S. R. Elliott writes entertainingly of Kate Field, one of the cleverest and versatile of women, who entered so largely into the social life of Washington. A fine pictorial opportunity is grasped in an article on the Interpretation of Beauty, with text by N. Hudson Moore. The Religious Sentiment in Photography will appeal to camera lovers and is especially timely at this season. In the series on Athletics for Women, Regis Senac, a well-known fencing master, writes of his art, and special illustrations are given. The home interests are strongly represented in an article on draperies, the lessons in cookery, and the items on household science; while parents are directly appealed to in Dr. Murray's second paper on the training of children, for whom amusement is provided in more pastimes by Lina Beard and another Brownie story by Silas G. Pratt.

A GREAT OPPORTUNITY.

Vick's Garden and Floral Guide for 1902, published by James Vick's Sons, comes to us full of everything relating to the garden and farm. It brings to our mind their display at the Pan-American Exposition—the gorgeous beds of Tulips and Hyacinths, the beds of Petunias, Geraniums, and various other plants, and the show of Asters and Dahlias in the Horticultural Building. Their great exhibit of over 1,200 heads of delicious Celery was considered by the manager of the expositiont to be the most attractive display in the vegatable department. The Guide is profusely illustrated with handsome half-tone cuts of all these and more. Any of our readers, by sending to James Vick's Sons Rochester, N. Y., can obtain the Guide free, merely stating what they most desire to grow.

A Baltimore paper in order to secure a "scoop" on the news of the arrival of Prince Henry was compelled to send its message from Nantucket by wireless telegraphy to Siasconsett, Mass., thence to Boston, to Buffalo and to New York City. As the wires were all down between New York and Baltimore the message was sent back to Buffalo, from there to Chicago, from Chicago to Birmingham, Ala., and up the coast to Baltimore.

The invication which Oregon as a country, relatively new, presents to the world is in many forms and is addressed to many sorts and conditions of men. In sincerity it would not be easy to say to whom the interests and conditions of the country most directly appeal to the lover of natural beauty, to the practical farmer, to the lumberman, to the miner, to the navigator, to the man of business, to the young who seek a fresh field of labor, or the the old who seek repose where the airs are soft and severities of climate unknown. Any of these, or all may find conditions to their liking here for it is a land of multiplied bounties, of unlimited opportunities and of unbounding and abiding charm.—From "The Three Oregons," by Alfred Holman, in Four-Track News for March.

FRIDAY, MARCH 14, 1902.

Origin and Confession of Faith of the U. B. in Christ.

In the eighteenth century it pleased the Lord our God to awaken persons in different parts of the world, who should raise up the christion religion from its fallen state and preach the gospel of Christ crucified in its purity.

About the middle of said century, the Lord, in mercy, remembered the Germans in America, who living scattered in this extensive country, seldom had an opportunity to hear the gospel of a crucified Savior preached to them in their native language.

Among others he raised up William Otterbein and Martin Boehm, in the state of Pennsylvania, and George A. Guething in the state of Maryland, armed them with spirit, grace and strength to labor in his neglected vineyard, and to call, among the Germans in America, sinners to repentance. These men obeyed the call of their Lord and Master. Their labors were blessed, and they established in many places excellent societies and led many precious souls to Jesus.

Their sphere of actions spread more and more, so that they found it necessary to look about for more fellow laborers to toil in the vineyard of the Lord, for the harvest was great and the laborers were few. The Lord called others who were willing to devote their strength to his service.

The number of members in the society in different parts of the county continue to increase as time passed and the precious work spread through the state. Great meetings were held. At one of these meetings it was resolved to hold a conference of all the preachers in order to consider in what manner they might be most useful. The first conference was held in the city of Baltimore Md. 1785 with six preachers present. The second meeting was in Pennsylvania in the 1781 with nine preachers present. After mature deliberation as to how they might labor most usefully in the vineyard of the Lord, they again appointed laborers such as they had come to believe had experienced true religion in their souls. Meantime the number continued to increase and they were obliged to call another meeting in order to unite themselves more closely and to lamore successfully in the vineyard of the Lord. This meeting was held in Frederick Co. Maryland Sep. 25 1800 with thirteen preachers present.

There they united themselves into a society which bears the name "United Breathern in Christ" and elected as bishops William Otterbein and Martin Boehm. The want of a book of disipline had long been deeply felt. Partial attempts to provide one had been made at different times; hence it was resolved to hold a general conference, in order to provide the same. in a manner not derogatory to the word of God. The members of this conference were to be elected from among the preachers in the different parts of the country, by a vote of the society in general. This conference convened on the 6th of June, 1815. After mature deliberation, they presented to their brethern a Book of Descipline containing the doctrine and rules of the church, desiring that these. together with the word of God, should be strictly observed, and admonishing the membership in the following manner:

God is a God of order; but where there is no order and no church discipline, the spirit of love and charity will be lost. Therefore brethren, we beseech you to follow the example of our Lord, as it is written, "Be kindly affectioned one to another with brotherly love; Let the mind be in you which was in Christ. He who will not submit is in want of humble love. "By this shall all men know that ye are my disciples, if ye have love one for another. He that loveth not his brother abideth in death. Let us walk in newness of life. Therefore, beloved brethren, let us strive to be likeminded, having the samt love, being of one accord, of one mind. Let no one speak or think evil of his brother, but pray God that he may grant us his spirit, and an earnest desire to lead a truly devoted life, to the honor and glory of his holy name."

In common with other churches what we believe, or Confession of Faith.

'Of God and the Holy Trinity.'

1st, We believe in the only true God, the Son, and the Holy Ghost; that these are one—the Father in the Son, the Son in the Father, and the Holy Ghost equal in essence or being with the Father and the Son.

Of Creation and Providence.

2nd, We believe that this triune God created the heavens and the earth, and all that in them is, visible and invisible; that he sustains, protects, and governs these, with gracious regard for t ewellfare of man, to the glory of his name.

Of Jesus Christ.

3d, We believe in Jesus Christ; that he is very God and man; that he became incarnate by the power of the Holy Ghost and was born of the Virgin Mary. That he is the Savior of the whole human race, if they with full faith accept the grace proffered in Jesus. That this Jesus suffered and died on the cross for us, was buried, rose again on the third day, ascended into heaven, and sittith on the right hand of God, to intercede for us; and that he will come again at the last day to judge the living and the dead.

Of the Holy Ghost.

4th, We believe in the Holy Ghost; that he is equal in being with the Father and the Son; that he convinces the world of sin, of righteousness and of judgment; that he comforts the faithful and guides them into all truth.

Of the Holy Scriptures.

5th, We believe that the Holy Bible, Old and New Testaments, is the word of God; that it reveals the only true way to our salvation; that every true Christian is bound to acknowledge and recieve it by the help of the Spirit of God as the only rule and guide in faith and practice.

Of the Church.

6th, We believe in a holy Christian church, composed of true believers in which the word of God is preached by men divinely called, and the ordinances are duly administered; that this divine institution is for the maintenance of worship, for the edification of believers, and the conversion of the world to Christ.

Of the Sacraments.

7th, We believe that the sacraments, Baptism and the Lord's Supper, are to be used in the Church, and should be practiced by all Christians; but the mode the mode of baptism and the manner of observing the Lord's Supper are alwahs to be left to the judgment of each individual. Also the baptism of children shall be left to the judgment of believing parents.

Of Depravity.

8th, We believe that man is fallen from original righteousness, and, apart from the grace of our Lord Jesus Christ, is not only entirely destitute of holyness, but is inclined to evil, and only evil; and that except a man be born again see the kingdom of heaven.

Of Justification.

9th, We believe that penitent sinners are justified before God only by faith in our Lord Jesus Christ, and not by works; yet that good works in Christ are acceptable to God, and spring out of a true and living faith.

Of Regeneration and Adoption.

10th, We believe that regeneration is the renewal of the heart of man after the image of God, through the word, by the act of the Holy Ghost, by which the believer recives the spirit of adoption and is enabled to serve God with the will and the affections.

Of Sanctification.

11th, We believe that sanctification is the work of God's grace, through the word and the spirit, by which those who have been born again are separated in their acts, words and thoughts from sin, and are enabled to live unto God, and to follow holiness, without which no man shall see the Lord.

Of the Christian Sabbath.

12th, We believe that the Christian Sabbath is divinely appointed; that it is commemorative of our Lord's resurrection from the grave, and is an emblem of our eternal rest; that it is essential to the welfare of the civil community, and to the growth of the Christian church, and that it should be observed as a day of holy rest and of social and public worship.

Of the Future State.

13th, We believe in the resurrection of the dead; the future general judgment, and an eternal state of rewards, in which the righteous dwell in endless life, and the wicked in endless punishment.

This church was born in a revival, and to do the wotk for which God called her, must keep in that same spirit. Admitance into her embrace, applicants are required to answer the following questions in the affermative:

1st, Do you believe the Bible to be the word of God, and that therein only is contained the knowledge of the way of salvation?

2nd, Have you experienced the pardon of your sins, and have you now peace with God?

3rd, Are you determined by the grace of God to follow Christ, renouncing the world and all ungodliness, seeking to lead a life of holiness and devotion to God and his cause.

4th, Are you willing to be governed by our church Discipline, and will you contribute to the support of the gospel as God prospers you?

Have you been baptized?

Dear readers, with great pleasure, I write this article, and am sure she is doing her part in helping this old world up to the cross and Christ. Whatever may be our differences as churches, in faith and practice, one thing is true that at last we will all be "United Brethern in Christ."

REV. C. H. BELL. Butler. Ind.

THE EPOCHAL MARCONI.

Signor Marconi, returning to this country on the steamer Philadelphia, received distinctly recorded messages from the Marconi station on the Cornwall Coast until his vessel was 1,500 miles distant on the open seas. He took the precaution of requiring the captian and chief officer of the Philadelphia to sign these messages as they were received, thus testifying to the genuine achievement.

"I believe," says Marconi, "that the distance to which a wireless message may be sent depends only on the power of the sending station. I think it possible to send a message entirely around the world—to start a message eastward around the globe and receive it at the same station from the westward. I now know that the curvature of the earth does not in the least affect the waves."

The world should not miss the significance of this utterance. Marconi is conceded, even by his opponents, to be an honest man, telling only the truth of his experiments. But a few days ago Prince Henry of Prussia, far out at sea in a storm, succesfully used the Marconi system to telegraph to President Roosevelt. This was an epochal incident. Marconi's utterance as given above must be received with the greatest respect. The Italian scientist has made his predictions good, one by one. It may not be long until he is in reality proving the soundness of his belief that he can send a telegraphic message around the world without wires.

INDIANA'S BIG WAR CLAIM.

The state finance board met yesterday and received a proposition from Mr. Hord, a New York attorney, to help represent the State in securing its war claim of $700,000 from the United States government. During the term of Attorney General Mitchener Attorney Hord was appointed to help represent Indiana in collecting the war claim and was to receive a per cent of the amount if the claim was paid. At that time the government refused to allow the claim because there was no law whereby the government should reimburse states for the interest and discounts paid on bonds for troops during the civil war.

A NEW DEPARTURE.

Up in Noble county there has been for years a star route running from Albion to Merriam village in the south part of that county. The service on that route is daily. A new contract for this route is to be let in June and under its provisions the carrier will be required to gather and deliver mail to farmers along the routes, just as carriers on free rural routes are now required to do. This is a new departure, and where it is not practicable to do away with country postoffice, may work satisfactorily. It will add considerably to the duties of this star route carrier, and will be of great convenience to the people residing along the route. Doubtless the same thing will be tried on other star routes where it is not found advisable to discontinue the star route service.

A JOKE ON LEVY.

The Indianapolis Journal tells the following good one on Leopold Levy the Hebrew Treasurer of State. The Journal says:

It seems that when Mr. Levy lived at Huntington a man found a pocket-book, but nobody would claim it. Finally one day Mr. Levy heard about the find and decided it was one he had lost. He went to the man and said he understood he had found a pocket-book.

"Yes, replied the finder, describe the one you lost."

"Well, replied Leopold, "it was a black pocket book and contained about $275 in cash and a note for $200."

"I guess it's your property," said the finder, handing over the book.

Mr. Levy opened the book and counted the money carefully several times. Then he took out the note and a pencil and figured for a few minutes.

"What's the matter?" asked the man who found the property. "Isn't it the same note?"

"Yes," remarked Levy, "but you had it for ten days and I think you owe me about 68 cents interest!"

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.
Address, F. J. Cheney & Co., Toledo, Ohio. Sold by Druggists, 75c.

Hall's Family Pills are the best.

TRUTH PLAINLY TOLD.

Some fellows never have any use for their party paper until they want an office. They give all their printing patronage to the opposition organ, until an official bee commences to buzz in their bonnet, when they suddenly realize that they want the support of their own party organ and its publisher. If the editor refuses to tear his coat in behalf of a candidate who has been supporting opposition papers he is relegated to the infernal regions, villified and falsified about, and is given the cold shoulder by the candidate getting his tickets printed at the oppositson party office. As far as we are personally concerned we have concluded that we will support our friends and not the fellow that has been giving us the cold shoulder. —Albion Democrat.

KEEP YOUR EYES ON THE WABASH.

Theatre trains will soon be on taking you to Toledo and return in time for breakfast.

Stockmen will be pleased to know that stock pens are now ready for use, and the Wabash is ready to handle stock, giving the same a quicker run to Buffalo than our competitors.

GIRL SHOOTS HERSELF.

Miss Bertha Homsher, the fifteen-year-old daughter of Mr. and Mrs. Joseph Homsher, of Albion, attempted to take her own life last week. She had gained possession of a revolver and placing the muzzle against her right temple fired. The ball did not penetrate the brain. Doctors were immediately summoned and the patient soon regained consciousness.

The cause of the rash act is not known, but several rumors are afloat to the effect that the girl had been opposed to her choice of a certain boy and her people recently moving upon a farm was very much against her taste. The girl was of a despondent nature as she had attempted suicide before. She was an exceptionally pretty girl, attractive in her make up and of a well trained mind.

DANGER OF COLDS AND LA GRIPPE.

The greatest danger from colds and la grippe is their resulting in pneumonia. If reasonable care is given however, and Chamberlain's Cough Remedy taken all danger will be advoided. Among the tens of thousand who have used this remedy for these diseases, we have yet to learn of a single case having resulted in pneumonia which shows conclusively that it is a certain preventive of that dangerous malady. It will cure a cold or an attack of la grippe in less time then any other treatment. It is pleasant and safe to take At S. G. Stone.

Schley and Santiago

BY GEORGE EDWARD GRAHAM.

The Intrepid Associated Press war correspondent was aboard the U. S. S. Brooklyn during the months of the campaign. His dispatches which he took to the Author during the war.

The Most Sensational Book of the Day.

The true story of the famous exploits of the Flying Squadron under Commodore Winfield Scott Schley, including the blockade and destruction of the Spanish fleet. TOLD FOR THE FIRST TIME.

Contains an autograph endorsement and personal account of the battle by Rear-Admiral Schley:

"The facts of the story of the movement and operations of the Flying Squadron as the author tells them in this book are correct."
—W. S. SCHLEY.

An interesting narrative of facts. Explains the so-called "Retrograde Movement;" the "Loop;" the "Coaling Problem," and settles conclusively every adverse ruling of the Court of Inquiry.

PRESIDENT ROOSEVELT, when Governor of New York, said:—"Mr. Graham's story is the most accurate I have heard or read of the naval fighting during the war. It needed just the average to go about taking photographs and to work the guns."

THE NEW YORK HERALD says:—"Mr. Graham, in the telling of facts, leaves the reader free to make the deduction that several naval officers need a Court of Inquiry to re-establish their reputations, if they can be re-established."

[illegible] never been before the public that has interested everybody as much as Admiral Schley has been treated, and the American people [illegible] *recognition of the Hero of Santiago.* This book tells [illegible] as it occurred and as the eyewitnesses saw it. Because it prints an abstract of every Indiana Supreme and Appellate Court decision. Also all local court news and many important court decisions handed down in other States.
Because it has the best Washington correspondent in the field. He keeps you thoroughly informed on all National Affairs, and often has special signed letters.
Because it carries the full reports of the Associated Press, with cables all over the world.
Because it has a special correspondent in every Indiana town of size. All important happenings are promptly chronicled.
Because it has a special department of farm news.
Because it prints a better sporting page than any other Indiana paper.
Because it prints all those features dear to the heart of most women. It leads in foretelling changes of fashion, in society matters, cooking recipes and other subjects of interest to good housekeepers.
Because it prints every class of news that any other paper circulating in Indiana prints, and much more than most of them.
Because it does not use cartoons and illustrations merely as space fillers—good and poor indiscriminately—as do many papers. Good cartoons and illustrations are used moderately.
Because it does not print vile or offensive news or advertising matter. The majority of patent medicine advertisements, with their awful illustrations, are considered objectionable, and are not admitted.
Because it is Republican and conservative, and confines its politics to its editorial columns. The news columns give the truthful, impartial facts.
Because it costs only 10 cents a week (Sunday 5 cents extra), and puts before you fresh, clean news of the city, State and country up to the hour of going to press.

Contagious Blood Poison Is the name sometimes given to what is generally known as the BAD DISEASE. It is not confined to dens of vice or the lower classes. The purest and best people are sometimes infected with this awful malady through handling the clothing, drinking from the same vessels, using the same toilet articles, or otherwise coming in contact with persons who have contracted it.

It begins usually with a little blister or sore, then swelling in the groins, a red eruption breaks out on the body, sores and ulcers appear in the mouth, the throat becomes ulcerated, the hair, eye brows and lashes fall out; the blood becoming more contaminated, copper colored splotches and pustular eruptions and sores appear upon different parts of the body, and the poison even destroys the bones.

Ten years ago I contracted a bad case of Blood Poison. I was under treatment of a physician until I found that he could do me no good. Then began taking S. S. S. I commenced to improve at once and in a very short time all evidence of the disease disappeared. I took six bottles and today am sound and well.
R. M. Wall, Morristown, Tenn.

S. S. S. is a Specific for this loathsome disease, and cures it even in the worst forms. It is a perfect antidote for the powerful virus that pollutes the blood and penetrates to all parts of the system. Unless you get this poison out of your blood it will ruin you, and bring disgrace and disease upon your children, for it can be transmitted from parent to child. S. S. S. contains no mercury or potash, but is guaranteed a strictly vegetable compound.

And now there is another struggle between the Indianas senators, Beveridge and Fairbanks. Both want to to be presiding officers of the republican state convention.

The story comes from Kendallvile that two of Aaron Browand's sheep gave birth to five lambs each and a third presented three, making thirteen lambs from three ewes.

The canning factory at Lagrange has been leased by a Michigan canning company and it is said that the contract provides that farmers are to get a minium price of $6.00 a ton for all tomatoes furnished.

Huntington is in the throes of a small pox scare. Jacob Foster a barber, was sick for a week before it was known what was the matter with him. Quite a number of the patrons of his shop were exposed and several have already developed cases of small pox.

It is reported that the people of Garret so feel the need of a representative newspaper that a new daily and weekty is quitely talked about. Citizens of that city say they propose to support a paper that talks more Garrett and less Auburn.—Dispatch.

Garrett is certainly an invitin field for a clean up-to date newspaper.

Cyrus Kline, of Angola, is attorney for two Pleasant Lake men who have filed petitions in bankruptcy, with the U. S. court at Fort Wayne. One is Geo. W. Neihart, now a farmer, but formerly a merchant. The other is Geo. A. Cogswell, who gives his occupation as a laborer.

A judge in Elkhart has decided that when a person advertises that he will apply for license, and after learning that a remonstrance has been filed against him, fails or refuses to apply at the following term of county commissioners' court the remonstrators may file their remonstrance just the same as though he had his application in, and the remonstrance will stand good against him for any application he may make for two years from date of filing.

There are always a large number of people who make no provision for the future and some of them in Butler have had to be assisted by individual aid during the past few weeks of severe weather. For the shiftless and dissolute, who will not work nor save when given the opportunity, there is not much need for sympathy, but unfortunately they seldom fail to provide themselves with families and it is hard to have women and children suffering for the bare necessities of life.

That excellent journal the New Albany Ledger, expresses the opinion that, "things are getting so hot in the factional fighting now under way in the republican state organization in Indiana, as well as in Illinois, that the caloric sizzling is distinctly audible and seems to extend all down the opposing lines from the erstwhile dignified leaders to the humblest slugger in precinct politics. Plainly the time has come to relieve Indiana of republican mistule, factorial vendattas, selfish feuds and consequent incapacity for achievement."

The governors of each state in the union have been asked to serve on a national committee to bring about a change in the date of the presidential inauguratior. So far a large number have answered, all of them in favor of the proposed change and most of them designating the 30th of April as their choice. Historically, this date is more appropriate than the fourth of March, because the first president was inaugurated on the last day of April 1. Meteorologically, those who know Washington weather at both seasons favor only the later date.

The coming of the month of March suggests the passing of cold weather and the approach of genial spring, and this reminds us that it is time to begin planning for the enjoyment of the coming summer. "In times of peace prepare for war," is the motto of the prudent man. As our thoughts figuratively wander away into the summer time we recall the fascination of house-boating, the charms of the Thousand Islands, and the picturesque quietude of the Rideau Lake Region, where the house-boat plys its peaceful way across the dark blue of the placid lakes, or along some quiet river where nature courts the cooling shades day by day or, as the twilight gathers, ventures forth to woo what Longfellow calls "the for-get-me-nots of the angels"—the stars. There is a peculiar enchantment about the idling life of a house-boat that creates its own atmosphere, an atmosphere of refreshing abandon and healthful rest, a rest that is care-killing and soal-inspiring. —From Four-Track News for March.

BIDS ON NEW SCHOOL HOUSE.

At the office of Dr. D. J. Swarts, president of the city school board, bids were opened Monday afternoon for the construction of the proposed new school building on north Van Buren street. There were five bids upon the entire construction, exclusive of the plumbing, heating and electric wiring. The two lowest bidders were J. P. Long and Sol Shearer, the other three being from Ft. Wayne The following were the bids:

J. P. Long	$9,477 25
Sol Shearer	9,587 00
H. Hilgemann	9,958 00
C. Franke	10,075 00
H. J. Kaiser	11,214 00

The board took the bids under advisement and up to the time of going o press were not ready to make any announcement of their action for publication.—Dispatch.

COLD CURE FOR BUSY PEOPLE.

Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urinates too often, if the urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of **Swamp-Root** is soon realized. It is sold by druggists, in fifty-cent and one dollar sizes. You may have a sample bottle by mail free, also pamphlet telling all about it, including many of the thousands of testimonial letters received from sufferers cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper.

A special from Kendallville to the Journal-Gazette says smallpox has broken out in several families northeast of that city. None of the patients are seriously ill but a strict quarantine will be enforced against these families as well as visitors to their homes.

An Indianapolis man says that consumption may be cured by inhaling the fumes from the hoof of a horse while a blacksmith is fitting a hot shoe upon it. The sufferer must get up close and actually breathe the fumes into the lungs. It is a bitter dose but does the business, so this man says.

The Vandalia will at once commence the erection of a stone building for repair shops at Logansport. The machine shop will be 120 feet long by 70 wide, and, it is expected will give employment to seventy or more men. Other buildings will be erected in the near future, making this a more important division point.

How often, oh how often is there a wish expressed that the public hitching racks of the town were located someplace else than directly on Main streets. It is to be regreted that the town in an earlier day did not set aside a block some place near the business center that could be used for such a purpose. But the men who planned it then did not see the needs of the present day.

An Indianapolis dentist has given up the forceps for pulling teeth and has adopted the primitive method of the Chinese, using nothing but his thumb and index finger. He considers that the sight of the forceps themselves is responsible for much of the harrowing part of tooth pulling and that many nervous persons are greatly shocked by the sight of there instruments. The pain is also said to be less. He can take out the most firmly rooted tooth in a few seconds. He learned this art from a Chinese practitioner.

A MISPLACED LETTER

Many of the most amousing and the most tragic errors that occur in print are due to one misplaced letter. I remember once seeing it stated in an account of a Grand Army re nion that over two thousand soldiers were compelled to sleep on cats, and the same article by dropping an r mentioned the battle-scared vetrans.

The little harmless - looking hyhnen, too is a mighty factor at times. If you write your landlord that you wish to release his house when your time expires you mean one thing; if you write him you wish to re-lease the premises you mean exactly the opposite. Mighty is the hyphen.—From Vest Pocket Confidences in Four-Tack for February.

IN THE CIRCUIT COURT.

From the time court was called Monday morning until Wednesday noon Judge Hartman heard several cases on the civil docket, and disposed of the following:

Rose Yenderly vs. Joseph Girardot; judgment for plaintiff and the county clerk ordered to pay to her the money in his hands.

Frank Klinger vs. Francis Klinger, to annul marriage contract; finding for plaintiff and decree rendered at his costs. George G. Foster vs. Philip Drake and others, to cancel mortgage; judgment for plaintiff.

The following cases were dismissed on motion of plaintiffs' attorneys: Frank Wofford vs. National Masonic Accident Association; Chas. H. Hanna vs. George Werntz; Maud Kizer vs. Frank Griest, for breach of promise of marriage; National Biscuit Co. vs. Seraphine Girardot, on account.

DITCH PETITION.

In the matter of the petition and report of Peter Grube number 743 ditch in Stafford township. To whom it may concern: Notice is hereby given that a petition has been filed with the Auditor of DeKalb County, State of Indiana, and viewers have been appointed who have viewed and reported said view which is on file in my office. The hearing of said petition and report upon its merits will be on

Tuesday, the 8th day of April, 1902, the same being the 2nd day of the April term, 1902, of Commissioners Court of said county.

The prayer of said petition is that a ditch be constructed on the following route to-wit:

Beginning five hundred and forty one (541) feet south of the north east corner of section sixteen (16) township thirty four (34) north, range fifteen (15) east, DeKalb county, Indiana.

Ending in the Daniel Hook joint state ditch, said ending being five hundred and fifty five (555) feet north and fifteen hundred and ten (1510) feet east of the south west corner of section sixteen (16) Stafford township, DeKalb county, Indiana.

Also a Lateral Drain:

Beginning at the south east corner of the north west one fourth (1-4) of the north east quarter of section seventeen (17) township thirty four (34) north, range fifteen (15) east, DeKalb county, Indiana.

Ending in main drain, sixty eight (68) feet below stake number thirty one (31). Said ending being five hundred and ten (510) feet north and one hundred and ninety (190) feet east at the south east corner of the north east quarter of section seventeen (17) Stafford township, DeKalb county, Indiana.

This proposed work will affect the lands of the following persons:

Ursula Hook, Henry Grube, Peter Grube, Samuel Miller, H. B. Maxwell and Sarah E. Maxwell, Nancy M. Fay, David W. Blaker, Adam Christoffel, Daniel Stroh, Samuel Hollinger, Lewis Peppers, Joseph H. Miller, Isaac Diehl, Stafford township, Christian Steckley, Daniel Steckley, Joseph N. Miller and William Shock.

YOU GET YOUR MONEY BACK.

We, the undersigned druggists hereby agree to refund the money, if after using one box of Dr Stone's New Dyspepsia Cure it has failed to give satisfactory results. Cures Dyspepsia, Indigestion, Sour Stomach, Heart Burn, and Loss of Appetite.—Geddes & Harding, C. F. Phillips.

WORTH $300,000,000.

The President of a certain big Oil Company is said to be worth $300,000,000. A tidy bit of money and no mistake. And yet he isn't happy. In an address to a Bible class he spoke of trials and troubles of the rich and the loads they have to carry. A young lady whispered to a friend that he might wear a Benson's Porous Plaster on his back or, better still, divide the money among the members of the class. I don't know why her idea about the plaster makes me want to laugh, but it does. All the same I have seen plenty of people laugh after putting Benson's Plasters on their backs or chests, or on any other spot where there was weight, heaviness, weakness or pain. It may be the sharp stabs of neuralgia, the aches and wrenches of rheumatism; it may be colds in muscles or bones; it may be those kidney or lumbago thrusts that make you yell as at a dog bite; or it may be a strain or cramp, *anything* that wants quieting and comforting. Dont bother with salves, liniments, lotions, etc., or with any of the stupid and useless old style plasters. Clap on a Benson's. It relieves *at once* and cures quickly. It stops the pain and makes you laugh for the very ease and good feeling of it. But watch out against imitations and substitutes. All druggists, or we will prepay postage on any number ordered in the United States on receipt of 25c. each.

SHERIFF SALE.

By virtue of a certified copy of a decree to me directed from the clerk of the circuit court of DeKalb county, Indiana, in a cause wherein Alvin Livergood is plaintiff, and Catharine Whitman is defendant, requiring me to make the sum of one hundred thirty-eight dollars and twenty-five cents, with interest on said decree and costs, I will expose at public sale to the highest bidder, on

Saturday, the 15 day of March A. D. 1902,

Between the hours of 10 o'clock a. m. and 4 o'clock p. m. of said day, at the door of the Court House, in Auburn, DeKalb County, Indiana, the rents and profits for a term not exceeding seven years, the following real estate to wit:

Commencing at the north east corner of the north west fourth of the north east quarter of section twenty (20) in Township thirty-five (35) north of range fifteen (15) east from thence running south forty (40) rods fourteen feet (14) and eight (8) inches thence west forty (40) rod fourteen (14) feet eight (8) inches thence north forty (40) rods fourteen (14) feet and eight (8) inches, thence east forty (40) rods, fourteen (14) feet and eight (8) inches to the place of beginning containing ten (10) acres and sixty-three (63) rods except chool house lot; all in DeKalb County Indiana.

If such rents and profits will not sell for a sufficient sum to satisfy said decree, interest and costs, I will at the same time and place expose at public sale the fee simple of said real estate, or so much thereof as may be sufficient to discharge said decree, interest and cost. Said sale will be made without any relief whatever from valuation or appraisement laws.

IMPORTANT IN HAVING A SALE.

The most important thing to be considered when arranging to have a public sale, is a good auctioneer. It means money in or money out of pocket. A good cryer will get more for the articles to be sold, while a poor cryer won't get as much. Why then should not the auctioneer be the most important feature to receive consideration?

The Herald has seen and heard enough of W. S. Troyer of Butler to convince us that he is one of the very best, if not the best auctineer in this section and will so recommend him to our readers. We do so too, feeling confident that we are not in error, and are conferring favor on them in so doing.

Mr. Troyer has made great strides as an auctioneer since he has been devoting his time to it, (only the last few years and the reputation he has gained has come through meritorious sources. Until within the last year his work was confined mostly to the neighborhood of Butler.

CARD OF THANKS.

BENEFITS OF HOT WA TER

Hot water has far more medical virtures than many believe or know. Because it is so easily procured thousands think it valueless. The uses of hot water are however, many. For example there is nothing that so promptly cuts short congestion of the lungs, sore throat or rhumatism as hot water when applied promptly and throughly. Headache almost always yields to simultaneous application of hot water to the feet and back of the neck. A towel folded several times and dipped in hot water and quickly wrung out and applied over the part in toothache or neuralgia will generally afford prompt relief. A strip of flannel or napkin folded lengthwise and dipped into hot water and wrung out and applied round the neck of a child that has croup will sometimes bring relief in ten minutes. Hot water taken freely half an hour before bed-times is helpful in the case of constipatson, while it has an soothing effect upon the stomach and bowels. A goblet of hot water taken just before breakfast has cured thousands of indigestion, and no simple remedy is more widely recommended by physicians to dyspeptics. Very hot water will stop dangerous bleeding.

Many are fond of Tapioca, but dislike the trouble of soaking it. Use Mrs. Austin's Quick Lunch Tapioca.

THE NAME OF THE CHURCH.

My position plainly stated is that "Bible things should be called by Bible names." The Bible record speaks of "The Counsel of God," "The Doctrine of Christ," "The Faith," "The Faith of the Gospel," "The Faith which was once Delivered to the Saints," etc.," but in contradistinction thereto, we can read in the various church standards as follows:

Augsburg's Confession of Faith, Heidleberg Catechism, Westminister Catechism, Constitution of the Presbyterian church, Discipline of the M. E. church, etc. These various modern-day systems of faith and duty of course must have appropriate names to distinguish them and especially apart from the "faith of the gospel" as taught in the Bible. By reference to the Bible, we can find no trace of those systems just cited; hence, they came into existence since the days of the Apostles and of sequence are human in their origin. History points out to the date of their first introduction.

In the Bible we too can read of Saints, Christians, Disciples, Friends, Brethrens, Righteous, etc., but in modern theology we can read of Lutherans, Presbyterians, Episcopalians, Methodist, Congregationalists and hosts of other names of like character. Now, who has a right to change these names? By what authority do men call the people of God by such unwarranted nick names?

1st.—The leading idea expressed by the names Episcopalian church and Congregational church is their peculiar form of ecclesiastical government, and so with the name Presbyterian church.

2nd.—The name Methodist Episcopal church relates mainly to its form of government and the circumstances of its organization. Methodist is a name which came from a very rigid or methodical class of physicians who, from their strict method of living, were styled Methodists. This name was applied out of derision first, and I can not but look upon it as a very inappropriate church title.

3rd.—Unitarian church is expressive of a belief in the unity of God in contradistruction to the Trinity, or a belief of unity in unity instead of Trinity in unity.

4th.—The leading idea expressed by the name Lutheran church, is that its members receive the fundamental sentiments advocated by Martin Luther, the great and successful reformer.

5th.—Universalist church signifies faith in the final holiness and happiness, of all God's intelligent creatures.

Others have framed church titles from Bible names which are equally unscriptual and inappropriate. These are numerous names as such. For instance, I, Brethren. Out of this name we find in Christendom at least from denominational names composed therefrom, viz: The Moravians or more properly Unitas Fratum or United Brethren church, the River Brethren church, the Brethren in Christ church or Shoemakerites and the United Brethren in Christ. The appropriateness of these titles is seen where we consider that the word brethren merely indicates the relation each member of the same household sustains to the other; and as the Disciples formed but one family they were called brethren. 2, Disciples. It, in its simple meaning signifies learner. Of course it would be improper to say Disciples or Learners church. This needs no further explanation. 3, Christians which signifies anointed one or one like Christ. This word is thus properly used, but not for a church appellation. It is not a proper noun or a patronymic, and therefore, is not used in the Scriptures as an appellation for the church. 4, Saints, means sanctified, holy pure, hence was applied to the deour of the Old Testament. 5, Baptist, signifies the administrator of baptism, baptizer—and there surely is no propriety in calling all men and women baptizers. Besides the word baptist means dipper or immerser; and who can not see the impropriety of naming the church a dippper or immerser church.

Similar remarks are true concernihg the entire category of denominational appellations whether framed of Bible or human terms, excepting the names Church of God or Church of Christ. I now come to inquire then, What is the proper name for the church? I answer, Church of God or Church of Christ. In confirmation of which I submit the proof as follows:

1st.—In the Bible the church is by metaphor compared to a natural family, and inasmuch as earthly parents have an undoubted right to name their own children, then God also has an undisputed right to name His church, which is made up of His children and having named her, the Church of God we the children or sons of God should beware of nick naming her as some do.

2nd.—The Greek word, ekklesia, from which we have congregation, assembly and church in the Bible may mean assembly without designating the character of the same. Hence it becomes necessary to add some qualifying term, Go1 Church or Church of God is describtive. It is God's assembly or an assembly of God's children. Any other name does not express that necessarily. Hence all those churches who have adopted sectarian names at times find themselves compelled to drop their names at times in conversation, writing and preaching, and say Church of God even when speaking of their own organization. This is done and for the plain reason that Methodist church, Presbyterian church Baptist church, etc., are not found in the Bible nor yet expressive of the subject of which they they are speaking.

3rd.—The names which may be properly applied, prefixed or annexed, to the metaphor to which the church is likened clearly prove it. The church is delightfully denominated by many figures and metaphors to all of which it will do, and make good sense and remain in keeping with Bible teaching to prefix or annex the name of God or Christ and it will destroy its intended meaning to prefix or anneang other words not of like importx Hence the church is compared to a kingdom, i. e., God's Kingdom or Kingdom of God; to a family, i. e., God's House or House of God.

4th.—It appropriately designates such society called out from the world. When ekklesia is applied to the people of God it means the out called. Such were those disciples whom Christ made and baptized. They constitued his bride, his household, his family or his church. Surely it was very appropriate to call those communitie of God's people whom Christ has called and converted and who are associated for his worship Churches of God. Such they are not only by creation and general redemption but by regeneration and adoption.

5th.—The language of the Holy Oracles. God verily has the best right to name this church. This right He has exercised and her the Church of God. The fact perogative and certainty of naming the church is predicted by the Evangelical prophet, Isaiah, when he said—Thou shalt be called by a new name which the mouth of the Lord shall name. Isa. 42-2. The church was to receive a new name which the mouth of the Lord should name.

The above prophetic declaration received its fulfillment by the action of the Lord Jesus Christ, the illustrious founder of the church at the time He founded her upon the rock. See Matthew's record "Upon this rock I will build my Church and the gates of hell shall not prevail against it;" 16-18. At this time and place the Lord, and Founder of the church, named the church, named her after His own name, "My Church," thus He assumed her ownership. Herein "the mouth of the Lord" gave the church a new name as the phrophetic had predicted.

2—In Luke's history of apostolic labors, he records, "Feed the Church of God, which He hath purchased with his own blood." Acts 20-28. This language is embodied in the able appropriate some stiring and sympathethic farewell address of the apostle Paul to the overseers of the church in Ephesus in Asia Minor.

From the above quotations the following is fairly deducible.

1st. That the community of Christians gathered through Pauls instrumetality at Ephesus constitute, as Paul says, "The Church of God" in said city.

2nd. That the "Overseers" whom Paul then addressed had the spirituall oversight of said "Church of God" for he says, "Feed the Church of God."

3rd. Paul declares the Lord purchased the church. If the Lord contracted for her and paid for her with his wuo blood then the church is His, the Lords Church. Then by actual purchas she belongs to the Lord, to no one else. To claim her for another is an attempt at robbing what belongs to the Lord.

Paul writing to the church at Corinth the Capital city of Achia which he himself had establised calls the same by the proper name which is in unison with what he said at Ephesus, to which I have just referred.

In the introduction of each one of his two epistles to this church he writes:

"Unto the Church of God" which is at Corinth 1 Cor. 1-2 and 2 Cor. 1-1. In these epistles he says "Give none offence to the Church of God" 1 Cor. 10-32.

"We have no such customs neither tqe Church of God. Chap 10-16 "Despies ye the Church of God" verse 22. And again Paul says "I am the last of the apostles that am not meet to be called an apostle because I persecuted the Church of God 15-9. The passages very clearly show that when Paul spoke or wrote concerning to a religious community he called it by the eogmomen the Lord had given i e. "The Church of God."

4th. At Thessalonica a congregation of Christians was geathered by Paul to which he afterward wrote two epistles. In the first epistle he states "Ye, breathern become followers of the "Church of God" which in Judea are in Christ Jesus. The following facts are deducible from this passage:

1.—That the Church of God in the land of Judea were model churches.

2.—That the rethern at Thessalonica constituting said church were imitators of these model churches.

3.—As these model churches in the Land Judea were Churches of God hence of necessity the chuch at Thessalonica were also a "Church of God" On his second epistle, Paul writes: We ourselves glory in you in the Churches of God.

5. To the Galatian brethern Paul says Beyond measure I persecuted the Church of God and wasted it.

What Church? Answer. The Church of God. Where? At Jerulesam; Hence the church at Jerulesam was a Church of God.

6. Timothy, after laboring some time became a pastor over the church at Ephesus. Paul sent him two epistles giving him sundry directions in his pastorial duties and among the rest he presents the needful qualifications for a church. Overseers, one of the qualifications is one that ruleth well his own house having his children in subjection with all gravity for if a man knows not how to rule his own house how shall he take care o the Church of God. 1 Tim. 3-45. From this we learn.

1st. That a man incapable of well regulating his own family is not capable and ought not by no means to be placed in trust with the management of church affairs.

2nd. And also that those churc es over which overseers are to be appointed in all times are Churches of God. And in the 15 verse of the same chapter Paul states to Timothy the object of his writing thus.

These things write I unto thee hoping to come unto thee shortly; but if I tarry long that thou mayest know how thou oughtest to behave thyself in the house of God which is the church of the living God the pillar and ground of truth. It is very clear that in this passage

1st.—Paul gave these directions to Timothy who was then yet unexperienced in his rule of conduct for the management of church affairs at Ephesus.

2nd. That the house of God the foundation of which was laid by Jesus Christ. He himself being the living, chosen, precious and tried corner stone a sure foundation called by Paul "Gods building" is the church of the living God.

3rd. That the house of God the church of the living God embodies the pillar and ground of truth.

Glorious thought! That a full revolation of Gods truth is in the Church of God. The great doctrine of the church is the truth unmixed with error. Formerly truth was but partially revealed much of it being shadowed with types, ceremonies and compariatively dark prophecies, but now all is plain and full revalation given and this revalation is deposited in the bosom of the church of the living God, hence she by inspiration is said to be the pillar and ground of truth.

7 Paul in his letter to the church of Rome says.

The churches of Christ salute you xvi-15 concerning this passage I remark.

That Paul must mean here that all the churchea he had shortly before visited through Greece and Asia had heard of the fa ith and obedience of the Christians at Rome and very probably knowing the apostles design of soon writing to or visiting Rome they desired to be kindly remembered to the church in that city or at least if they did not regret it he did send these salutations to Rome.

All these chuches in Greece and Asia Paul called Churches of Christ. From these and other like passages to my mind the conclusion is erresistible that the names by which God has called his churches are Church of God Church of Christ and such like church titles and was so recognized by the apostles.

6 That the title Church of God is proper as well as scripitual is evident from the fact that the Church is the Bride. She is the bride, the Lambs wife as such should assume the name of her husband. The Lamb, Lord or God.

That is the Lambs Church, the Lords Church or God's Church. What would we think of the bride who refuses to assume the name of her husband? Would it not cause trouble? What then does God think of the bride, the church, who refuses to assume His the husbands name. To say the least is it not treating the Lord with disrespect?

The arguments advanced are sufficient to maintain the name Church of God

RURAL MAIL BILL PASSED

The bill to classify the rural mail service and place the carriers under the contract system passed the house of representative but with the provisions placing the carriers under the contract system striken out after a long struggle. The salary system will be continned at $600 per year. This is as it should be. It is hard to see how it came that men with whiskers in congress attempted to place the carriers under the contract system; any man with a grain of common sense should have known that it would have ruined the service. People who have been so fortunate as to receive the benefit of this service are satisfied and want no tinkering.

NERVES LIKE A FLAT-IRON.

Head Feel Like Bursting.

"How shall I know I'm in love?" This question was asked me by a fine young lady from Sheldon who believes all she reads, after the manner of those who are full of youth and truth and hope, and who use—'s soap. The question is very pertinent now. Max, the wise man, and Ella Wheelcox Willer, have just given us some fine articles on love, which convince us that they know nothing of the subject. A fine old "critter" who occupies a regular orthodox pulpit has just delivered himself of a bushel of real fresh wisdom on the same subject He may have never been in love, but he is like a town farmer. He has the theory, if he lacks the practice. If there is anything I can praise and analyze and define and make good intellectual hash of, for medium brains, it is this same love. Dickens says love makes the world go round. As the power that propels the world has never objected to this definition, we have no kick.

The young woman above referred to think she is in the ocean of love at present and feels certain that a certain young man who has plenty of money and a reasonable amount of grains, is so deep in love with her that he is sore all over, and liable to become a lunatic unless she becomes his pride.

Now the preacher above referred to had said good things. He says that people should not be permitted to marry unless they are first married by love. That marriage now is to easy. That people who are in love, and who marry for money, or convenience never are really married. And this lets us done hard on the text. What is love and how shall I know that I am in it? That is a deep subject. It goes clear to the bottom; also to the top, and extends north, south, east and west. There is not a corner of the universe where love does not exist. It is an electric invisible ocean that fills all space. From the perfume of the flower to the purr of the pussy cat, there is love, things that have life. True life is simply true love and leads to the perservation of life to the highest possible development of life. One is a passion of hell the other of heaven. In this wide world nearly every day some man brutally murders his sweetheart aid takes his own life. He starts in love and the brute passion is awakened and hate takes control and hurries him to hell. Now Susan if you can tell where hate ends and love exists, if you can bathe in that part of the mystic ocean where love only exists, and there is no brute savagery then you are in love and will know it.—Exempla Gracia.

WOMEN AND JEWELS.

Jewels, candy, flowers, man—That is the order of a women's perference. Jewels form a magnet of mighty power the average women. Even that greatest of all jewels, health is often ruined in the stenuous effort to make or save the money to purchase them If a women will risk her health to get a coveted gem then let her fortify herself against the insiduous consequences of coughs, colds and bronchial affections by the regular use of Dr. Boschee's German Syrup. It will promptly arrest consumption in its early stages and heal the affected lungs and bronchial tubes and drive the dread disease from the system. It is not a cure-all but is a certain cure for coughs, colds and bronchial troubles. You can get Dr. G. G. Green's reliable remedies at—Geddes & Harding. Get Greens Special Almanac.

BEAUTIFUL SEA SHELLS FREE.

Since coming South I have received numerous inquiries for sea shells, and please say to your readers that I am living on the seashore, and have made a fine collection of lovely shells from our own shore, the coral reefs and the West India Islands, and that I will send a dozen different kinds, no two alike, and a dozen scarlet sea peas to any one who sends a stamp to pay the postage. Any one is welcome to send, as I have plenty for all.

Mrs. F. A. Warner,
Pablo Beach, Fla.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.
Address, F. J. Cheney & Co., Toledo, Ohio. Sold by Druggists, 75c.

INHUMAN BUTCHERS.

A Washington man writes to one of the New York papers stating that in his boyhood, when a butcher killed a cow, he first struck the animal on head, then cut its throat, and then, before life was extinct, began to take the hide off; and he says that he has been informed of the existence of the same inhuman methods of proceedure at the present day. If this is a fact, it is time something was done about it.

There is undoubtedly a chance for any butcher to be inhuman about his work if he happens to be cruel or careless. Most people do not like to see any such work going on, and keep as far away from it as they can; and those who amuse themselves by going through slaughter-houses, in Chicago or elsewhere are not apt to be persons of very delicate nerves.

The public, however has a responsibility in this matter, and there is a reason why butchers should not be compelled to take life so quickly as by as merciful methods as they do. The Hindoo believes that the condition of mind in which an animal is at the time of its death has an influence over the person who eats the meat; and though this may seem rather far-fetched, if it is true that terror and torture have an evil effect upon the health—as they undeniably do it might well be that these emotions would effect the conditions of an animal so that the flesh would not be as fit for food as it would as properly killed without unnecessary cruelty. But all this is beside the question. The real point at issue is that we cannot afford to have unwatched and uncontrolled a class of men in the community who are so brutal, so callous and so cruel that they will deliberately or carelessly torture a helpless animal.

YERY SIMPLE INDEED.

Human saliva is more deadly to the rattlesnake than the rattlesnake's venom is to the human being. This is said to be a fact which has been repeatedly proven by scientific men. A few days ago a Huntington, Ind., physician introduced one drop of human saliva into the mouth of a healthy rattler and the serpent died in just four minutes. This will be valuable information to people who live in a anrke-infested region. When, in their rambles through field and forest, they meet with a rattler, all they have to do is to yank him up by the neck, pry open his jaws, spit in his mouth and he's a goner. It is a sure way and simpler than clubbing him to death.

LA GRIPPE QUICKLY CURED.

In the winter of 1898 and 1899 I was taken down with a severe attak of la grippe says F. L. Hewett, a prominent druggist of Winfield, Ill. The only medicine I used was two bottles of Chamberlain's Cough Remedy. It broke my cold and stopped the coughing like magic, and I have never since been troubled with la grippe Chamberlain's Cough Remedy can always be depended upon to break up a cold and ward off any threatened attack of pneumonia. It is pleasant to take too, which makes it the most desirable and one of the most popular preparations in use for these ailments. For Sale by L. G. Stone.

PNEUMONIA FOLLOWS A COLD.

But never follows the use of Foley's Honey and Tar. It stops the cough, heals and strengthens the lungs and affords perfect security from an attack of pneumonia. Refuse substitutes. Sold by Geddes & Harding.

HOW TO CURE THE GRIP.

Remain quietly at home and take Chamberlain's Cough Remedy as directed and a quick recovery is sure to follow. That Remedy counteracts any tendency of the grip to result in pneumonia which is really the only serious danger. Among the tens of thousands who have used it for the grip not one case has ever been reported that did not recover. For sale S. G. Stone.

Schley at Santiago

BY GEORGE EDWARD GRAHAM.

The intrepid Associated Press war correspondent who was aboard the U. S. S. Brooklyn during the entire months of the campaign. Illustrated with photographs taken by the Author during the fight.

The Most Sensational Book of the Day.

The true story of the famous exploits of the Flying Squadron under Commodore Winfield Scott Schley including the blockade and destruction of the Spanish fleet. TOLD FOR THE FIRST TIME.

Contains an autograph endorsement and account of the battle by Rear-Admiral Schley.

"The facts of the story of the movements and operations of the Flying Squadron as author tells them in this book are correct."
—W. S. SCHLEY.

An interesting narrative of facts. Explains so called "Retrograde Movement;" the "Loop;" the "Colon Problem," and settles conclusively every salient point of the Court of Inquiry.

THEODORE ROOSEVELT, when Governor of New York, said: "Mr. Graham's story is the most interesting account of the naval fighting during the war. It reads just as if he had been taking photographs instead of words the guns."

THE NEW YORK HERALD says: "Mr. Graham, in the telling of facts, leaves the reader free to make the deduction that several naval officers need a Court of Inquiry to re-establish their reputations, if they can be re-established."

For years past the public has had its interest alternately aroused and satisfied by the publication of articles and books on the Battle of the Yalu and Santiago. Now comes a work which has been created, and the American people will read it with the same avidity as it devoured and as the eyewitnesses saw it. It contains special contributions. Outfit and books now ready. Agents wanted everywhere. ACT QUICK. Now is the time. $1.25, $2.25, $2.75, according to style of binding.

NEARLY ALL OF INDIANA'S SUCCESSFUL FARMERS

Business Men and Home Folks Read The Indianapolis Journal.

IT IS THE BEST ALWAYS

Because it is a splendid representative American morning newspaper, carefully edited, clean, bright and able, a wise counselor for old or young, patriotic and national from end to end.

Because it is accurate and fully reliable. Time spent reading the Journal is never wasted. The matter is so well arranged that you always know just where to find what you want. Then, too, you feel that you can believe what you read in the Journal without affidavit.

Because it gives, by actual comparison, more columns of news than any other Indiana paper. It is an 8 to 12-page paper every week day; 20 to 32 on Sunday.

Because it prints the most complete and accurate Market Reports.

Full Associated Press Markets, with special wires to New York, Chicago, Buffalo and Louisville.

Highest, lowest, opening and closing bids on Stocks and Bonds.

Representatives at Union and Interstate Stockyards here at home, with special articles daily.

Representative sales and Indianapolis Wagon Market.

Afternoon papers are printed too early to get full market reports. Make comparisons and see. The Journal reaches you early in the morning with fresh and reliable information with which to proceed to your day's business.

Because it prints an abstract of every Indiana Supreme and Appellate Court decision. Also all local court news and many important court decisions handed down in other States.

Because it has the best Washington correspondent in the field. He keeps you thoroughly informed on all National Affairs, and often has special signed letters.

Because it carries the full reports of the Associated Press, with cables all over the world.

Because it has a special correspondent in every Indiana town of size. All important happenings are promptly chronicled.

Because it has a special department of farm news.

Because it prints a better sporting page than any other Indiana paper.

Because it prints all those features dear to the heart of most women. It leads in foretelling changes of fashion, in society matters, cooking recipes and other subjects of interest to good housekeepers.

Because it prints every class of news that any other paper circulating in Indiana prints, and much more than most of them.

Because it does not use cartoons and illustrations merely as space fillers—good and poor indiscriminately—as do many papers. Good cartoons and illustrations are used moderately.

Because it does not print vile or offensive news or advertising matter. The majority of patent medicine advertisements, with their awful illustrations, are considered objectionable, and are not admitted.

Because it is Republican and conservative, and confines its politics to its editorial columns. The news columns give the truthful, impartial facts.

Because it costs only 10 cents a week (Sunday 5 cents extra), and puts before you fresh, clean news of the city, State and country up to the hour of going to press.

Eczema, Psoriasis, Salt Rheum, Tetter and Acne

Belong to that class of inflammatory and disfiguring skin eruptions that cause more genuine bodily discomfort and worry than all other known diseases. The impurities or sediments which collect in the system because of poor digestion, inactive Kidneys and other organs of elimination are taken up by the blood, saturating the system with acid poisons and fluids that ooze out through the glands and pores of the skin, producing an indescribable itching and burning, and the yellow, watery discharge forms into crusts and sores or little brown and white scabs that drop off, leaving the skin tender and raw. The effect of the poison may cause the skin to crack and bleed, or give it a scaly, fishy appearance; again the eruptions may consist of innumerable blackheads and pimples or hard, red bumps upon the face. Purification of the blood is the only remedy for these vicious skin diseases. Washes and powders can only hide for a time the glaring blemishes. S. S. S. eradicates all poisonous accumulations, antidotes the Uric and other acids, and restores the blood to its wonted purity, and stimulates and revitalizes the sluggish organs, and the impurities pass off through the natural channels and relieve the skin. S. S. S. is the only guaranteed purely vegetable blood purifier. It contains no Arsenic, Potash or other harmful mineral.

"I can cheerfully endorse your S. S. S. as a cure for Eczema. I was troubled with it for 25 years and tried many remedies with no good effects, but after using a few bottles of S. S. S. was entirely relieved. Wm. Campbell, 313 W. Central St., Wichita, Kan.

RULING ON REMUNERATION.

State School Superintendent Jones has received a report of a decision of Judge Capron, of the Fulton circuit court of interest to all county superintendents, county commissioners and county councils. The court decided that the county superintendent shall receive necessary office expense and the regular per diem for all days on which he is actually employed in school work whether the county appropriates enough or not. W. S. Gibbons, county uperintendent of schools presented bills which the county commissioners refused to allow. A reunion of graduates of the common schools of the county was held in a grove. The county superintendent counted his attendance educational work and asked for his per diem, but the commissioners deducted it from his bill. All told, he brought suit for $336.55.

The court, however, deducted from the claim bills for telephone tolls, and held that the county commissioners have no right to pay such bills for any county officer. The superintendent used the telephone in talking to teachers in different parts of the county. County assessors, who are paid per deiur instead of a salary, are concerned in the decision.

A Goshen chap was sent to jail for sixty days on a charge of having visited prohibited houses in that place. After reaching jail it was ascertained that he had $118 in his pocket. He was then sent to the Elkhart stone pile as the county does not propose to board him.

Canajoharie, N. Y., caps the climax of the matrimonial record in the marriage of John Barlow, 107 years old, to a well known widow, 97 years old. Mr. Barlow is described as a wonderfully preserved old man. He frequently takes long walks through the country and by his retentive memory has for 75 years been a court of last resort on boundery line disputes. He has very accurate knowledge of the topography of the country which surrounds Sloansville, Scholarie county, and Oak Ridge and Charleston Montgomery county. He has been a farmer all his life and elected as highway or road commissioner many times. He has never been compelled to consult a physician or require the service of a dentist or occulist. He is bald-headed and his face is adornod with shaggy white whiskers. Mr. Barlow says he has drunk whiskey and chewed and smoked tobacco nearly all his life. He has two sons who are great-grand fathers thus making the old man a great-great-grand-father. The account neglects to say a word in behalf of the 'blooming widow.'

April is a month which marks the anniversary of a great many important events in American history. April 9, 1865, Lee surrendered to Grant at Appomattox; April 12, 1861, Fort Sumpter was fired upon by the confederate forces; April 14, 1865, Lincoln was assassinated; April 19, 1775 the Revolutionary battles of Lexington and Concord were fought. April 27, 1822, General Grant was born; April 30 1789, Washington was inaugurated as our first president.

Considerable talk is heard about the cases of alleged smallpox in the country. Not a few good people believe the afflicted ones have nothing more severe than chickenpox. This may be true, but reputable physicians believe it is smallpox in a mild form. Be that as it may, no harm can come if it is regarded as smallpox, and those afflicted and those exposed kept under quarantine restrictions, and other people kept away from it, even if it really should be chickenpox. Is it not the safer plan to pursue? There is no occasion for alarm, by any means. No harm can result from the exercise of as much caution as possible. Confine the disease, whatever it may be, and keep it from spreading.

A FINE TRACT.

Some time ago we offered for sale a fine tract of land on which there was a growth of nice young timber. And as some of you were very much disappointed when the other fellow bought it, now we offer something much more desirable and give some one the chance of a life time. We are told that fortune knocks once at the door for each of us, and this knock is for you—the fortunate man will not be the one who delays opening the door.

This farm of which we refer consisti of 120 acres of good land, with buildings and orchard. Lies nearly level; no county ditches on the farm and never will be. Is not far from Butler. We offer this farm for a few days for $5,[illegible] We will guarantee to give you $5[illegible] for the saw timber if you should wish to sell it; and after this is taken off you can then cut five thousand cords of wood and still have all left you will need on the farm. Now do not forget that delays are dangerous, and that prompt action means a fortune.

Thousands Have Kidney Trouble and Don't Know it.

How To Find Out.

Fill a bottle or common glass with your water and let it stand twenty-four hours; a sediment or settling indicates an unhealthy condition of the kidneys; if it stains your linen it is evidence of kidney trouble; too frequent desire to pass it or pain in the back is also convincing proof that the kidneys and bladder are out of order.

What to Do.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy fulfills every wish in curing rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often during the day, and to get up many times during the night. The mild and the extraordinary effect of **Swamp-Root** is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists in 50c. and $1. sizes.

You may have a sample bottle of this wonderful discovery and a book that tells more about it, both sent absolutely free by mail. Address Dr. Kilmer & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper.

Some say it was better than a game of "Spat them Out," "Postoffice," etc. —Press.

DIED FROM DRINKING LYE.

Little Carrol Manor, nearly three years old, whose parents reside in Albion, died last week from the effects of having swallowed some lye in October 1900. The lye had eaten his throat badly before antidotes were given him. He continued to decline until death. A post mortem disclosed the fact that the esophagus for four inches above the stomach had so nearly closed that the opening was not larger than a knitting needle and through this passed all the nourishment he received. It is said of him that intense thirst would seize him at times and in a single day he had attempted to swallow over thirty gallons of water, then emitting it, in the vain efforts to allay his thirst.—Kendallville Sun.

WORTH $300,000,000.

The President of a certain big Oil Company is said to be worth $300,000,000. A tidy bit of money and no mistake. And yet he isn't happy. In an address to a Bible class he spoke of trials and troubles of the rich and the loads they have to carry. A young lady whispered to a friend that he might wear a Benson's Porous Plaster on his back or, better still, divide the money among the members of the class. I don't know why her idea about the plaster makes me want to laugh, but it does. All the same I have seen plenty of people laugh after putting Benson's Plasters on their backs or chests, or on any other spot where there was weight, heaviness, weakness or pain. It may be the sharp stabs of neuralgia, the aches and wrenches of rheumatism; it may be colds in muscles or bones; it may be those kidney or lumbago thrusts that make you yell as at a dog bite; or it may be a strain or cramp, *anything* that wants quieting and comforting. Dont bother with salves, liniments, lotions, etc., or with any of the stupid and useless old style plasters. Clap on a Benson's. It relieves *at once* and cures quickly. It stops the pain and makes you laugh for the very ease and good feeling of it. But watch out against imitations and substitutes. All druggists, or we will prepay postage on any number ordered in the United States on receipt of 25c. each.

SHERIFF SALE.

By virtue of a certified copy of a decree to me directed from the clerk of the circuit court of DeKalb county, Indiana, in a cause wherein Alvin Livergood is plaintiff, and Catharine Whitman is defendant, requiring me to make the sum of one hundred thirty-eight dollars and twenty-five cents, with interest on said decree and costs, I will expose at public sale to the highest bidder, on

Saturday, the 15 day of March A. D., 1902.

Between the hours of 10 o'clock a. m. and 4 o'clock p. m. of said day, at the door of the Court House, in Auburn, DeKalb County, Indiana, the rents and profits for a term not exceeding seven years, the following real estate to wit:

Commencing at the north east corner of the north west fourth of the north east quarter of section twenty (20) in Township thirty-five (35) north of range fifteen (15) east from thence running south forty (40) rods fourteen feet (14) and eight (8) inches thence west forty (40) rod fourteen (14) feet eight (8) inches thence north forty (40) rods fourteen (14) feet and eight (8) inches, thence east forty (40) rods, fourteen (14) feet and eight (8) inches to the place of beginning containing ten (10) acres and sixty-three (63) rods except chool house lot; all in DeKalb County Indiana,

If such rents and profits will not sell for a sufficient sum to satisfy said decree, interest and costs, I will at the same time and place expose at public sale the fee simple of said real estate, or so much thereof as may be sufficient to discharge said decree, interest and cost. Said sale will be made without any relief whatever from valuation or appraisement laws.

FARMING VERSUS RAILROADING.

A young man wants to know if he does not stand a better show to make his way in the world by taking up railway work than he does to keep plugging along on the farm. We do not think that he does, if he is only just an average, common place fellow. If he should, however, be one of the rare sort which when trained and developed would would have the ability to boss 5,000 employes and increase the dividends for the stockholders of a road, he then should skip off the old farm just as quickly as possible and get a place as section hand and commence to climb for the top. But for just the every day young man who in the railway service could never climb to anything higher than freight conductor or local agent at some little way station, the farm is by all odds the better place; it is a safer place. A man is free from the nervous strain incident to the railway work, and fewer temptations beset him, while, more than all, he is independent and is not bossed by some chump a notch above him. The roads are being consolidated so fast that the number of choice positions is becoming less and less, and promotion comes slower and slower. Then the road is no place for any man past fifty, just when a man is at his best; roads won't have him. Summing the case up, it may be said most truthfully that today no occupation of any kind, professional or mechanical, offers better inducements to the average young man than the farmer and its varied interests—not the old, slipshod, happy go lucky type of agriculture, where a man does business with one "gallus" and moon signs, but a broad, intelligent, practical and sensible working of the soil and stock growing. It's the best business in America to-day when run right.—Farmers Guide.

TIME TO STUDY THE SEED QUESTION.

It will pay well to spend a few hours these winter evenings in looking over the seed catalogues to select the varieties we want to plant in the spring. Most farmers intend to have better crops this year than last, and especially better gardens. "To do this," says the Indiana Farmer, "one essential is to plant better seeds. In field seeds we should strive to find the most perfect and vigorous and the most carefully cleansed, and no expense should be spared to get the very best that are to be had. So much of the success of the crop depends on perfect seed that we can well afford to write numerous letters and to travel miles if necessary in the quest. The name of dealers in corn, clover seed, oats and potatoes can be found in our advertising columns. Samples for inspection should be asked for from different dealers and growers, and all care taken to get the best of each kind. In garden seeds we must trust the honesty of the seedsmen to a greater extent. If you order soon you will be most likely to get what you want, if you wait till near planting time the probability will be the other way. The first comers are best served, as a rule."

The demonstration that the republican caucus cannot safely agree upon the substantial relief for Cuba asked by President Roosevelt is leading, apparently, to a compromise of the matter that is little short of disgraceful. It is likely that the Sibley proposition to accord a 20 per cent reduction, until December 31, 1903, will be agreed upon. That means nothing of consequence to Cuba. If the beet sugar men are correct in their view of the effect the entire sum thus remitted from the tariff will go to enrich the sugar trust. Cuba will get no more for her sugar crop than now. The Cuban laborer will get not a cent more wages and the individual cane-raiser will sell his product to the trust mills for not a centavo more than he now receives. The position of the republicans is not an enviable one and their dlemma is not likely to be solved by the action above indicated. It is practically an agreement to smooth over the conflict inside the party and suppress the issue of Cuban tariff concessions in substantial form until after the congressional elections of the present year. The make-shift measure of 20 per cent reduction for a single year will save the president from a clear defeat and will still permit the beet sugar men to hold their ground and go before the republican voters with the issue of the protection of their industry.

There has been much hippodroming of the German prince for the purpose, as announced from the other side, of cementing the friendship of the two nations. It is burlesque diplomacy to attempt to strengthen the friendship of nations by pagentry. The prince's address at the banquet at the Waldorf-Astoria was not happy, and emphasized a gulf wider than the Atlantic that separates autocracy from democracy. The German thrones hates and fears the press and it appears from his speech that journalism which, could suggest nothing to his brother but interviews, mines and explosions, which however, like Farragut, he was determined to brave. He could think of no better comparison than to liken editors to his brother's generals in the field. His words were not well timed. How could they be? Prince Henry is out of his habit at in this country. Our antecedents, adjacents and ideals are different from his.

A rural editor who was presented with a bag of red apples by one of his country subscribers wound up a quarter column acknowledgement of the kindly act thus: "The farmer holds the key to the country's prosperity. To him we look for the salvation of the republic. He tills the soil and, with the help of kind Providence, produces the result which, when coined into money, furnishes employment to the countless wage earners throughout the nation. It is his money which supports all classes of people, rich and poor, and greases the wheels of commerce all over the world.

The agricultural department at Washington estimates that twenty-three per cent of last year's crop of wheat is still in the farmers' hands; that twenty-nine per cent of last year's corn crop is yet unsold or fed and that thirty per cent of oats is yet in farmers hands. The reports received by the department make it manifest that the wheat crop of last year was one of the largest ever grown; that the corn crop was the smallest, with one exception, in twenty years, and that the oats crop was also much below the average.

The telephone girl and the bill clerk to whom she had promised her heart and hand, were sitting in front of the fire place talking about the happy days to come when they would be one. From one little detail to another the talk finally drifted to the subject of lighting fires in the morning. On this point the young man was decided. He stated it as his emphatic opinion that it was a wife's place to get up and start the fires and let her poor hard working husband rest. After this declaration there was a silence for the space of about three quarters of a second. Then the telephone girl thrust out the finger encircled by her engagement ring and murmured sweetly, but firmly: "Ring off please. You have got connected with the wrong number."

The new banking bill which the house committee on banking and currency has agreed upon is a work of art. It ought to be framed and hung up in every house in the country. It proposes to empty the national treasury into the national banks—authorizing the secretary of the treasury to deposit all government funds in excess of $50,000,000 in those banks. The banks are to have the use of this enormous amount—now over $1,100,000,000—at the rate of 1 per cent per annum and in addition to that are to be allowed to issue notes to the full extent of their capital—now $689,000,000. This is banking and currency reform with a vengeance. It comes very near being what Senator Beveridge calls "conservatism." We hope that congress will pass it. There will then be no need of looking for an "issue" for the next campaign.

The Candidate—He kissed the babe and rubbed the heads of Sam and sister Sue; he swore the twins were beautiful and wished that he had two-but that doesn't count. He ask about the corn bread, which he vainly tried to chaw, and forwith begged for the receipt, of course that tickled ma—but that doesn't count. But just before he left he stopped and winked, closed up his jaw, and slipping out behind the barn he took a drink with pa—and that's what counts.

The local newspaper shoul be found in every home. No children should be brought up ignorant who can be taught to appreciate home papers. It is said to be the stepping stone to intelligence in all those matters not found in book. Give your children one foreign paper with not one word about any person, place or thing they ever saw or heard of, and how do you suppose them to be interested? But let them read the home paper and hear from people whom they meet and of places with which they are familiar, and soon an interest is awakened which increases with the arrival of every local paper. Thus a habit of reading is formed and those children will read papers all their lives, and become intelligent men and women, a credit to their ancestors and strong in the knowledge of the world as it is to-day.

Prof. Hicks, the weather prophet, says that March is to be a stormy month. Changes of temperature will be extreme and there will be much wind, rain, sleet and snow. The first storm period will be central about the 2nd. and 3rd. The second storm period will cross the continent from the 8th to the 10th and may continue until the 16th. Another disturcance may be looked for the 19th and 20th. The equinoctial storm period covers from the 21st to the 27th bringing snow and blizzards to many parts of the country. A cold wave is predicted to follow this last storm period, changing to warmer as the month goes out.

WONDERFUL ELECTRICAL DEVELOPMENT.

Nothing in the whole range of modern scientifics progress can equal the phenomenal record made in electrical development during the past twenty-five years.

When we consider how general has become the use of incandescent lights and trolley cars throughout the length and bredth of this country, and how dependent we are upon them at the present time, it is difficult to realize that less than three decades ago there were no such things in existence. Of course the scientific men of the world were perfectly well aware of the fact that electricity contained hidden possibilities, both as a motive power and as a means of illumination, but it was not until the nineteenth century was waxing old that trolley cars and incandescent lights became tangible realities.

But the electrical achievements of recent years have not been restricted to trolley cars and incandescent lights by any means. On the contary, electrical energy has been harnessed in various other ways and made to perform many other wonders equally as great. We are not in possession of statistics for the country at large, but for the south the latest reports show that the total amount of capital employed in the electric lighting industry aggregates $75,000,000, while the capitalization of the various electric railway systems aggregates $150,000,000.

In looking back over the past generation, which has witnessed so many wonderful transformations in the section, we cannot help wondering what its next generation will bring forth.

The appellate court has affirmed a judgement holding that where a man signed and acknowledged deeds conveying away his land and deposited them in a bank to be delivered back to him if he calls for tnem, and if not to be given to a friend for delivery to the grantees after his death, there was no such delivery as gave the guartine any right to a claim on the land upon receiving the deeds after he died. The question arose from a dispute over land which John D. Stout, of Morgan county, had undertaken to dispose of in this way.

MRS. C. E. STRAIGHT.

A WISCONSIN PIONEER

Recommends Pe-ru-na as Being Worth its Weight in Gold.

Hon. John Paulin, Sr., a pioneer of Port Washington, Wis., is held in high esteem by the residents of that place. He is one of the oldest citizens. In a recent letter he says:

"I have used Peruna with good results for coughs and colds. It has also cured my catarrh which alwrys became worse when affected with but a slight cold. I am recommending Peruna because it is worth its weight in gold."—JOHN PAULIN, SR.

Mr. A. Howell, Marietta, Ga., writes: "I have been troubled with catarrh in head, throat and stomach for several years, and from accounts that I have read in several newspapers of the good effects that many had received from Peruna, and whose veracity could not be doubted, caused me to give it a trial, and I bless the day that I did make a trial. It has made a new man of me.

"I was all my life up to about five years ago a very healthy man, and about that time I was troubled with catarrh. I tried a number of prescriptions from different doctors but none seemed to relieve me until I commenced the use of Peruna, and from its use I can truly say that I have been greatly benefited.

"I am now in my eighty-seventh year and can walk and get about as well as many much younger than myself and attribute it greatly to the use of Peruna. I keep some on hand all the time, and consider it the cheapest medicine in the world."—Mr. A. Howell.

J. R. Prince, East Leon, N. Y., writes: "Peruna has saved my life, and made a strong, healthy, jolly old man of me. Peruna is just what every family should not be without. I have taken very few colds since I have used Peruna, but when I do catch cold, Peruna is my medicine.

J. R. Prince.

"A minister came to me last summer and said that he had seen my testimonial in the paper, and began taking Peruna. He said that it straightened him right up—(he was troubled with kidney trouble) and Peruna cured him. I cannot express my thanks for the benefit your medicine has been to me."—J. R. Prince.

Abraham Ziegler, Piedmont, Wayne County, Mo., writes: "My wife who is now eighty-seven years old, suffered for about sixteen years from severe catarrh of the head, which affected her sight and hearing. I saw Pe-ru-na advertised in your almanac, and testimonials similar to her case attracted my attention. I got one bottle and it helped her so much that she is now using the second bottle and she thinks it is something wonderful. Her hearing and sight are both in part restored."—Abraham Ziegler.

In old age the mucous membranes become thickened and partly lose their function. This leads to partial loss of hearing, smell and taste, as well as digestive disturbances. Pe-ru-na corrects all this by its specific operation on all the mucous membranes of the body. One bottle will convince anyone. Once used and Pe-ru-na becomes a life-long stand-by with old and young.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

AN EXCELLENT TIME

At the pleasant home of Mrs. D. H. Knisley on Wednesday evening March 12th. there was a very delightful gathering of the Ladies Literary Club in honor of the three sisters Mrs. C. B. Mason, Mrs. Kimmel and Miss Fannie Abrams who were about to sever their connection with the club on account of leaving Butler. At 6 oclock all were invited to the dinning room where covers were laid for 14 members. The table was beautifully decorated with Carnations the class flower and the favors were hearts decorated with Gibson heads etched by Mrs. J. S. Patterson to these were added a carnation tied with class colors white and gold. An excellent menu was served and all the members enjoyed a pleasant visit. At the close the President presented the three sisters each a boquet of Carnations as a token of their esteem and love in behalf of the club.

Take a common iron poker, tie a short string to the end of it, wrap the string around yonr finger and put your finger in your ear letting the poker dangle. Then have some one strike the poker with a table knife at different places and you hear all kinds of chimes. It's new amusement under an old and well known game.

The pension list is being rapidly reduced by the dying off of our old soldiers. The defenders of the flag and savers of the union are rapidly passing to that bourne whence no traveler returns. But the dear old soldiers should be well taken care of by Uncle Sam while they live. This government cannot do to much for the old veterans of 61-4.

Eczema for Forty Years.

The Unqualified Statement of a Well Known Attorney, St. Ignace, Mich.

Some of the cures made by Dr. A. W. Chase's Ointment of stubborn and long continued eczema and skin diseases are causing much comment. People are beginning to realize that this Ointment is a wonder worker with all kinds of skin trouble. Attorney James J. Brown, St. Ignace, Michigan, writes as follows:

Dr. A. W. Chase Med. Co. Buffalo, N. Y.—Gents:—I cannot refrain from expressing my acknowledgement for the relief I have felt from Dr. Chase's Ointment. For 40 years I was afflicted with a skin disease which was located in one spot—on my leg. I have spent at a rough estimate five hundred dollars trying to effect a cure, and not until I applied this ointment did I get relief. You are strangers to me and this letter is prompted directly because I want to say and I feel as though I ought to say it. That Chase's ointment has effected a complete cure of my affliction. Three boxes did the work on my leg. I was also suffering from itching piles and applied the ointment which gave the best of satisfaction by affording me rest at night and rapidly causing the disease to disappear. I have received such relief and comfort from the ointment that I cannot withhold expressing my gratitude. I was so long afflicted with the tortures of eczema, I feel now that I am cured, a word of recommendation is due from me. Yours truly,

JAMES J. BROWN.

The Inspired Idiot.

"They are putting uniforms on some of the students at the Chicago University," said the Clerk. "I wonder if such a thing will go there."

"It will," answered the Inspired Idiot. "The lads who wear the uniforms are working their way through college, and they will wear what they are told to wear if is nothing more than a winning smile. The fellow who wants an education bad enough to work for it isn't dropping any slumber over the cut of his clothes. If they should rig him up like a drum major of a country band he would continue his pursuit after knowledge just he same.

This uniforming college students may not be such a bad idea after all. And it was a happy thought to try it on the two lads in the information bureau of the university. Their maroon colored coats, with black braid and nickel-plated sign on their breast inform the visiting public that they haven't the price of an education. Humility is a prerequisite of knowledge. If those boys were not tagged they might think they were stockholders in the Standard Oil company. If they ever got to thinking that way a Supreme court couldn't get any information out of them.

The more you think about it the more you will be impressed with the idea of a tailor-made university. The gown and mortar board savor too much of Oxford and Cambridge, two old-fogy institutions of learning having no regard for fashion plates. We of the west are progressive. We want to see this uniform business made a part of the university extension course. Nothing would be more edifying than to see Prof. Van Holst appear in the lecture room dressed as a colonel of the Braudenberg guards. Prof. Small's lectures on political economy in the growth of hair would be more interesting if he were to dress in the uniform of a rear-admiral of the United States navy. The head of the department of domestic economy would be better able to teach if attired as a head waiter in a restaurant. It would be necessary for designs and bids for Dr. Harper's uniform.

If this uniform business becomes a steady thing the annual prospectus of the university will read something like this:

'The Chicago university offers unusual facilities to students during the forthcoming year. Besides the regular course of studies in the respective branches, we offer new novelties in fall styles of clothing. Students to poor to pay for their tuition will be furnished with natty uniforms in university colors. We employ only first-class tailors and perfect fit is guaranteed with every deploma. Those who have enough money to pay their way through college can secure the latest styles at fire-sale prices. Members of the senior class may have their choice of the uniform of a Chinese mandarin or Coal Oil Johnnie in his flourishing days. Our array of suitings for theological students admit of no comparison in style or price. Credit given to those who can furnish references. We are not exaggerating when we say that we are the best-dressed university in the country. Don't fail to attend our bargain sales on convocation day. Send 2 cents for our fall term catalogue of styles and prices.'

Then in his lectures on higher criticism, Dr. Harper will say: 'I find a marked discrepancy between the Mosaic account of the Babylonian captivity and the prevailing styles of uniform of our best Hebraic scholars. This is no doubt due either to a careless translation of the original text or a want of taste on the part of modern tailors employed in our leading universities. Dr. Swingle in his famous work says that the Babylonian captivity lasted from the introduction of creased trousers to the inauguration of the shirt waist. If this be true, then we must infer that tailor-made higher criticism cannot be impeached. It is well to remember in this connection that the Babylonians were far advanced in civilization and that our university students are the most fashionably dressed people in the world.

When these conditions exist the conditions exist the conferring of degrees will take on added interest. It may be necessary to create the degree of D. T., doctor of tailoring. Commencement days will bring forth learned theses on 'Relativity of the Psychological Norm to Last Year's Suit of Clothes,' 'The Infinitesimality of the Atom and Its Correlativeness with Deserted Trousers' and other profound questions of the hour. Then the overworked student will suffer from his trousers bagging at the knee, as well as brain fag. The professor of astronomy will explain the spots on the sun while the professor of tailoring in the next room is examining the spots on the uniform.

It shows the advancement made in our institutions of learning in the last twenty five years. When I was a boy it made little difference how I was dressed when I went to school. Many a boy whose clothes were made over by his mother from his father's cast-off suit stood higher in the class than the fellow who wore a cuff around his neck. There was many a fellow who could extract the square root of the square of the perpendicular plus the square of the hypotenuse who didn't have the second shirt to his back. The only uniform he had was one of excellence in all his studies. If you had put a red coat and green breeches on him he would have thrown a fit and ducked for the swimming hole."

"Then you dont believe in uniforms?" asked the Clerk.

"In some instances I do." answered the Inspired Idiot. "It is necessary for the elevator boy to wear a uniform so that you can cuss at him for remaining so long on the top floor when you are in a hurry. As a matter of convenience to the traveling public the sleeping-car porter should be uniformed. It keeps you from handing the quarter to the president of the road. But there is no advantage to be gained by putting a uniform on a college student. He has seventeen-hundred different ways of telling you that he is a college student already. The poor student feels bad enough about it without rigging him up like a wigwag signal aboard a man-of-war. Incidenily, you havn't heard of any order at the university for Mr. Rockefeller to put on a uniform."

BRAIN FOOD NONSENSE

Another ridiculous food fad has been branded by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for brain another for muscles, and still another for bones. A correct diet will not only nourish a pecular part of the body, but it will sustain every other part. Yet however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. You must prepair for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. A few doses aids digestion, stimulates the liver to healthy action purifies the blood, and makes you feel buoyant and vigorous. You can get Dr. G. G. Green's reliable remedies at Geddes & Hardings. Get Green's Special Almanac.

At the meeting of the executive committee of the caner's association of the state, held at the Hotel English, Indianapolis, Wednesday, the price for the season's tomato pack was fixed. Representatives were present from Ohio, Michigan and Indiana. The committee fixed the minimum price at ninety cts. a dozen for three-pound cans, seventy-five cents a dozen for two-pound cans and $2 55 a dozen for gallon cans. It is stated that last year that three-pound cans started at seuenty-seven and one half cents and went up to $1.35. Mostly three-pound cans are sold in this locality, it is said. The advance in price ought to be of benefit to the tomato growers in this country and result in a large acerage.

If the test of a good is that it shall have the power which carries the reader with it, this new history, "Schley and Santiago," leaves nothing to be desired. No one can read it without smelling the powder, hearing the roar of the guns, and feeling some frenzy of battle. It is a fine story told simple and convincingly. "Schley and Santiago" is a book that every American should desir to possess. It contains the sort of a story that will stir the spirit of patriotism in the heart of every American lad. It moves the reader by its directness. The facts the book contains need no literary aporment, and the author, appreciating this has shown rare discrimination in the way he has put together all the incidents of this remarkable cruise of the Flying Squadron.—Milwaukee Sentinel.

State Auditor Hart is still after the Lincoln Insurance and Banking company, of Hammond, Ind., for which he had a receiver appointed a few weeks ago. In a statement of the company, it is said, it was asserted that the company had assets of $200,000, but Hart says he has been unable to find any assets except some chairs and desks.

Foley's Honey and Tar cures colds, prevents pneumonia.

NEWSPAPER INDIVUALITY.

It is a mistake to suppose that individualism in the conduct of newspapers is limited to the editorial page. It dominates every line of effort. The well conducted newspaper shows the editorial personality in the treatment of all topics, all news, all opinions, if it has a really individual management. If it has a composite editorial director subject to the whims of clique, or class or a party, it also shows that more plainly. Judge Tomas Ross, of Chicago, gave these excellent suggestions to provincial newspader men:

"The loss of individualism in any enterprise, is to be regretted. No matter how many readers a newspaper may have it can never become a great paper editorially unless it has one responsible editor whom the people know and who knows the people. Here is where the conntry editor must be looked to for the perpetuity of the honor of the newspaper profession. The country with its pure air, produces not only all that which sustains men, but it likewise produces men; and it breadens mankind in general, while the cities, the congested centers of population burn and consume. The atmosphere in the cities is not healthy, either from a moral or physical standpoint and rural districts must be depended upon to furnish the physicial and moral stamina of the Nation; and the country editors Must naturally be depended upon to formulate and control the editorial morals of the newspapers of America."

Cities in Kansas are settling with men who had property destroyed by Carrie Nation and her fanatical associates, the Supreme Court of that State having decided that if the executive and police authorities of a city fail to protect property from destruction by a mob, the city is liable in damages to the owner of proderty so destroyed. Topeka settled with a dozen or more saloon-keepers last week paying each of them $1000 from the city treasury. Mrs. Nation's lawless pranks were applauded by many people notwithstanding the fact that they were a vicious kind of anarchy. Carrie Nation only injured the cause of real temperance. Tempetate results cannot be attained by intemperate methods; and when fanaticism, which is born of evil is given free rein, disaster is sure to follow.

AN OLD BARN BURNED.

Thursday evening of last week, the barn on the Phillips farm, located 3 miles west and one mile south of Montpelier, was consumed by fire. Over forty tons of hay, one hundred bushels of corn, cultivator and hay rake were burned with the barn. The contents were covered by insurance and there was also some insurance on the building. No cause can be attributed for the fire.

The barn had stood for over fifty years, being one of the first barns built in Superior township. It however, yet remained in fairly good condition and would have withstood many more storms.—Bryan Democrat.

DANGERS OF PNEUMONIA.

A cold at this time if neglected is liable to cause pneumonia which is so often fatal, and even when the patient has recovered the lungs are weakened making them peculiarly susceptible o the developement of consumption. Foley' Honey and Tar will stop the cough, heal and strengthen the lungs and prevent pneumonia. Sold by Geddes and Harding.

NEARER THE GRAVE.

Excuse me but are you forty? If so you can appreciate the truth of Colonel Dryden's remarks: "A man can't be a regular, out and out first class fool until he has reached the forty mark. He can be a dude a twenty, an idiot at thirty-eight, but not a full-fledged, undulterated fool until he has struck two score by the clock. After a man has reached forty he should give up flirting fabricating and getting full. His stomach won't stand the racket. The erstwhile copper lining has departed. His inside is worn out and it would be wise for him to stick to ginger ale and milk shake. There is nothing so indicative of the donkey as for an old fool to try to act like a young fool. He may smoke cigaretts, part his hair in the middle, wear a red tie and a chrysanthemum in his button hole but still everybody realizes that he is nearer his grave than his cradle.—Decatur Democrat.

The "Schley and Santiago" story is, course, one of thrilling interest, although the pleasure of reading it is painfully marred by the thought of the envious and bitter controversy that has shamed our navy and the country itself. That Rear-Admiral Sampson should have felt most keenly his misfortune by reason of his absence in not being "in it" at all and so just missed his supreme personal opportunity, is not strange. That having missed the credit of the victory, he should have allowed his consuming selfishness to deprive him of all magnanimity after the victory, has proved to be after all his deepest misfortune. That mistake has cost him dearly. It is Schley's magnanimity in bearing alike toward Sampson and Gervera on that historic occasion which has gone so far toward winning for him the decisively favorable judgement of the people throughout the country.—Chicago Tribune.

A sentimental editor asks: "Are there any sweeter words in the English language than these: "I love you?" Perhaps not; but the words, "Here's that dollar I borrowed," are not lacking in eloquent and delightful enunciation.

The strenous efforts of the house of representetives to reach adjournment day without doing anything to injure the trusts and the senate working overtime to saddle a ship-subsidy bill on the country ought to be sufficient guarantee of a big republican campaign fund. And it is.

The battle is still raging at Washington between the sugar beet and Cuban reciprocity. Since official patronage has taken a hand on the side of reciprocity it is beginning to look like the sacred principle of protection is about to get a severe jolt in the region of the collar button.

At a country fete a conjurer was performing the old trick of producing eggs from a hat, when he remarked to a little boy: "Your mother can't get eggs without hens, can she?" "Of course she can!" replied the lad. "Why how is that?" asked the conjurer. "She keeps ducks," raplied the boy, amidst roars of laughter.

The electric light was first shown in this country at the Centennial in 1876, twenty-six years ago, but the public was so skeptical in regard to it that it was not till 1982 that electric lighting in its modern aspects was begun. Since that date, however, the rapidity with which it has been brought into general use is almost without a parallel in history.

The wind storm of Wednesday evening played havoc southeast of this place. The residence of John Wimer seemed to be in the path of the storm. It blew down his wind mill and up set his sheds. An old harvest reel was hurled against a large plate glass window wreaking it; and a piece of lumber was hurled through the front door crashing the panels. We have heard of no other damage done in this vicinity.—Dispatch.

It has been suggested and the idea would prove a good one to show the world that the Ameridan people are not in sympathy with eastern snobocracy, that President Kruger be invited to this country and a reception given in his honor at Chicago on the Edward VII is crowded king. The demonstration that would greet the representative of the South African republics would undoubtedly prove an educator to the snobs on both sides of the water.

Chicago today is a city of nearly 2,000,000 inhabitants. Do you know what these figures mean? They mean that within the borders of the municipality are more people than live in either the state of Georgia, or Minnesota, or New Jersey, or Virginia, or Wisconsin. They mean that there are gathered together more people than occupy Alaska, Arizona, Colorado, Delaware, Idaho, Maine and Oregon combined. Greater New York is about twice the size of Chicago.

THE RATH MURDER.

Those in the secret were on the quivive Tuesday evening on learning that parties were then en-route to Paulding from Hicksville, and had communicated with parties here by telephone, to be ready to receive them about the hour of 8 o'clock with relay, that no delay would occur. The parties connected claimed to possess true inwardness concerning the murder of Enos Rath, which was enacted in Hicksville nearly two years ago, and for which crime two of our young men are now doing service in the penitentiary, and which secret confession they wished disclosed, and in possession of the authorities. They were met here by interested parties, and in the shades of night, and all unmindful to our citizens, quietly continued their way to the county seat, where it is claimed they made a clean-cut statement of the entire affair, to attorney, ex-Judge W. H. Shook

The parties connected in the case are Mrs. Haney, at present a resident of Auburn, Ind., and Mrs. Chas. Wier, a resident of Hicksville. It was at the Wier residence on the fatal night in November, 1899, from whence all evidence of the fatal tragedy eminated; was hatched, and from which concoction, the boys were convicted. Mrs. Wier was an important witness in the case and it was believed that Mrs. Haney, then a resident of Hicksville, was in the house at the time, but no evidence could be produced sufficient to bring her out as a witness.

These two women come now with a full and free confession, and appear to produce evidence very convincing, of the innocence of those now in servitude, and it will implicate parties connected, and it would appear that plenty of witnesses can at any moment necessary, be brought forward to substantiate their statement.

There appears a desire to suppress this matter from home publication and the Bee has even been requested to make no mention, but such appears foolish, same being now common property, and other papers will eagerly bring it to light. This being the case those connected are very remiss in giving information, regarding connecting circumstances.

It is well known, that since the terrible tragedy detective Streifling of Fort Wayne, the Rumbaughs, J. P. Monney, and parties in Hicksville have been indefatagauble in their labors, and through their strenuous efforts matters thus far have been accomplished.—Antwerp Bee.

LOCKJAW FROM COWEBS.

Cobwebs put on a cut lately gave a woman lockjaw. Millions know that the best thing to put on a cut is Bucklen's Arnica Salve the infallible healer of wounds, ulcers, sores, skin eruptions, burns scalds and piles. It cures or no pay. Only 25c. at Stone's drug store.

The days for sugar making are now at hand and the maple trees and cob piles will be worked about equally. In this country there are plenty of maple trees, but in some localities where corn is the long suite, there are no maple trees, and the juich of corn cobs is sweetened and made into genuine maple syrup. And to the credit of the corn cobs, be it said that it takes an expert to tell the difference.

Nine Butler mail wagons were shipped this week to be used in the rural districts of Kansas City.

TRUTH BETWEEN CAMPAIGNS

The Indianapolis News, a republican journal tells the truth between campaigns says "the republican party is in danger of making an exceedingly unpleasant record. If it refuses relief to Cuba, or grants an inadequate reliéf, cuts off revenue without reducing taxes, refuses to protect the shippers and the public generally against the unfairness of the railroads, passes a ship subsidy bill and indulges in gross extravagence, it is not impossible that it may learn once again how quickly majorities may disappear before the indignation of any outraged people. So far congress has been in session for three months, and it has not yet done a single thing except pass a few appropriation bills.

THE SPRING MILLINERY.

The majority of the new hats are distinguished by the decided downward flar at the back. Another important item in up-to-date millinery is the low almost flat crown. The new straws and braids, the new flurral and other trimmings are pictured and described at length in the April Delineator, which also advocates a page to illustrating the various steps in the construction of a stylish Marquise hat from a Fifth Avenue shop.

Repairing Neatly Done

Never thought of such a sign for a medicine did you? Well, it's a good sign for Scott's Emulsion. The body has to be repaired like other things and Scott's Emulsion is the medicine that does it.

These poor bodies wear out from worry, from over-work, from disease. They get thin and weak. Some of the new ones are not well made—and all of the old ones are racked from long usage.

Scott's Emulsion fixes all kinds. It does the work both inside and out. It makes soft bones hard, thin blood red, weak lungs strong, hollow places full. Only the best materials are used in the patching and the patches don't show through the new glow of health.

No one has to wait his turn. You can do it yourself—you and the bottle.

This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle.

DANGER OF COLDS AND LA GRIPPE.

The greatest danger from colds and la grippe is their resulting in pneumonia. If reasonable care is given however, and Chamberlain's Cough Remedy taken all danger will be advoided. Among the tens of thousand who have used this remedy for these diseases, we have yet to learn of a single case having resulted in pneumonia which shows conclusively that it is a certain preventive of that dangerous malady. It will cure a cold or an attack of la grippe in less time then any other treatment. It is pleasant and safe to take At S. G. Stone.

Talking of mean tricks the Pierceton Record says that in the northern part of Washington township, this county, lives one of the meanest men in the state. This man keeps a large number of chickens and sells a great many eggs. This is perfectly legitimate, but he deceives his hens and thereby is guilty of obtaining money under false pretenses. He made his hen coop air tight and put curtains on the wipdows. At noon he draws down the curtains making the coop perfectly dark. The hens go to roost and an hour later he raises the curtains, letting in the light. The hens think another day has dawned and proceed to lay another egg. This is certainly a mean trick.

A SEVERE COLD FOR THREE MONTHS.

The following letter from A. J. Nusbaum, of Batesville, Ind., tells its own story. "I suffered for three months with a severe cold. REPREHENSIBLE CONDUCT.

In one of the district schools of Wilmington township several of the male pupils recently so far forgot their sense of decency as to attack their young lady teacher, who was trying to punish them for misconduct, inflicting injuries that may prove serious if not fatal. Such hoodlums as these young fellows have proven themselves to be should and no doubt will be given a dose of medicine commensurate with the cussedness they have displayed. It is indeed a shame that such hoodlums are allowed to live in a civilized community.—Dispatch.

ARTIC.

Edward Heller is reported dangerously ill and small hopes are entertained for his recovery.

Mrs. Lou Wise closed her school at No. 1 last Friday. Miss Wise taught an excellent school the past winter.

Geo. Worthington is thinking about getting a move on him since Wm. Jennings purchased the premises on which he now resides.

Jerry McClintock recently purchased heavily of the lamb wire fence. Jerry is a hustler and is bound to keep abreast of the times even if he has snow flakes in his hair.

Arthur Freed has been bothered considerably this winter with rheumatism.

Eva Wise is now doing the house work for the family of C. Dewitt.

Artic now has a city checker board.

Will Rohrbaugh, who resides south of Butler, is now cutting wood for Roger Rummel.

Wiley Bros. have quite an extensfve sugar making outfit. They have an up-to-date evaporator and gather the sap from at least 300 trees.

School was out at district No. 4 last Friday. A. L. Cornelius was the teacher.

O. S. Benjamin, who formerly taught school in Troy township, was in this vicinity shaking hands with his many friends last Saturday and Sunday. Mr. C. will enter South Bend Business College in the near future.

For benefit the of Artic postmaster we wish to state that in case patrons of the office refuse their mail, it then comes his duty to notify the publisher of the same.

The loafers club meets in daily sessions at Artic. Jerry is now the president with the planitary powers; John is the chronic dissenter; Jessie is the sage and Jake the postmaster, may be aptly likened to the Pickwickian. Fat boy, and apropos this subject we may observe that the loafers who collect at Artic lay their wires in the shade when it comes to gossiping, moreover the same may be said about most men.—Public opinion to the contrary.

YOUR FAITH will be as strong as ours if you try

Shiloh's Consumption Cure and ours is so strong we guarantee a cure or refund money, and we send you free trial bottle if you write for it. SHILOH'S costs 25 cents and will cure Consumption, Pneumonia, Bronchitis and all Lung Troubles. Will cure a cough or cold in a day, and thus prevent serious results. It has been doing these things for 50 years. S. C. WELLS & Co., Le Roy, N. Y.

MOORES.

Mr, and Mrs. Jasper woods moved on their farm in Michigan last week. Miss Otie Bloyd, the latter's sister accompanied them and will remain there two weeks.

Mrs. Mary Oiler is on the sick list.

Mr. and Mrs. Fred Bunge were called to Williams county last Saturday on account of the illness of Mrs. B 's mother.

Mrs. Alta Love and Mrs. Rosa Murray visited with Mrs. Anna Albright last Friday.

Mr. and Mrs. Lautzenheiser and daughter Blanche, spent Sunday with Joseph Pifer and family.

FRANKLIN.

Samuel Noregon is sawing wood for Frank Funk at present.

Miss Grace Haverstock has returned from Marion college and is now enjoying her vacation.

Charley Noragun's friends will be sorry to hear that he has been removed from his rooms to the pest house at Hnntington. However, it is hoped that he can come home as soon as the quarantine is raised.

John Huyck was confined to the house last week but is able to be out again.

A number from this vicinity attended the sale at Alfred Kepler's last Friday.

Al Noragon, who was called here on account of the sickness of his parents, has returned to his home in Nebraska

The storm of last week did considerable damage in the neighborhood. Jonathan Haverstock seemed to be the unlucky one The wind partly blew the roof off his barn and upset his wind mill.

Must be some attraction for Sam F. Haverstock at Ashley.

STAFFORD.

Mrs. Lucy is reported slightly better.

Cora Heckler has been very ill for about two weeks, but is now reported convalescent.

There is a rumor that Milt McCavit has sold his farm to Isaac Hose of Butler.

There is also a report in circulation that C. S. Arford has sold the Robson house to L. Peppers.

Mr. and Mrs. Nimmons and Miss Stoody moved to their new home in Grant township Thusday of last week.

An agent of the Page Fence Co., was on our streets one day last week in the company of Henry Grube, taking orders for one of the best wire fences.

Recently Wm. Wilson received two pounds of German sugar beet seed from the department at Washington. As he does not wish to plant much of it, he says, any one can have some free of charge.

Our schools closed Friday of last week after being in session 6 months. We believe our teachers gave general satisfaction, but no doubt the attendance at the four schools in the aggregate was small, for in the whole township there is less than 140 scholars of school age and it seems only about 80 actually attended school.

Mrs. Andy Miller has been ill for a few days.

Robt. Speer an aged citizen of Waterloo is dead.

Born to Truman Showalter and wife Thursday, a girl.

Al Vernier's baby has been on the sick list for a few days.

Geo. Powers little daughter was quite sick last Tuesday night.

Dr. Fanning, Sr., takes his position on the pension board, March 27th.

L. C. Hunt has been appointed postmaster at Ashley; vice J. W. Mintzer removed.

Mrs. L. C. Hunt of Ashley was the guest of Butler friends the fore part of the week.

Miss Walters dress making rooms are now located in the Van Duzen building up stairs opposite M. E. Church.

Preaching at the Methodist church next Sunda, morning and evening by the pastor. All are very cordially invited to attend these services.

Jessie Oberlin has purchased the residence now occupied by Thos. DeWitt and family. He will occupy the same as soon as posession can be had.

Miss Daisy MacGinnus returned to her home at Calument Mich., after being an inmate of the railway hospital at Pern since Thanksgiving day.

Now's the time, spring time. Take Rocky Moantian Tea; keeps the whole family well. A great medicine for spring tiredness. 35 cts. Geddes & Harding.

The Modern Woodmen are receiving applications for membership almost every meeting night. The Woodmen is the cheapest insurance society and will probably always remain so in spite of the big "bugabo" talk of "raised rates" by its competitors.

Mrs. Cora Hiner has been elected delegate to the District Convention of the Rathbone Sisters at Columbia City to be held next Tuesday. Mrs. Laura Sinclair, of Waterloo, is the District Deputy and will be assisted by Carrie M. Fanning, Past Grand Chief of the State.

THE SCHOOL ENTERTAINMENT

The enternainment given by the impusonator, Mr. Bergderfor at the M. E. Church Wednesday evening on behalf of our scnools, was liberally patronized and well received by those present. His selections were varied but mostly of a humerous nature. Several numbers from Riley, The Rescue of Lygia ect. were most excellently rendered but his masterpiece Silly Sam in which a number of imitations of animals, musical instruments, ect. of his selection. The vocal solo by Miss Bloyd was very fine as was also the instrumental solo by Miss Clark. This closes the lecture course for the season except an entertainment by the pupils of the school which will be given in about six weeks.

THEATER TRAIN.

On March 22, the Lake Shore & Michigan Southern Ry. will run a theatre train to Toledo leaving Butler at 1:24 p. m, Fare $1.45 for the round trip. For attractions at different theatres see hand bills.

F. L. FARNSWORTH'S SPRING OPENING.

The grand spring opening at F. L. Farnsworth's is proving a big success. The people appreciate honest values at honest prices. Our line is absolutely new, and as we have no back numbers to work off it will pay you to attend this sale. There is much to be gained in buying from a new stock and our store is now the leader in every sense of the word. Call in and see our big bargni s.

MISS BLOYD'S, RECITAL.

The musical recital at the M. E. church Saturday evening, by the pupils of Edwina Bloyd, assisted by Prof. E. J. Germann, of Rochester, Ind., was highly enjoyed by a small but selected audience. The pupils acquitted themselves in an admirable manner, and Miss Bloyd can well feel proud of them.

Prof. Germann was a revelation to the lovers of good music, and he was beyond question the finest pianist who ever played for a Butler audience. He is a master of the piano and takes rank with the best in the country. He also sang two vocal solos that won the admiration of all. It is seldom that both vocal and instrumental accomplishments are so fine in one person, but Prof. Germann must be an exception. Should he ever return to Butler he will be greeted with a full house.

Miss Bloyd is to be congratulated on the excellent recital given, and should have had a much larger house. She is a remarkably fine musician, and as an instructor has but few equals.

Record Poultry Farm pointers. Barred Rocks only. Birds all line bred. Farm raised, your choice of matings. Selected eggs, good hatches guaranteed.

A lot of girls in this vicinity are like cheap calico—they wont wash.

County Auditors and Clerks are to be elected in 68 Counties in Indiana this year.

An Indianapolis telegram states that State Auditor Hart may have a bill to protect fire insurance companies introduced in the next legislature. It will make every person responsible for losses caused by carelessness, and make the landlord responsible to the tenant and the owner of adjoining property for the losses of preventable fires. It will create the office of fire marshal to enforce the law. Auditor Hart believes that the effect would be to greatly lower insurance rates.

"A good Methodist and a good clergyman," says an exchange, "got to telling dreams to each other one night at a church social. "I dreamed I was in heaven and saw no Baptists there," remarked the Methodist, "I inquired where they were and was answered: They have not yet arrived they are coming by water." "I dreamed," retorted the Baptist, "that I was in heaven and saw no Methodists there, but upon inquiry I was told that they were out side the wall on six months probation.

Mr. Blank, of Blankville, Sundayed here.—Country Correspondence.

He Sundeyed there, I'll bet a horse,
Because he wanted quiet,
And dinnered there because he liked
Good wholesome country diet.
After dinner he piped awhile;
And while he piped he booked it,
Till the cook had her dishes washed,
Then he turned in and cooked it.
Then they hammocked in the yard
And sparked for fun and glory;
And while he piped or cigared
She listened to the same old story.
Then perhaps her mother came on the scene,
And gently mother-in-lawed him,
Also her dad with savage mien,
While the family bull dog chawed him.
Perhaps, however, they were not
Disturbed in either fashion,
They maybe parlored it alone
And rocking chaired their passion.
Or' mayhap, he suppered there,
And staid till cocks were crowing,
Then in the dawn, he buggyed home
Or sleighed, if it was snowing.

ORITUARY

Curtis Davis was born in Portage Co. Ohio Dec. 10, 1838 and died at his home in Butler Ind., March 19th. 1902. Aged 63 years 3 months 9 days. He was the only son of his fathers family, five sisters are living to mourn the loss of an only brother. He was united in marriage to Sarah J. Love Feb. 2nd 1864. This union was blessed with 3 sons and 2 daughters and today these children with the sisters and the lonly wife sit in the shadow of sorrow and loneliness with many other friends. He was a soldier of the great rebellion, enlisting early in the beginning of the war giving his country over four years of his service, He was a victor in all of these years, but when death came he was conqueror. He was a member of Co. G. 19th. Indiana Vol. He was in over forty engagements the principal of which were Gainsvitle, Bull Run, Spotsylvania, Wilderness, Laurel Hill, Cold Harbor, North Anna, Petersburg, South Mountain, Fredricksberg, Antictain, Fitzhugh Crossing, Gettsberg Mine Run, Hatchess Run, Weldon Railroad, Five Forks, Appomattox. His regiment came out with but 150 officers and men. Co. G. had but only 13 men left. He had never identified himself with any church, but nearing the last gave his heart to Jesus and ask for pardon, joining that army from which there is no discharge. Nearly his last words to his daughter was "It is all right and I am nearly ready to go." His last hours were hours of great suffering. Rest soldier rest the battle is over, and thou art crowned at last.

MARRIED.

On Sunday March 23, at 12:30 p. m. occurred the marriage of Miss Goldie Diehl, one of Butler's charming young ladies, to Mr. Hardie Myers, of Auburn, at the home of the bride's parents, L. F. Drash, pastor of the Church of Christ officiating.

The guests present were Mr. and Mrs. Myers, parents of the groom, Mr. and Mrs. Lee Diehl, Mr. and Mrs. Isaac Diehl, Mrs. Miller, Mrs. Bordner and Miss Pearl Culler, of Hicksuille, Ohio, who played the wedding march.

The bride was prettily attired in pink albatross. The groom was dressed in the conventional black.

Mr. and Mrs. Myers have not yet determined where they will locate, but it is probable that Mr. Myers will go into business with his father-in-law when they find a suitable place.

WOMEN AND JEWELS.

Jewels, candy, flowers, man—That is the order of a women's perference. Jewels form a magnet of mighty power the average women. Even that greatest of all jewels, health is often ruined in the stenuous effort to make or save the money to purchase them If a women will risk her health to get a coveted gem then let her fortify herself against the insidnous consequences of coughs, colds and bronchial affections by the regular use of Dr. Boschee's German Syrup. It will promptly arrest consumption in its early stages and heal the affected lungs and bronchial tubes and drive the dread disease from the system. It is not a cure-all but is a certain cure for coughs, colds and bronchial troubles. You can get Dr. G. G. Green's relible remedies at—Geddes & Harding. Get Greens Special Almanac.

Rev. Mary Strickland who assisted in the revival service at the Church of God will preach there next Sunday 10:30 a. m. and 7 p. m. Her many friends will be highly pleased to meet her again and listen to the gospel of truth and love preached by her. Those who have heard this gifted lady and those who have not should not fail to go to the Church of God next Sunday. You will not be disappointed

The meetings at the Church of Christ still continues with fine interest. There have been up to the present time 21 additions to the church with prospects for a number of others. The meeting will close on next Sunday evening. The subjects for Sundays sermons will be as follows:

10:30 a. m. What the Resurrection is to the believers. 2:30 p. m. a meeting for the men converts. The evening meeting will be held at 6:30 instead of 7:15 at which time Mr. Cobb will speak on "The Venture of Faith.

THE LAST DAY.

Miss Achasa Beechler closed a very successful term of school in the Curtis district last Monday week. The closing exercises consisted of a literary program interspersed with good music, and this was followed by a large treat, which was greatly enjoyed. An interested visitor on this occasion was Grandma Meenan, who is now 78 years of age and who was a school teacher in her native country over 60 years ago. Other visitors were Mrs. R. Meeman, Mrs. Dan Diamond and the Misses Studt. Miss Beechler will began a summer school in about five weeks in the Pl asant Valley district. —Akron, (Colorado) Press.

A. C. Gulford of Auburn will be presented by his democratic friends as a candidate for sheriff at the county convention.

The Recital by Nora Brown and pupils at the Opera House Friday evening should be liberally supported. The public can be assured of an excellent entertainment.

OUR HIGH SCHOOL RE-COMMISSIONED.

Recently Supt. J. N. Study, on behalf of the State Board of Education and by the request of Supt. Brown, visited our high school to inspect the work done there with reference to granting the school a new commission. Supt. Study expressed himself as being entirely satisfied with the work and especially commend the character of the instruction for its thoroughness in the several branches. A favorable report was made to the Board and a commission has just been received by the school.

THE MACCABEES ENTERTAIN.

Last Thursday evening the Maccabee lodge of this city, entertained thirty-one Sir Knights from Kendallville. The Kendallville team conferred the degrees upon Jacob Ginder, and the local members of the order say that the visiting team acquitted themselves in an admirable manner—in fact the work was the finest ever conferred in Butler. The lodge convened in the I. O. O. F. hall, which had been secured for the evening.

A fine banquet was served in the Maccabee hall to which all did ample justice. A fine evening was enjoyed by all present, and the local Maccabees are very thankful to the visiting bretheren for the valuable knowledge given them in degree work.

BOTH SENATORS TO PRESIDE.

It is given out unofficially that Chairman Goodrich of the Republican state committee made a recommendation to executive committee at a recent meeting which was readily acquiesced in that Senator Beveridge should act as temporary chairman of the Republican state convention next month and Senator Fairbanks be chosen permanent chairman. This arrangement will give senators an opportunity to make a key note speech as well as to gratify and please the friends and admirers of each senator.

Eczema for Forty Years.

The Unqualified Statement of a Well Known Attorney, St. Ignace, Mich.

Some of the cures made by Dr. A. W. Chase's Ointment of late years and long continued sufferings from skin diseases are causing much comment. People are beginning to realize that this Ointment is a wonder worker with all kinds of skin trouble. Attorney James J. Brown, St. Ignace, Michigan, writes as follows:

Dr. A. W. Chase Med. Co. Buffalo, N. Y.—Gents:—I cannot refrain from expressing my acknowledgement for the relief I have felt from Dr. Chase's Ointment. For 40 years I was afflicted with a skin disease which was located in one spot—on my leg. I have spent at a rough estimate five hundred dollars trying to effect a cure, and not until I applied this ointment did I get relief. You are strangers to me and this letter is prompted directly because I want to say and I feel as though I ought to say it. That Chase's ointment has effected a complete cure of my affliction. Three boxes did the work on my leg. I was also suffering from itching piles and applied the ointment which gave the best of satisfaction by affording me rest at night and rapidly causing the disease to disappear. I have received such relief and comfort from the ointment that I cannot withhold expressing my gratitude. I was so long afflicted with the tortures of eczema. I feel now that I am cured, a word of recommendation is due from me. Yours truly,

JAMES J. BROWN.

HOMEWARD BOUND.

The train goes roaring up the track,
The sun is in the west;
The smoke rolls eastward dense and black,
And I complacently lean back—
To-day I've done my best.

I think of one who waits out there
To greet me with a shout,
And I will kiss him, and we'll fare
Across the open fields to where
The lights are peeping out.

Contentment fills my heart to-night,
And fates and God are kind;
I've worked to day with all my might,
And I can feel with strong delight,
The miles recede behind.

Ah, but the years will pass away,
And I am doomed to see
A change that parents only may—
The child will be a man some day
Who waits to-night for me.

BRAIN FOOD NONSENSE.

Another ridiculous food fad ha been branded by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for brain another for muscles, and still another for bones. A correct diet will not only nourish a pecular part of the body, but it will sustain every other part. Yet however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. You must prepair for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. A few doses aids digestion, stimulates the liver to healthy action purifies the blood, and makes you feel buoyant and vigorous. You can get Dr. G. G. Green's reliable remedies at Geddes & Hardings. FOUND THE MISSING MAN.

Early last week a man was found at the side of the Vandalia track near Columbia City in an unconscious condition and apparently badly hurt. He possessed nothing by which he could be identified and was taken to the county infirmiry to wait for some one to come and identify him. The man was George Stonestreet who lives three miles east of LaOtto and had been missing for several days. Taylor Shobe of this city, visited LaOtto and found the people much excited. Searching parties had been scouring the woods and dragging the waters in search of the missing man. He had read of the finding of the injured man near Columbia Ciiy and was sure from dersriptions that he was the man. The Columbia City Post had a description of the man, and Mr. Shobe had a copy with him. The people were satisfied it was Stonestreet, and a brother went to Columbia City and immediately identified his brother whom he took home. Stonestreet has been afflicted with sudden illness since he was a child, and in this condition he had wandered from home.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

COCK FIGHTS IN INDIANA.

A special from Defiance O., to the Ft. Wayne Journal-Gazette says: Indiana is to be the scene of combat beteen game fowls of Ohio and Indiana and the conflict will take place some time this month. It is now estimated that over $1,000 will change hands on the result and the sum may reach $3,000. Two years ago there was an interstate meeting at Ligonier in which the Defiance boys won four fights out of five and they want to repeat the dose.

AN ADVANCE IN RATES.

Many of the local fire insurance agents and perhaps all of them of this city, have been notified by the companies they represent, as well as by the secretary of the local board that a flat advance of twenty-five per cent in rates is to apply from the 17th of March, as follows: On merchantile stocks in all buildings except such as are occupied as dwellings on the grade floor and on frame store buildings. All manufacturing risks and and other special hazards, including cold storage risks, mill lumber yards and grain elevators.

SOMETHING ABOUT PRIVATE POSTAL CARDS.

By an order from the Post Office Department received at the local office a great many of the restrictions placed upon the private mailing cards have been removed. Under the new regulations the private mailing card takes rank with the ordinary postal card, and will undoubtedly supersede it to a great extent. The new order provides that any card of the weight of the regular postal card can be used, providing it does not exceed 3 9-16 by 5 9-16 inches, and is not under 2 15 16 by 4 5 8 inches. On the face of this card must be printed the words "Postal Card." The cards can be used for written messages or for advertising purposes. The printing of advertisements on both sides of the card is allowed, and any or all colors of ink can be used. A 1-cent stamp is all that is required to send the card to any part of the United States or our island possessions. Under the former regulations the cards were called "private mailing cards." This name, as well as reference to the act of congress creating them, had to be printed on the card, and its use was limited.

A RATTLING TESTIMONIAL.

The following patent medicine testimonial was written by the Atchison, Kan., Globe man, who knows what he is talking about:

"I had an easy job and enjoyed health and my nerves were steady, but one day a baby arrived at my house and then began a period of stenuous life which shattered my nervous orginization. For weeks I was not able to finish a meal and I could not sleep at night. At times I would walk the floor for hours and was always in a high state of supense and apprehension, and I felt as if my brain was on fire. By means of my shaving glass I watched myself sicken and fade away, and I would have developed a hollow cough had I not been afraid of waking the baby. Every neighbor that came in had an unfailing remedy which I tried, but it gave no relief until finally some-one let the baby smell of an empty bottle of your soothing syrup and I found myself improving within an hour. I went to a druggist to buy a bottle of your syrup but the druggist said he had something just as good. Following your instructions on the wrapper I shunned that druggist as I would a reptile, and we went to another druggist who had your soothing syrup with the name blown on the wrapper togeather with your trademark. After seeing that I had the genuine, I began giving it to the baby and am now entirely recovered. I owe my life to you, and if you ever come out west you can come up and visit us, and sleep on our lounge."

It is rather late in the day to suggest the appointment of a commission to "investigate the nature and value of vaccination." That has long since been conclusively determined. The possible ill effects of vaccination in cases where pure virus is not used are also well known. No state commission with a salaried staff could possibly add to the sum of knowledge now possessed by physicians and by all others who are willing to take the trouble to gain it. As the result of vaccination, smallpox, once a terrible scourge, has sunk to comparative insignificance in the list of contagious diseases. Vaccination is the public's means of defense against a restoration of the old scourge.—New York Mail.

Physicians of the towns and cities of this vicinity have cautioned the people to be on their guard for symptoms of typhoid fever. They predict an epidemic in many places because of the long dry period and the drinking of water from shollow well, the water taking up the filth and dirt from the bottom.

A FAMOUS NEWSPAPER CORRESPONDENT.

There are few if any newspaper men in the United States with a more brilliant record than that achieved by William E. Curtis, the famous Washington correspondent of The Chicago Record-Herald. Among newspaper men as well as among the careful readers of newspapers it is generally conceded that Mr. Curtis is the dean of the large colony of trained journalists at the national capital. His relations with the eminent men Washington are so intimate and so personal that he has an immense advantage over the ordinary correspondent. They give to him their confidence, knowing that he will properly discriminate what should be said and what should not.

The newspaper career of Mr. Curtis began in Chicago in 1872. Starting as a reporter, he worked his way upward rapidly to the position of managing editor, which he resigned to become the secretary of the South American commission—a government appointment. While in Central America, producing several popular volume as the literary result of his labors. Later on in co-operation with Secretary of States James G. Blaine, Mr. Curtis organized the work of the Bureau of American Republics, and was placed in charge of that organization, and at the World's Columbian Exposition he distinguished himself by his labors as the extensive head of the Latin-American departments. As correspondents of The Chicago Record Mr. Curtis, travels carried him not only into all quarters of the United States, but almost everywhere abroad. His letters to the Record from Japan and China were published in book form; likewise his letters from England, Germany and France and also those resulting from his travels in Mexico and in South America. A letter from Mr. Curtis is published in every issue of The Chicago Record-Herald daily and Sunday.

In an address delivered at a St. Patrick's day celebration, David B. Hill said: "I have no patience with the flunkies, the sycophants and the would-be courtiers who are constantly criticising the democratic methods of our people, but who have nothing but unstinted praise for the customs and conventionalities of those who serve under royal rule. Let the attitude of this county toward monarchial governments, be that laid down by Thomas Jefferson in his inaugural address as resident, namely, "Peace, commerce and friendship with all nations entangling alliances with none."

POINTED PARGRAPHS.

Many a man charges his misdeeds up to precedent.

Love may laugh at the locksmith, but at the plumber—never.

Noah played a great game. He drew pairs and got a full house.

Matrimonially speaking, the baseball catcher isn't always a catch.

When the mercury reaches the zero mark the plumber has a lead-pipe cinch,

some married men repent in haste and some batchlors contemplate at leasure.

Long-winded individuals are usually short when it comes to paying their debts.

Originality usually consists of repeating bright remarks to people who never heard them before.

A man is always telling his wife that his household expences are higher than any other man's in town.

There are some gossipers in Butler whose tongues are long enough to lap buttermilk from the bottom of a churn.

Many a man who talks like a war hero makes his wife interview the janitor every time he finds it necessary to rigister a kick.

Thousands Have Kidney Trouble and Don't Know it.

How To Find Out.

Fill a bottle or common glass with your water and let it stand twenty-four hours; a sediment or settling indicates an unhealthy condition of the kidneys; if it stains your linen it is evidence of kidney trouble; too frequent desire to pass it or pain in the back is also convincing proof that the kidneys and bladder are out of order.

What to Do.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy fulfills every wish in curing rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often during the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists in 50c. and $1. sizes.

You may have a sample bottle of this wonderful discovery and a book that tells more about it, both sent absolutely free by mail. Address Dr. Kilmer & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper.

Zoa Phora Cures Change of Life

The Greatest Known Cure For Leucorrhea Change of Life, Painful Menses, Kidney, Liver or Bladder Trouble.

It Is the Only Safe, Sure and Ever-Ready Remedy in the Three Danger Periods in Woman's Life—Large Trial Bottle Free.

MRS. MARY A. BLOUNT, Montpelier, Ind.

Zoa Phora cures leucorrhea, painful or suppressed menstruation, flooding, laceration, kidney, liver or bladder trouble, falling of the womb and change of life.

It is one of the most marvelous of modern remedies, serves as a steady hand to guide the frail and sickly girl to and through the trying period that opens to her the untraveled path of womanhood. It proves through the trying times of pregnancy and motherhood a "woman's friend" in the truest sense of the word, benefiting and strengthening and building up when all physicians and all other remedies fail; and as she passes from the period of motherhood to the last period in life Zoa Phora is still her friend and maintains—bringing her through the third dangerous change in woman's life, safe and soundly healthy. Women by the thousands testify to the wonderful effect of Zoa Phora on their general health as well as to its marvelous power in correcting and permanently strengthening when weak.

The story of Mrs. Mary A. Blount, of Montpelier, Ind., will interest you. She says: "When I began to experience change of life I was forced to employ doctors. I tried one after another without relief. Then I turned to patent medicines. For four or five years I did this and steadily grew worse. Finally Zoa Phora was recommended to me and without any faith I decided to try it. The result was truly wonderful. I began to improve right away, and was soon completely cured. The Zoa Phora did it. From my own personal knowledge I know what a great benefit your Zoa Phora is to young girls during the change and I will be glad to furnish information to anxious mothers who may write me."

Zoa Phora is for sale by druggists, but will be sent direct, prepaid, on receipt of price, one dollar a bottle. If you are a sufferer you can make no mistake in taking Zoa Phora at once. If you are interested or have a friend who is a sufferer send for the book telling why Zoa Phora cures. It is sent free as is advice, on application from our lady physician. All communications strictly confidential.

We will be glad to send you a large trial bottle free upon receipt of 10c to cover postage and packing. Address Zoa Phora Co., Kalamazoo, Mich.

HORSE AND CHILD

Does your horse "feel his oats"? What a difference between the grain-fed and the grass-fed horse! The first strong and full of ginger, the second flabby, weak and tired out before he begins. The feeding makes the difference.

Children are not alike either. One is rosy, bright-eyed, full of life and laughter, another is pale, weak and dull. The feeding again is responsible.

Sickly children need special feeding. They don't "feel their oats". Scott's Emulsion adds just the right richness to their diet. It is like grain to the horse. The child gets new appetite and strong digestion.

Scott's Emulsion is more than food. It is a strong medicine. It rouses up dull children, puts new flesh on thin ones and red blood into pale ones. It makes children grow. Scott's Emulsion makes ordinary food do its duty.

This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle.

The DeKalb County Herald

PUBLISHED WEEKLY.

O. H. DOWNEY, Editor and Publisher.

The Herald is the Only All-Home-Printed Newspaper in DeKalb Co.

FRIDAY, MARCH 28, 1902.

Roosevelt is not delivering any reprimands to General Funston either by way of newspaper interviews, or by letter so far as the public is aware. But it does make a difference whose ox is gored.

One is therefore somewhat startled by the pretty plain intimation from Washington that General Miles may be "given his walking papers"—that is, retired by the order of the President. In the circumstances this would amount to dismissal in disgrace (with the administration.)

The Standard Oil company has just declared another quarterly dividend of twenty millions of dollars. The company's capital stock is $100,000,000 and the divided profits are $80,000,000 a year. How does that strike you for "maximum product and minimum cost." Everybody knows how it strikes consumers of oil and gasoline.

Watterson confers a few new titles upon Hanna. He calls him "the field marshal of the old guard, past grand-master of McKinley lodge, Knights of the American Protective system and dean of the ancient order of Robber Barons." Holding secure such positions in his party Watterson sees some fun ahead unless Teddy comes down and agrees to do the right thing, divide fair and treat Hanna's crowd fair. If he will not agree to this his political bark will encounter many dangerous squalls.

There is a heavy falling off in exports, due, it is claimed, to the fact that hard times prevail in many foreign countries. The exportations of corn and iron are far below the average and there has also been a decrease in many other lines. Should this condition continue it will exert a bad influence in this country also. In fact a point has been reached when the prosperity of this nation depends largely upon the prosperity of all other countries to which it ships its products.

Surveyor C. P. Hamman has invented a field note book for the use of surveyors, that will prove a great convenience. It is arranged so as to show the township, the ditch and each man's allotment of work to be done, its size, length, etc., and all in handy columns under proper headings. An officer can carry one of these in his pocket and is ready to meet any man who has an interest in ditches, and by means of his book, show him all he needs to see or cares for. It is one of the neatest things we ever saw and Surveyor Hamman should have credit for his invention. He should get a copyright.

It is no secret that the relations between the lieutenant general of the army and the administration have been strained and unsatisfaetory. The unpleasantness is by no means of recent origin, but the attention of the public was first directed to it in connection with the Schley "interview" and the rebuke which followed it. Since then, it is alleged, General Miles has been guilty of "innumerable acts of petty insubordination and disloyalty," but of course no specific instances are given. Perhaps the situation has become "intolerable," as correspondents allege, but the public is in no position to form an opinion on the conduct of the senior general of the aymy.

In this day of subsidies we rise to repeat what we have said before; namely, that inasmuch as the newspapers are of incalcuable benefit to the nation, infinitely more important than a merchant marine, Congress should subsidize the struggling diurnals and hebdomadals of this country. If rich ship-builders are to have nine millions a year, why not appropriate a few billions for the editors. This subsidy business might be carried still further. If it is a good thing for shipbuilders and editors certainly it wouldn't be bad for farmers, laborers, merchants and professional men. Uncle Sam should show no partiality, but subsidize us all alike.

Edward VII has been contemplating a trip through Ireland but is about to give it up as the temper of the Irish people as shown in Parliament, when the news of Lord Methuen's defeat was received, showed plainly that Ireland was disloyal to him and strongly in sympathy with the Boers of South Africa. All of the other colonies of Great Britain are loyal and the only reason we can see is, that Ireland is not permitted to have anything to do with its own government. If King Edward wants to make himself popular, even more so than any other ruler that ever sat on the throne of England, not excerting Queen Victoria, let him first abandon the conquest in South Africa, then give Ireland "Home Rule," and he could travel without a guard in any part of the British possessions.

The Hon Aedaie Stevenson, once vice president and the candidate with Mr. Bryan in 1900, in a recent letter printed in the New York Journal, points the way to a new democrat victory by recalling who all the later triumphs of the party have been won. He cites the Tilden platform of 1876 as a suitable model to build upon in 1904: "We denounce the present tariff levied upon nearly four thousand articles as a masterpiece of injustice, inequality and false pretense. It yields a dwindling, not a yearly increasing revenue. It has impoverished many inproducts of American labor. It prohibits imports that might purchase the products of American labor. If promotes fraud, fosters smuggling, enriches dishonest officials and bankrupts honest merchants. We demand that all custom house taxation shall be only for revenue."

"A prominent young couple at Marion were married a few days ago and all the witnesses to the marriage were sworn to secrecy, but by some slip of the tongue of one of them the ceremony became public. Of all the idiotic, vulgar things with which civilized communities have to contend, the 'secret marriage' is about the worst, says the Logansport Reporter. "Any county clerk who would be a party to anything of the kind ought to be prosecuted, and a minister of the gospel who would lend himself to this sort of tomfoolery ought to be stripped of his ministerial garb and driven from any sensible community. Public sentiment upon matters of this kind should be such that every party to such a transaction would be held up to public scorn. The 'romance' and 'secrecy' in matrimonial matters is badly overworked in these days."

PASSING OF THE REUBEN.

Edward D. King, smooth citizen and all around confidence man, ran up against a Marion county farmer last Tuesday and came out of the test second best. The farmer appeared "dead easy," fell into the trap with a readyness and innocence which was well calculated to deceive the most accomplished and experienced confieence shark in existance and then, when he had caught the smooth citizen securely, cruelly betrayed him to the minions of the law and left him to languish in the Marion county jail. The telegraph, the daily newspaper and free rural mail delivery are fast making the rural Reuben a thing of memory only. In another decade the sharps and confidence gentlemen will not dare venture beyond the confines of the cities without police protection. We seem to have reached a hard-hearted and a cruel age.

In order to relieve the Britishers from further embarrassment in the matter of wearing apparel, Governor Hogg might compromise by donning a bathing suit of the old Roman pattern.

General Funston is to take command of the department of the Colorado. It is fortunate for free speech and a free press that the appointment does not give him the powers of a dictator.

The democrats in congress are on solid ground in their demand that strict neutrality be enforced in the war between the British and the Boers. The military supplies sent to the British from this country are sent in violation of our international obligations, and this lawlessness is due to British sympathies of the administration.

General Otis as a witness to conditions in the Philippines is very like a youth of 30 giving his reminiscences of the civil war. There is a certain faded air about the general's testimony, like that of a pressed flower dropping out of an old book. "War as war" ceased two years ago, he declares firmly. But so did Otis' prophecies as prophecies cease about the same time.

The republican party has rarely presented a less attractive front to the people than it does in the two important measures now before congress—The ship subsidy bill and the Cuban reciprocity bill. In the one it proposes to steal millions from the United States Treasury to enrich a few ship owners; in the other it protects a sugar trust at the expense of American honor and at the cost of prosperity to the Cuban people, who are dependent upon the United States for the trade lost from Spain.

The war beteen the Beveridge and Fairbanks men has been compromised and there will be no outbreak at the republican state convention. It has been agreed that Beveridge shall be tempoary chairman and Fairbank permanent chairman. Thus each man will be permitted to "sound the key note" of the campaign. Beveriege will touch off his oratorial pyrotechnics first and Fairbanks may have to thrash over some of his straw. Thus the enivitable clash beteen these two statesmen is for a time postponed.

One of the most model metropolitian newspapers publshed in the United States is the Chicago Chronicle. It is without doubt the most up-to-date in its news service of any paper in the west. The Chronicle is not a yellow journal, using half its space in display heads, but presents to its readers a neat appearing sheet, concise in what it has to say and says it well. The printing craft give the Chronicle credit for being the neatest paper mechanically, in the country, as well as alarys being able to rely upon what it says. The Chronicle is securing a prestige in the country held by few newspapers.

The Turkish government has—and very properly—refused to pay to the government of the United States the $72,500 that was raised by private subscription in this country to ransom Miss Stone. Under similar conditions the United States would take exactly the same position. Although the deviling of Turkey has long been recognized as a legitimate form of diplomatic amusement we cannot honorably make demands upon the sultan which would be instantly rejected if made by the sultan upon us. His previous bad character in a governmental way has nothing whatever to do with the case.

The paper trust, by a prohibitory tariff on raw material and a combination of the pulp and paper mills producing 85 per cent of the annual consumption of news print in the United States, has at times advanced prices over 100 per cent by exterminating competition through a monopoly of over 250,000 horse power of available water power adjacent to over 2,600,000 acres of spruce timber. And these increases of price have been direct burdens on every newspaper in the country. Why should this outrageous system of robbery be permitted to continue? It is of no benefit to anybody except the paper trust and there is no more obnoxious trust than it in the country.

The American Economist says that the American workingman is deeply interested in the ship subsidy bill. We should think he would be. He owns so many ships. But the Economist is strangely oblivious to the wants of the ship-owners. It has been professed that they would get something out of the donation. That is what it is made for—to encourage ship owning. The central object is to build up the merchant marine. But according to the Economist the ship-owners will get nothing. It says: "We are convinced that labor will benefit to the amount of the appropriation, that business will profit in like ratio, and so far as workman are politically concerned they don't care whether the father of that bill is Sam Patch, Marcus Hanna or the Devil." If Mark Hanna were convinced of the same thing he would not be half so much interested in the bill. And the bill would not have so much prospect in passing.

MRS. C. E. STRAIGHT.

A PASTOR WHO WAS BEFRIENDED BY AN EMPEROR SAVED BY PE-RU-NA.

Rev. H. Stubenvoll, of Elkhorn, Wis., is pastor of the Evangelical Lutheran St. John's Church of that place. Rev. Steubenvoll is the possessor of two bibles presented to him by Emperor William of Germany. Upon the fly leaf of one of the bibles the Emperor has written in his own handwriting a text.

This honored pastor in a recent letter to the Peruna Medicine Co., of Columbus, O., says concerning their famous catarrh remedy, Peruna:

The Peruna Medicine Co., Columbus, O.:

Gentlemen: "I had hemorrhages of the lungs for a long time, and all despaired of me. I took Peruna and was cured. It gave me strength and courage, and made healthy, pure blood. It increased my weight, gave me a healthy color, and I feel well. It is the best medicine in the world. If everyone kept Peruna in the house it would save many from death every year."

Yours very truly,

REV. H. STUBENVOLL.

Thousands of people have catarrh who would be surprised to know it, because it has been called some other name than catarrh. The fact is, catarrh is catarrh wherever located; and another fact which is of equally great importance, is that Peruna cures catarrh wherever located.

Catarrh is an American disease. Fully one-half of the people are afflicted more or less with it in some form. Previous to the discovery of Peruna, catarrh was considered well nigh incurable. Since the introduction of Peruna to the medical profession thousands of cases are cured annually.

Mr. W. D. Smith, a well-known grocer of Port Huron, Mich., writes:

"By following your instructions and taking Peruna and Manalin I am cured of catarrh. I had catarrh for twelve years and quite a bad cough so I could not sleep nights. I do not have any cough now, and if I feel anything in the throat I take a swallow of Peruna and I am alright."—W. D. Smith.

Suffered Fifteen Years.

C. F. Gerding, Milburn, Neb., writes:

"I contracted a heavy cold about fifteen years ago and tried all kinds of patent medicines and drugs recommended for a cold or heavy cough, but found none to help me until I commenced using Peruna. My age is seventy-eight years, and I am better now than I have been for years. I still keep using your great medicine, and am still improving in health. I recommend it to all sufferers with coughs and colds."—C. F. Gerding.

Peruna, The Greatest Remedy Known For Catarrh.

Mr. Chas. H. Stevens, 97 Seventeenth Street, Detroit, Mich., writes: "It affords me great pleasure to testify to the merits of Peruna as a remedy for catarrh. I suffered for some time with chronic nasal catarrh, but after five months' treatment during which time I used seven bottles of Peruna I am pleased to say that I am entirely well, there being not the slightest trace of the catarrh left. Peruna is without doubt the greatest remedy known for catarrh."—Chas. H. Stevens.

Afflicted Since Childhood With Catarrh.

Mr. Elbert S. Richards, Milton, Conn., writes:

"I am near sixty-eight years of age, and have from childhood been afflicted with catarrh in the head, and, for the past four or five years been much afflicted with it in my eyes; they being watery, would materate a good deal, and stick together in the night. My condition was so fully described in your almanac that I decided to try Peruna.

"I am thankful to say that I now consider myself entirely free from catarrh, and only use Peruna occasionally now as a tonic. Accept my sincere thanks for your personal interest in my case.

"My son, 21 years of age, has been using Peruna for a number of weeks for catarrh in the head and has obtained great relief."—Elbert S. Richards.

Catarrh Thirty Years.

Mr. Andrew Barrett, 940 N. Kidzie Ave., Chicago, Ill., writes:

"It gives me great pleasure to testify to the merits of such a worthy remedy for catarrh as your Peruna. I had suffered for thirty years from this very disagreeable disease and had tried many so-called remedies but until I used Peruna none had the desired effect.

"I have been connected with the Chicago Police Department for the past twenty-eight years. I can cheerfully recommend Peruna to anyone suffering from catarrh."—Andrew Barrett.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Mrs. F. W. and F. D. Fanning entertained Mr. and Mrs. Kimmel and daughter Dorothy, of Goshen, Mr. and Mrs. W. S. Maxwell and Mrs. C. B. Mason and daughter Jeanette at a six o'clock tea Friday.

Tuesday evening Luther Knisely and Frank Stage were given the 3rd degree in the K. of P. lodge. A number of visiting brothers were present to witness the "Old Style" 3rd given by Arthur Sinclair, of Waterloo. Although Mr. Sinclair was sick, he gave the work up to his standard and it was appreciated by all.

A Colorado paper says: "As we have several requests to print the market reports of this locality, we give you this week's report, which probably applies the world over. Young men, unsteady; girls, lively, and in demand; coffee considerably mixed; fresh fish, active and slippery; wheat, a grain better than barley; eggs, quiet, but will probably open in a few days; whiskey, steadily going down; onions, strong and rising; breadstuffs heavy; boots and shoes, those in the market, going steadily up and down; hats and caps, not as high as last year, except foolscap, which is stationery; tobacco very slow, with a downward tendency; money, close, but not close enough to get hold of; feathers, light, and going up; iron, firm; butter, a little stronger, opium, a drug on the market; advice, good but no demand."

The Auburn daily Dispatch has been enlarged from a 7 to an 8 column folio. We are glad to note this evidence of prosperity on the part of our esteemed contemporary and only wish that Butler could also support a daily paper.

Frank Kinney, of Elkhart, formerly of Butler, has received a promotion from the L. S. & M. S. Ry with a material enlargement of salary. Frank is a jolly good fellow, steady as a clock and is well deserving of his success. That he will acquit himself with honor in his new position, goes without saying.

Mr. Hurty, who began a few years ago to warn the people of the state of the danger of a general small-pox epidemic, stated recently in a lecture upon the subject that the disease is with us and with us to stay until it attacts all who are suscepitible. Only the successful vaccinated or those who have had small-pox are protected Dr. Hurty's openion is entitled to consideration for the reason that what he predicted two or three years ago has since been verified and the disease is spreading more and more. Precaution in the way of vaccination is certainly advisable.

Tuesday and Wednesday occured at Columbia City the district meeting of this congressional district of Rathbone Sisters. Mrs. Cora Hiner was the delegate from Butler Temple. She gave a fine report of Butler Temple and read a paper by Mrs. Della Moltz, M. E. C., of Butler Temple, which was well received. Mrs. Carrie M. Fanning, Past Grand Chief, gave an address which had some very fine points. At the evening session a collection was taken up for the benefit of the Orphans' Home fund and it was much in excess of the highest expectations being nearly $12, the largest taken up at any convention. Altogether the meeting was a grand success and those who were there will look eagerly forward to the next one.

PISO'S CURE FOR CONSUMPTION

CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. 25 CTS.

Mr. Blank, of Blankville, Sundayed here.—Country Correspondence.

He Sundeyed there, I'll bet a horse,
Because he wanted quiet,
And dinnered there because he liked
Good wholesome country diet.
After dinner he piped awhile,
And while he piped he booked it,
Till the cook had her dishes washed,
Then he turned in and cooked it.
Then they hammocked in the yard
And sparked for fun and glory;
And while he piped or cigared
She listened to the same old story.
Then perhaps her mother came on the scene,
And gently mother-in-lawed him,
Also her dad with savage mien,
While the family bull dog chawed him.
Perhaps, however, they were not
Disturbed in either fashion,
They maybe parlored it alone
And rocking chaired their passion.
Or mayhap he suppered there,
And staid till cooks were crowing,
Then in the dawn, he buggyed home
Or sleighed, if it was snowing.

PNEUMONIA FOLLOWS A COLD.

But never follows the use of Foley's Honey and Tar. It stops the cough, heals and strengthens the lungs and affords perfect security from an attack of pneumonia. Refuse substitutes. Sold by Geddes & Harding.

AT LAKE JAMES.

The New York gentlemen who have taken hold of the Goshen & Indiana electric railway have organized what they call "The Lake James Manor Park Association," and have purchased Wm. A. Palfreyman's interest in Paltytown, and quite a large tract of other land, including the lands of Dr. Waller and Russell at the southeast corner of Lake James. The Waller and Russel purchase will be platted into lots and drives for a "country place," summer resort homes with no stores nor saloons within its borders. Such parks are popular and well patronized in the east.

Paltytown will be improved as a public park. The deal is all closed except payment of the purchase price, and that will be done as soon as the railroad people return home. These improvements will be a great thing for Lake James.—Angola Magnet.

A CONSCIENTIOUS MINISTER.

Dear Sir—Having tried your White Wine of Tar Syrup, I believe it to be an ecellent medicine and can conscientiously recommend it to others.

Respectfully yours, Rev. Wm. Stevenson, Kingsville, Mo.

THIS CLIMATE IS GOOD

enough for anybody with weak lungs. The patient needs l. He can get well here with the help of Allen's Lung Balsam, taken freuently when coughing and shortness of breath after exercise serve notice upon him that serious pulmonary trouble is not far away. Allen's Lung Balsam is free from any form of opium.

A certain woman recently left her work undone, sent her children to bother a neighbor, and left her husband cook his own meals, in order to attend the funeral of a man she never saw.

TAX REBATE ON TOBACCO.

All those growers and tobacco dealers in town who certified to the collector of the internal revenue that they had over $10 worth of tobacco on hand on the passage of the act of March 2, 1901, and filed their claims for amounts due them by the reduction of the tax will be able to collect them on May 15 next. The warrants were drawn some time ago, but were not paid owing to the fact that there was no appropriation with which to do so. Now an appropriation of $3,150,000 has been made by congress and the 48,000 claims that have been passed upon will be paid off in about sixty days.

WOMEN AND JEWELS.

Jewels, candy, flowers, man—That is the order of a women's perference. Jewels form a magnet of mighty power the average women. Even that greatest of all jewels, health is often ruined in the stenuous effort to make or save the money to purchase them If a women will risk her health to get a coveted gem then let her fortify herself against the insiduous consequences of coughs, colds and bronchial affections by the regular use of Dr. Boschee's German Syrup. It will promptly arrest consumption in its early stages and heal the affected lungs and bronchial tubes and drive the dread disease from the system. It is not a cure-all but is a certain cure for coughs, colds and bronchial troubles. You can get Dr. G. G. Green's reliable remedies at—Geddes & Harding. Get Greens Special Almanac.

AFTER SEVENTY-FIVE YEARS.

A visit to the old home is one of the most delightful experiences of old age. In New England more and more has been made each year of the feeling for the old homestead, and it is only natural that the "old home" paper, the Youth's Companion, should participate in this renewal of "old home" acquaintances.

Last week the publishers of The Youth's Companion enjoyed a visit from one of their seventy-five-year subscribers, Mr. R. W. Peabody of Chicago, now ninety-one years old who had been spending a few weeks in New England. He is one of the few subscribers on record who has taken The Yout 's Companion continuously since its first issue, April 17 1827. The letter in which he sent his original subscription was one of the first he ever worte. Through young manhood, maturity and old age, through times of war and times of peace, in New England and in the West, through all the last seventy-five years of his life, his one constant companion has been the old Youth's Companion.

The growth of The Companion itsel from the first small four-dage issues to the great family paper of the present is merely typical of the growth of the country during Mr. Peabody's lifetime. The wonderful triumphs of steam, and electricity; the great inventions that made the ninetenth century what it was, nearly all occurred in the period through which Mr. Peabody and The Youth's Companion have passed side by side.

The regard Mr. Peabody holds for the paper is not because of its age, but because the paper, although the same in purpose in its last issue as in that of seventy-five years ago, has kept pace with all the extraordinary developmentt of these three generations, and instead of growing old has grown young in enterprise, in originality, and in the ability to know and supply the literary wants of the American family.

NERVES LIKE A FLAT-IRON.

A woman who suffered three years from nervous prostration says two bottles of Lachty's Celery Nerve Compound effected a complete cure. She hardly knows to day wnether she has nerves or not as she never feels them. It is certainly a wonderful remedy. Sold by Geddes & Harding.

CHRISTIAN ENDEAVOR STATE CONVENTION.

The Christion Endeavorers of Indiana will hold thesr fifteenth annual convention this year at Indianapolis, June 26-29, in Tomlinson Hall. State conventions of the Union will hereafter be held every two years alternating with the International convention, so an unusually large attendance is expected this year. The state officers are preparing an attractive program for the meeting, to embrace all departments of the Christian Endeavor work. Prominent workers of the society will be among the speakers. Half fare rates on the railroads have been secured.

FOLEY'S HONEY AND TAR.

Sold by Geddes and Harding.

All Up-to-date Housekeepers use Russ Bleaching Blue. It makes clothes clean and sweet as when new. All grocers.

SOMETHING ABOUT POSTAGE STAMPS.

When a stamp is placed on a letter it represents one of sixty made for each man, woman and child in the United States. Enough stamps will be issued this year to supply each individual in the United States with at least sixty stamps each. Distributed among the population of the entire globe, they supply each person with postage for not less than three letters. Placed side by side in a continuous line the total issue would girdle the entire earth three times, forming a variegated ribbon around it nearly three inches in width. If spread out in the same manner on the collector's book of the conventional size the issue for one year would half fill 1,000,000 volumns, which placed one upon another would form a solid column over twenty-five miles high. If it is true, as Edward Everett Hale says, that the United States postal system is the greatest of popular educators, these figures will serve to show the extent of Uncle Sam's present service as a school teacher.

RAW OR INFLAMED LUNGS.

Yield rapidly to the wonderful curative and healing qualities of Foley's Honey and Tar. It prevents pneumonia and consumption from a hard cold settled on the lungs. Sold by Geddes & Harding.

VERY SIMPLE INDEED.

Human saliva is more deadly to the rattlesnake than the rattlesnake's venom is to the human being. This is said to be a fact which has been repeatedly proven by scientific men. A few days ago a Huntington, Ind., physician introduced one drop of human saliva into the mouth of a healthy rattler and the serpent died in just four minutes. This will be valuable information to people who live in a anrke-infested region. When, in their rambles through field and forest, they meet with a rattler, all they have to do is to yank him up by the neck, pry open his jaws, spit in his mouth and he's a goner. It is a sure way and simpler than clubbing him to death.

INDIANA DISEASES FOR LAST MONTH.

The monthly report to the state board health shows that smallpox was the most prevelent disease in February, and pneumonia is the second most prevalent. Pneumonia was the fifth in January, bronchitis being second to smallpox in that month.

The order of disease prevalence in February was smallpox, pneumonia, bronchitis, influenza, rheumatism, tonsilitis, scarlet fever, diarrhoea typhold fever, diphteeria, erysipelas, whooping coughs, puerperal fever, cerebro-spinal meningitis, cholery morbus, choler infantum. The last two will move up the list commencing in March and remain near the top until November. There were 758 cases of smallpox reported in thirty six countries, and three deaths. In the corresponding month last year there were 165 cases in fifteen countries two deaths. The increase in deaths from smallpox was 50 per cent. The area of infection increased 140 per cent.

SCROFULA

I bequeath to my children Scrofula with all its attendant horrors, humiliation and suffering. This is a strange legacy to leave to posterity; a heavy burden to place upon the shoulders of the young.

This treacherous disease dwarfs the body and hinders the growth and development of the faculties, and the child born of blood poison, or scrofula-tainted parentage, is poorly equipped for life's duties.

Scrofula is a disease with numerous and varied symptoms; enlarged glands or tumors about the neck and armpits, catarrh of the head, weak eyes and dreadful skin eruptions upon different parts of the body show the presence of tubercular or scrofulous matter in the blood. This dangerous and stealthy disease entrenches itself securely in the system and attacks the bones and tissues, destroys the red corpuscles of the blood, resulting in white swelling, a pallid, waxy appearance of the skin, loss of strength and a gradual wasting away of the body.

S. S. S. combines both purifying and tonic properties, and is guaranteed entirely vegetable, making it the ideal remedy in all scrofulous affections. It purifies the deteriorated blood, makes it rich and strong and a complete and permanent cure is soon effected. S. S. S. improves the digestion and assimilation of food, restores the lost properties to the blood and quickens the circulation, bringing a healthy color to the skin and vigor to the weak and emaciated body.

PRESENT STATUS OF MISSION WORK IN CHINA.

W. P. Bentley.

First, there is the confidence of assured results. There are nearly one hundred thousand Christians in the empire. The last province, Hunan, has opened to receive messengers of the Cross. Christian schools and colleges have not the capacity to receive the students who apply. In many districts the native Christians are supporting their own churches and schools. The number of converts increases each year. The Protestant missionaries have the confidence of the people and the officials. The failure of the recent outbreak has convinced the people that it is the will of heaven that the foreign religion is to prevail, as part of the consequence of the all-conquering progress of the people of the West. This promotes a more hospitable frame of mind in the oriental, although it might not do so in us.

Second, the Chinese attitude is more favorable. Not only "per force," as above stated, but officials and people alike, taking the empire as a whole, are gradually losing their bitter prejudices. Thousands, who are not classed as Christians, have a strong conviction that Christianity is true. The officials have unlimited confidence in the sincerity and trustworthyness of missionaries. And altogether, the leaven of unselfish devotion to high ideals is gradually working a profound change in the public mind.

The international committee of the Young Men's Christian association sustains five or six secretaries in China, whose work tells mightily upon the young men who will mold the thought and life of the empire in coming years.

The missionaries of China last year organized themselves into the China Missionary Alliance. This national body will be able to secure unity and power in many matters where united action may be beneficial to the cause of truth.

There is a thorough educational awakening in China. Everywhere the "new learning" is the talk of the day, and governors and viceroys vie with each other in founding institutions of learning. The most gratifying feature of the movement is that it is largely controlled by missionaries. An appeal is just being sent out to the colleges of Europe and America for young men who will devote themselves to literary work and educational work in China.

Another feature is that the great missionary societies intend year by year to increase their contributions of men and money, so that their power may be cumulative. If the number of workers was doubled in ten years it would not meet the increasing demands.

And, finally, there is the steadfast optimism of both foreign and native Christians, which is in itself a promise of continued victories.

DANGER OF COLDS AND LA GRIPPE.

The greatest danger from colds and la grippe is their resulting in pneumonia. If reasonable care is given however, and Chamberlain's Cough Remedy taken all danger will be advoided. Among the tens of thousand who have used this remedy for these diseases, we have yet to learn of a single case having resulted in pneumonia which shows conclusively that it is a certain preventive of that dangerous malady. It will cure a cold or an attack of la grippe in less time then any other treatment. It is pleasant and safe to take. At S. G. Stone.

BEAUTIFUL SEA SHELLS FREE.

Since coming South I have received numerous inquiries for sea shells, and please say to your readers that I am living on the seashore, and have made a fine collection of lovely shells from our own shore, the coral reefs and the West India Islands, and that I will send a dozen different kinds, no two alike, and a dozen scarlet sea peas to any one who sends a stamp to pay the postage. Any one is welcome to send, as I have plenty for all.

WORK FOR WHITECAPS.

The Avilla News contains the following account of a recent wife-beating in that neighborhood which, if true, should give Noble county whitecaps a little work. It seems to have been written by a correspondent:

"The neighbors of the Stanley school house in Green township were wonderfully stirred up early Friday morning by the inhuman conduct of a man by the name of Graham (the man that was formerly identified with the Graham buggy factory of Kendallville.)

In the small hours he made a very brutal and ferocious attack upon his wife who according to the neighbors, is a very estimable woman. He tried hard to choke her, leaving the prints of his fingers on her throat until the next day. With some weapon he struck her on the head leaving a gash over the eyebrow. The poor woman all gory with blood, fled from the savage fiend and ran for life to a neighbor's house. Although it was dark she made good time, but arrived none too soon at the home of Cyrus Carothers. Before they could barricade the door against the bloodthirsty wretch he too had entered the house in pursuit of his victim. It was fortunate John Carothers was at home, for altogether they were sufficient to overawe the ruthless vagabond and prevent any further abuse.

The poor woman was a pitiful sight being almost wholly covered with blood. The culprit is a devoted member of the "Seven day advent church" and seems to have considerable difficulty in persuading his family to adhere to the peculiarities of that sect and this seems to be a constant irritation to him. He does not drink and frequently feels it his duty to warn and exhort his neighbors regarding the true Sabbath and the sin of eating pork, but the neighbors have no confidence in his preaching and are inclined to think that had he gorged himself with pork and soaked himself with the worst kind of beverages he could not well have been more base, brutal and inhuman

In fact they are beginning to regard him as being inferior in many respects to the poor brute that he so despises.

NOW LOOK OUT!

"Take care of yourself," say our friends. "I'll try to," we answer. We do take a little care, yet in spite of warm clothes, rubbers and mackintoshes, an army of people were bowled out by pneumonia and other lung and chest diseases last winter. They caught cold, neglected it, let it fix upon them, were torn by coughs, choked by inflammations and congestions, wasted by fever, tired out by pain and then gave up the fight. The hour you realize that you have a cold on the chest, place a Benson's Porous Plaster where the pain or oppression is felt. If you think two are needed make it two. No harm if you were covered with them. They act quickly and prevent the engorgment of blood in the organs. In this way—with ordinary caution as to exposure—you will break up the cold and avoid a serious sickness. No other applications, or any other form of treatment, will accomplish this as certainly and speedily. Benson's Plasters have a distinct and positive action and are curative to the highest degree. Use them with the same confidence for coughs, muscular rheumatism, the grip (back and chest) and all similar ailments. Women, who are chief sufferers from cold weather complaints, should keep these plasters always within reach. Get the genuine. Carpet, Curtains and Draperies.

House cleaning and house furnishing times are at hand, which means new curtains new draperies and new carpets. Where do you expect to buy them? We carry this stock, have hundreds, even thousands of dollars invested in this line, and do save all purchasers at our store 15 to 25 per cent from prices charged by sample line dealers.

Full standard all wool carpets at 50c per yard. We mean a 13 ply carpet containing 1080 war ends and weighs 18 oz. to the yard strictly all wool. If your sample line dealer will sell you at this price we will make a corresponding reduction to 40c per yard.

Lowell all wool carpets at 60c per yard. If your sample line dealer will sell you a straight Lowell at 60c we we will make you a corresponding reduction to 50c a yard.

The Sultan two faced fast color carpet at 25c. If your sample line dealer will sell you a straight Sultan at 25c, one of the best 25c carpets made, we will make you a corresponding reduction to 17½c. All our carpets are cut to match without waste and laid without extra charge The above proposition represents the saving to the purchaser throughout our carpet stock.

The same difference exists in lace and shade curtains, draperies or any other line between the man who does a sample business and the merchant who buys his stock and pays his money for it. Reasonable is it not?

Easter Gloves and Ribbons.

Don't forget that F. L. Farnsworth's store has the best values in gloves. $1.00, 1.25 and 1.50. This promises to be a great ribbon season—we have a very extensive line. Special for Saturday at 10c a yard.

3, 3½ and 4 in. wide all silk fancy, worth 20c at 10c yard.

F. L. FARNSWORTH, Butler Ind.

The schools of this place closed the fourteenth and as usual a picnic dinner was in order. Four of the young ladies of the high room were too dignified to eat dinner with the common class in a schoolroom so they brought their dinner seperately and when the noon hour came they carried it to the Christian Church which was open for practicing. They were not satisfied with going to the church but used the communion table thereby soiling the table cloth so that the lady who has charge had to wash them. We think that such proceedings are outrageous especially as three of the girls are devout church members and if any thing like it occurs again their names will be published.

The human heart, that most wonderful of engines, is scarcely larger than a man's fist. Yet in each twenty-four hours the dual heart moves approximately six tons of blood, equivalent to about two barrels of blood per hour. And this continues without ceasing from the first breath of infancy to the last sigh of age. Is it any wonder that when continued extra strain is put upon so delicate and busy an organ, it should break down? Is it any wonder that in this age of overwork there should be an increasing number of deaths attributed to heart failure?

Dr. Pierce's Golden Medical Discovery cures diseases of the organs of digestion and nutrition and purifies and enriches the blood. One of the ingredients entering into the "Discovery" is one of the best heart tonics known to medicine. Thus while through the action of "Golden Medical Discovery" the body is nourished into strength, the heart is also strengthened and an adequate blood supply is pumped to the stomach and kidneys thus improving the action of these organs.

Sick people, especially those suffering from chronic diseases, are invited to consult Dr. Pierce by letter *free*, and so obtain without charge, the opinion of a specialist on their ailments. All correspondence strictly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

"I had been troubled with catarrh of the stomach and heart trouble," writes Mr. W. D. Merchant, of Tylersburg, Clarion Co., Penna. "Had doctored for some time without relief, then I began to take Dr. Pierce's Golden Medical Discovery. I took seven bottles. Before I began to take it I weighed 119 pounds, and now I weigh 176. I am working steadily and feel like a new man. I send you many thanks."

ATTRACTIVE WOMEN.

All women sensibly desire to be attractive. Beauty is the stamp of health because it is the outward manifestation of inner purity. A healthy woman is always attractive, bright and happy. When every drop of blood in the veins is pure a beauteous flush is on the cheek. But when the blood is impure, moroseness, bad temper and a sallow complexion tells the tale of sickness, all too plainly. And women to-day know there is no beauty without health. Wine of Cardui crowns women with beauty and attractiveness by making strong and healthy those organs which make her a woman. Try Wine of Cardui, and in a month your friends will hardly know you.

AN OBSERVER ON THE ROAD SUBJECT.

Editor Herald:—If our trustees would oversee the gravel pits and not allow anything but gravel hauled and that on a good road bed, we would have far better roads. On the other hand, generally the man that own the land where the gravel is hauled from will insist on hauling the black ground that is just above the gravel, and the supervisor will have the same hauled along with the gravel, saying "it will help pack and make a good road," but when this "stuff" gets wet it will be muddy. And then oft times the road is not properly graded, the ditches not deep enough at the sides to drain the water. This is why there are so many ruts and hollow places in the road.

This is my limited experience and I have hauled from eight different gravel pits in DeKalb county.—An Observer.

Next Sunday, at the Methodist church, will be the last service this conference year. All are invited to be present.

Fred Briggs went to Columbia City last week where he received the 3rd degree of masonery. He was made a mason in company with two candidates, all these being brothers, sons of Silas Briggs, who has been a mason for the past 50 years.

The pedro club met with Mr. and Mrs. D, J. Plowe last Monday. Twenty-five guests were present and a dainty lunch was served. Dr. Acker and wife carried off first honors, while the consolation prize was awarded to J. N. Boyle and wife.

The Samuel Firestone farm was sold by Wilcox & Campbell for $9,000 to Peter Teutsch this week. This is one of the largest real estate deals consumated in Butler in a long time. The farm is one of the finest in northern Indiana and we congratulate Mr. Teutsch over his purchase.

WIGENT—BLOYD.

Mr. Spencer Wigent, of Corunna, and Miss Edwina Bloyd, of this city, were united in marriage at the home of Mr. and Mrs. Carl Oberlin, in South Butler, at noon Wednesday, April 2nd. The ceremony was the beautiful and impressive ring service and was performed by Rev. T. F. Frech, of the M. E. church.

Byron Wigent, a brother of the groom, acted as best man and Miss Mapes, of Ohio City, O., served as bridesmaid. The bride wore a beautiful costume of blue silk mull, trimmed in lace and velvet and carried roses while the groom wore the conventional black.

After receiving congratulations an elaborate repast was served to which the guests did ample justice.

The presents were numerous and valuable.

Mr. Wigent is a highly respected business man, of Corunna, while the bride is one of Butler's most charming daughters. She is an accomplished musician, both vocal and instrumental, and will be missed in the musical circles in which she occupied such a prominent part.

The bride and groom left on the 4 o'clock train for Chicago, where they will spend their honeymoon. They will be at home at Corunna, Ind., after May 1st.

The Herald extends congratulations to the happy couple and wishes them a happy journey through life.

THE RECITAL A SUCCESS.

The recital at the opera house, Friday evening of last week, by Miss Nora Brown and pupils, was a success in every way, and highly appreciated by a large audience.

The program was carried out practically as advertised, and the excellent manner in which each participant acquitted themselves, speaks well for the ability of Miss Brown as a teacher.

The program was carefully arranged and so well presented that no criticism could be made. The little people handled their parts in an admirable manner and by distinct delivery, gestures, expressions, etc., delineated the beauties of elocution when taught by a practical teacher.

Miss Brown in her selection delighted the audience and responded to a hearty encore with a selection from Riley. Miss Wilma Urie contributed a vocal solo which was much enjoyed. She has a very promising voice.

The instrumental music by Dr. Sargent and Mrs Berger was fine and well received as it always is.

Among the prominent numbers of the evening were the scarf drill; the Lotus Eaters, in which the posing was particularly fine, the reading being very ably given by Mrs. D. H. Knisely; and the doll drill, in which the miniture mothers did themselves proud.

We congratulate Miss Brown over the success of the entertainment. Her ability is of the highest order and she is entitled to great praise.

HOME SEEKERS EXCURSIONS.

One way tickets will be sold at low rates to Western points until April 30th. For informiuation regarding rates, time of trains etc. Call on C. T. Apt. Butler Agent.

THE GATES AJAR.

(Composed by Mrs. Hattie Smith.)

I have often thought of sunset,
Where it glows on the mountain side,
I fancy I caught faint glimpses
Of a loved one just over the tide.

Oh can it be but fancy,
That the gate swings open wide,
I fancy I see the portals
And the hills on the other side.

But see! Ah a shadow hides it,
thought I saw a hand,
The hand that guided my footsteps
For a home in a better land.

Oh loved one, how I miss you,
Are you there, at the Golden Gate
Awaiting some friend down the pathway
That leads home soon or late.

The angels at twilight are closing
The light of some tear stained eye.
And no longer I see the city,
O'er the hills on the other side.

Some day I hope to meet you
In that land where loved ones are,
And enter those pearly portals,
Where the gate still stands ajar.

CARD OF THANKS.

We desire to thank all who so kindly assisted us through our husband and father's sickness, and also for all services rendered during our severe affliction and burial.

Mrs. Keller and Children.

LEONARD WALKER MARRIED.

Leonard Walker, our popular merchant tailor, has assumed the exacting duties of a benedict. In company with Bettie Gitley, his intended bride, he went to Ft. Wayne last Saturday and in the evening at 7:30, was united in marriage. The ceremony was performed at the Lutheran parsonage by the Rev. Ruell. The happy couple returned to this city Monday and will commence house keeping in the near future.

The Herald joins their many friends in congratulations, and trusts that they may have a long, happy and prosperous life.

NEW CREAMERY AT BUTLER.

Monday J. D. Wilcox, of Butler, Ind., in company with Henry Showalter and Frank Creiger, visited Fayette in the interests of the proposed creamery to be built at that place by D. A. Baker and A. E. Bird. They were inspecting the Fayette creamery and while here took a drive out to Mr. Bird's well kept farm.

Mr. Wilcox was a former Fayette resident and still retains that spirit of progressiveness that always characterized him. He is hustling for Butler now, besides running a hotel and doing an extensive real estate business.—Fayette Review.

SPECIAL NOTICE.

Having been told that Mr. Christian Keller was a soldier of the Rebelion, the law providing $50 for the burial expenses of each soldier was spoken of and from that the false report was circulated that application was made for county burial which was a gross mistake, and we take this opportunity to rectify it.

A PRINTER'S DREAM.

By Arthur Powers.

Last night in my slumber I journeyed
To the realms far below,
To the place of eternal torment,
Where many a printer will go.

"A Print," was the greeting of Lucifer
O say, have you come to stay?
I think you will find old acquaintances
Come, let me show you the way.

Straight to the job rooms he led me,
There was litter all over the floor
I gazed with horror and pity
At the printers there galore.

As I looked at the sweltering wretches
My temper began to rage.
Then I thought of my first experience,
And the shop where I learned my trade

Poor devils, I said to old Satan,
A double dose surely they've had,
To be cussed on earth in a print shop,
And now to be doomed with the bad.

Now how would you like to work sir,
For a man who had not learned the trade,
Who was always raging and swearing
At any mistake that was made?

Then Satan turned to me saying,
Sir, you may go your way,
I understand you're from Butler,
You certainly have had your pay.

LOOKS LIKE IT.

It looks very much as though we would get an extension of the Lake Shore Fayette branch the coming summer. Three times during the past winter have the Vandalia people been over the old road-bed. The last time was apont three weeks ago. Of course they are "mum" when asked as to their intentions, but every move made by the L. S. Co., point to the fact that the road will be built. They have many reasons for doing this, but the main one is to successfully compete with the Wabash. Here's hoping our expectations will at last be realized.—Fayette Review.

Over-Work Weakens Your Kidneys.

Unhealthy Kidneys Make Impure Blood.

All the blood in your body passes through your kidneys once every three minutes.

The kidneys are your blood purifiers, they filter out the waste or impurities in the blood.

If they are sick or out of order, they fail to do their work.

Pains, aches and rheumatism come from excess of uric acid in the blood, due to neglected kidney trouble.

Kidney trouble causes quick or unsteady heart beats, and makes one feel as though they had heart trouble, because the heart is over-working in pumping thick, kidney-poisoned blood through veins and arteries.

It used to be considered that only urinary troubles were to be traced to the kidneys, but now modern science proves that nearly all constitutional diseases have their beginning in kidney trouble.

If you are sick you can make no mistake by first doctoring your kidneys. The mild and the extraordinary effect of Dr. Kilmer's **Swamp-Root**, the great kidney remedy is soon realized. It stands the highest for its wonderful cures of the most distressing cases and is sold on its merits by all druggists in fifty-cent and one-dollar sizes. You may have, a sample bottle by mail free, also pamphlet telling you how to find out if you have kidney or bladder trouble. Mention this paper when writing Dr. Kilmer & Co., Binghamton, N. Y.

Eczema for Forty Years.

The Unqualified Statement of a Well Known Attorney, St. Ignace, Mich.

Some of the cures made by Dr. A. W. Chase's Ointment of stubborn and long continued eczema and skin diseases are causing much comment. People are beginning to realize that this Ointment is a wonder worker with all kinds of skin trouble. Attorney James J. Brown, St. Ignace, Michigan, writes as follows:

Dr. A. W. Chase Med. Co. Buffalo, N. Y.—Gents:—I cannot refrain from expressing my acknowledgement for the relief I have felt from Dr. Chase's Ointment. For 40 years I was afflicted with a skin disease which was located in one spot—on my leg. I have spent at a rough estimate five hundred dollars trying to effect a cure, and not until I applied this ointment did I get relief. You are strangers to me and this letter is prompted directly because I want to say and I feel as though I ought to say it. That Chase's ointment has effected a complete cure of my affliction. Three boxes did the work on my leg. I was also suffering from itching piles and applied the ointment which gave the best of satisfaction by affording me rest at night and rapidly causing the disease to disappear. I have received such relief and comfort from the ointment that I cannot withhold expressing my gratitude. I was so long afflicted with the tortures of eczema. I feel now that I am cured, a word of recommendation is due from me. Yours truly,

JAMES J. BROWN.

On my recommendation many people have used Foley's Honey and Tar, and always with satisfaction. Sold by Geddes & Harding.

OF COURSE NOT.

"My son," said the parson to a small boy who was digging in a back in a back lot, "don't you know that it is a sin to dig on the sabbath, except in case of necessity?"

"Yes, sir," replied the youngster.

"Then why don't you stop it?" asked the good man.

"Cause this is a case of necessity," repled the young philosopher. "A feller can't fish without bait."

BETTER THAN PILLS.

The question has been asked, "In what way are Chamberlain's Stomach & Liver Tablets superior to pills?" Our answer is: They are easier and more pleasant to take, more mild and gentle in effect and more reliable as they can always be depended upon. Then they cleanse and invigorate the stomach and leave the bowels in a natural condition, while pills are more harsh in effect and their use is often followed by constipation. For sale by S. G. Stone, druggist.

The other night a little boy was kneeling down in front of the fire saying his prayers before going to bed. His sister who was standing by could not resist the temptation of tickling his little naked foot as it peeped out from under his night gown. He stood it as long as he could, and then astonished everybody by exclaiming, "Please, God, excuse me for a moment while I knock the stuffing out of sis!"

A CHATANOOGA DRUGGIST,S STATEMENT.

Robt. J. Miller, proprietor of the Read House Drug Store of Chattanooga, Tenn., writes: "There is more merit in Foley's Honey and Tar than in any other cough syrup. The calls for it multiply wonderfully and we sell more of it than all other cough syrups combined. Sold by Geddes & Harding.

A Garrett man whose only virtue is that he never smoked or used tobacco in any form, likes to boast what he has saved in his life by not using the weed. He says he has figured it out closely and he has made just forty acres of land in the deal. But as he does not own a foot of land, tobacco-using men want to know where he is really ahead. Some men are too skeptical.

$100 REWARD, $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

DEMOCRATIC STATE CONVENTION.

The Democracy of Indiana will assemble in State Convention at Tomlinson Hall, in the city of Indianapolis, at 10 o'clock a. m. on Wednesday, June 4 1902, for the purpose of nominating candidates for State officers, the adoption of a platform, and such other business as may properly come before the Convention.

The basis of representation to said Convention as fixed by the Democratic State Central Committee, is one delegate for each 200, and one delegate for each fraction over 100, of the vote cast for Judge Allen Zollars for Presidential Elector in 1900.

Under the apportionment the Convention will consist of 1547 delegates, divided among the counties as hereafter stated.

The offices for which nominations will be made are as follows:

Secretary of State.
Auditor of State.
Treasurer of State.
Attorney General.
Clerk of the Supreme Court.
Superintendent of Public Instruction
State Geologist.
State Statistician.
One Judge of the Supreme Court for Fifth District.
Six Judges for the Appellate Court.

Wm. H. O'Brian, Chairman.
Joe Reilley, Secretary.

BRAIN FOOD NONSENSE.

Another ridiculous food fad has been branded by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for brain another for muscles, and still another for bones. A correct diet will not only nourish a peculiar part of the body, but it will sustain every other part. Yet however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. You must prepair for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. A few doses aids digestion, stimulates the liver to healthy action purifies the blood, and makes you feel buoyant and vigorous. You can get Dr. G. G. Green's reliable remedies at Geddes & Hardings. Get Green's Special Almanac.

The DeKalb county friends of O. P. Ensley, formerly of Auburn, will be pleased to note his nomination to the office of treasurer of Marion county at a primary recently held at Indianapolis. Mr. Ensley went after it proper, and he has filed the following statement of his campaign expenses, aggregating $3,219 05, as follows: Newspaper advertisements, $985; $371.50 for cards, circulars and literature; $342 for the distribution of advertising matter; $134 50 for bill posting; $75 for badges; carriages, $178; postage, $289; cigars, $192.50; assessment, $100; churches, ball, etc., $147.50; personal expenses, $183.20; stenographers and clerks, $97 85.

GOOD FOR RHEUMATISM.

Last fall I was taken with a very severe attack of muscular rheumatism which caused me great pain and annoyance. After trying several prescriptions and rheumatic cures, I decided to use Chamberlain's Pain Balm which I had seen advertised in the South Jerseyman. After two applications of this Remedy I was much better, and after using one bottle, was completely cured.—Sallie Harris, Salem, N. J. For sale by S. G. Stone, druggist.

Queer things are done out in Kansas. A well-to-do farmer in Russell county has traded his 10-year-old son and a wagon load of corn for the 13-year-old daughter of a neighboring farmer, equally well-to-do, and the transaction was made a matter of record in the county clerk's office. The reason for the trade was that in the family of which the son was a member there were no girls, while the father of the transferred girls had no boys. Those directly interested being well satisfied with the arrangement, it is not probable that outsiders will feel called upon to interpose serious objection.

CANAL THROUGH INDIANA.

A project is again being revised to construct a canal between Lake Erie and Lake Michigan, and the introduction of a bill in congress to that effect will be of especial interest to the people of this state. Seven years ago Dr. Wm. T. Harris, of Defiance, Ohio, spent some time in trying to father a bill of this kind.

The route proposed by Dr. Harris, and there were maps compiled at the the time, starts from Michigan City, striking South Bend, Elkhart and Goshen, and thence southeasterly to Syracuse lake, proceeding on through the small chain of lakes in Kosciusko, Noble and Whitley counties to Fort Wayne, the plan being to dig the canal from Blue lake to Ft. Wayne and connecting with the Maumee river and thence into Toledo. The expectation was to take advantage of the natural waterways available and the people were deeply interested. But legislation was lacking and the movement died. Now it seems that there is more friendship toward the movement. Indiana has attracted so much attention since then in every way that the people of the entire nation are more friendly to us, and there is a possibility for great results.

THE BEST COLD CURE.

Is one you can take without interruption to business. One that does not affect the head or hearing like the continued use of quinine. One that cures speedily and leaves you feeling fresh and clear-headed. Such a one is Krause's Cold Cure. Price 25c. Sold by Geddes & Harding.

A LOOSE ASSESSMENT STATUTE.

Auditor of State Hart in writing to a Goshen lady who paid over $500 into the Royal Life Insurance company says: "The Royal Life Insurance company was organized under the law of 1883 a very loose assessment statute that has now been repealed. The company never had any deposit with the auditor of state, as do the companies operating under the more recent law of 1899. If the agent of the company represented to you that it had a deposit with the auditor of state, I think you should get after him for obtaining money under false pretenses. The company was a plain unadulterated assessment company operating under one of the poorest laws in the world, and I am only surprised that any legislature would pass such a law."

"Do you know, Tommy, said the minister who was helping the family to dispose of their Sunday dinner, "that, no matter how insignificant a thing may seem, it has its use? Now take flies, for example; you wouldn't think they were good for anything, yet—"

"Oh, yes, I would," interrupted the youthful Thomas. "Pa says they are good to keep folks awake when you are preaching."

The Auburn councilmen are even divided so far as politices are concerned, and the Dispatch, the republican newspaper there, recommends the re-election of all of them. They are now contracting for the paving of several streets, and the Dispatch feels that the present council is better prepared to finish the improvements than a new council; that expansion or anti-expansion, protection or free trade has nothing to do with street paving or other city improvements. The arguments seem pretty good, at least from this distaet point of observation.

The season for clipping horses is now at hand and those who use the clippers seem to be busy. Some few yeary ago the practice of clipping horses was considered by many to be cruel and inhumane, but of late years it is quite the proper caper. Among the speakers at a big St. Patrick's Day banquet at Washington, Hon. James M. Robinson indulged in the following in responding to the toast "America:" "Let us not follow the example of Alexander, who, amid the plaudits of his people, wept that there were not more worlds for him to conquer. Our duty is plain. Little Boer boys and girls are crying for their fathers and mothers. This is claimed by England to be civilized warfare. Let us pray that America may never imitate its example. America to-day should deny no people's cry. She should give them a willing ear."

In discussing the probability of an early spring a writer in the Des Moines Capital says: "In 1861 snow and sleet fell on seventeen different days in May. In June there was either frost or snow every night but three. The snow was five inches deep for seven successive days in New York, and from ten inches to three feet in Vermont and Maine; July cold and frosty, ice as thick as window panes. In every one of the New England states in August the ice was an inch thick The cold killed every green thing in the United States. In 1817, corn that had been kept over sold at from $6 to $10 ber bushel; May 10, 1849, snow fell to the depth of a foot in Jamestown, Virginia, and was piled up in hugh drifts in most of the northern states; snow also fell in many parts of Iowa and Illinois, May 11, 1878."

General Miles is likely to be retired by President Roosevelt because he insists on ending the Phillippine war without so much bloodshed. The plan he proposes to adopt is the one with which he brought the western Indians to terms. But the president is one of those strenuous fighters who likes to shoot things to a finish. Therefore General Miles will have to go. In considering his retirement it might be well to remember that at the outbreak of the civil war General Miles was a porter in a Boston store. He entered the army as a private, was wounded several times and promoted time after time for conspicuous gallantry until in 1865 he was a major general. He also received the thanks of congress. Since then he has proved to be the most successful of our Indian fighters, and is now at the head of the United States army. But he never wrote a book in which he was the conspicuous hero.

WHEN YOU GO INTO A DRUG STORE

to get a bottle of Painkiller, examine it carefully to see if it is made by Perry Davis, and don't be persuaded to take something "just as good" because it is a few 6cents cheaper. There is only one Painkiller, "Perry Davis." Large bottles 25 and 50c.

THE THRUST OF A LANCE

is scarcely more agonizing than the recurrent pains in the abdomen which follow the eating of improper food or too free indulgence in ice-water. The immediate cause of croups and colic is often the distention of the bowels by gas. Quick relief follows the use of Perry Davis' Painkiller. Careful housekeepers give it the place of honor in the family medicine chest.

Auburn has the paved street fever and will make a brave effort to pull out of the mud, by building a mile and a quarter this summer. Nineteen bids have been made on the work, both for brick and asphalt and it will be awarded soon. Are paved streets a good thing? Ask any merchant or any farmer who comes to the city to do business.

The Columbia City Mail has changed to the 16-page magazine form. It is an excellent paper and bears evidence of prosperity.

110 acre farm under high state of cultivation, well tiled, fine buildings you cannot find a better farm in DeKalb Co., another of 170 acres. Splendid buildings and fine soil. See Webster and Wartenpe.

A TARIFF FIGHT INEVITABLE.

There is sure to be a great tariff revision fight waged this year in the congressional campaigns between the democrats and the republicans. The course of congress up to date in refusing to concede to the republican members even the right to be heard in behalf of the revision of schedules that afford no protection to any necessary industry, but are only profitable to the trusts by enlarging the profits they can demand from a shut-in mass of consumers, is producing widespread discontent among the people.

The fact is thus made plain that protection is being used for the benefit of favorites and against the people who heretofore have given it its existence and strength. Had only the democrats been concerned in attacks upon the manifest evils of the system the leaders might still, like Demetrius and his craft in Ephesus, have raised a mob and a howl that would have silenced internal objectors and rallied the whole party to the defense of the policy with the cry of "Great is Dingleyism!" But when republican leaders have pleaded for an honest protection system and the cutting off of monopoly bounties only to be turned down and threatened with punishment for their loyalty to the people, the boots get on the other leg so to speak!

It is now shown, by figures that cannot be successfully denied, that the Dingley schedules from A to Izzard could be horizontally shaved off 80 per cent and still afford ample protection to every American industry for which protection against destructive foreign competition could be honestly demanded.

In those figures lie the boundaries of one of the greatest political battle grounds of the generation. The democrats cannot afford to minimize the issue they present and to make them the basis of an assault upon Dingleyism that will bring to the party a victory even greater than that of 1892.

DID NOT TELL THE TRUTH.

Secretary Root, in the recent controversy with General Miles, made the remarkable statement that the pacification of the Philippines has proceeded more rapidly than Americans could have rightly expected when the Spanish treaty was ratified.

Our Secretary of War should elaborate. It would be instructive to learn what the controlling circle of imperialists counted upon when they began the subjugation of an alien people and the political enslavement of millions who, under our Declaration of Independence, were created our equals under at least our American laws.

If the Republican leaders, when the treaty of Paris was under discussion, expected that the country would spend more blood, time and money than have been spent, to secure a mere sullen lull in Filipino hostility, then they must be credited with an imperialist ruthlessness equal to that of the colonizing Kaiser or that of the Russian Cabinet when it considers Manchuria.

American people expect to be informed of the sacrifices they are to make for given purposes. Imperialists in office did not tell them before the treaty was ratified that an annual expenditure of hundreds of millions, a regular army of over 50,000 men stationed abroad and a subversion of all our principles of government would in more than three years reach only the point of a suppressed rebellion with no prospect of permanent Philippine government on a civil basis.

Of course, it's all right for March to go out like a lion if such a departure is necessary to maintain tradition. But the thousands of women who were prevented from wearing their new spring gowns and bonnets on Easter Sunday thereby will doubtless contend that the "lion business" was a bit overdone this year.

The democrats of Elkhart county seem to be organizing this spring with the view of accomplishing better results. This is commendable and it is hoped they will regain some of their lost ground. Elkhart county has been a sore spot to the democracy of the state for some years largely through the mismanagement of its leaders.

Perhaps the greatest squabble for county positions took place at the republican primaries of Marion county (Indianapolis) that the people of that city ever witnessed. Several candidates report nearly $4,000 as expenses. The bone of contentfon among the candidates was the negro vote. It was all purchable, but it took money to get it. The negro vote in that city is about 6,000.

UNCLE MARCUS AND THE CROWN.

Usually we would be disposed to take Uncle Marcus Aurelius Hanna at the full face value of his smile that is so childlike and bland. But when it comes right down to the point of accepting as unconditionally straight goods his letter to that western man, declining to be considered an aspirant for the presidency and asking that his friends refrain from mentioning him in that connection, we must be pardoned for pausing to give our credulity a stimulant!

It may be true that he wrote the letter in question. It sounds like a letter dictated on the spur of the moment, with one eye foxily shut and the other on the woodcock that must not be flushed too hurriedly. Because of Uncle Marcus is really harboring designs on the white house he can not afford to let the present tenant find it out. There are certain little matters which would quickly go where the woodbine twineth if the entente cordial between the president and the chairman of the national republican committee should be disturbed. And, in addition, some senatorial perquisites in Ohio appointments might be forthcoming in the meanwhile.

A method too frequently neglected, whereby temperance may be encouraged, is the regulation of the habits of employes in reference to liquor drinking. If the drink habit is bad it must have bad effects, and these must serve to make the workman less capable and trustworthy. A suggestion of the method may be gathered from the fact that the French Governor Director of Railroads has written to the different societies opposing the use of alcohol that all the Government roads have agreed to the following: First, to discharge all employes who persist in using spirits and wine while on duty; second, all persons who continue to drink shall be dropped from the pension rolls of the company, and will not participate in the endowment funds in case of an accident. All restaurants on the roads are forbidden to sell spirits to the workmen.

MANY RELIABLE WITNESSES

Prove That Old Cases of Chronic Catarrh can be Cured.

A Medicine That Will Cure Cases of Catarrh of Long Standing Deserves a Very High Place in the Annals of Medical Discovery.

Such a Medicine is Peruna.

THOUSANDS of testimonials are pouring in every day of old cases of chronic catarrh that have resisted all treatment for years, being promptly and permanently cured by Peruna.

These reports do not all come from obscure places, signed by obscure people. A large proportion of these letters are written by men and women prominent in business and professional circles and many of them well known from ocean to ocean.

Colonel John Franklin Waters occupies a prominent position among the leading trial lawyers of Chicago. He has probably obtained more verdicts against corporations in suits for personal injuries than any man of his age in the United States, and during his practice of over fifteen years he has not lost a single case in the Supreme Courts of Illinois and Missouri. He is a hard worker and has the energy of four men.

For a number of years he had been afflicted with chronic catarrh and having recently been thoroughly cured of his old affection, an interview was obtained with him by one of our reporters in which he gave the following statement to the public:

CHICAGO, ILL., Aug. 6, 1900.
The Peruna Medicine Co., Columbus, O.:

Gentlemen—"It gives me great pleasure to testify to the merits of such a worthy remedy for catarrh as your Peruna. I had suffered for a number of years from this very disagreeable disease and had tried many so-called remedies, but until I used Peruna none had the desired effect. I feel that I am perfectly cured and can cheerfully recommend Peruna to any one suffering from catarrh."

JOHN F. WATERS,
120 E. Randolph St., Chicago, Ill.

Another case equally well-known in Chicago, is reported through a letter from a veteran Railroad man.

COLONEL JOHN FRANKLIN WATERS, OF CHICAGO.

J. H. Lyons.

Captain John H. Lyons, of Chicago, passenger agent for various railroad companies for the past twenty-four years, connected with the Postoffice Department for six years, the Police Department for six years, and at present connected with the Grand Trunk railroad, had a similar case. He is a veteran soldier and a prominent member of G. A. R. Camp No. 102.

Captain John H. Lyons, 1612 Prairie Ave., Chicago, Ill., writes:

"For twenty years I suffered with chronic catarrh but thanks to Peruna I am now entirely cured.

"It affords me much pleasure to make a statement in behalf of your meritorious remedy, Peruna. I have used same for catarrh and have found it to be all you claim for it. I had suffered for twenty years. I cheerfully recommend Peruna to anyone suffering from catarrh, as I believe that, as in my case, it will prove a sure cure."—Captain John H. Lyons.

Address The Peruna Medicine Co., of Columbus, Ohio, for instructive free literature on catarrh.

SOME TESTIMONIALS.

There are some queer testimonials published. The cure-alls find followers everywhere. Following are a few that have caught the attention of the editor of an exchange:

One man said: "I was born baldheaded and could't spell hair until I came across Dr. Knob's restorative. I bought a bottle, and in going home fell into a briar patch and broke the bottle and the next day the thicket was full of hairs."

Here's another that is simple and beautiful: "During five years of my life I had only one leg. I consulted numerous physicians, but they did me no good. Finally I consulted Dr. Stretch and he pulled my one leg until now it is long enough for three."

This is from a man who appears to have been badly off: "I lost all my blood in a sausage factory and nothing did me any good until I took Dr. Gores remedy and found such improvement in my blood, that since then my daughter has joined the Colonial Dames."

The Rev. Dr. Nod writes: "For a number of years I suffered from insomania, but after using two bottles of your famous remedy I put my congregation to sleep."

Here is one from a woman who now appears in a fair state of health: "I was so lean that I could have traveled as the living skeleton, but I took eight bottles of your medicine and now have so much flesh that when I go to a theatre they think I am a box party."

We are in position to figure with you on tin, steel or gravel roofing also spouting. Yours for business, W. M. Thompson & Son.

HELPFUL HINTS.

"O-o-o-h!"

It is the wife who shrieks thus.

"What is the matter?" calls the husband.

"Baby has swallowed a tack."

Nervously the husband seeks his copy of "First Aid to the Injured."

Quicker yet is the wife.

See! She is feeding the baby a tack-puller.—Baltimore American.

For Sale—One of the best 160 acre farms in DeKalb county. It is the finest farm adjoining Butler. Has fine buildings; beautiful residence. 30 acres timber, all modern improvements. Will be sold very reasonable. Wilcox & Campbell.

An exchange sings as follows: "Winter days are passing by, soon we'll hear the busy fly. Soon we'll hear the murmuring rill and gather greens on every hill. The old gray mare's begun to shed, it's time to make your lettuce bed. Sugar sap is runnin sweet, farmers now begin to treat, and when the hens begin to set spring ain't fur you better bet."

MORTGAGE DEDUCTION.

The supreme court of Indiana has held the mortgage deduction law to be constitutional and any person having a valid mortgage existing against real estate are entitled to have the same deducted from the value of said real estate to the amount of $700, provided it does not exceed one-half the appraised value thereof. The person or persons claiming such deduction in order to obtain the same must file with the auditor, during the month of April an affidavit stating the name of the mortgage, with his place of residence and the amount thereof remaining unpaid on the first day of April 1902, together with the book and page where such mortgage is recorded.

Such affidavits must state all facts required by law or the board of review will reject the same.

Blanks will be furnished by the auditor free of cost, on which the affidavit must be made.

A CONSCIENTIOUS MINISTER.

Dear Sir—Having tried your White Wine of Tar Syrup, I believe it to be an ecellent medicine and can conscientiously recommend it to others. Respectfully yours, Rev. Wm. Stevenson, Kingsville, Mo.

SEEK YOUR OWN RELIEF.

Life seems to many to be a drudge, a weariness, a struggle for existence with little hope of earthly betterment. The apparently unfortunate condition may have been no fault of theirs, but they are very much to blame for not making a strenuous effort to improve it.

As long as there is life there is hope for better things. We were giving intellects to seek knowledge and learn how to live in comfort and plenty. Those who are weighed down with trouble or who find life a burden should appeal to a higher power for relief.

Of what use is religion if its benefit cannot be realized here? It is true that we we are offered the blessings of a future life and are given to understand that we shall experience greater happiness by abandoning the evils of our present existence. But now is the time when we want relief.

Therefore there can be no harm in appealing directly to God for his merciful assistance in showing us how to live. Why should we struggle along in poverty and ignorance, or in the clutches of vice if He can help us?

Let every person in sickness or trouble, in sin, or misery, in sorrow or affliction, in want or squalor, in need of work or assistance pray with all his heart and soul for Divine aid. Don't pray for anyone else, but ask God to help you, to give you strength to get out of your trouble. That kind of a prayer will always be answered.

I live and let my brethren live
With all that's good with me.
Unto the poor, some cash I give,
The balance I give Rocky Mountain Tea. Geddes & Harding.

A TERROR TO LAZY MEN.

Butler Could Use Her For Several Months.

There is a woman in Elkhart who is doing her community more good than all the preachers and other good people of her city combined, and it is to be regretted that a woman or a man like her is not to be found in every community. Her name is Sophia Demuth, 47 years old, weight 190 pounds and has a heart proportionate to her size. She holds no public office yet she is the most indispensible person in the community. If a waif is left on a doorstep, Mrs. Demuth finds it a home; if they are orphans they go to Mrs. Demuth; if a child is lost, the next person informed after the chief of police is Mrs. Demuth; if a boy or girl runs away from home, the parents appeal to Mrs. Demuth; if if there is to be a distribution of food to the very poor in midwinter, it is done through Mrs. Demuth.

Mrs. Demuth has been for years the good angel of Elkhart. Get her into some movement and you get results. She is a plain woman, plain spoken. A few months ago she atte ded at Indianapolis a state convention of prohibition officers and astounded the assembly by saying: "Mr. Chairman, the curse of this state and this country is laziness. We have too many whittlers in our small towns and too many saloon bums in our cities. Down at Elkhart we have some men who have not done a lick of work since they became old enough to realize what they were doing. They are none of them bachelors. No such good luck. They have families—the poorer the bigger. The wives and mothers work when they can, the children work at the glass factories and the fathers lay around and do nothing at all until Saturday night, when they take their coats off, roll up their sleeves and take the week's earnings from the children. They need it for whiskey—the mean, dirty, contemptible things. I move you that this convention appeal to the legislature of Indiana to draft a law making laziness a misdemeanor. We don't want to put those people jails, where they can play cards all day and have regular meals, but we want to put them to work on the roads, where they can work out their keep."

The convention was a little to conservative to sanction Mrs. Demuth's resolution, but it applauded her, and acknowledged that what she said was true. Mrs. Demuth determined that if war on lazy men could not be made a general movement through the state it could be essayed in Elkhart, anyway. So she went to the chief of police and said: "Chief, will you back me up if I get after the lazy men of Elkhart?" The chief said he would. Within a week Mrs. Demuth called upon him again. She had found a man who made his wife and children work to support him, though he was able to work himself. An arrest followed, and the police magistrate gave the idler 10 days to go to work or to jail.

Recently Mrs. Demuth appeared at the home of George Blank, an able-bodied man averse to work. This is what happened: "Are you George Blank?" "I m George Blank" "Is this your home?" "Yes." "Are you an invalid?" "No." "Why don't you work?" "It's none of your business why I don't work. Get out." Then the Nemesis of indolent humanity swung her fist under Blank's nose, and beside gave him a tongue lashing that caused him to cower in terror. Next she bade the children pick up their scant clothing and follow her.

This was the end of George Blank's family circle. Mrs. Demuth found homes where the children would be fed, clothed and educated, and she sent the police after Blank. He was given ten days in which to show visible means of support, and within two days was working at the glass works, the first labor he had sought during the winter.

Mrs. Demuth has the approval of the Elkhart community in her unique crusade She gets no money from any source for this or any other work she does, and she needs none, for her husband and sons are glass blowers, making good wages. She does it because she believes it ought to be done. She despises a lazy man. She has personally visited more than a score of them in the last sixty days. When some one suggests that she is meddling with other people's business, Mrs. Demuth answers that when women and children are denied the comforts of life because husbands and fathers are too lazy to provide for them, it is anybody's business who has the stamina to walk in and lead the loafer by the ear from his couch of ease to the work bench.

Mrs. Demuth is, in truth, a crusader and the people of Elkhart are swift to rise in her defense. This is her definition of a lazy man: "A lazy man is no man at all. He is a mean, contemptible creature, the purpose of whose creation is not yet apparent. He is a fellow who can never find work. He is the creature who forgets that the first consideration should be meat and drink and clothing for his family. He is the individual who never worries himself with wondering whether his wife cuts and carries the wood for fuel or for physical culture. He is the fool who imagines that it isn't the greatest of all delights to be a good provider. He is the only type of humanity from which every trace of pride has disappeared. He is a man who does not love his wife and children enough to take care of them and who does not love his own life enough to make the most of it. So he is a man a long time without a heart, and but a short time to possess a soul."

Painless Childbirth.

Zoa Phora the Only Safe, Sure and Ever Ready Remedy in the Three Danger Periods of Woman's Life.

It Carries Women Safely Through the Terrible Ordeal of Childbirth and Afterwards Restores the Organs to Strength and Vigor of Health.

TRIAL BOTTLE MAILED FREE.

The stern agony, the awful writhing pain of childbirth is known to every woman who is a mother who did not prepare for the terrible ordeal with Zoa Phora. With the use of Zoa Phora many women testify they find the labor of bearing children very easy, the pain almost nothing, and altogether a different time during confinement and the days preceding it.

MRS. EMMA DODSON, Jerseyville, Ills.

Mrs. Emma Dodson, of Jerseyville, Ills., says: "I have kept Zoa Phora in my house for twenty-one years, using it at monthly periods and preparatory to confinement. Before I used Zoa Phora I was very irregular and suffered terribly whenever I did menstruate, but by using it I became regular, and suffered very little. I have often said I had sooner go through childbirth without an attending physician than do without Zoa Phora previous to confinement. I have been the mother of five children. Before the first two came I had not heard of Zoa Phora, and suffered labor with one fifty hours before delivery. The last three births I used Zoa Phora during each pregnancy and was not in labor over four hours for any of them. I have now passed safely and comfortably through the critical time, called change of life. I suffered very little pain, because I used Zoa Phora. It is the best medicine for painful menstruation I have ever seen, and I have given it to several women, and have never known it to fail."

Zoa Phora has brought the sunshine of health into the home of many a despairing woman. It has made it possible for women to have children who never in the world could have stood the pain and suffering and laceration that must surely have followed the birth of a child in their old condition. The stories of some of the women who now praise this great medicine, Zoa Phora are truly wonderful. They tell of monthly pain and misery suffered for years. They tell of the impossibility of bearing a child for the reason that the organs were not strong enough to carry the child to the end of the time, but would miscarry, greatly endangering the life of the mother. Now they assert they have had children with scarcely a pain and with little inconvenience after the birth was over, few pains and no bad after effect.

Get a dollar bottle of Zoa Phora at the nearest drug store, or the Zoa Phora Co., Kalamazoo, Mich., will send it to you prepaid on receipt of price. It is no experiment as hundreds of grateful women testify daily. The doctor is always glad to answer questions. Do not hesitate to write for information.

We will be glad to send you a large trial bottle free upon receipt of 10c. to cover postage and packing. Address, Zoa Phora Co., Kalamazoo, Mich.

MALARIA An Invisible Enemy to Health

Means bad air, and whether it comes from the low lands and marshes of the country, or the filthy sewers and drain pipes of the cities and towns, its effect upon the human system is the same.

These atmospheric poisons are breathed into the lungs and taken up by the blood, and the foundation of some long, debilitating illness is laid. Chills and fever, chronic dyspepsia, torpid and enlarged liver, kidney troubles, jaundice and biliousness are frequently due to that invisible foe, Malaria. Noxious gases and unhealthy matter collect in the system because the liver and kidneys fail to act, and are poured into the blood current until it becomes so polluted and sluggish that the poisons literally break through the skin, and carbuncles, boils, abscesses, ulcers and various eruptions of an indolent character appear, depleting the system, and threatening life itself.

The germs and poisons that so oppress and weaken the body and destroy the life-giving properties of the blood, rendering it thin and watery, must be overcome and carried out of the system before the patient can hope to get rid of Malaria and its effects.

SSS S. S. S. does this and quickly produces an entire change in the blood, reaching every organ and stimulating them to vigorous, healthy action. S. S. S. possesses not only purifying but tonic properties, and the general health improves, and the appetite increases almost from the first dose. There is no Mercury, Potash, Arsenic or other mineral in S. S. S. It is strictly and entirely a vegetable remedy.

Write us about your case, and our physicians will gladly help you by their advice to regain your health. Book on blood and skin diseases sent free.

DECISION OF JUDGE ROBY.

A new and somewhat unique question of law was decided by the appellate court of Indiana a few days ago, the opinion being written by Judge Roby. It arose from the following facts, briefly stated: A man with a pimple on his nose consulted an alleged cancer specialist The doctor pronounced the pimple cancer and treated it, the patient finally losing a part of his nose.

Later microscopic examination by competent physicians disclosed the fact that the man's ailment was not cancer, and a suit against the cancer doctor for damages followed. The verdict in the trial court was in favor of of the doctor The plaintiff appealed, and the appellate court reversed the case, the syllabus to the decision being in these words: "When a physician holds himself out to the public as a specialist in the treatment of disease, he is bound to bring to the discharge of his duty, to patients employing him as such specialist, that degree of skill and knowledge which is ordinarily possessed by physicians who devote special attention and study to the disease, its diagnosis and treatment, having regard to the present state of scientific knowledge." In short the decision means that the specialist must possess the knowledge he claims to have, and must exercise the skill of a competent practitioner. —Angola Magnet.

THIS CLIMATE IS GOOD

enough for anybody with weak lungs. The patient needs I. He can get well here with the help of Allen's Lung Balsam, taken freuently when coughing and shortness of breath after exercise serve notice upon him that serious pulmonary trouble is not far away. Allen's Lung Balsam is free from any form of opium.

A parallel case to the recent horrible death of a Noble county child is recorded from Nopoleon, Ohio. Miss Emma Bohrs practically starved to death. She was employed by a Napolean family and while away from home the lady of the house used a drinking dipper for dipping some concentrated lye. When Miss Rohrs returned she used the dipper to drink water. Some of the acid remained in the vessel and her throat and stomach were burned in a horrible manner. She could not eat, the passages became swollen, and after six months of the most terrible suffering she died, death being due to starvation. The young lady lacked a few months of being nineteen years of age and very popular.

I have had occasion to use your Black-Draught Stock and Poultry Medicine and am pleased to say that I never used anything for stock that gave half as good satisfaction. I heartily recommend it to all owners of stock.

J. B. BELSHER, St. Louis, Mo.

Sick stock or poultry should not eat cheap stock food any more than sick persons should expect to be cared by food. When your stock and poultry are sick give them medicine. Don't stuff them with worthless stock foods. Unload the bowels and stir up the torpid liver and the animal will be cured, if it be possible to cure it. Black-Draught Stock and Poultry Medicine unloads the bowels and stirs up the torpid liver. It cures every malady of stock if taken in time. Secure a 25-cent can of Black-Draught Stock and Poultry Medicine and it will pay for itself ten times over. Horses work better. Cows give more milk. Hogs gain flesh. And hens lay more eggs. It solves the problem of making as much blood, flesh and energy as possible out of the smallest amount of food consumed. Buy a can from your dealer.

CUBA'S DAY OF INDEPENDENCE.

By the terms of the provisional electorial law prescribing the plans to be followed in establishing Cuban independence the military governor of the island is authorized to name the dates upon which the new government shall be proclaimed and its executive and legislative officials installed. The Cubans have now elected a president, a vice-president and a legislature, together with a municipal or provincial officers. Practically the whole machinery of government stands waiting for Gov. Wood to press the button which is to set it in motion. Although May 1 was the date orignally selected as the time for this step, it has now been agreed by President Roosevelt and President-elect Palma of Cuba that the formal transfer of sovereignty over the island shall take place on May 20. On that day Cuba will cease to be an American dependency and become a full-fledged independent republic. Then too, if the administration carries out its present commendable purpose the United States will withdraw from the island bag and baggage, taking all its governmental agents, civil or military, with it. Cuba will be left to its own devices.

A VALUABLE MEDICINE

For Coughs and Colds in Children.

"I have not the slightest hesitancy in recommending Chamberlain's Cough Remedy to all who are suffering from coughs or colds," says Chas. M. Cramer, Esq. a well known watch maker of Colombo, Ceylon. "It has been some two years since the City Dispensary first called my attention to this valuable medicine and I have repeatedly used it and it has always been beneficial. It has cured me quickly of all chest colds. It is especially effective for children and seldom takes more than one bottle to cure them of hoarseness. I have persuaded many to try this valuable medicine, and they are all as well pleased as myself over the results." For sale by S. G. Stone, druggist.

DREADFUL ATTACK OF WHOOPING COUGH.

Mrs. Ellen Harlison, of 300 Park Ave., Kansas City, Mo., writes as follows: "Our two children had a severe attack of whooping cough, one of them in the paroxysm of coughing would often faint and bleed at the nose. We tried everything we heard of without getting relief. We then called in our family doctor who prescribed Foley's Honey and Tar. With the very first dose they began to improve and we feel that it has saved their lives." Refuse substitutes. Sold by Geddes & Harding.

NOW LOOK OUT!

"Take care of yourself," say our friends. "I'll try to," we answer. We do take a little care, yet in spite of warm clothes, rubbers and mackintoshes, an army of people were bowled out by pneumonia and other lung and chest diseases last winter. They caught cold, neglected it, let it fix upon them, were torn by coughs, choked by inflammations and congestions, wasted by fever, tired out by pain and then gave up the fight. The hour you realize that you have a cold on the chest, place a Benson's Porous Plaster where the pain or oppression is felt. If you think two are needed make it two. No harm if you were covered with them. They act quickly and prevent the engorgment of blood in the organs. In this way—with ordinary caution as to exposure—you will break up the cold and avoid a serious sickness. No other applications, or any other form of treatment, will accomplish this as certainly and speedily. Benson's Plasters have a distinct and positive action and are curative to the highest degree. Use them with the same confidence for coughs, muscular rheumatism, the grip (back and chest) and all similar ailments. Women, who are chief sufferers from cold weather complaints, should keep these plasters always within reach. Get the genuine. George is a hustler and well deserves the success he is having.

Clint Oberlin was severely hurt last Sunday while attending to his work. He was on a hand car with some of his fellow workmen when one of his companions noticed a piece of iron on the track where some boys had placed it who they were passing and placed his foot on the brak. This checked the car so suddenly that Clint was hurled head long off in front of the car and directly beteen the tracks where the car passed completely over him. He was picked up and brought home at once where he has been in a very precarious condition ever since but a slight improvement can be noticed. The base of the skull is factured which is invariably fatal but in this case, great hopes are entertained for his recovery.

Anxious thoughts sometimes perplex the wife who sees maternity before her. If she is treading an untried path, she sometimes frets herself into a nervous condition which is injurious and prostrating. If motherhood has already been a painful experience she is apt to shrink from the coming trial and by her very mental anxiety increase the possibility of her suffering.

There is no cause for anxiety for those prospective mothers who use Dr. Pierce's Favorite Prescription. It tranquilizes the nerves, encourages the appetite, induces refreshing sleep and produces mental cheerfulness as well as physical vigor. It gives strength and muscular elasticity so that the baby's advent is practically painless. It is the best tonic for nursing mothers.

"I am so thankful for what Dr. Pierce's Favorite Prescription has done for me," writes Mrs. John T. Smith, of Slocan, Brit. Col., Box 92. "It helped me through the long months before baby came and I have a big, strong baby girl, the most healthy of the three, and it cured me of a disease which was taking away all my strength."

The dealer who offers a substitute for "Favorite Prescription" does so to gain the little more profit paid on the sale of less meritorious medicines. His profit is your loss, therefore accept no substitute.

THE PUBLIC SCHOOLS.

The attention of our readers is called this week to the sixth grade of our public schools. The work of this department is in charge of Miss Lily Fisk, who is fully demonstrating her ability to instruct pupils that have reached a critical period in their school life. By unassuming, conscientious and persistent effort Miss Fisk has accomplished much good work in her department.

The sixth grade is a very mysterious age of a childs life. The children realize they have hands and feet. Just what to do with them is often a serious question. They are cognizant of an inner being and consciousness which is difficult to express. They are no longer children, not the young men and women they would like to be. The girl lays aside her doll, the boy his drum and soldier cap because they are child-like. The parent and teacher have to supply objects of interest to take the place of the long cherished playthings.

The teacher endeavors in manifold ways to engage the surplus energy in the pupils studies. In the business world competition is the life of trade. Sometimes the feeling of rivalry is a healthful stimulant to flagged interests in the school-room. In grammar we have been studying the relation of words in a sentence the ultimate end being a clearer insight into the meaning conveyed. The subject under discussion being the "noun" we resolved to have a parsing contest, girls versus boys. For three recitations the word battle raged. Each child was thoroughly interested and carefully observed the parsing of each word.

During these recitations a little incident occrrued which revealed a hidden broadness in a nature which was certainly worthy of being fostered. One of the girls, when called upon to recite said: "I can't parse it." A boy forgetful of party glory replied: "You can try." Was it not a generous impulse that prompted the suggestion? "Virtue is its own reward"—the boys won.

In geography the B's have been taking imaginary trips in the western part of the United States. The aim is to make the children really see, with the minds eye, the Rocky Mountain Highland with its gold and silver mines, its famous parks with their boiling, seething springs and geysers shooting the water upward hundreds of feet, the snow capped peaks, the Colorado valley famous for its beautiful scenery, and the Gorge with its prismatic colors portrayed by the rising and setting sun. Leaving the highland they visit the fertile valley of California with its orange groves, grape vine-yards and abundance of flowers. By calling their imaginations into greater activity perchance they may see the "Golden Gate," wonderful gate-way of the west, in all the sublime glory of the setting sun.

The children may never take the real trip but how much their lives are enriched to know that such proofs of the wisdom of God exist.

The study of Physiology is condemned by some who think it entirely impracticable. In today's lesson the following are some of the thoughts conveyed. The tissues of the body require oxygen. It is obtained largely through the lungs, consequently the lungs should have plenty of room to expand. This necessitates an erect posture of the body and an avoidance of compressing clothing. Exhaled air is impure, therefore close apartments should be well ventilated. Decayed vegetable matter and improper sewerage is injurious. At this point a lesson in cleanliness and neatneis may be taught. In fact the purpose of Physiology is a clearer view of Hygiene.

The children have committed the "Psalm of Life" for one of their memory gems. After carefully noting the beautiful thoughts portrayed an enthusiastic maiden said: "Oh teacher I like it." The object in studying the above selection is to awaken a desire for that literature which not only broadens the mind but inspires the soul to a higher life.

In the stern realities of life the mind may often revert to the thought "Life is real! Life is earnest! And the grave is not its goal," and be stimulated to strive more earnestly to rise above the sordid cares and truly live in the broadest, highest sense.

Not only is the child's aesthetic and moral nature to be developed but the practical as well. Economy, an important factor of financial success, may be taught in the careful use of paper, pencils etc. It is difficult for a child to understand he should not destroy a partly used tablet thus forming a habit of wastefullness.

Why all this careful training? It is to produce noble young men and women with stanch, sturdy character prepared to uphold the right, oppose the wrong and fill well the responsible positions awaiting him.

B SECTION—Blanche Casebeer, Silvia Geisinger, Ollie Miser, Bessie Moughler, Alethea Perkins, Fern Robinett, Zella Rush, Hilda Whitman, Ivey Warner, Roebert Brown, Daine Bordner, Perry Chilcoat, James Cummins, Guy Cosper, Claud Frech, Clarence Nelson, Harry Oberlin, Harry Richard, Harold Tess.

ORDER OF THE EASTERN STAR.

Forest Chapter, No. 44, O. E. S., had one of the most enjoyable times in the history of the lodge, Tuesday evening of this week.

By invitation, Kendallville, Auburn and Waterloo Chapters were well represented.

The degrees of the Order were conferred on Mr. and Mrs. A. U. Vernier and Dr. Acker, in an impressive manner, the officers acquitting themselves very efficiently and creditably.

The Grand Lecturer of the state, Mrs. George W. Hartsuck, of Kendallville, was present, and made a few remarks appropriate to the occasion, after which a very pleasing program was carried out.

The Lotus Eaters and the scarf drill, which were recently given and so greatly enjoyed, were repeated for the benefit of the out-of-town guests, and were highly applauded. Little Helen Garber and Zura Shumaker gave recitations in their winning way and received their share of praise. These little tots are in great demand on various occasions as they have considerable ability in this line. The music was furnished by Dr. Sargent and a graphophone played at intervals.

Delicious refreshments were served and the remainder of the evening spent in a social way.

Much credit is due the Worthy Matron, Mrs. Rudd, for the prosperous and harmoneous condition of the Chapter and for the interest that is manifested. The last year has been a prosperous one with bright prospects for the future.

RECEPTION AT MR. AND MRS. WARREN MASON'S

At the beautiful home of Mr. and Mrs. W. A. Mason on Railroad street, Friday April 4th, occurred the social event of the season. A reception was given in honor of their neice, Miss Mable Knisely, also Miss Olive Leiter, who were home from Oberlin University for a few days vacation.

Miss Knisely wore white silk with point lace trimming and carried red carnations while Miss Leiter was gowned in a beautiful cream silk with lace trimmings.

The reception was given between the hours of 5 an 1 9 o'clock and more than a hundred guests were hospitably received by Mr. and Mrs. Mason and pleasantly greeted by the Misses Knisely and Leiter.

The ladies who assisted in reciving proved equal to the occasion, and welcomed each guest in a genial and hospitable manner, dispelling all formality, making the evening a happy mingling of old and young.

In the back parlor, Miss Stone presided at the punch bowl, after which the guests were invited to the dining room, which was beautifully and artistically decorated with ribbons and flowers, carnations tulips and potted plants. Here Mrs. Berger and Miss Nora Brown served dainty refreshments to all, after which the guests registered in the reception hall where stuffed dates were offered.

The music furnished by Dr. Sargent Mrs. Berger, the Misses Jennie Harger, Hazel Urie and Bessie Stone greatly added to the evenings enjoyment. The guests lingered in the spacious parlors seemingly loth to depart thus manifesting their delight in the evenings pleasure and universally pronouncing their host and hostess royal entertainers.

ROYAL BAKING POWDER CO., NEW YORK.

THE L. O. T. M.

The L. O. T. M. of Harmony Hive No. 26, had a most excellent time at their regular meeting Friday evening, April 4th.

As Lady Byron Mason and Lady Kinney intended to move from our city the lodge took the opportunity of expressing its sincere regrets at their departure.

Light refreshments were served and after the regular work the evening was given over to social enjoyment.

Much credit is due Ladies Coats, Stevens, Bechtel, Harger and Miller, who constituted the entertainment committee for the efficient and successful manner in which they discharged their duties.

At this time the lodge also availed themselves of the opportunity of presenting Mrs. Maud Haverstock with a beautiful fraternal pin in token of the high esteem in which she is regarded by her sister members. Last winter Mrs. Haverstock entertained the entire lodge in such a delightful manner that it was highly appreciated by all.

Harmony Hive No. 26, is rapidly mounting the ladder of prosperity which bespeaks the ambition and loyality of its members. Friendly rivilary inspires the efforts of all, and the Herald congratulates them over their rapid growth and successful meetings.

Milo Hussleman, Chas. Madden, Hays Ramsey, Ora Hiner and Smith were at Hamilton lake after ducks last Tuesday. They had great luck, bringing back between thirty-five and forty.

Over-Work Weakens Your Kidneys.

Unhealthy Kidneys Make Impure Blood.

All the blood in your body passes through your kidneys once every three minutes.

The kidneys are your blood purifiers. they filter out the waste or impurities in the blood. If they are sick or out of order, they fail to do their work.

Pains, aches and rheumatism come from excess of uric acid in the blood, due to neglected kidney trouble.

Kidney trouble causes quick or unsteady heart beats, and makes one feel as though they had heart trouble, because the heart is over-working in pumping thick, kidney-poisoned blood through veins and arteries.

It used to be considered that only urinary troubles were to be traced to the kidneys, but now modern science proves that nearly all constitutional diseases have their beginning in kidney trouble.

If you are sick you can make no mistake by first doctoring your kidneys. The mild and the extraordinary effect of Dr. Kilmer's **Swamp-Root**, the great kidney remedy is soon realized. It stands the highest for its wonderful cures of the most distressing cases and is sold on its merits by all druggists in fifty-cent and one-dollar sizes. You may have a sample bottle by mail free, also pamphlet telling you how to find out if you have kidney or bladder trouble. Mention this paper when writing Dr. Kilmer & Co., Binghamton, N. Y.

Eczema for Forty Years.

The Unqualified Statement of a Well Known Attorney, St. Ignace, Mich.

Some of the cures made by Dr. A. W. Chase's Ointment of stubborn and long continued eczema and skin diseases are causing much comment. People are beginning to realize that this Ointment is a wonder worker with all kinds of skin trouble. Attorney James J. Brown, St. Ignace, Michigan, writes as follows:

Dr. A. W. Chase Med. Co. Buffalo, N. Y.—Gents:—I cannot refrain from expressing my acknowledgement for the relief I have felt from Dr. Chase's Ointment. For 40 years I was afflicted with a skin disease which was located in one spot—on my leg I have spent at a rough estimate five hundred dollars trying to effect a cure, and not until I applied this ointment did I get relief. You are strangers to me and this letter is prompted directly because I want to say and I feel as though I ought to say it. That Chase's ointment has effected a complete cure of my affliction. Three boxes did the work on my leg. I was also suffering from itching piles and applied the ointment which gave the best of satisfaction by affording me rest at night and rapidly causing the disease to disappear. I have received such relief and comfort from the ointment that I cannot withhold expressing my gratitude. I was so long afflicted with the tortures of eczema. I feel now that I am cured, a word of recommendation is due from me. Yours truly,

JAMES J. BROWN.

Dr. Chase's Ointment is sold at 50 cents a box at all dealers or Dr. A. W. Chase's Medicine Co., Buffalo, N. Y.

In the debate on imitation butter in the national Senate, Senator Money of Mississippi said that every pound of it that goes to the West Indies is colored a brilliant red, as "the natives there like red butter just as they adore red shirts and red cravats."

The mayor of Waukegan, Wisconsin, is a man who attends to all of the details of his office. He often does duty as a policeman, and only a few days ago while walking along the street superintending the municipal work of clearing away the snow, he seized a shovel from a laborer and set to work in the slush to show him how to work. For ten minutes he wielded the shovel with swiftness and then ordered the astonished workman to "go and do likewise"

CHRONIC BRONCHITIS CURED.

"For ten years I had chronic bronchitis so bad that at times I could not speak above a whisper" writes Mr. Joseph Coffman of Montmorenci, Ind. "I tried all remedies available, but with no success. Fortunately my employer suggested that I try Foley's Honey and Tar. Its effect was almost miraculous, and I am now cured of the disease. On my recommendation many people have used Foley's Honey and Tar, and always with satisfaction. Sold by Geddes & Harding.

BETTER THAN PILLS.

The question has been asked, "In what way are Chamberlain's Stomach & Liver Tablets superior to pills?" Our answer is: They are easier and more pleasant to take, more mild and gentle in effect and more reliable as they can always be depended upon Then they cleanse and invigorate the stomach and leave the bowels in a natural condition, while pills are more harsh in effect and their use is often followed by constipation. The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

DEMOCRATIC STATE CONVENTION.

The Democracy of Indiana will assemble in State Convention at Tomlinson Hall, in the city of Indianapolis, at 10 o'clock a. m. on Wednesday, June 4 1902, for the purpose of nominating candidates for State officers, the adoption of a platform, and such other business as may properly come before the Convention.

The basis of representation to said Convention as fixed by the Democratic State Central Committee, is one delegate for each 200, and one delegate for each fraction over 100, of the vote cast for Judge Allen Zollars for Presidential Elector in 1900.

Under the apportionment the Convention will consist of 1547 delegates, divided among the counties as hereafter stated.

The offices for which nominations will be made are as follows:

Secretary of State.
Auditor of State.
Treasurer of State.
Attorney General.
Clerk of the Supreme Court.
Superintendent of Public Instruction
State Geologist.
State Statistician.
One Judge of the Supreme Court for Fifth District.
Six Judges for the Appellate Court.

The loss of an entire life-saving crew while doing rescue work off the coast of Massachusetts portrays some of the perils of a branch of the government service that the general public knows very little about. Ours is the only life-saving system in the world that is an exclusively governmental establishment, the institutions abroad being all voluntary societies. Ours is thoroughly organized and liberally supported by the government and its services in saving lives and property along the coasts and lakes are of immense value.

A bright five-year old at the breakfast table one morning said: "Papa, I had a funny dream last night." "What was it, my son?" "I thought there was a ladder standing on the ground and reaching far up in the air, so high I could not see the other end. An angel gave me a piece of chalk and told me to climb the ladder and upon each round to write a sin or mean act that I had committed during my life. I hadn't gone far when I ran out of sins and mean acts that I had done during my life. While standing there trying to think of more I looked up and saw a speck on the ladder. It grew larger, which showed me it was coming down. As it came nearer I saw it was a man. Soon he was down to where I was, and, papa, the man was you." "Me! What was I doing there?" "That is just what I asked you, and you said you were coming down after more chalk?"

BRAIN FOOD NONSENSE

Another ridiculous food fad has been branded by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for brain another for muscles, and still another for bones. A correct diet will not only nourish a pecular part of the body, but it will sustain every other part. Yet however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. You must prepair for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. A few doses aids digestion, stimulates the liver to healthy action purifies the blood, and makes you feel buoyant and vigorous. You can get Dr. G. G. Green's reliable remedies at Geddes & Hardings. A good story is told on the better-half of a couple who went from this county to spend the honeymoon in a large city. One day the bride, finding that she needed to purchase a few small articles, left the young husband and hotel to go shopping. She returned shortly and made her way up stairs to the door she thought opened into her own room. Knocking gently at the door: "Homer," she called affectionately, "let me in." No response came and she knocked again and called in insinuating terms: "Honey, please let me in." "Mad am" answered a gruff voice from within, "this is no bee-hive. General Reub Williams, of the Warsaw Times, is a practical bird man. Noting that the martins were being driven out by the prevalent, pugnacious and pesky English sparrow, he learned the habits of the martin, advised the building of special bird houses for them and the closing of the same as soon as the martins left in the fall and the reopening of the houses in the spring when the birds return from the southland. The result is about 100 martin houses in Warsaw, and Reub Williams' bird house leads all the rest. The result has been a great increase of these insectivorous birds in Warsaw and much enjoyment as well as profit in their sojourn.

While we do not entirely agree with the author of the "Passing of the Spare Chamber," we wish to pass it along that our readers may see and decide for themselves. There are many very true and quite pretty thoughts, and it will revive many recollections of the days when the darkened spare chamber and parlor were almost sacred and it were almost a profanation to have lifted those same old paper shades and carried a pillow from the bed and taken a siesta upon the floor on a hot summer's day away from noise and flies.

THE NEW GIBSON SHIRT-WAISTS.

The newest shirt-waists, known as the "Gibson," are characterized by broad plaits at the shoulders, gener- extending over the sleeves, thereby accentuating the broad-shouldered effect which is so fashionable in other garments. The May Delineator fully describes the making of these waists, and the accompaning illustrations, depicting the various steps in their in their construction, will be invaluable to the amateur dressmaker. Embroidery of various kinds has been much in vogue recently for embellishing silk and wool gowns and has greatly enhanced their beauty and their value as well. The new decoration, called faggoting, is treated in special article in this numper, and the illustrations show many variations of this stitch and their application.

AFTER FOREIGN CORPORATIONS

The secretary of state is endeavoring to ascertain how many foreign corporations doing business in this state have complied with the law which requires them to file articles in the state and pay the fee required for doing business. Neither the tobacco trust nor the whisky trust has complied, and perhaps others. The law seeks to make it impossible for a company that has not complied to collect a debt or enforce any contract in Indiana.

KICK A DOG

Kick a dog and he bites you. He bites you and you kick him. The more you kick the more he bites and the more he bites the more you kick. Each makes the other worse.

A thin body makes thin blood. Thin blood makes a thin body. Each makes the other worse. If there is going to be a change the help must come from outside.

Scott's Emulsion is the right help. It breaks up such a combination. First it sets the stomach right. Then it enriches the blood. That strengthens the body and it begins to grow new flesh.

A strong body makes rich blood and rich blood makes a strong body. Each makes the other better. This is the way Scott's Emulsion puts the thin body on its feet. Now it can get along by itself. No need of medicine.

This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle.

PROHIBITION CANDIDATES.

The Prohibitionists placed the following candidates in nomination at their county convention, held at Auburn last week: County chairman, J. O. Rose, Auburn; sheriff, Geo. Fretz, Sedan; surveyor, C. C. Woodcox, St. Joe; treasurer, J. H. Urie, Fairfield; commissioner south-east dist., Henry Milliman, St. Joe; representative, Geo. DeLong, Newville. A county council was chosen as was also commissioners for the other two districts. There were 16 delegates chosen to go to the state convention to be held at Indianapolis, April 15 and 16.

There is a chance for free coinage after all but this good thing goes to our "colonial possessions." Monday Senator Lodge introduced the administration Philippine bill, in the senate, on which his committee has been working. One provision of the bill is for the establishment of a mint at Manila to which any person can take silver, in quantities of $100 and more, and have it coined into dollars containing 416 grains of silver, of standard fineness, free of charge, except actual cost of mintage, and the dollars shall be legal tender in all parts of the islands.

DEATH OF EMERY HALEY.

Paoay Ilocos-Norte, Luzon, P. I.
Feb. 19, 1902.

Bereaved relatives and friends of Trumpeter Emery Haley of Troop M. 3rd Cav., stationed at this place under command of 1st Lieutenant Robert E. Wood:

Accept my sincere sympathy in your bereavement of your dear one's sickness and death which took place this 19th day of February 1902, of the most dreaded disease, smallpox. He was stricken by a heavy fever on the 8th inst. and upon the 10th he was removed from the troops quarters with symptoms of smallpox, and on the 12th he had already broken out and then he continually grew worse until to-day at eleven o'clock he passed away and was buried this afternoon in full and strict military discipline regardless of the contagious disease, and the funeral was presided over by the father of the Catholic church at this place.

His funeral was as sad as any funeral I ever attended in my life. My fellow soldiers, as well as myself, were made to feel sad for the lost loving comrade of ours. Haley was a loyal soldier and had excellent health prior to the 8th of this month. The doctor and hospital attendants spared nothing for the benefit of Emery and of which they deserve a high recommendation. Emery and myself have been near and dear friends ever since he joined this troop, as we were so near from the same neighborhood. I was formerly of Bryan, Ohio, also knew some of Emery's acquaintance in and near Butler, Ind.

I will again extend my sympathy to the many relatives and friends of Trumpeter Haley, and should any one wish full particulars of the death and burial and military life of Emery I will gladly give it, by dropping me a few lines I will give full particulars and any other information as I can render.

I am your sympathizer and friend,
JACCB H. KINTNER,
Troop M. 3rd Cav.
Manila, P. I.

Panay, Luzon, P. I.
February, 20, 1902.

Mrs. Elizabeth Haley,
Dear Madame:

It is with the deepest regret that I have to announce to you the death of your son, Emery, late trumpeter of this troop

Your son was taken sick on February 8th and on February 11th the doctor pronounced the disease small pox. A house was rented and he had the constant care of the Post Surgeon and two Hospital Corps privates who acted as his nurses. Everything in our power was done for him, ice being broght from Vegan, 40 miles away, for his use, but from the beginning the disease was of the most virulent type and it was only due to his good constitution and habits that he lasted so long. Owing to the contagious character of the disease none were present at his death bed, except the doctor, the two nurses and myself. He was unconscious and passed away peacefully.

I know that these words are of little avail at such a time but wish to assure you of my deepest symyathy. Your son was very popular in the troop and was liked and admired by all who knew him. He always did his duty as a soldier and I never had a single cause of complaint against him. I send you a few pictures found in his effects which I thought you might desire to posess. All other information relative to his effects you will find in my official letter.

Very Sincerely,
Albert E. Wood.
1st Lt., 3rd Cavalry,
Comd'y Troop M.

Emery Haley, late Trumpeter of Troop M, 3rd Cavalry, was born in Butler, Ind., May 30th 1883, died Feb. 19th 1902; was buried with full military honors in the church yard at Pavay, Ilocoe Norts, Luzon P. I., the priest of the Pueblo officiating.

DISGUISED CATARRH.

A Stealthy, Insidious, Weakening Enemy to Women.

REV. HARRIET R. EDWARDS, CLINTON, IA.

Rev. Harriet R. Edwards in a recent letter from Mt. Pleasant Park, Clinton, Ia., writes:

"I have found that Peruna is a wonderful medicine to use in diseases peculiar to women. It quickly and permanently restores health and vigor and acts as a natural tonic to a worn-out system. I have so far never observed a case which was not greatly aided by its use."--REV. DR. H. R. EDWARDS.

THERE are a multitude of women, especially housewives, and all other women obliged to be on their feet constantly, who are wretched beyond description, simply because their strength and vitality is sapped away by catarrhal discharges from the pelvic organs. These women get up in the morning tired, drag themselves through their daily duties tired, only to go to bed at night as tired as before.

Peruna is such a perfect specific for each case that when patients have once used it they can never be induced to quit it until they are permanently cured. It begins to relieve the disagreeable symptoms at once. The backache ceases, the trembling knees are strengthened, the appetite restored, the digestion made perfect, the dull headache is stopped and the weakening drains are gradually cured. These results certainly follow a course of treatment with Peruna.

Jos. B. Crowley, Congressman from Illinois, writes from Robinson, Ill.:

"Mrs. Crowley has taken a number of bottles of Peruna on account of nervous troubles. It has proven a strong tonic and lasting cure. I can cheerfully recommend it."---Jos. B. Crowley.

Mrs. Wm. Hetrick, Kennard, Washington county, Neb., writes:

"I am fifty-six years old and have not felt well since the Change of Life began ten years ago. I was in misery somewhere most of the time. My back was very weak, and my flesh so tender it hurt me to lean against the back of a chair. I had pain under my shoulder-blades, in the small of my back and hips. I sometimes wished myself out of this world. Had hot and cold spells, dizziness, and trembling of the limbs, and was losing flesh all the time.

"After following your directions and taking Peruna I now feel like a different person."—Mrs. Wm. Hetrick.

Barbara Alberty, corner Seventh and Walnut streets, Appleton, Wis., writes as follows in regard to Peruna:

"For years I have suffered with backache and severe pains in the side. I doctored so much that I became discouraged.

"A school friend told me how very much Peruna had benefited her and I sent out for a bottle, which did more to relieve me than all the other medicine I had ever taken.

Barbara Alberty.

"I used it faithfully for two weeks and it completely cured me. I have not had any pains since, anywhere, but feel like a new woman. I am truly thankful for what Peruna has done for me."—Barbara Alberty.

Mrs. D. W. Mason, 502 Dauphine street, New Orleans, La., writes:

"I have been taking your Peruna and Manalin and can cheerfully recommend it to all those suffering with the same trouble that I was. I have been suffering for the past two years with female weakness, palpitation of the heart, stomach, kidney and liver disorder, and above all a dreadful cough with smothering spells. I was completely run down.

"After I had taken one bottle of Peruna and a few doses of your Manalin, I could sleep soundly, my heart was better, my cough left me, it acted immediately upon my nerves, and after taking four bottles according to your directions, I was entirely cured of all my troubles.

"I can truthfully say that there is nothing to equal your Peruna and Manalin. I was a different women after taking the second bottle. It is without a doubt the best medicine in the world. Language fails to express my gratitude for this cure. May God bless you."—Mrs. D. W. Mason.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

The American Humane Association last year intervened in 29,000 cases of cruelty to children and in 99,000 of cruelty to animals.

The repeal of the war revenue tariff takes the 10 cent tax off a pound of tea. This should reduce the retail price that much.

The youngest governor in the union is William McCroskey of the state of Washington, who recently succeeded ex-Governor Rogers. He is only 28 years old.

It is said that votes for the ship subsidy bill were traded for votes on the oleomargarine measure, which shows the value of preeent republican legislation.

The Federal Courts of Chicago have rendered a decision against special rate cutting, and Judge Grosscup, in his comment, said: "I believe that freight rates should be as steady as postage rates and that no discrimination should be made. The person who turns over freight to a common carrier for transportation should be made to feel that he will enjoy the same rates as any other shipper."

A car load of insane soldiers from the Philippines was taken to Chicago last week. The men were violent and were handcuffed and were chained to their seats. The heat and the awful climate have made these young men incurable lunatics. One man in the Philippines says if you could modify the climate and change the people it would be a good place to live. That is all hell needs.

MAJOR BITTERS DEAD.

We regret exceedingly to announce the death of T. M. Bitters, the venerable editor of the Rochester Republican, The Herald editor was schooled in the "art preservative" under the tutorship of Mr. Bitters, and in fact grew up from boyhood as an employee of his office.

He was a brilliant editor, a forcible writer and a printer in all that the word implies.

We beg to tender our sympathy to the bereaved family, and the community as well, over the death of such an esteemed citizen.

ROSE KEENAN MARRIED.

Louis A. Parre and Miss Rose Keenan were licensed to wed at Geneva, Ill., last week. The news of the marriage came as a surprise to the friends of the contracting parties, both of whom are employed at the Northern Illinois Hospital for the Insane, Mr. Parre being the engineer at the institution. Frank Hooker, the supervisor, is the step-father of the groom.

The ring ceremony was used and the happy couple immediately left for Chicago on their honeymoon. The Butler friends of the bride join the Herald in sending congratulations.

THEATRE TRAIN.

On April 19, the Lake Shore & Michigan Southern Ry will run a theatre train to Toledo leaving Butler at 1:24 p. m. Fare $1.45 for the round trip.

SOME FREAKS.

We are proud to know that the usual wonders of this wonderful country are still coming up serenely. Down in Kansas is a baby six weeks old that continually says "famine." A tree half walnut and half oak is reported. All right. One man says he fed an old hen on sawdust, which she thought was bran. She laid twelve eggs and sat on them red hot In three weeks she hatched out eleven chickens each with a wooden leg. She sat three weeks longer on the other egg and then tore the shell off to see what was the matter. It was a solid round ball of wood. A man in Mankato reports that his dog gave birth to six wildcats and treed the whole litter. Up in Fulda the village editor swears he saw a rabbit with a dozen horns.

A PLEASANT SURPRISE.

A surprise party was given on Miss Atlanta Kester by her Sabbath School class at her home, Thursday evening, April 3rd. Interesting games were played which were thoroughly enjoyed by all.

Miss Kester was presented with a three piece tea set which she appreciated.

After serving choice refreshments, at a late hour, the guests departed for their homes.

Those present were Misses Mabel Miller, Maude Shull, Mertie Miser, Ethel Porter, Etta Tombow, Inez Chilcote, Althea Perkins, Florence Mutzfelt and Edith Oren.

Have your lace curtains washed at the Butler laundry. Done right by a new process. Price 50 cents a pair.

Three of the Butler teachers while at South Bend attending the State Association, were very pleasantly entertained by Mr. and Mrs. Elmer Plank, who are very nicely situated in their new home.

Charles Hanes, who again has charge of the hotel at Cold Springs, Hamilton lake, was in town last week conferring with Lyston Harding about his naptha launch. We understand that Mr. Harding will have Charley run his launch this season.

Our esteemed fellow townsman, John J. Mack, has reconsidered his determination to be a candidate for sheriff, as his business will not permit him to make the canvas. He would have been a strength to the ticket and we regret to learn of his decision in the matter.

The employes of the buggy department of the Butler Co., presented T. A. Hoffman with a handsome gold fountain pen last Thursday in honor of his birthday. It was quite a surprise to Mr. Hoffman as he had forgotten that it was his anniversary until the presentation speech was made. He appreciates the gift very highly.

Willis Dannells, of this township who will ask for the democratic nomination as county treasurer, has strong claims on the party that should be recognized. He pulled off the ticket at one time in order to promote its prospects, and this self sacrifice entitles him to consideration. He will prove a strong candidate beyond question.

Miss Alta Norrigan, of Reading, Mich., was the guest of Mrs. Murch a few days last week.

Mrs. John Steury suffered a stroke of paralysis last Friday, but at this writing is slowly improving.

D. A. Baker the new elevator man will build a creamery in Butler if enough cows are pledged to make it a go.

The Lutheran church will give a Sweetheart Social at the home of A. Beckley in South Butler, Friday evening. Admission 10 cents.

James Wilcox is getting his restaurant ready and will open the same to the public next week. It will be up-to-date in every respect.

Mr. and Mrs. Frank Kiplinger, of Ft. Wayne, were in town a few days this week and attended the Eastern Star lodge Tuesday evening.

In a personal letter from Ike Stiefel we learn that he is feeling good and getting along fine, which pleases his many Butler friends exceedingly.

The new bank building will be erected in the near future. Brick will be secured at Hamilton, and as the atchitect has the designs nearly completed work will soon be commenced.

Miss Franc Potter returned to Hartford, Conn., Saturday, to resume her work (principal of one of the city schools) after a two weeks Easter vacation with her "pater familias," H. A. Potter.

The many friends of J. N. Boyle, are trying to get him to make the race for the democratic nomination for Sheriff. He would make a most excellent candidate and add stren th to the ticket.

Frank P. Seiler is much spoken of for renomination. He has fully shown to the thoughtful taxpayer of the county his ability to manage the financial affairs of the auditor's office to their best interests.

Dr. Harrison purchased the Kinney office building and moved it to the Showalter lot, next to his residence, Tuesday. He will occupy the same as an office building. He is also building an addition to the same.

The marriage of Miss Rosa Levy of Archibold, Ohio, to Mr. Lee Dreyfus of Chicago will take place next Tuesday. The many friends of the bride, who is well known in this city, join in sending congratulations.

Effie Dryden was granted a divorce Monday, from Chas. S. Dryden, the defendant failing to appear when the case was called. The plaintiff was also given the custody of the child, a son three years old.

The astute news gatherer of the Auburn Dispatch, who has evidently been pondering over the subject says, "We have never been able to understand why some women have their skirts made four inches too long, and then hold them sixteen inches too high.

It is stated that Hon. C. G. Conn, the great manufacturer of musical instruments at Elkhart, will put a one ring circus on the road to advertise his factory. One of the important features of the show will be a splendid band equipped with the finest instruments of the manufacturers. It will no doubt be an effective way to advertise.

At a meeting of the county assessors of the state, the following valuations on farm products for the assessments for this year were adopted, to be followed as nearly as possible by the township assessors: Wheat per bushel, 65c; corn, 50c; rye, 55; oats, 35; potatoes, 75; barley, 55; clover seed, $5; timothy seed, $2; flax seed, $1.50; clover hay per ton, $5; timothy $8; wool per pound, 15c.

Perhaps no state in the union can show a cleaner or better printed list of country papers than Indiana. They are attractively made up and are filled chock full of news. The advancement of the rural press in Indiana the past decade has been remarkable and is a credit to the publishers. At the present time not more than a dozen Hoozier papers seem to be made up by a blacksmith and printed with apple butter on cider presses.—Indianapolis Sun.

A VALUABLE MEDICINE

For Coughs and Colds in Children.

"I have not the slightest hesitancy in recommending Chamberlain's Cough Remedy to all who are suffering from coughs or colds," says Chas. M. Cramer, Esq. a well known watch maker of Colombo, Ceylon. "It has been some two years since the City Dispensary first called my attention to this valuable medicine and I have repeatedly used it and it has always been beneficial. It has cured me quickly of all chest colds. It is especially effective for children and seldom takes more than one bottle to cure them of hoarseness. I have persuaded many to try this valuable medicine, and they are all as well pleased as myself over the results." For sale by S. G. Stone, druggist.

COMMANDERY IN ANGOLA.

A dispensation for a commandery of Knights Templar in Angola was granted by the right eminent grand commander of Indiana a few days ago Dr. F. B. Humphreys being named therein eminent commander; Thomas S. Wickwire, of Ashley, as generalissimo, and Harry K. Scott as captain general. At a special meeting of Knights Templar in Masonic hall last evening, steps were taken to perfect the organization and get the commandry into working order. There are about twenty-five Knights Templar in Angola and vicinity. Nineteen petitions for the Knight Templar orders were received and referred to a committee.—Angola Magnet.

A dozen years or so ago he was a roustabout in Fort Wayne, but was industrious and ambitious. Going to England, he there made his way to the front as a genius and mechanic. He has an automobile that has attained a speed of sixty-eight miles an hour and weighs 2,900 pounds.

Painless Childbirth.

Zoa Phora the Only Safe, Sure and Ever Ready Remedy in the Three Danger Periods of Woman's Life.

It Carries Women Safely Through the Terrible Ordeal of Childbirth and Afterwards, Restores the Organs to Strength and Vigor of Health.

TRIAL BOTTLE MAILED FREE.

The stern agony, the awful writhing pain of childbirth is known to every woman who is a mother who did not prepare for the terrible ordeal with Zoa Phora. With the use of Zoa Phora many women testify they find the labor of bearing children very easy, the pain almost nothing, and altogether a different time during confinement and the days preceding it.

MRS. EMMA DODSON, Jerseyville, Ills.

Mrs. Emma Dodson, of Jerseyville, Ills., says: "I have kept Zoa Phora in my house for twenty-one years, using it at monthly periods and preparatory to confinement. Before I used Zoa Phora I was very irregular and suffered terribly whenever I did menstruate, but by using it I became regular, and suffered very little. I have often said I had sooner go through childbirth without an attending physician than do without Zoa Phora previous to confinement. I have been the mother of five children. Before the first two came I had not heard of Zoa Phora, and suffered labor with one fifty hours before delivery. The last three births I used Zoa Phora during each pregnancy and was not in labor over four hours for any of them. I have now passed safely and comfortably through the critical time, called change of life. I suffered very little pain, because I used Zoa Phora. It is the best medicine for painful menstruation I have ever seen, and I have given it to several women, and have never known it to fail."

Zoa Phora has brought the sunshine of health into the home of many a despairing woman. It has made it possible for women to have children who never in the world could have stood the pain and suffering and laceration that must surely have followed the birth of a child in their old condition. The stories of some of the women who now praise this great medicine, Zoa Phora are truly wonderful. They tell of monthly pain and misery suffered for years. They tell of the impossibility of bearing a child for the reason that the organs were not strong enough to carry the child to the end of the time, but would miscarry, greatly endangering the life of the mother. Now they assert they have had children with scarcely a pain and with little inconvenience after the birth was over, few pains and no bad after effect.

Get a dollar bottle of Zoa Phora at the nearest drug store, or the Zoa Phora Co., Kalamazoo, Mich., will send it to you prepaid on receipt of price. It is no experiment as hundreds of grateful women testify daily. The doctor is always glad to answer questions. Do not hesitate to write for information.

We will be glad to send you a large trial bottle free upon receipt of 10c. to cover postage and packing. Address, Zoa Phora Co., Kalamazoo, Mich.

THE PASSING OF THE SPARE CHAMBER.

We have no spare chamber. I have been troubled about it for a long while. Yesterday it occurred to me that the Browns have no spare chamber either, nor the Robinsons, nor the Smiths, and I am more troubled than ever.

The decadence of the spare chamber strikes me deep. It is the concrete difference between past and present. The spare chamber meant a room in the house set apart from common life, dedicated to the higher nature. The family might havt only three chambers—one of these was sacred. The feather bed rose plump and impregnable in its recesses. The green paper shades shut out all but a chink of light, the cane-seat chairs stood stiff against the wall, and clean straw rustled under the taut "store carpet." The stimulous to the imagination alone was worth three times the amount of cubic space the chamber occupied. You tiptoed in. Mother's best bonnet lay on the middle of the bed. Sometimes a hugh loaf of fruit cake sat elegantly in one of the chairs.

There was always something reserved in the days of the spare chamber—fruit-cake and bonnets. People had best clothes. They wore them on spare days. Sunday was a spare day. You knew it was Sunday. Grandfather shaved. (When grandfathers shave every day, what is left for the seventh?) There was a hush about the house. As the day wore on it deepened, the whole farm lay under its warm, sleepy spell—All but the irrepressible hen. The cheerful cackle lingers still, the most irreverent thing in memory. She worked seven days in the week and talked about it. very silence waited to hear and condemn. Amid trolley cars and bicycle bells and children playing and the Salvation Army drum, the cackle dies away into a harmless whisper.

There was spare time then. People made visits—not anxious, crowded, hurried calls, but good old-fashioned visits. The carryall was washed and oiled. Old Flora was carefully combed and brushed by grandfather, and then grandfather was brushed combed by grandmother. Aunt Clara packed the luncheon in a big basket. There was alwas a spare cricket to fit in front for small folkes, with a good view of Flora's haunches going up hill, and the wide sweep of country going down. The journey was leisurely, but full of wild excitements. There were the dangerous railroad crossings, where grandfather always got out rods ahead and walked cautionsly across, looking two ways at once. The rest of us rode boldly over, with a fine feeling of risk. Grandfather used to crack his whip in defiance of danger. There were the covered bridges, too. Old Flora's hoofs echoed on them, and repeated the trampling of armies. The loose boards rattling underneath held the child on the cricket breathless. Times have changed. Now we speed quickly over gaudy open bridges, and the legend, "No faster than a walk," looks grimly down from either end.

We had a spare chamber at first. When the baby came we turned it into a nursery. We cleared out a storeroom for the nurse, and used the little back room for a drying room. Grandmother' when her first baby came, took it into her own bed. When another baby came to crowd it out, there was the trundle-bed that stood under the big bed all day, and rolled out at night with a sleepy rumble. And when more babies still came to crowd the trundle-bed, the first baby, a big boy, six years old now, had a bed made for him at the head of the back stairs, or up in the garret under the sloping eaves. The rain lulled him to sleep, and the snow drifted in sometimes. In the spare chamber the big bed loomed untouched. It hovered in his dreams, a presence not to put by. The snow, the rain, the stars, and the spare chamber made a poet of him. We have no poets now.—Atlantic Monthly.

AN OLD SORE

Will sour the sweetest disposition and transform the most even tempered, lovable nature into a cross-grained and irritable individual.

If impatience or fault-finding are ever excusable it is when the body is tortured by an eating and painful sore. It is truly discouraging to find after months of diligent and faithful use of external remedies that the place remains as defiant, angry and offensive as ever. Every chronic sore, no matter on what part of the body it comes, is an evidence of some previous constitutional or organic trouble, and that the dregs of these diseases remain in the system; or, it may be that some long hidden poison—perhaps Cancer—has come to the surface and begun its destructive work.

The blood must be purified before the sore will fill up with healthy flesh and the skin regains its natural color. It is through the circulation that the acrid, corroding fluids are carried to the sore or ulcer and keep it irritated and inflamed. S. S. S. will purify and invigorate the stagnant blood when all sediment or other hurtful materials are washed out, fresh rich blood is carried to the diseased parts, new tissues form, and the decaying flesh begins to have a healthy and natural look; the discharge ceases and the sore heals.

CHRISTIAN ENDEAVOR STATE CONVENTION.

The Christion Endeavorers of Indiana will hold thesr fifteenth annual convention this year at Indianapolis, June 26-29, in Tomlinson Hall. State conventions of the Union will hereafter be held every two years alternating with the International convention, so an unusually large attendance is expected this year. The state officers are preparing an attrabtive program for the meeting, to embrace all departments of the Christian Endeavor work. Prominent workers of the society will be among the speakers. Half fare rates on the railroads have been secured.

FUNSTON SOMEWHAT OF A NUISANCE.

For one who has done nothing that a clever non-commissioned officer might not have done that young man is suffering from the effects of one of the worst cases of conceit known in the military history or the country. In a few months he has done more talking about the capture of Aguinaldo than Grant did about Vicksburg and Appomattox during all his life, while Napoleon himself never performed the functions of a natural schoolmaster so arrogantly or so confidently. The war in the Philippines is still something of a national burden but it is not half so burdensome as the mushroom heroes that strut across the country and parade their petty achievements.

"I dreaded the change of life which was fast approaching. I noticed Wine of Cardui, and decided to try a bottle. I experienced some relief the first month, so I kept on taking it for three months and now I menstruate with no pain and I shall take it off and on now until I have passed the climax."

Female weakness, disordered menses, falling of the womb and ovarian troubles do not wear off. They follow a woman to the change of life. Do not wait but take Wine of Cardui now and avoid the trouble. Wine of Cardui never fails to benefit a suffering woman of any age. Wine of Cardui relieved Mrs. Webb when she was in danger. When you come to the change of life Mrs. Webb's letter will mean more to you than it does now. But you may now avoid the suffering she endured. Druggists sell $1 bottles of Wine of Cardui.

A farm of about 80 acres very close to town nothing better in the state.—Webster & Wartenbe.

A number of people who formerly got their mail at this point have been benefitted by the rural route out of Waterloo.

The filling of mortgage exemptions began April 1 and will continue until May 1, the law having been declared constitutional by the supreme court.

In a number of Indiana counties the idea of independent county councils has been abandoned, the parties holding conventions almost invariably placing full tickets in the field.

Having been nominated for president for three different terms, Mr. Cleveland feels that he can overlook the criticisms of Col. Bryan, who has only two nominations to his credit.

Under date of April 1, Ware & Leland, commission merchants of Chicago, issue a bulletin on the wheat crop, based upon reports from 5,000 townships, which is rather encouraging. The percentage of condition in Indiana is 87 and in other states it ranges from 74 to 92.

A man asked us the other day if we ever got the blues. It was such a funny question that it set us to thinking. We wondered if there was anybody who did not get the blues. We know only two persons who never get the blues. One is a book agent and the other works up lodges.

As a result of the wreck on the Wabash, at Seneca, Lenawee county, Michigan, last fall, suits for damages aggregating $40,000 have been begun in the supreme court at Chicago against the railroad company by the administrator of the estates of eight of the Italians who were killed in the wreck.

A country school teacher boxed the ears of one of his pupils a few days ago. The boy told his mother and the next day the teacher received the following note: "Nature has provided a proper place for the punishment of the boy, and it is not on his ear. I will thank you to use it hereafter."

A woman in this town baked some cake and forgot to put sugar into it. That day her husband brought company for dinner, and she was so chagrined she did not know what to do about it. When the stranger was gone she told her husband what she thought of him for bringing company, but as the doors were shut nobody heard what she said. All he said was that he could not tell when she was going to forget to sweeten the cake.

A woman in this town was in the habit of making her husband's shirts. Being somewhat particular, he always kicked on the fit. He said the shirts never felt comfortable and he objected so much that presently she told him, "All right, you can get your shirts made and pay for the work." It was agreed that he would pay for the making. He told his wife to get some good seamstress to make his shirts. She pretended to do so, and ever since she makes his shirts, unknown to him, and charges him twenty-five cents apiece. He likes the fit so well that he compliments the woman who makes them and he has not complained about the fit since the new arrangement. Which shows that most men do not appreciate anything that comes too cheap.

DREADFUL ATTACK OF WHOOPING COUGH.

Mrs. Ellen Harlison, of 300 Park Ave., Kansas City, Mo., writes as follows: "Our two children had a severe attack of whooping cough, one of them in the paroxysm of coughing would often faint and bleed at the nose. We tried everything we heard of without getting relief. We then called in our family doctor who prescribed Foley's Honey and Tar. With the very first dose they began to improve and we feel that it has saved their lives." Refuse substitutes. Sold by Geddes & Harding.

YOU GET YOUR MONEY BACK.

We, the undersigned druggists hereby agree to refund the money, if after using one box of Dr. Stone's New Dyspepsia Cure it has failed to give satisfactory results: Cures Dyspepsia, Indigestion, Sour Stomach, Heart Burn, and Loss of Appetite.—Geddes & Harding, C. F. Phillips.

NOW LOOK OUT!

"Take care of yourself," say our friends. "I'll try to," we answer. We do take a little care, yet in spite of warm clothes, rubbers and mackintoshes, an army of people were bowled out by pneumonia and other lung and chest diseases last winter. They caught cold, neglected it, let it fix upon them, were torn by coughs, choked by inflammations and congestions, wasted by fever, tired out by pain and then gave up the fight. The hour you realize that you have a cold on the chest, place a Benson's Porous Plaster where the pain or oppression is felt. If you think two are needed make it two. No harm if you were covered with them. They act quickly and prevent the engorgment of blood in the organs. In this way—with ordinary caution as to exposure—you will break up the cold and avoid a serious sickness. No other applications, or any other form of treatment, will accomplish this as certainly and speedily. Benson's Plasters have a distinct and positive action and are curative to the highest degree. Use them with the same confidence for coughs, muscular rheumatism, the grip (back and chest) and all similar ailments. Women, who are chief sufferers from cold weather complaints, should keep these plasters always within reach. Get the genuine. All druggists, or we will prepay postage on any number ordered in the United States on receipt of 25c. each. Seabury & Johnson, Mfg. Chemists, N. Y.

A DOCTOR'S BAD PLIGHT.

"Two years ago, as a result of a severe cold, I lost my voice," writes Dr. M. L. Scarbrough, of Hebron, Ohio, "then began an obstinate cough. Every remedy known to me as a practicing physician for 35 years failed, and I daily grew worse. Being urged to try Dr. King's New Discovery for Consumption, Coughs and Colds' I found quick relief, and for last ten days have felt better than for two years." Positively guaranteed for Throat and Lung troubles by S. G. Stone. 50c and $1.00. Trial bottles free.

Next to a physician, the newspaper man has more "secrets" tied up and stored away "by request," than any other man in town. What an upheaval there would be in Butler if the newspapers would publish those secrets and not vary from the truth!
